To ensure the best performance from your camera, please read the Operating Manual before using the camera.
Thank you for purchasing this PENTAX Digital Camera. Please read this manual before using the camera in order to get the most out of all the features and functions. Keep this manual safe, as it can be a valuable tool in helping you to understand all the camera’s capabilities.

This operating manual applies to Optio RZ18 and Optio RX18. The illustrations used in this manual are those of Optio RZ18.

**Regarding copyrights**

Images taken with the PENTAX Digital Camera that are for anything other than personal enjoyment cannot be used without permission according to the rights as specified in the Copyright Act. Please take care, as there are cases where limitations are placed on taking pictures even for personal enjoyment during demonstrations, performances or of items on display. Images taken with the purpose of obtaining copyrights also cannot be used outside the scope of use of the copyright as laid out in the Copyright Act, and care should be taken here also.

**Regarding trademarks**

- SDXC Logo is a trademark of SD-3C, LLC.
- ArcSoft, and its logo are either the registered trademark or trademark of ArcSoft Inc. in the United States and/or other countries.
- Microsoft and Windows are registered trademarks of Microsoft Corporation in the United States and other countries. Windows Vista is either a registered trademark or trademark of Microsoft Corporation in the United States and/or other countries.
- Macintosh and Mac OS are trademarks of Apple Inc., registered in the U.S. and other countries.
- This product supports PRINT Image Matching III. PRINT Image Matching enabled digital still cameras, printers and software help photographers to produce images more faithful to their intentions. Some functions are not available on printers that are not PRINT Image Matching III compliant. Copyright 2001 Seiko Epson Corporation. All Rights Reserved. PRINT Image Matching is a trademark of Seiko Epson Corporation. The PRINT Image Matching logo is a trademark of Seiko Epson Corporation.
- Eye-Fi, the Eye-Fi logo and Eye-Fi connected are trademarks of Eye-Fi, Inc.
- All other brands or product names are trademarks or registered trademarks of their respective companies. In this manual, the ™ and ® marks are not specified.

**Regarding Product Registration**

In order to better serve you, we request that you complete the product registration, which can be found on the CD-ROM supplied with the camera or the PENTAX website. Thank you for your cooperation. Refer to “Connecting to a Computer” (p.209) for more information.
To users of this camera

• Do not use or store this device in the vicinity of equipment that generates strong electromagnetic radiation or magnetic fields. Strong static charges or the magnetic fields produced by equipment such as radio transmitters could interfere with the monitor, damage the stored data, or affect the product’s internal circuitry and cause camera misoperation.
• The liquid crystal panel used for the display is manufactured using extremely high precision technology. Although the level of functioning pixels is 99.99% or better, you should be aware that 0.01% or fewer of the pixels may not illuminate or may illuminate when they should not. However, this has no effect on the recorded image.
• If you point the camera toward an object that is bright, a band of light may appear on the screen display. This phenomenon is referred to as “smear” and is not a malfunction of the camera.
• There is a possibility that the illustrations and the display screen in this manual are different from the actual product.
• In this manual, SD Memory Cards, SDHC Memory Cards and SDXC Memory Cards are referred to as SD Memory Cards.
• In this manual, the generic term “computer(s)” refers to either a Windows PC or a Macintosh hereafter.
• In this manual, the term “battery(ies)” refers to any type of batteries used for this camera and its accessories.

Using Your Camera Safely

We have paid close attention to the safety of this product. When using this product, we request your special attention regarding items marked with the following symbols.

⚠️ Warning
This symbol indicates that violating this item could cause serious personal injuries.

⚠️ Caution
This symbol indicates that violating this item could cause minor or medium personal injuries, or loss of property.
About the Camera

⚠️ Warning
- Do not disassemble or modify the camera. High voltage areas are present inside the camera, with the risk of electric shock.
- If the camera interior is exposed due to dropping or otherwise damaging the camera, never touch the exposed portion. There is a risk of electric shock.
- Wrapping the strap around your neck is dangerous. Take care that small children do not hang the strap around their necks.
- If any irregularities occur during use, such as smoke or a strange odor, stop use immediately, remove the battery or the AC adapter, and contact your nearest PENTAX Service Center. Continuing to use the product can cause a fire or electric shock.

⚠️ Caution
- Do not place your finger over the flash when discharging the flash. You may burn yourself.
- Do not cover the flash with clothing when discharging the flash. Discoloration may occur.
- Some portions of the camera heat up during use. There is a risk of low temperature burns when holding such portions for long periods.
- Should the monitor be damaged, be careful of glass fragments. Also, be careful not to allow the liquid crystal to get on your skin, in your eyes or mouth.
- Depending on your individual factors or physical condition, the use of the camera may cause itching, rashes or blisters. In case of any abnormality, stop using the camera and get medical attention immediately.

About the Battery Charger and the AC Adapter

⚠️ Warning
- Always use the battery charger and AC adapter exclusively developed for this product, with the specified power and voltage. Using a battery charger or AC adapter not exclusive to this product, or using the exclusive battery charger or AC adapter with an unspecified power or voltage can cause a fire, electric shock, or camera breakdown. The specified voltage is 100 - 240V AC.
• Do not disassemble or modify the product. This can cause a fire or electric shock.
• If the generation of smoke or strange odor from the product or other abnormality occurs, immediately discontinue use and consult a PENTAX Service Center. Continuing to use the product can cause a fire or electric shock.
• If water should happen to get inside the product, consult a PENTAX Service Center. Continuing to use the product can cause a fire or electric shock.
• If a thunder storm should occur while using the battery charger or AC adapter, unplug the AC plug cord and discontinue use. Continuing to use the product can cause damage to the equipment, fire, or electric shock.
• Wipe off the plug of the AC plug cord if it becomes covered with dust. Dust on the plug may cause a fire.

⚠️ Caution

• Do not place or drop heavy objects on or forcefully bend the AC plug cord. Doing so may damage the cord. Should the AC plug cord be damaged, consult a PENTAX Service Center.
• Do not touch or short-circuit the terminal area of the AC plug cord while the cord is plugged in.
• Do not plug or unplug the power cord with wet hands. This can cause an electric shock.
• Do not drop the product, or subject it to violent impact. This can cause equipment breakdown.
• Do not use the battery charger to charge a battery other than a rechargeable lithium-ion battery D-LI92. Attempting to charge other types of batteries may cause an explosion, or heating, or may damage the battery charger.
• To reduce the risk of hazards, use only a CSA/UL certified power supply cord set, cord is Type SPT-2 or heavier, minimum NO.18 AWG copper, one end with a molded-on male attachment plug cap (with a specified NEMA configuration), and the other is provided with a molded-on female connector body (with a specified IEC nonindustrial type configuration) or the equivalent.
About the Battery

⚠️ Warning
• Be sure to store the battery out of the reach of small children. Placing it in their mouths may cause an electric shock.
• If any leakage from the battery should come in contact with your eyes, do not rub them. Flush your eyes with clean water and get medical attention immediately.

⚠️ Caution
• Only use the specified battery with this camera. Use of other batteries may cause an explosion or fire.
• Do not disassemble the battery. Disassembling the battery may cause an explosion or leakage.
• Remove the battery from the camera immediately if it becomes hot or begins to smoke. Be careful not to burn yourself during removal.
• Keep wires, hairpins, and other metal objects away from the + and - contacts of the battery.
• Do not short the battery or dispose of the battery in fire. This can cause an explosion or fire.
• If any leakage from the battery should come in contact with skin or clothes, wash the affected areas thoroughly with water.
• Precautions for D-LI92 Battery Usage:
  BATTERY MAY EXPLODE OR FIRE IF MISTREATED.
  - DO NOT DISASSEMBLE OR DISPOSE OF IN FIRE.
  - DO NOT CHARGE EXCEPT SPECIFIED CHARGING CONDITION.
  - DO NOT HEAT ABOVE 140°F / 60°C, OR SHORT CIRCUIT.
  - DO NOT CRUSH OR MODIFY.

