Chapter 5

Using the Communication and Internet Functions

Using the Communication and Internet Functions

The various functions that are available in Communication mode include not only direct upload and mail upload, but receiving mail and uploading HTML file. This section explains how to use these functions.

Types of Functions

There are three types of communication and Internet functions, as shown below. Refer to the table below to choose the function best suited to your purpose. Details of each function are given later.

	Internet		**Communication**
Function	**E-Mail**	**FTP Upload**	**Direct Upload**
Type of Function	Upload/ Download	Upload	Upload
Files that can be sent	Still image file Text file Voice memo file Motion picture file Related file*1	HTML file*2 + embedded image file*3	Still image file Text file Voice memo file Motion picture file Related file*1

*1 Refers to the voice memo (.WAV) files.

*2 Refers to the HTML file created by this camera

*3 Refers to the still image, voice memo and motion picture files excluding related files.

Important Note
• Before using the various functions, check that the communication settings have been made and that the communication equipment is correctly connected to the camera.
→ P.17 "Setting the Communication Function" and P.55 "Connecting Communication Equipment"

Using E-Mail

This section explains how to upload and download e-mail.

Displaying the E-mail Menu

❶ **Set the mode dial to [✉]
(Communication mode).**
The communication menu will be displayed.

❷ **Select [E-MAIL] and then press the ▶
button.**

COMMUNICATION
E-MAIL
DIRECT UPLOAD

SELECT
The e-mail menu will be displayed.
Choose a function from this menu and
upload or download mail. Details are given in
the next section.

SELECT MENU
SEND
RECEIVE
INBOX
OUTBOX

END   SELECT
CANCEL

- "Composing Mail" → P.84
- "Sending Mail" → P.86
- "Checking Incoming Mail" → P.87
- "Replying to and Forwarding Mail" → P.91
- "Resending Mail" → P.92

5 Using the Communication and Internet Functions
Composing Mail

You can compose new messages.

❶ Select [SEND] on the mail menu and press the ⊙ button.
The mail setting screen will be displayed.

❷ Select [TO:] and press the ⊙ button to set an address.

Set [CC:] if necessary.

> **See** • P.75 "Selecting an Address Using the Address Book"

```
E-MAIL
  TO:
                          ⊙
  CC:
                          ⊙
  TITLE
                          ⊙
▼
      CANCEL    SAVE     OK
1/2   CANCEL   FUNCTION  ENTER
```

❸ Select [TITLE] and press the ⊙ button to set a title.

> **See** • P.76 "Setting Titles Using Preset Memos"

❹ Press the ⊙ button to display the next screen.

❺ Select [MESSAGE] and press the ⊙ button to enter a message.

> **See** • P.76 "Setting Messages Using Preset Memos"

```
MESSAGE

  CANCEL             OK
  CANCEL   FUNCTION  ENTER
```

Note • You can attach files to mail. → P.85 "Selecting Files to Attach"
- An mail message that you are still composing will be saved in the outbox as a draft without being uploaded. You can edit and send the draft later. → P.92 "Resending Mail"
- When you save a draft mail including an attachment, the attachment will not be saved in the memory.

Composing is now completed.
■ **Selecting Files to Attach**

Select the file to be uploaded when sending an image file as an attachment.

A **Check that the image to be uploaded is stored in the internal memory (IN).**

> **Important Note** • While communication is in progress, the card slot will be occupied with the communication CF card, so that you cannot upload images recorded on the CF card. Record (or copy) images onto the internal memory when uploading them.

B **Select [SEND FILE] on the e-mail screen and press the ▶ button.**

```
E-MAIL
▲ MESSAGE
                                    ○
  SEND FILE
  RIMG0002.JPG                      ○
  CHANGE SIZE
                                    ○
      CANCEL      SAVE        OK
2/2   CANCEL    FUNCTION    ENTER
```

C **Choose a file to be attached.**

● **Adding an Attachment**

Press the ▶ button and select the folder in which the file you want to choose is stored. Choose the file you want to add from [FILE] and then press the FUNCTION button. The image file that has been selected to be uploaded is marked with a green ■ next to the file name. You can select more files by repeating this procedure.

```

    CANCEL    SELECT      OK
    CANCEL   FUNCTION    ENTER
```

● **Deleting an Attachment**

Choose the file you want to delete from [FILE] and then press the FUNCTION button to turn the ■ next to the file name to gray.

