

How to use PENTAX Tethered Capture Plug-in for Adobe® Photoshop® Lightroom® via IMAGE Transmitter 2

[How to confirm plug-in registration]

When completed the installation, please confirm that if “PENTAX Tether Plugin IT2” is registered at the Menu of the Adobe® Photoshop® Lightroom® file → Plug-in Manager, in case of “Disable” is appeared even it is registered correctly, turn to “Enable” at the Plug-in manager.

In case of the conventional [Simple Version] is installed, following two plug-in are displayed at the Plug-in Manager and either one of them is usable.

“PENTAX Tether Plugin“

“PENTAX Tether Plugin IT2“

If you would like to change the plug-in, turn to “Enable” for that plug-in at the Plug-in manager, and re-start Adobe® Photoshop® Lightroom®.

[How to use]

1. At the SETTING menu 2 of the camera, select [PTP] of USB connection.
2. Connect the camera to the PC with USB cable, and turn the camera ON.
3. Start up the [Adobe® Photoshop® Lightroom®], and also start up the menu of the Tethered Capture → [Start Tethered Capture].

The [PENTAX IMAGE Transmitter 2] is automatically started.

Operate [PENTAX IMAGE Transmitter 2] for various Tethered Capture functions.

Captured images are saved into the [Adobe® Photoshop® Lightroom®].

When close down the Tether Capture function of [Adobe® Photoshop® Lightroom®], the [PENTAX IMAGE Transmitter 2] is also close down automatically.

[Notes]

1. Please update the camera firmware for latest version.
2. Please confirm version of OS if it is corresponded with software.
3. The USB connection mode of camera should be selected with PTP
4. Confirm that PENTAX Tethered Capture Plug-in is set for [Enable] at the [Plug-in manager] of Lightroom®.
5. You cannot use the [Cooperated function of the Digital Camera Utility] of the [PENTAX IMAGE Transmitter 2] at the same time.
6. You cannot use function of tethered capture mode of the [Adobe® Photoshop® Lightroom®], such as the Aperture display or Shutter button.
7. For Mac OS, we strongly recommend that set the OS setting as below for steady Tether capturing.

- (1) Set the Sleep mode of both PC and Display to [No] at the System Preferences setting → Energy saver.
- (2) Set the [Screen Saver] to [Never] at the System Preferences setting → Desktop & Screen Saver,
- (3) Apply at [Prevent App Nap] at the [New Finder] → [Application] → Adobe Photoshop Lightroom® → [Get Info].

8. When you use this plug-in, please specify [Save Destination folder] of the [PENTAX IMAGE Transmitter 2] for other than [Watched folders] nor [Application folder] and so on which are specified at the [Auto Import Setting] of the [Adobe® Photoshop® Lightroom®].

The image file that saved in the [Save Destination folder] of the [PENTAX IMAGE Transmitter 2] is handling as the temporarily file by the specification of image import of the [Adobe® Photoshop® Lightroom®] and it will be automatically deleted when the image is saved in the Lightroom® properly.