Keep the Camera and Accessories out of the Reach of Small Children

⚠️ Warning
• Do not place the camera and its accessories within the reach of small children.
  1. If the product falls or is operated accidentally, it may cause serious personal injuries.
  2. Wrapping the strap around a neck may cause suffocation.
3. To avoid the risk of a small accessory such as the battery or SD Memory Cards from being swallowed by mistake, keep them out of the reach of small children. Seek medical attention immediately if an accessory is accidentally swallowed.

**Care to be Taken During Handling**

**Before Using Your Camera**

- When traveling, take the Worldwide Service Network listing that is included in the package. This will be useful if you experience problems abroad.
- When the camera has not been used for a long time, confirm that it is still working properly, particularly prior to taking important pictures (such as at a wedding or when traveling). Pictures, movies and sound files cannot be guaranteed if recording, playback or transferring your data to a computer, etc. is not possible due to a malfunction of your camera or recording media (SD Memory Card), etc.

**About the Battery and Charger**

- Storing the battery fully charged may decrease the battery performance. Avoid storing in high temperatures.
- If the battery is left inserted and the camera is not used for a long time, the battery will over-discharge and shorten the battery's life.
- Charging the battery a day before use or on the day of use is recommended.
- The AC plug cord provided with this camera is developed exclusively for the battery charger D-BC92. Do not use it with other devices.

**Precautions on Carrying and Using Your Camera**

- Do not subject the camera to high temperatures or high humidity. Do not leave the camera in a vehicle, as the temperature can get very high.
- Do not subject the camera to strong vibrations, shocks, or pressure. Use a cushion to protect the camera from vibrations of motorcycles, automobiles, or ships.
- The temperature range for camera use is 0°C to 40°C (32°F to 104°F).
- The monitor may appear black at high temperatures, but will return to normal at normal temperatures.
• The monitor may respond more slowly at low temperatures. This is due to liquid crystal properties, and is not a malfunction.
• Sudden temperature changes will cause condensation on the inside and outside of the camera. Place the camera in your bag or a plastic bag, and remove it after the temperature of the camera and surroundings are equalized.
• Avoid contact with garbage, mud, sand, dust, water, toxic gases, or salts. These could cause the camera to breakdown. Wipe the camera to dry off any rain or water drops.
• Please do not press forcefully on the monitor. This could cause it to break or malfunction.
• Be careful not to sit down with the camera in your back pocket as this may damage the exterior of the camera or the display.
• Be careful not to overtighten the tripod screw when using a tripod to avoid damaging the camera.
• The lens on this camera is not interchangeable. The lens is not removable.

Cleaning Your Camera

• Do not clean the product with organic solvents such as thinner, alcohol or benzine.
• Use a lens brush to remove dust accumulated on the lens. Never use a spray blower for cleaning as it may damage the lens.

Storing Your Camera

• Do not store the camera with preservatives or chemicals. Storage in high temperatures and high humidity can cause mold to grow on the camera. Remove the camera from its case and store it in a dry and well-ventilated location.

Other Precautions

• Periodic inspections are recommended every one to two years to maintain high performance.
• Please note that deleting images or sound files, or formatting the SD Memory Cards or the built-in memory does not completely erase the original data. Deleted files can sometimes be recovered using commercially available software. It is user’s responsibility to ensure the privacy of such data.
• The SD Memory Card is equipped with a write-protect switch. Setting the switch to LOCK prevents new data from being recorded on the card, the stored data from being deleted, and the card from being formatted by the camera or computer. 
  \[\text{SD}\] appears on the display when the card is write-protected.
• Care should be taken when removing the SD Memory Card immediately after using the camera, as the card may be hot.
• Keep the battery/card cover closed and do not remove the SD Memory Card or turn the camera off while the data is being played back or saved to the card, or the camera is connected to a computer with the USB cable, as this may cause the data to be lost or the card to be damaged.
• Do not bend the SD Memory Card or subject it to violent impact. Keep it away from water and store away from high temperature.
• Do not remove the SD Memory Card during formatting as this may damage the card and render it unusable.
• The data on the SD Memory Card may be deleted in the following circumstances. We do not accept any liability for data that is deleted
  (1) when the SD Memory Card is mishandled by the user.
  (2) when the SD Memory Card is exposed to static electricity or electrical interference.
  (3) when the SD Memory Card has not been used for a long time.
  (4) when the SD Memory Card is ejected or the battery is removed while the data on the card is being recorded or accessed.
• If it is not used for a long time, the data on the card may become unreadable. Be sure to regularly make a backup of important data on a computer.
• Avoid using or storing the card where it may be exposed to static electricity or electrical interference.
• Avoid using or storing the card in direct sunlight or where it may be exposed to rapid changes in temperature or to condensation.
• When using an SD Memory Card with a slow recording speed, recording may stop while you are taking movies even when there is adequate space in the memory, or shooting and playback may take a long time.
• Be sure to format SD Memory Cards that are unused or have been used on another camera. Refer to “Formatting the Memory” (p.190).

Composition of the Operating Manual

This Operating Manual contains the following chapters.

1 Getting Started

This chapter explains what you need to do after purchasing the camera before you start taking pictures. Be sure to read it and follow the instructions.

2 Common Operations

This chapter explains common operations such as the functions of the buttons and how to use the menus. For more details, refer to the respective chapters below.

3 Taking Pictures

This chapter explains the various ways of capturing images and how to set the relevant functions.

4 Playing Back and Deleting Images

This chapter explains how to view still pictures and movies on the camera or on a TV screen and how to delete them from the camera.

5 Editing and Printing Images

This chapter explains how to print still pictures, and how to edit them on the camera.

6 Recording and Playing Back Sound

This chapter explains how to record sound and add sound (a voice memo) to an image, and how to play them back.

7 Settings

This chapter explains how to set the camera-related functions.

8 Connecting to a Computer

This chapter explains how to connect the camera to a computer, and includes installation instructions and a general overview of the provided software.

9 Appendix

This chapter deals with troubleshooting and lists the optional accessories.
Camera Features

In addition to basic picture-taking, this camera has a variety of shooting modes to suit different situations. This section describes how to make the most of the key features of your camera. Together with the explanations of camera operations, it will enable you to enjoy your camera to the full.

Easy-to-Navigate Capture and Playback Functions!

The user-friendly design of this camera enables easy operation with only a few buttons. Simply by choosing the appropriate icon, you can select the shooting mode (p.69) and choose the optimal settings for the situation, or the playback mode (p.138, p.160) and enjoy the various playback and editing functions. A guide on the display lets you check the functions available in each mode and how to use them.

- A shooting mode guide is displayed in the Capture Mode Palette and a playback mode guide in the Playback Mode Palette (p.69, p.138).
- Use the Green Mode to take pictures easily using standard settings (p.76).
Perfect for Portrait Shots!

This camera comes with a “Face Detection” function that spots the faces in your shot and automatically adjusts the focus and exposure for the faces. It can detect up to 32 people per shot (*), so it will help you take perfect group shots too. It will automatically release the shutter when people are smiling, or if anyone blinked, it will tell you that so you can take the shot again until it is perfect. It also has a feature that lets you enlarge each person’s face in sequence during playback so you can quickly check their facial expressions.

* Up to 31 face detection frames are displayed on the monitor.

- Face Detection function (p.72)
- Modes for taking stunning pictures of people (p.82)
- Close-ups of faces for easy checking during playback (p.146)

Add Various Frames to Your Pictures!