> **Note** • If you choose a file from [FILE], a thumbnail display will appear on the right side. Add more files while checking this thumbnail display.

> **See** • P.64 "Approximate Number of Images to be Sent"

D **Press the ENTER button.**

Setting is completed and the display will return to the original screen.

5

Using the Communication and Internet Functions

85

Sending Mail

This function enables you to send the message you have composed. Before uploading the mail, check once more for mistakes in the address or message.

❶ Select an image size if necessary.

See • P.45 "Setting an Image Size"

❷ Press the ENTER button.

Note • To temporarily save an mail message that you are still composing, press the FUNCTION button. The mail will be saved in the outbox as a draft without being uploaded. You can edit and send the draft later. → P.92 "Resending Mail"

❸ To change the dial-up account, select [DIAL-UP ACCOUNT] and press the ▶ button.

See • P.44 "Selecting a Dial-Up Account"

Note • The expected sending time shown on this screen is approximate. The actual sending time varies depending on how the telephone line or server works.
• On a LAN connection, [LAN] will be displayed in [DIAL-UP ACCOUNT].

```
DIRECT UPLOAD
SENDING DATA SIZE

testnet.Tokyo        ▶
       CANCEL      SEND
       CANCEL      ENTER
```

Important Note • When the file size exceeds the memory size for processing the file, error message will be displayed. Remedy it referring to the list of troubleshooting. → P.113 "Troubleshooting"

❹ Press the ENTER button.
A connection will be established to the Internet and the mail will be sent.

Note • On a LAN connection, this screen is not displayed.
• If there is any incoming mail, it will be downloaded automatically.
→ P.87 "Checking Incoming Mail"

```
🕐 Connecting...

       CANCEL
       CANCEL
```
When uploading and downloading of mail is completed, the connection will be terminated automatically and the display will return to the e-mail menu.

◇Note〉• Outgoing mail is saved in the outbox. You can send this mail again if you wish. Mail that failed to be sent will be saved in the outbox as well. You can send this mail later.→ P.92 "Resending Mail"

Checking Incoming Mail (INBOX)

This section explains how to download mail and check incoming mail.

■ Checking Incoming Mail

Normally any incoming mail is automatically downloaded when mail is uploaded. This function enables you to check any mail that has been downloaded.

❶ **Select [INBOX] on the mail menu and press the ▶ button.**

A list of incoming mails will be displayed.

SELECT MENU
SEND
RECEIVE
INBOX
OUTBOX
END   SELECT
CANCEL   ○
❷ **Check the incoming mail from the mail list of received mail.**

● **Unread mail**

Unread mail is indicated by green ■.

● **Read Mail**

Mail that has already been read is indicated by □.

● **Mail with an Attachment**

Mail with an attachment is indicated by the ⬚ mark.

MAIL LIST
⬚ xxx@xxx.co.jp   17:13
  xxx@xxx.co.jp   17:13
  xxx@xxx.com   17:13

END   CONFIRM   OK
CANCEL   ○   ENTER

◇Note〉• On the right of each line, the sending date of the mail will be displayed. When you receive the mail on the same day the mail is sent on, the receiving time will be displayed instead.
• To delete mail, choose the message you want to erase from the [MAIL LIST] and press the 🗑 button.
5

Using the Communication and Internet Functions

87

❸ Choose a mail you want to check from the mail list and press the ▶ button.

The mail content will be displayed.

❹ Press the ▼ button and display the next screen.

```
OPEN MAIL
 FROM
 xxx@xxx.co.jp
 TITLE
 Landscape
 ATTACHMENT
▼RIMG0016.JPG          ▶
                       OK
1/2                  ENTER
```

❺ Select [MESSAGE] and press the ▶ button.

```
OPEN MAIL
▲MESSAGE
 Please find the attached▶

                       OK
2/2                  ENTER
```

❻ Using the ▲ or ▼ button, check the mail message.

⟨Note⟩ • When you receive an HTML file, a part of the mail message will be received as an attachment.

```
MESSAGE
 Please find the attach
 ed file.

                       OK
                     ENTER
```

❼ When checking the mail message is complete, press the ENTER button.

❽ Press the ENTER button again.

The display will return to the mail list screen.

88

■ Checking Mail After Downloading

This function enables you to download mail.