When you take a picture with this camera, you can choose from fun frames to create attractive framed shots (p.90). You can also add frames to pictures you have taken (p.169). Adjust the position of the subject in the picture or reduce or enlarge the picture size to match the frame shape and size. Now you no longer have to worry about the subject not fitting into the frame.

- For decorating your pictures with a frame

Display Images and Sound Files in Calendar Format!

With this camera, you can display recorded images and sound files by date in calendar format (p.137). This lets you quickly find the image or sound file you want to play back.
Advanced Movie Recording Functions

This camera has a shake reduction function (Movie SR) to reduce camera shake during movie recording (p.130). And it enables you to record movies in 1280×720 pixel (16:9) HDTV format (*) (p.129).

* When connecting to and playing back images on AV equipment, image data is output at normal screen resolution. To view movies in HDTV, transfer the data to a computer and play it back on the computer.

- Use the camera to shoot fun-filled movies of your children or pets as a visual diary of their development (p.127).

A Multitude of Functions Inside the Camera for Enjoying Images Without a Computer!

This camera has a variety of functions to let you enjoy playing back and editing images without having to connect the camera to your computer and transfer the images first. The camera is all you need to take and edit still pictures and movies (p.160).

- Resize (p.160), Cropping (p.161) and Red-eye Compensation (p.168) can be used, while the image is displayed in the playback mode.
- You can divide a movie into two or select a frame from a movie to save it as a still picture (p.173).
Checking the Contents of the Package

Items marked with an asterisk (*) are also available as optional accessories. The battery charger and AC plug cord are only sold as a set (Battery Charger Kit K-BC92). For other optional accessories, refer to “Optional Accessories” (p.240).
Names of Parts

Front

- Speaker
- Microphone
- Lens
- Flash
- Self timer lamp/Focus assist
- Remote control receiver
- Tripod socket
- Battery/card cover
- Battery/card cover lock lever
Refer to “Understanding the Button Functions” (p.52 - p.55) for an explanation of the function of each button.
Monitor Indications

Display in  bào Mode

The display shows information such as the shooting conditions in the capture mode. The display changes in the following sequence each time you press the OK/DISPLAY button: “Normal Display”, “Histogram + Info” and “No Info”.

When the shooting mode is set to  bào (Green) mode, the monitor display is as shown on the right. You cannot change the information on the display by pressing the OK/DISPLAY button (p.76).
Normal Display in Still Picture Capture Mode

1. Shooting mode (p.69)
2. Face Detection icon (p.72)
3. D-Range Setting (p.111)
4. Camera shake reduction icon (p.118)
5. Shutter speed
6. Aperture
7. Flash Mode (p.102)
8. Drive Mode (p.92, p.93)
9. Focus Mode (p.104)
10. Eye-Fi icon (p.224)
11. Digital Zoom/Intelligent Zoom icon (p.78)
12. Memory status (p.42)
13. Remaining image storage capacity
14. Battery level indicator (p.36)
15. Focus frame (p.66)
16. Date and time (p.48)
17. EV Compensation (p.110)
18. Date Imprint setting (p.122)
19. World Time setting (p.195)

* 3 depends on the [D-Range Setting] setting in the [Rec. Mode] menu.

When [Highlight Correction] is set to 
When [Shadow Correction] is set to 
When [Highlight Correction] and [Shadow Correction] are both set to 

If [Highlight Correction] and [Shadow Correction] are both set to (Off), nothing appears in 3.
* 4 varies depending on the following conditions.

When the shutter release button is pressed halfway with [Shake Reduction] in the [Rec. Mode] menu set to [CCD-Shift] or [Dual]

When [Shake Reduction] is set to [Off] (If the camera shake is likely to occur, 🕳️ is indicated when the shutter button is pressed halfway.)

* 5 and 6 appear only when the shutter release button is pressed halfway.
* For 9, when the focus mode is set to AF and the Auto-Macro function is activated, the 🕳️ appears on the display (p.104).
* Some indications may not appear depending on the shooting mode.

**Histogram + Info/No Info Display in Still Picture Capture Mode**
A1 to A19 and B1 appear when “Histogram + Info” is selected. Only B1 appears when “No Info” is selected.

   - When [Highlight Correction] is set to ✓
   - When [Shadow Correction] is set to ✓
   - When [Highlight Correction] and [Shadow Correction] are both set to ✓

If [Highlight Correction] and [Shadow Correction] are both set to □ (Off), nothing appears in A3.

* A4 varies depending on the following conditions.

   - When the shutter release button is pressed halfway with [Shake Reduction] in the [Rec. Mode] menu set to [CCD-Shift] or [Dual]
   - When [Shake Reduction] is set to [Off] (If the camera shake is likely to occur, ⚠ is indicated when the shutter button is pressed halfway.)

* B2 and B3 appear only when the shutter release button is pressed halfway.

* When the shooting mode is AUTO (Auto Picture) and if you press the shutter release button halfway, the automatically selected shooting mode appears in A1 even when “No Info” is selected (p.74).

* Some indications may not appear depending on the shooting mode.
Display in [ ] Mode

The display shows the shooting information of the image in the playback mode. The display changes in the following sequence each time you press the OK/DISPLAY button: “Normal Display”, “Histogram + Info” and “No Info”.

Normal Display

Histogram + Info

No Info
Normal Display/Histogram + Info Display in Playback Mode
(All of the display items are displayed here for explanatory purposes.)
The display shows information such as the shooting conditions. A1 to A12 appear when “Normal Display” or “Histogram + Info” is selected. B1 to B7 appear only when “Histogram + Info” is selected.

A1  Face Detection icon (p.72)
A2  Playback mode
   - : Still Picture (p.134)
   - : Movie (p.135)
   - : Sound (p.184)
A3  Protect icon (p.153)
A4  Voice memo icon (p.187)
A5  Eye-Fi icon (p.224)
A6  Memory status (p.42)
A7  Folder number (p.199)
A8  File number
A9  Battery level indicator (p.36)
A10 Volume icon
A11 Captured date and time (p.48)
A12 Four-way controller guide
B1  Recorded Pixels (p.108)
B2  White Balance (p.112)
B3  AE Metering (p.114)
B4  Sensitivity (p.115)
B5  Shutter speed
B6  Aperture
B7  Histogram (p.28)

* A1 appears only if the Face Detection function worked when the image was shot.
* In “Normal Display”, A9 and A11 disappear if no operation is performed for two seconds.
* A10 appears only when the volume is being adjusted during playback of movies, sound files or voice memos (p.135, p.184, p.187).
* A12 appears even when “No Info” is selected, but disappears if no operation is performed for two seconds. When no operation is performed for two seconds in “Normal Display” or “Histogram + Info”, only “Edit” disappears.

Guide Indications

A guide indication for each available button/key operation appears as follows on the display during operation.

| , , | button |

Using the Histogram

A histogram shows the brightness distribution of an image. The horizontal axis represents brightness (dark at the left and bright at the right) and the vertical axis represents the number of pixels. The shape of the histogram before and after shooting tells you whether the brightness and contrast are correct or not, and lets you decide if you need to adjust the exposure and take a picture again.

Setting the Exposure (EV Compensation) ➤ p.110
Understanding Brightness

If the brightness is correct, the graph peaks in the middle. If the image is too dark, the peak is on the left side, and if it is too bright, the peak is on the right side.

When the image is too dark, the part to the left is cut off (dark portions) and when the image is too bright, the part to the right is cut off (bright portions).

Understanding Contrast

The graph peaks gradually for images in which contrast is balanced. The graph peaks on both sides but sinks in the middle for images with a large difference in contrast and low amounts of mid-level brightness.
1 Getting Started

Attaching the Strap ..................................... 32
Powering the Camera .................................. 33
Installing the SD Memory Card ...................... 39
Turning the Camera On and Off .................... 42
Initial Settings ........................................... 44
Getting Started

Attaching the Strap

Attach the strap (O-ST104) supplied with the camera.

1. Pass the narrow end of the strap through the strap lug.
2. Pass the other end of the strap through the loop and pull tight.
Getting Started

Powering the Camera

Charging the Battery

Use the supplied battery charger (D-BC92) to charge the supplied rechargeable lithium-ion battery (D-LI92) before using it in the camera for the first time or after a long period of non-use, or when the [Battery depleted] message appears.

Note: AC plug cord “Listed, Type SPT-2 or NISPT-2, 18/2 flexible cord, rated 125 V, 7A, minimum 6 ft (1.8 m)”

1. Connect the AC plug cord to the battery charger.
2. Plug the AC plug cord into the power outlet.
3. Place the battery in the battery charger so that the PENTAX logo is facing up.
   The charging indicator lights while the battery is charging and turns off when charging is finished.
4. Remove the battery from the battery charger when charging is finished.
Getting Started

Use the rechargeable lithium-ion battery D-LI92 that is provided with the camera. Charge the battery before using it in the camera for the first time.

1. Open the battery/card cover.
   Slide the battery/card cover lock lever in the direction indicated by the arrow ① and flip the cover open ②.

Caution

• Do not use the supplied battery charger (D-BC92) to charge batteries other than the rechargeable lithium-ion battery D-LI92, as the battery charger may overheat or be damaged.
• The battery has reached the end of its service life when it starts to run down soon after being charged. Replace it with a new battery.
• If the battery is inserted correctly but the charging indicator fails to light, the battery may be faulty. Replace it with a new battery.

memo

The time required to fully charge the battery is about 120 minutes (max.). (The charging time may vary depending on the ambient temperature and charging conditions.) The appropriate ambient temperature for charging the battery is 0°C to 40°C (32°F to 104°F).

Installing the Battery

Use the rechargeable lithium-ion battery D-LI92 that is provided with the camera. Charge the battery before using it in the camera for the first time.
2 Press the battery lock lever in the direction of ③ and insert the battery so that the PENTAX logo is facing toward the lens.
Match the marks on the battery to the marks inside the battery compartment and push the battery in until it is locked in place.

Caution: Make sure that the battery is inserted with the PENTAX logo facing toward the lens. If the battery is incorrectly oriented, malfunction may result.

3 Close the battery/card cover.
After closing the battery/card cover, slide the cover lock lever in the opposite direction indicated by ①. When you hear a click, the cover is securely closed.

Removing the Battery

1 Open the battery/card cover.
2 Press the battery lock lever in the direction of ③.
The battery will be ejected. Take care not to drop the battery when removing it.

Caution:
- This camera uses a rechargeable lithium-ion battery D-LI92. Use of any other type of battery may damage the camera and cause a malfunction.
- Insert the battery correctly. If the battery is incorrectly oriented, malfunction may result.
- Do not remove the battery while the camera is turned on.
- When storing the battery for more than 6 months, charge the battery for 30 minutes using the battery charger and store the battery separately.
Be sure to recharge the battery every 6 to 12 months. Storing the battery at or below room temperature is ideal. Avoid storing it at high temperature.
- The date and time may be returned to the default setting if the camera is left without the battery for a long time.
- Be careful as the camera or the battery may become hot when the camera is used continuously for a long period of time.
• **Image Storage Capacity, Movie Recording Time, Sound Recording Time, and Playback Time**
  (at 23°C with the display on and the battery fully charged)

<table>
<thead>

</tr>
</tbody>
</table>

*1 Image Storage Capacity shows the approximate number of shots recorded during CIPA-compliant testing (with display on, flash used for 50% of the shots, and 23 degrees centigrade). Actual performance may vary according to operating conditions.

*2 According to the result of in-house testing.

- In general, battery performance may temporarily deteriorate as the temperature decreases.
- Be sure to take a spare battery with you when traveling abroad or to a cold region, or if you intend to take a lot of pictures.

• **Battery Level Indicator**

  You can check the battery level by the indicator on the display.

Using the AC Adapter

Use of the optional AC adapter kit (K-AC117) is recommended if you intend to use the camera for a long time or connect it to a computer.

1. **Make sure that the camera is turned off and open the battery/card cover.**

2. **Remove the battery.**
   Refer to p.34 - p.35 on how to open/close the battery/card cover and remove the battery.

3. **Insert the DC coupler while holding down the battery lock lever.**
   Confirm the DC coupler is locked in place.

4. **Extract the DC coupler cord.**
   Pull out the tab at the joint of the camera and the battery/card cover so that the DC coupler cord can be extracted from there.

5. **Close the battery/card cover.**
6 Connect the DC terminal of the AC adapter to the DC terminal of the DC coupler.

7 Connect the AC plug cord to the AC adapter.

8 Plug the AC plug cord into the power outlet.

---

- Make sure that the camera is turned off before connecting or disconnecting the AC adapter.
- Make sure that the AC plug cord and the DC terminal connecting the AC adapter to the camera are inserted securely. Data may be lost if either becomes disconnected while data is being recorded on the SD Memory Card or the built-in memory.
- Use the AC adapter with due care to avoid fire or electric shock. Be sure to read “About the Battery Charger and the AC Adapter” (p.2) before using the AC adapter.
- Be sure to read the operation manual accompanying the AC adapter kit K-AC117 before using the adapter.
Installing the SD Memory Card

This camera uses SD Memory Cards, SDHC Memory Cards or SDXC Memory Cards. (These cards are referred to as SD Memory Cards hereafter.) Captured images and sound files are saved on the SD Memory Card when a card is inserted in the camera. They are saved in the built-in memory when a card is not inserted (p.42).

**Caution**

- Be sure to use this camera to format (initialize) an SD Memory Card that is unused or has been used on other cameras or digital devices. Refer to “Formatting the Memory” (p.190) for instructions on formatting.
- When you intend to use a brand-new Eye-Fi card for the first time, copy the Eye-Fi Manager installation file to your computer before formatting the card.
- Make sure that the camera is turned off before inserting or removing the SD Memory Card.

**Memo**

- The still picture storage capacity varies depending on the capacity of the SD Memory Card and the selected number of recorded pixels and quality level (p.41).
- The self-timer lamp blinks while the SD Memory Card is being accessed (data is being recorded or read).

**Backing Up Data**

The camera may not be able to access data in the built-in memory in the case of a malfunction. Use a computer or other device to back up important data in another location.
Getting Started

1 Open the battery/card cover.
Slide the battery/card cover lock lever in the direction indicated by the arrow ① and flip the cover open ②.

2 Insert the SD Memory Card into the SD Memory Card socket so that the label is facing toward the back of the camera (the side with the screen display).
Push the card in until it clicks. Data may not be recorded correctly if the card is not inserted all the way.

3 Close the battery/card cover.
After closing the battery/card cover, slide the cover lock lever in the opposite direction indicated by ①. When you hear a click, the cover is securely closed.

To Remove the SD Memory Card

1 Open the battery/card cover.

2 Push the card into the SD Memory Card socket to eject it.
Pull the card out.
Number of Images Recordable on an SD Memory Card

The file sizes of the recorded images vary depending on the number of recorded pixels of the images, so the number of images that can be saved on an SD Memory Card also varies.

Choose the appropriate number of recorded pixels for still pictures on the [Rec. Mode] menu.

Selecting the Number of Recorded Pixels  p.108

Choose the appropriate number of recorded pixels and frame rate in [Movie] on the [Rec. Mode] menu.

Selecting the Recorded Pixels and Frame Rate for Movies  p.129

For an approximate guide to the number of images or the length of recorded movies that can be saved on an SD Memory Card, see “Main Specifications” (p.242).
Getting Started

Turning the Camera On and Off

1 Press the power switch.
The camera turns on and the display turns on.
When you turn the camera on, the lens cover opens and the lens extends.
If the [Language/言語] screen or [Date Adjustment] screen appears when you turn the camera on, follow the procedure on p.44 to set the display language and/or current date and time.