> **Note** • Mails of size exceeding 'Maximum Mail Size to be Downloaded' will be rejected. → P.33 "Setting the Mail Environment"

❶ Select [RECEIVE] on the e-mail menu and press the ▶ button.

❷ Check the dial-up account and press the ENTER button.

> **Note** • This screen will not be displayed for a LAN connection.

```
TELEPHONE NUMBER
  xxx-xxxx-xxxx
DIAL-UP ACCOUNT
  testnet.Tokyo
  net.NET

     CANCEL            OK
     CANCEL            ENTER
```

The mail will be downloaded.
When downloading is complete, the display will return either to the mail list when more mails come in or to the e-mail menu when there is no more mail to be downloaded.

Check the incoming mail in the same way as in steps ❷ and ❸ for "Checking Incoming Mail" (P.87).

■ Saving Attachment Files

When you received a mail which has an attachment file such as an image file, this function enables you to save the attachment file to the storage memory (internal memory, card) of the camera. The saved file can be checked in Play mode.

❶ Display the received mail.
The content of the mail will be displayed.

> **See** • P.87 "Checking Incoming Mail"

```
OPEN MAIL
  FROM
  xxx@xxx.co.jp
  TITLE
  Landscape
  ATTACHMENT
▼ RIMG0016.JPG        ▶
                      OK
1/2                   ENTER
```

5

Using the Communication and Internet Functions

89

❷ Select [ATTACH] and press the ▶ button.

A list of attachments will be displayed.

> **Note** • Choose a file from the list and its thumbnail image will be displayed on the right side of the file name.

❸ Choose a file to save and press the FUNCTION button.
❹ Press the ENTER button.
The screen for selecting the destination will be displayed.

❺ Choose the destination and press the ENTER button.
The attachment file will be saved.

❻ Press the ENTER button.
The screen will return to the screen of step ❶.

> **Important Note** • When the communication card is set in the card slot, attachment files cannot be saved in the card.

> **Note** • The attachment file will be saved in the [(3-digit number)DOWNL] (example: 101DOWNL). The following unique numbering will be used for each type of files recorded in this camera:
> Voice memo file: RSOU0001 ~ RSOU9999
> Motion picture file: RMOV0001 ~ RMOV9999
> Image and the other files: RIMG0001 ~ RIMG 9999
> • When you set the SEQUENTIAL NO. to ON, the numbering format "R0010001 ~ R9999999" will be used.
> • When the mail has a related file, it will be saved as a separate file in the memory.
> • Details of files recordable on this camera are given in "Files Playable on the Camera" in the 'Camera' operation manual.

Replying to and Forwarding Mail

This section explains how to reply to or forward mail that you have received.

❶ Select [INBOX] in the e-mail menu and press the ▶ button.

The received mails will be displayed.

```
MAIL LIST
  xxx@xxx.co.jp    17:13
  xxx@xxx.co.jp    17:13
  xxx@xxx.com      17:13

    END    CONFIRM    OK
    CANCEL    ●    ENTER
```

❷ Choose the desired mail to be replied or forwarded and then press the ENTER button.

The reply submenu will be displayed.

❸ Select the reply method and then press the ENTER button.

```
SELECT MENU
  REPLY ALL
  REPLY
  FORWARD
  ADD TO ADDRESS BOOK

    CANCEL        OK
    CANCEL      ENTER
```

● **REPLY ALL**

A reply will be sent to the person who sent the mail and all persons specified in CC:.
● **REPLY**

A reply will be sent only to the person who sent the mail.

● **FORWARD**

The mail will be forwarded to the specified address.

● **ADD TO ADDRESS BOOK**

The address of the sender will be registered in the address book.

> **Tips** **Reply and Forward**
>
> Reply is used when you want to reply to someone who sent you a message. The form generally used is adding comments to the received mail.
>
> Forward is used when you want to send a received message as it is to someone other than the person who sent it. You can also add comments to received mail.
Using the Communication and Internet Functions

A mail to be replied will be created and displayed.

● **REPLY**

The Send to address will be applied
automatically to [TO:].
[RE:] will be added at the beginning of the
[TITLE] field.
[>] will be added at the beginning of each line
in the [MESSAGE] field.

● **FORWARD**

[FW:] will be added at the beginning of the
[TITLE] field.