2 Press the power switch again.
The display turns off, the lens closes, and the camera turns off.

Taking Still Pictures p.66

Checking the SD Memory Card

The SD Memory Card is checked when the camera turns on and the memory status is displayed.

- The SD Memory Card is inserted. Images and sound files will be saved on the SD Memory Card.
- The SD Memory Card is not inserted. Images and sound files will be saved in the built-in memory.
- The write-protect switch on the SD Memory Card is in the LOCK position (p.7). Images and sounds cannot be recorded.
Starting-up in the Playback Mode

If you want to play back images or sound files straightaway without taking any pictures, you can start up the camera in the playback mode.

1. Press the power switch while holding down the ▶ button.

The display turns on with the lens retracted and the camera turns on in the playback mode.

Memo: To switch from the playback mode to the capture mode, press the ▶ button or press the shutter release button halfway.

Playing Back Still Pictures  p.134
The [Language/言語] screen appears when the camera is turned on for the first time. Perform the operations in “Setting the Display Language” below to set the language, and in “Setting the Date and Time” (p.48) to set the current date and time.

The language, date, and time can be changed later. Refer to the pages below for instructions.
- To change the language, follow the steps in “Changing the Display Language” (p.198).
- To change the date and time, follow the steps in “Changing the Date and Time” (p.192).

### Setting the Display Language

1. Use the four-way controller (▲▼◄►) to choose the desired display language.
1 Press the OK button.
The [Initial Setting] screen appears in the selected language. If the desired settings for [Hometown] and [DST] (Daylight Saving Time) appear, proceed to Step 3. Proceed to “To Set Hometown and DST” (p.47) if the desired settings do not appear.

3 Press the four-way controller (▼) twice to select [Settings complete].

4 Press the OK button.
The [Date Adjustment] screen appears. Set the date and time by following the procedure in “Setting the Date and Time” (p.48).
If you accidentally select the wrong language and proceed to the next procedure, perform the following operation to set the desired language.

**When the Wrong Language Has Been Inadvertently Selected**

1. Press the four-way controller (▶).
2. Use the four-way controller (▲ ▼ ◀ ▶) to select the desired language and press the OK button.
   The [Initial Setting] screen appears in the selected language.

**When the Screen After Step 2 Appears in the Wrong Language**

1. Press the MENU button.
   The setting screen is canceled and the camera is set to still picture capture mode.
2. Press the MENU button.
   The [Rec. Mode] menu appears.
3. Press the four-way controller (▶).
4. Use the four-way controller (▼ ▲) to select [Language/言語].
5. Press the four-way controller (▶).
   The [Language/言語] screen appears.
6. Use the four-way controller (▲ ▼ ◀ ▶) to select the desired language.
7. Press the OK button.
   The [Setting] menu appears in the selected language.

The language is now switched to your desired language. To reset [Hometown], [Date] and [Time], refer to the pages below for instructions.
- To change [Hometown], follow the steps in “Setting the World Time” (p.195).
- To change the [Date] and [Time], follow the steps in “Changing the Date and Time” (p.192).
To Set Hometown and DST

3 Press the four-way controller (▼).  
The frame moves to [akukan hometown].

4 Press the four-way controller (▶).  
The [akukan hometown] screen appears.

5 Use the four-way controller (◀▶) to choose a city.

6 Press the four-way controller (▼).  
The frame moves to [DST] (Daylight Saving Time).

7 Use the four-way controller (◀▶) to select ✓ (On) or □ (Off).

8 Press the OK button.  
The [Initial Setting] screen reappears.

9 Press the four-way controller (▼) to select [Settings complete].

10 Press the OK button.  
The [Date Adjustment] screen appears. Next, set the date and time.
The video output format (NTSC/PAL) is set to the format of the city selected in [Hometown] on the [Initial Setting] screen. Refer to “List of World Time Cities” (p.239) for the video output format of each city that will be set at the time of initial setting, and “Changing the Video Output Format” (p.200) for changing the video output format.

### Setting the Date and Time

Set the current date and time and the display style.

1. **Press the four-way controller (▶).**
   The frame moves to [mm/dd/yy].

2. **Use the four-way controller (▲ ▼) to choose the date format.**
   Choose from [mm/dd/yy], [dd/mm/yy] or [yy/mm/dd].

3. **Press the four-way controller (▶).**
   The frame moves to [24h].

4. **Use the four-way controller (▲ ▼) to select [24h] (24-hour display) or [12h] (12-hour display).**

5. **Press the four-way controller (▶).**
   The frame returns to [Date Format].

6. **Press the four-way controller (▼).**
   The frame moves to [Date].
7 Press the four-way controller (◀).  
The frame moves to the month.

8 Use the four-way controller (▲▼) to change the month.  
Change the day and year in the same manner.  
Next, change the time.  
If you selected [12h] in Step 4, the setting switches between am and pm corresponding to the time.

9 Press the four-way controller (▼) to select [Settings complete].

10 Press the OK button.  
This confirms the date and time.

If you press the OK button in Step 10, the camera clock is reset to 00 seconds. To set the exact time, press the OK button when the time signal (on the TV, radio, etc.) reaches 00 seconds.

Caution: When the [Initial Setting] or [Date Adjustment] screen is displayed, you can cancel the settings made up to that point and switch to the capture mode by pressing the MENU button. In this case, the [Initial Setting] screen will appear again the next time you turn the camera on.
[Language/言語], [Date], [Time], [Hometown], and [DST] can be changed. Refer to the pages below for instructions.

- To change the language, follow the steps in “Changing the Display Language” (p.198).
- To change the date and time, follow the steps in “Changing the Date and Time” (p.192).
- To change the city or DST setting, follow the steps in “Setting the World Time” (p.195).
2 Common Operations

Understanding the Button Functions ..... 52
Setting the Camera Functions .................. 57
Understanding the Button Functions

**Power switch**
Turns the camera on and off (p.42).

**Zoom lever**
Changes the captured area (p.78).

**Shutter release button**
Focuses the camera on the subject when pressed halfway in still picture capture mode (except in PF, ▲ and MF modes).
Takes a still picture when pressed down fully (p.67).
Starts and stops movie recording in 🎬 (Movie) mode (p.127).
Starts and stops sound file recording in Voice Recording (p.183).

**button**
Switches to the 🎬 mode (p.56).
5 **button**
Switches the Face Detection function (p.72). The Face Detection function is switched as follows each time the **button** is pressed:
Smile Capture → Face Detection Off → Face Detection On

6 **Four-way controller**
- ▲ Changes the drive mode (p.92, p.93).
- ▼ Displays the Capture Mode Palette (p.69).
- ◀ Changes the flash mode (p.102).
- ▶ Changes the focus mode (p.104).
- ▲▼ Adjusts the focus when the focus mode is set to MF (p.105).

7 **OK/DISPLAY button**
Changes the information on the display (p.22).

8 **Green button**
Switches to the ◇ (Green) mode (p.76).
Calls up the assigned function (p.123).

9 **MENU button**
Displays the [Rec. Mode] menu (p.57).
### Mode

**1. Power switch**
Turns the camera on and off (p.42).

**2. Zoom lever**
Turn to the left (лево) during single-image display to change to four-image display. Changes to nine-image display when turned to the left again. Returns to the previous display when turned to the right (право) (p.136).
Enlarges the image when turned to the right (вверх) during single-image display. Returns to the previous display when turned to the left (вниз) (p.145).
Turn to the left (лево) during nine-image display to change to folder or calendar display (p.137).
Turn to the right (вверх) during folder/calendar display to change to nine-image display (p.137).
Adjusts the volume during playback of movies, sound files or voice memos (p.135, p.184, p.187).

**3. Shutter release button**
Switches to mode (p.56).

**4. button**
Switches to mode (p.56).
5 **[Zoom] button**
Zooms in on the subjects’ faces in a face-detected image in the order the faces were detected when the picture was taken. (Face close-up playback) (p.146)

6 **Four-way controller**
- ▲ Plays back and pauses a movie or sound file (p.135, p.184).
- ▼ Displays the Playback Mode Palette (p.138).
- ◄ ► Stops a movie or sound file during playback (p.135, p.184).
- ◄ ► Displays the previous or next image or sound file during single-image display (p.134).
  - Fast-forwards, fast-reverses, frame forwards, frame reverses, reverses a movie and makes a movie play forwards during playback (p.135).
  - Fast-forwards, fast-reverses, and moves to the next index during sound file playback (p.184).
- ▲ ◄ ► Selects an image during four-/nine-image display, a folder during folder display, and a date during calendar display (p.136, p.137).
  - Moves the display area during zoom display (p.145).
  - Moves the image when using the Frame Composite function (p.169).

7 **OK/DISPLAY button**
Changes the information on the display (p.26).
Returns to single-image display during four-/nine-image display or zoom display (p.136, p.145).
Changes to nine-image display of the selected folder during folder display (p.137).
Changes to single-image display of the selected date during calendar display (p.138).

8 **Green/□ button**
Switches from single-image display to the Delete screen (p.148).
Switches from four-/nine-image display to the Select & Delete screen (p.150).
Switches from folder display to the calendar display screen (p.137).
Switches from calendar display to the folder display screen (p.137).

9 **MENU button**
Displays the [Setting] menu during single-image display (p.57).
Returns to single-image display during Playback Mode Palette display (p.138).
Returns to single-image display during four-/nine-image display or zoom display (p.136).
Changes to nine-image display of the selected folder during folder display (p.137).
Changes to nine-image display of the selected date during calendar display (p.137).
Switching Between Mode and Mode

In this manual, the capture mode, such as for taking still pictures, is referred to as “Mode” (the capture mode). The playback mode, such as for viewing the captured images on the display, is referred to as “Mode” (the playback mode). In Mode, you can perform simple editing operations on the captured images.

Follow the procedure below to switch between Mode and Mode.

To Switch from Mode to Mode

1. Press the button.
   The camera switches to Mode.

To Switch from Mode to Mode

1. Press the button or the shutter release button halfway.
   The camera switches to Mode.

Displaying the data stored in the built-in memory

When an SD Memory Card is inserted in the camera, images, movies, and sounds on the SD Memory Card are displayed. If you want to display images, movies and sounds in the built-in memory, turn the camera off and remove the SD Memory Card.

Caution: Make sure that the camera is turned off before inserting or removing the SD Memory Card.
To change the camera settings, press the **MENU** button to display the [Rec. Mode] menu or [Setting] menu. Menus for playing back and editing images and sound files are called up from the Playback Mode Palette (p.138).

### Operating the Menus

Press the **MENU** button in **Rec. Mode** mode to display the [Rec. Mode] menu. Press the **MENU** button in **Setting** mode to display the [Setting] menu. Use the four-way controller (↑↓) to switch between [Rec. Mode] menu and [Setting] menu.
During recording

Press halfway

The setting is complete and the camera returns to Photo mode.

During playback

The setting is complete and the camera returns to Playback mode.

Available button operations appear on the display during menu operation (p.28).
Ex.) To set the [Focusing Area] on the [Rec. Mode] menu

1 Press the MENU button in mode.  
The [Rec. Mode] menu appears.

2 Press the four-way controller (▼).  
The frame moves to [Recorded Pixels].

3 Press the four-way controller (▼) twice.  
The frame moves to [AF Setting].

4 Press the four-way controller (▲).  
The [AF Setting] screen appears.

5 Press the four-way controller (▲).  
A pull-down menu appears with the items that can be selected.  
The pull-down menu displays only those items that can be selected with the current camera settings.

6 Use the four-way controller (▲▼) to change the setting.  
The focusing area changes each time the four-way controller (▲▼) is pressed.
Press the OK button or the four-way controller ( ).
The setting is saved and then the camera is ready for setting the other functions.
To exit the setting operation, press the MENU button.

To use another operation, refer to the following alternate Step 7 options.

### To Save the Setting and Start Taking Pictures

Press the shutter release button halfway.
The setting is saved and the camera returns to capture status.
When the shutter release button is pressed fully, the picture is taken.

When the [Setting] menu is displayed from Mode, you can switch to Mode by pressing the button.

### To Save the Setting and Start Playback of Images

Press the button.
When the [Rec. Mode] menu is displayed from Mode, the setting is saved and the camera returns to playback status.

### To Cancel the Changes and Continue with Menu Operations

Press the MENU button.
The changes are canceled and the screen shown in Step 3 reappears.

The MENU button function differs depending on the screen. Refer to the guide indications.

- **MENU Exit**: Exits the menu and returns to the original screen.
- **MENU**: Returns to the previous screen with the current setting.
- **MENU Cancel**: Cancels the current selection, exits the menu and returns to the previous screen.
Menu List

This displays the items that can be set with the menus and provides descriptions of each item. See the list of default settings in the Appendix “Default Settings” (p.234) to check whether the settings are saved when the camera is turned off and whether the settings return to the defaults when the camera is reset.

[ientes Rec. Mode] Menu
This menu shows the functions related to taking still pictures and recording movies.

3 Taking Pictures

Taking Still Pictures ........................................ 66
Setting the Shooting Functions .................. 102
Recording Movies ........................................ 127
Saving the Settings (Memory) ................. 131
Taking Pictures

This camera features a wide range of shooting modes and functions to suit almost any subject or scene. This chapter describes how to take pictures with the most commonly used standard settings (the factory default settings).

1 Press the power switch.
The camera turns on and is ready to take still pictures. In this manual, this is called “still picture capture mode”.

2 Confirm the subject and shooting information on the display.
The focus frame in the middle of the display indicates the zone of automatic focusing.

When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72). When the camera detects the pet’s full face, a light blue pet detection frame appears, and the shutter is automatically released.
You can change the captured area by turning the zoom lever to the left or right (p.78).

   Right (↑)  Enlarges the subject.
   Left (↓)   Widens the area that is captured by the camera.

3  Press the shutter release button halfway.
The camera emits focus assist light in dark shooting situations.
The focus frame (or face detection frame) on the display turns green when the camera focuses on the subject at the correct distance.

4  Press the shutter release button fully.
The picture is taken.
The flash discharges automatically depending on the light conditions.
The captured image appears on the display (Instant Review: p.69) and is saved to the SD Memory Card or the built-in memory.

Press the Green button to switch to the (Green) mode and let the camera set all the shooting functions automatically (p.76).
Using the Shutter Release Button

The shutter release button works in a two-step action as follows.

**Press halfway**
This refers to pressing the shutter release button gently to the first position. This locks the focus setting and the exposure. The green focus frame lights on the display when the shutter release button is pressed halfway and the subject is in focus. If the subject is out of focus, the frame turns white.

**Press fully**
This refers to pressing the shutter release button all the way down to the fully depressed position. This takes a picture.

---

**Poor focusing conditions**
The camera may not be able to focus under the following conditions. In these cases, lock the focus on an object the same distance away as the subject (by pressing and holding the shutter release button halfway), then aim the camera at your subject and press the shutter release button fully.