**④ If necessary, change the title or
message.**

**⑤ Press the ENTER button to send the
mail.**

See • P.86 "Sending Mail"

Resending Mail (OUTBOX)

Mail waiting to be sent or mail that has already been sent and drafts are saved
in the outbox. This section explains how to send or resend such mail.

■ Confirming Send Mail

You can check the mail message saved in the OUTBOX. The OUTBOX screen
is used for viewing the message, not for editing it.

**① Select [OUTBOX] on the e-mail menu
and press the ▶ button.**

A list of sent mail will be displayed.
❷ Check the mail message on the SENT MAIL LIST screen.

● **Mail that is waiting to be sent**
Unsent mails due to the transmission error will be marked by the red ■.

● **Mail that has already been sent**
Marked by the white □.

● **Draft**
Marked by the green ■.

● **Mail with an attachment**
Marked by 🗋.

      CANCEL
      CANCEL
```

When uploading is finished, the connection will be automatically terminated and the screen will return to the communication menu.

See • P.72 "Uploading an Image"
Uploading an HTML File

This section explains how to create the HTML file and upload it to the home page. Follow the following procedure.

Sending the HTML Template from a PC to the Camera

Import the HTML templates in the CD-ROM supplied to the camera.

See • P.100 "Transferring the HTML Template Files from a PC to the Camera"

Creating/Saving the HTML File

Use the HTML templates in the camera to create and save the HTML file.

See • P.102 "Creating an HTML File"

Uploading the HTML File

Upload the created HTML file

See • P.105 "Uploading an HTML File"

Checking the Uploaded HTML File on a PC

Check the uploaded HTML file with the Web browser installed in the camera.

When you want to check the HTML templates and send them to the camera

Browsing the HTML Templates on a PC

By using the computer, you can check the HTML templates saved in the internal memory of the camera.

See • P.107 "Displaying the List of the HTML Template Files"
• P.109 "Checking the HTML Template Files"
• P.110 "Deleting the HTML Template Files"

HTML Template

By creating the HTML template file, you can upload the recorded images to the Web page. Create the HTML file from the HTML template file.

The following HTML templates with no images embedded are included in the CD-ROM provided with this camera. You can transfer these template files to the camera and create the HTML files.

Example using template 1

Example using template 2

Tips

Creating/Using a New Template File

The HTML template files are included in the CD-ROM supplied. However, you can create a new template file and edit it as well.

When creating a new HTML template file or editing the current template, you need to understand the Hypertext Markup Language (HTML) with which the Web page will be created.
Use the HTML-authoring software to improve the efficiency of editing the HTML files.

Read the Readme file found in [html] folder in [Templates] folder included the CD-ROM to know how to create the HTML file and understand the special commands.
Follow the procedure on page 100, "Transferring the HTML Template Files From a PC to the Camera" to create the HTML template files and transfer them to the camera.

5

Using the Communication and Internet Functions

99

Transferring the HTML Template Files from a PC to the Camera

This function allows you to read the HTML template files supplied with the CD-ROM and transfer them to the camera.

❶ **Check that the camera and PC are properly connected, that the camera and the PC are turned on, and that the camera's mode dial is set to [⤳].**

⟨Note⟩ • Configure the PC to use the HTML template files on a PC. Instructions for using the PC with the HTML template files are given in Chapter 1 "Getting Started" in 'Connecting to a Personal Computer' operation manual.