- Objects that lack contrast such as a blue sky or white wall
- Dark places or objects, or conditions that prevent light being reflected back
- Intricate patterns
- Fast moving objects
- When there is an object in the foreground and an object in the background in the captured area
- Strongly reflected light or strong backlighting (bright background)
Instant Review and Blink Detection

The image appears on the display immediately after it is captured (Instant Review). If the camera detects that the subject’s eyes are closed while the Face Detection function (p.72) is activated, the message [Closed eyes have been detected] appears for 3 seconds (Blink Detection).

- When the Face Detection function does not work, Blink Detection also does not function. Even if the subjects’ faces are detected, Blink Detection may not function depending on the condition of the detected faces.
- You can also disable the Blink Detection function (p.117).

Setting the Shooting Mode

This camera has a variety of shooting modes that let you take pictures or record movies in different situations simply by choosing the appropriate mode for the particular situation from the Capture Mode Palette.

1. Press the four-way controller (▼) in \( \text{Capture} \) mode.
   The Capture Mode Palette appears.

2. Use the four-way controller (▲ ▼ ◀▶) to choose a shooting mode.
   When an icon is selected in the Capture Mode Palette, the guide for the selected shooting mode appears.
3 Press the OK button.
The shooting mode is fixed and the camera returns to capture status.

There are 24 shooting modes which can be selected from the Capture Mode Palette.

</tbody>
</table>

* In shooting modes other than 🌻, 🍂, 🍊, 🍎, 🎉, ☀, 🏝️, ⌀ and 🏚️, saturation, contrast, sharpness, white balance, etc. are automatically set to the optimal settings for the selected mode.

• Some functions may not be available or may not work fully depending on the selected shooting mode. For details, refer to “Functions Available for Each Shooting Mode” (p.228).
Using the Face Detection Function

With this camera, the Face Detection function is available with all shooting modes. When the camera detects a person’s face in the image, the Face Detection function displays a yellow face detection frame around the face on the display screen, sets the focus (Face Detection AF) and compensates the exposure (Face Detection AE).

If the subject in the face detection frame moves, the frame also moves and changes its own size as it tracks the face.

The Face Detection function can detect up to 32 people’s faces. If it detects multiple faces, the camera displays a yellow frame over the main face and white frame(s) over the other face(s). It can display up to a total of 31 frames, including a main frame and white frame(s).

- Face Detection AF and AE may not work if the subject is wearing sunglasses, has part of their face covered or is not looking toward the camera.
- If the camera cannot detect the subject’s face, the camera focuses using the setting currently selected in [Focusing Area].
- When the Smile Capture function is activated, the shutter may not be released automatically because the Smile Capture function may not work in some situations, such as when the detected face is too small.
- When a pet is detected in AUTO (Auto Picture) or PET (Pet) mode, a light blue pet detection frame appears, and the shutter is automatically released.

To Switch the Face Detection Function

By default, the Face Detection function is set to Face Detection On. You can switch to the Smile Capture function, which automatically releases
the shutter when the subject smiles. The Face Detection function is
switched as follows each time the button is pressed:
Smile Capture → Face Detection Off → Face Detection On

An icon indicating either Face Detection On or Smile Capture appears
on the display. (The icon does not appear when the Face Detection
function is not activated.)

- The Face Detection function cannot be set to off in (Auto Picture),
  (Portrait), (Night Scene Portrait), (Pet), (Natural Skin
  Tone) or (Kids) mode. In these modes, the Face Detection function
  is always activated, and only either Face Detection On or Smile
  Capture can be selected.
- Face Detection On is automatically selected in (Green), (Auto
  Picture), (Portrait), (Night Scene Portrait), (Movie), (Natural Skin
  Tone) or (Kids) mode. When switching to another
  mode from one of these modes, the Face Detection setting returns to
  the previous setting.
- If the Face Detection function is activated when the flash mode is set
to (Auto), the flash mode automatically changes to (Flash On +
  Red-eye).
Taking Pictures Automatically (Auto Picture Mode)

In AUTO (Auto Picture) mode, the camera automatically selects the most appropriate mode depending on the situations and subjects.

1. **Press the four-way controller (▼) in □ mode.**
The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼ ◄►) to select AUTO.**

3. **Press the OK button.**
The AUTO mode is selected and the camera returns to capture status. When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72). When the camera detects the pet’s full face, a light blue pet detection frame appears, and the shutter is automatically released.

4. **Press the shutter release button halfway.**
The selected shooting mode is displayed on the top left of the screen.

<table>

</tr>
</tbody>
</table>
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5 Press the shutter release button fully.
The picture is taken.

The following restrictions apply in \( \text{mode:} \)
- You cannot turn the Face Detection function off.
- The focusing area setting is fixed at \( \text{(Multiple).} \)
- The \( \text{(Flower) mode cannot be selected when using Digital Zoom or Intelligent Zoom.} \)
- If the \( \text{(Night Scene) mode is selected when the flash mode is} \text{(Auto) or} \text{(Auto + Red-eye), the flash mode automatically changes to} \text{(Flash Off).} \)
- If the \( \text{(Night Scene Portrait) mode is selected when the flash mode is} \text{(Auto), the flash mode automatically changes to} \text{(Flash On + Red-eye) when the camera detects a face and determines that the flash is needed.} \)
- When the Smile Capture function is activated, the camera will not detect pets.

Taking Pictures in the Custom Settings (Program Mode)

In \( \text{(Program) mode, the camera automatically sets the shutter speed and aperture for taking still pictures. However, you can select other functions such as the flash mode and the number of recorded pixels.} \)

1 Press the four-way controller (\( \text{) in} \text{ mode.} \)
The Capture Mode Palette appears.
2 Use the four-way controller (▲ ▼ ◀ ▶) to select P.

3 Press the OK button.
The P mode is selected and the camera returns to capture status.
When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

4 Set the functions you want to change.
Refer to “Setting the Shooting Functions” (p.102 - p.126) for details on how to set the functions.

5 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

6 Press the shutter release button fully.
The picture is taken.

Taking Pictures in the Basic Mode (Green Mode)

In (Green) mode, you can enjoy easy picture-taking using standard settings, regardless of the settings in the [Rec. Mode] menu.
The mode settings are as shown below.

<table>
<thead>
<tr>

Taking Pictures

1 Press the Green button in Video mode.
The camera switches to mode. Press the Green button again to return to the status before mode was selected. When the camera detects a person's face, the Face Detection function is activated and the face detection frame appears (p.72).

2 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

3 Press the shutter release button fully.
The picture is taken.

- The Video mode is available only when it is assigned to the Green button in [Green Button] of the [Rec. Mode] menu (p.123). By default, the Video mode is assigned to the Green button.
- In Video mode, you cannot change the information on the display by pressing the OK/DISPLAY button.
- If you press the MENU button in mode, the Setting menu appears. The [Rec. Mode] menu cannot be displayed.
- When the camera is turned off in mode, it turns on in mode next time the power switch is pressed.
Using the Zoom

You can use the zoom to change the captured area.

1 Turn the zoom lever in \( \text{ } \) mode.
   Right ( ) Enlarges the subject.
   Left ( ) Widens the area that is captured by the camera.
When you continue to turn to the right ( ), the camera automatically switches from optical zoom to Intelligent Zoom and stops at the point where the zoom switches to Digital Zoom.
Once the lever is released and turned again, the camera switches to Digital Zoom.

* The focus range is not displayed when the focus mode is set to \( \text{PF/} \), or the shooting mode is set to \( \text{(Fireworks)} \).
Taking Pictures

The zoom bar is displayed as follows.

*1 You can zoom in to a maximum of 18× optically.
*2 The Intelligent Zoom range differs depending on the number of recorded pixels. See the following table.