❷ **Insert the CD-ROM into the CD-ROM drive of the PC.**

❸ **Start up the browser by the PC, input the IP address and display the camera's homepage.**

⟨See⟩ • "Opening the Camera's Homepage on the Browser" in the 'Connecting to a Personal Computer' operation manual

❹ **Click on [JOB NAVI. FUNC. SETTINGS].**

The list of the Guide lists will be displayed.

❺ **Click on [HTML TEMPLATE].**

❻ Choose the storage media.

Click on [IN] or [CF CARD].
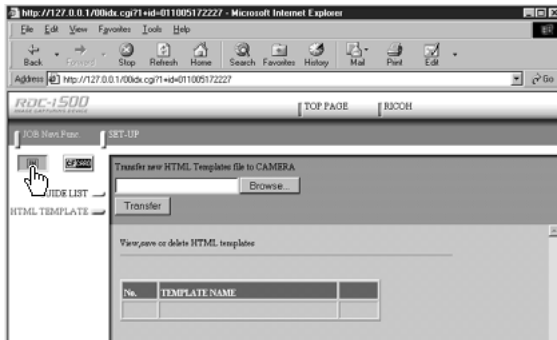

❼ Click on [Browse...].

The dialog box will be displayed to select the HTML template file.

❽ Specify the folder including the files you want to paste and select the file and click on [Open].

The HTML template files are found in the [html] folder in the [Template] folder of the CD-ROM supplied.

❾ Click on [Transfer].
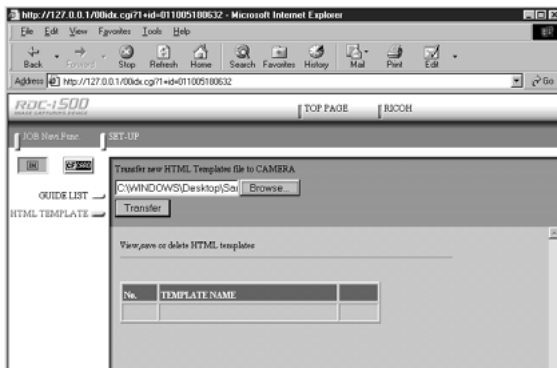

The selected HTML template file will be transferred to the camera.
To transfer more HTML files, repeat Steps ❼ to ❾.
Creating an HTML File

Embed a recorded image file in an HTML template to create an HTML file. You can then upload the resultant file to a Web page directly.

Important Note • The card slot will be occupied with the communication CF card. You can not upload the HTML file stored in the CF card.
When creating an HTML file, be sure to do so by storing (copying) both the HTML file and embedded images in the internal memory, because the embedded images will be stored in the same storage memory as the HTML file.

❶ **Set the mode dial to [▶].**

❷ **Press the CARD/IN button to select the source memory (CF CARD/IN) where the file to be embedded is stored.**

Note • When the communication CF card is set in the card slot, selecting the source memory is not available.

❸ **Press the [FOLDER] button to select a folder in which images are recorded.**

See • "Selecting a Folder" in the 'Camera' operation manual
❹ Display the file to be embedded in an HTML file and turn its check box ☐ to green ▣.

To select more files, change the file and repeat this procedure.

● **Thumbnail display**

Turn the check box ☐ of the image file to green ▣. You can select multiple files.

⟨Note⟩ • When the check box ☐ is not checked, the current file displayed in the single image display mode is to be embedded or the selected files in thumbnail display mode is to be embedded.
❺ Press the J button.

❻ Select [NEW HTML FILE] and press the ▶ button.

⟨Note⟩ • Select [NEW + FTP UPLOAD] to be uploaded HTML files immediately upon creation.
• [NEW + FTP UPLOAD] can not be selected when CF CARD has been selected in step ❷.

HTML FILE CREATION
NEW HTML FILE
NEW HTML + FTP UPLOAD

Using the Communication and Internet Functions

103

⟨Note⟩ • When [NEW + FTP UPLOAD] has been selected in step ❻, and creating an HTML file is complete, uploading the HTML file will be soon started. When uploading is completed, the HTML file will be deleted, and the display will return to the screen of step ❻.
❾ **When you have finished creating the HTML file, press the CANCEL button.**
The display will return to the normal playback screen.
Deleting an HTML File

You can delete HTML files when they are no longer needed.

❶ **Set the model dial to [▶].**

❷ **Press the J button.**

❸ **Select [DELETE HTML FILE] and press the ▶ button.**

```
HTML FILE CREATION
 NEW HTML FILE
 NEW HTML+ FTP UPLOAD
 FTP UPLOAD
 DELETE HTML FILE

      END      SELECT
     CANCEL       ▶
```

❹ **Select the HTML file you want to delete and press the ENTER button.**
A deletion confirmation message will be displayed.

```
SELECT HTML FILE        IN
TITLE
  templete1
FILE
  100RHTML.HTM
  101RHTML.HTM

    CANCEL            OK
    CANCEL          ENTER
```

❺ **Press the shutter release button.**
The HTML file selected will be deleted and the display will return to the screen of step ❹.

```
  ⚠ Delete this HTML file?

    CANCEL            OK
    CANCEL          RELEASE
```
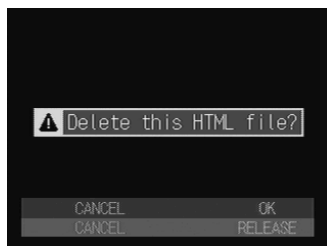

❻ **When deleting is completed, press the CANCEL button.**
The display will return to the screen for selecting the storage memory.

❼ **Press the CANCEL button again.**
The display will return to the normal playback screen.

Uploading an HTML File

You can upload the HTML file created in this camera. Select the file to be uploaded first.

❶ **Check that the communication settings are properly made and the proper equipment is connected the camera.**

See • P.17 "Setting Communication Function", P.55 "Connecting Communication Equipment"

❷ **Check that the HTML file to be uploaded is saved in the internal memory (IN).**

Important Note • While communication is in progress, the card slot is occupied with the communication CF card, so that you can not upload the HTML file recorded in the CF card. Be sure to create the HTML file in the internal memory.

❸ **Set the mode dial to [▶].**

❹ **Press the J button.**

❺ **Select [FTP UPLOAD] and press the ▶ button.**

JOB Navi.
NEW HTML FILE
NEW HTML + FTP UPLOAD
FTP UPLOAD
DELETE HTML FILE
END   SELECT
CANCEL   ●

❻ **Choose the desired file to be uploaded and press the ENTER button.**

One file can be selected.

SELECT HTML FILE   IN
TITLE
templete1
FILE
100RHTML.HTM
101RHTML.HTM
CANCEL   OK
CANCEL   ENTER

Note • When you create the HTML file, the file will be created and be identified by names such as [(3-digit number) RHTML.HTM] (example: 100RHTML.HTM, 101RHTML.HTM). The latest file will be displayed at the bottom of the list.

Using the Communication and Internet Functions

105
❼ Check the upload destination and press the ENTER button.

> **See** • P.17 "Setting Communication Function"

```
FTP UPLOAD SETTING
FTP SERVER ADDRESS
ftp.testnet.ne.jp
DESTINATION FOLDER
/xxxx

         CANCEL            OK
         CANCEL            ENTER
```
❽ To change the dial-up account, select [DIAL-UP ACCOUNT] and press the ▶ button.

> **See** • P.44 "Selecting a Dial-Up Account"

> **Note** • The expected sending time shown on this screen is approximate. The actual sending time varies depending on how the telephone line or server works.

```
FTP UPLOAD
SENDING DATA SIZE
181625 BYTE
EXPECTED SENDING TIME
2MIN 10SEC
DIAL-UP ACCOUNT
testnet.Tokyo            ◯
         CANCEL            OK
         CANCEL            ENTER
```

   • On a LAN connection, [LAN] will be displayed in [DIAL-UP ACCOUNT].

❾ Press the ENTER button.

A connection will be established and the HTML file and the embedded images will be uploaded.

> **Note** • Press the CANCEL button to cancel the connection.
   • On a LAN connection, this screen is not displayed.

When uploading is finished, the connection can be automatically terminated and the screen will return to the screen of step ❻.

> **Note** • When uploading has been completed normally, new mail for which the URL (address showing the location of the file) has been recorded will be composed and saved as a draft. To check this mail, see "Resending Mail" (P.92).

> Subject: FTP Upload xxx.HTM
> Message: (URL for FTP upload)

   • When you set the Homepage URL for FTP upload, the URL will be recorded in the HTML file. → P.50 "Setting FTP Upload/Homepage URL"
   • You can check the uploaded HTML file using a PC Web browser.

106

Viewing the HTML Templates on a PC

This section explains how to display the list of the HTML templates on a PC and how to delete them.

■ Displaying the List of the HTML Template Files

You can display the list of the HTML template files stored in the internal memory of the camera.

❶ Check that the camera and PC are properly connected, that the camera and the PC are turned on, and that the camera's mode dial is set to [⤳].

Note • Chapter 1 "Getting Started" in 'Connecting to a Personal Computer' operation manual.

❷ Start up the browser by the PC, input the IP address and display the camera's homepage.

See • "Opening the Camera Homepage on the Browser" in the 'Connecting to a Personal Computer' operation manual

❸ Click on [JOB NAVI. FUNC. SETTINGS].

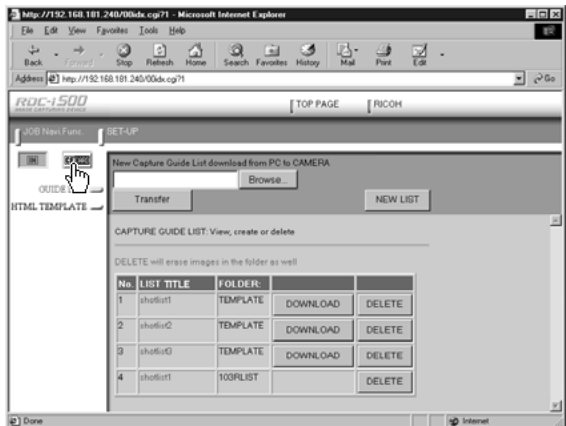

The Guide Lists will be displayed.
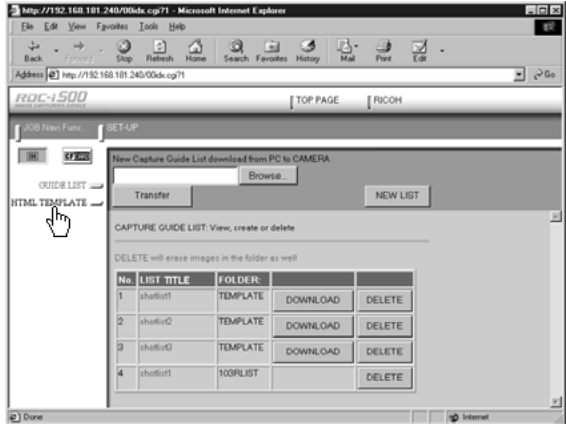

5

Using the Communication and Internet Functions

❹ Click on [HTML TEMPLATE].

The list of the HTML templates stored in the internal memory of the camera will be displayed.

❺ If you want to display the HTML template files stored in CF card, click on [CF CARD].
The list of the HTML template files in the selected memory will be displayed.

Instructions for selecting the functions on this window are given in the following pages.

■ **Checking the HTML Template Files**

You can check the HTML template files stored in the storage memory.

❶ Display the list of the HTML template files you want to check.

◆ **See** • P.107 "Displaying the List of the HTML Template Files"

❷ Click on the name of the HTML template file you want to check.
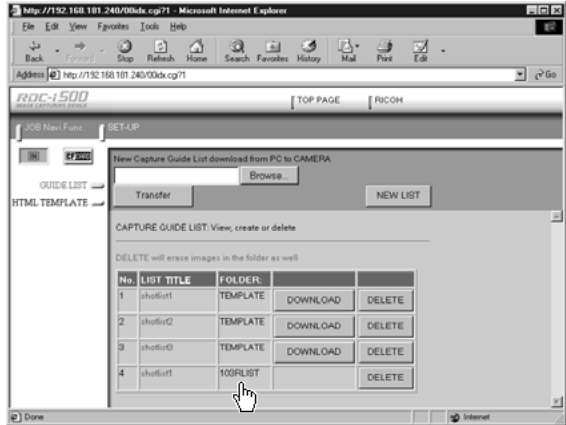

The contents of the template file will be displayed.
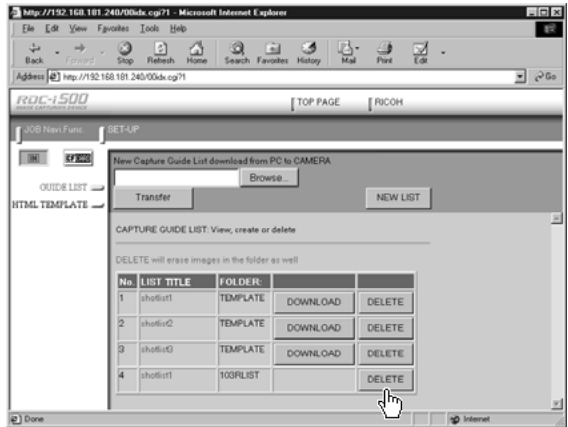

109

■ **Deleting the HTML Template Files**

You can delete the HTML template files stored in the storage memory.

❶ **Display the list of the template files you want to delete.**

　See • P.107 "Displaying the List of the HTML Template Files"

❷ **Click on [DELETE] for the HTML template file you want to delete.**

The deletion confirmation message will be displayed. Click [OK].
The HTML template file will be deleted.