**Recorded pixels and the maximum zoom ratio**

<table>
<thead>
<tr>
<th>Recorded Pixels</th>
<th>Intelligent Zoom</th>
<th>Digital Zoom</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>16M</strong></td>
<td>Not Available (optical zoom only)</td>
<td></td>
</tr>
<tr>
<td><strong>12M</strong></td>
<td>Not Available (optical zoom only)</td>
<td></td>
</tr>
<tr>
<td><strong>7M</strong></td>
<td>Approx. 27×</td>
<td>Equivalent to approx. 130×</td>
</tr>
<tr>
<td><strong>3M</strong></td>
<td>Approx. 40.5×</td>
<td></td>
</tr>
<tr>
<td><strong>2M</strong></td>
<td>Approx. 43.2×</td>
<td></td>
</tr>
<tr>
<td><strong>640</strong></td>
<td>Approx. 130× (Same as Digital Zoom)</td>
<td></td>
</tr>
</tbody>
</table>

- It is recommended to use a tripod or other support to prevent camera shake when taking pictures at high zoom.
- Pictures taken in the Digital Zoom range appear grainier than pictures taken in the optical zoom range.
- Intelligent Zoom is not available under the following conditions:
  - When the number of recorded pixels is set to **16M**/**12M** (optical zoom is available)
  - In **M** (Digital SR) mode
  - When the sensitivity is set to 3200 or 6400
- The image enlarged using Intelligent Zoom may appear rough on the display. This does not affect the quality of the recorded image.
- In **M** (Movie) mode, only Digital Zoom is available while recording.
To Set the Digital Zoom

The Digital Zoom is set to (On) in the default setting. To take pictures using only the optical zoom and Intelligent Zoom, set the Digital Zoom to (Off).

1 Press the MENU button in mode.
The [Rec. Mode] menu appears.

2 Use the four-way controller (▲▼) to select [Digital Zoom].

3 Use the four-way controller (◄►) to select ✓ or □.
   ✓ Uses Digital Zoom
   □ Uses only optical zoom and Intelligent Zoom

   The setting is saved.

4 Press the MENU button.
The camera returns to capture status.

Saving the Digital Zoom Function setting p.131

Taking Pictures of Dark Scenes (Night Scene Portrait/Night Scene/Digital SR/Fireworks/Candlelight Mode)

You can choose a shooting mode appropriate for taking pictures of dark scenes, such as nightscapes.

| Night Scene Portrait | For images of people at night. Use of a tripod or other support is advised. If the Face Detection function is activated when the flash mode is set to (Auto), the flash mode automatically changes to (Flash On + Red-eye). |
| Night Scene | For night time images. Use of a tripod or other support is suggested. |
1. **Press the four-way controller (▼) in 📷 mode.**
The Capture Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◀ ▶) to select 📷, 🌠, 🌟, 🧑, 😎 or 🌡️.**

3. **Press the OK button.**
The 📷, 🌠, 🌟, 🧑, 😎 or 🌡️ mode is selected and the camera returns to capture status.
When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

4. **Press the shutter release button halfway.**
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5. **Press the shutter release button fully.**
The picture is taken.

- The shutter speed tends to be slower when taking pictures of dark scenes.
- To prevent camera shake, set the Shake Reduction function (p.118) or use a tripod and/or remote control (optional) (p.95), or the self-timer function (p.92).
Taking Pictures of People (Portrait/Natural Skin Tone Mode)

The (Portrait) and (Natural Skin Tone) modes are suitable for taking pictures of people. The Face Detection function (p.72) operates for each shooting mode, making it easier to emphasize the subject’s face when taking pictures.

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Portrait</td>
<td>For capturing portraits. Reproduces a healthy and bright skin tone.</td>
</tr>
<tr>
<td>Natural Skin Tone</td>
<td>For images of people. Enhances skin tones while smoothing blemishes.</td>
</tr>
</tbody>
</table>

1. Press the four-way controller (▼) in \( \text{a} \) mode. The Capture Mode Palette appears.
2. Use the four-way controller (▲ ▼ ◀ ➤) to select \( \text{a} \) or \( \text{b} \).
3. Press the OK button.
   The \( \text{a} \) or \( \text{b} \) mode is selected and the camera returns to capture status.
   When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).
4. Press the shutter release button halfway.
   The focus frame on the display turns green when the camera focuses on the subject at the correct distance.
5 Press the shutter release button fully.
The picture is taken.

Taking Pictures of Children (Kids Mode)
The  (Kids) mode is suitable for taking pictures of moving children. It also reproduces healthy and bright skin tone. The Face Detection function (p.72) operates automatically for this mode, making it easier to emphasize the subject’s face when taking pictures.

1 Press the four-way controller (▼) in  mode.
The Capture Mode Palette appears.

2 Use the four-way controller (▲ ▼ ◄ ►) to select  .

3 Press the OK button.
The  mode is selected and the camera returns to capture status. When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

4 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5 Press the shutter release button fully.
The picture is taken.
Taking Pictures of Your Pet (Pet Mode)

In 🐱 (Pet) mode, the camera automatically releases the shutter when the pet is detected. Also the camera can register pets.

1. Press the four-way controller (▼) in 📸 mode.
   The Capture Mode Palette appears.

2. Use the four-way controller (↑↓←→) to select 🐱.

3. Press the OK button.
   The 🐱 mode is selected and the camera returns to capture status.
   When the camera detects the pet’s full face, a light blue pet detection frame appears, and the shutter is automatically released.

To Register the Pet

1. Press the 🐱 button on the capture status screen in 🐱 (Pet) mode.
   The pet selection screen appears.
2 Press the button again.
The pet registration screen appears.
Aiming the camera at the pet’s full face automatically releases the shutter and the pet registration confirmation dialog appears.

When you select [Registry] using four-way controller (▲) and press the OK button, the picture of the registered pet is indicated on the upper-left corner of the display and the camera returns to capture status.

When the camera detects the pet’s full face, a light blue pet detection frame appears, and the shutter is automatically released. You can also take a picture by pressing the shutter release button.

When you press the button twice in the capture status screen, the pet registration screen appears to register another pet. You can register up to three pets.

- When you press the MENU button on the pet registration screen, the registration will be canceled and the camera returns to still picture capture mode.
- Only dogs and cats can be registered in (Pet) mode. Other animals or human faces cannot be registered. You may not be able to register the pet’s face if, for example, the pet’s face is too small.
- The camera may not detect the registered pet’s face, depending on the shooting situation.
- [Focusing Area] is set to (Automatic Tracking AF) and the flash mode is set to (Flash Off). However, you can change these settings.
- [Focus Assist] is set to off. However, you can change this setting.
To Switch the Pet You Want to Shoot

If you have registered pets, choose the pet you want to shoot.

1. Press the 🐶 button on the capture status screen in 🐶 (Pet) mode. The pet registration screen appears.

2. Use the four-way controller (◀▶) to select the pet you want to shoot.

3. Press the OK button. The selected pet is switched to the pet you want to shoot and the camera returns to capture status.

To Delete the Pet from the Entry

1. Press the 🐶 button on the capture status screen in 🐶 (Pet) mode. The pet registration screen appears.

2. Use the four-way controller (◀▶) to select the pet you want to delete.

3. Press the Green button.

4. Use the four-way controller (▲) to select [Delete].

5. Press the OK button. The selected pet is deleted.
# Taking Pictures of Sports and Leisure Activities (Sport/Surf & Snow Mode)

<table>
<thead>
<tr>
<th>Sport</th>
<th>For a fast moving subject. Tracks the subject until the picture is taken.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Surf &amp; Snow</td>
<td>For bright images such as sand or snow. Accurately meters for bright scenes.</td>
</tr>
</tbody>
</table>

1. **Press the four-way controller (▼) in mode.**
   The Capture Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◀▶) to select ▼ or ◁.**

3. **Press the OK button.**
   The ▼ or ◁ mode is selected and the camera returns to capture status.
   When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

4. **Press the shutter release button halfway.**
   The focus frame on the display turns green when the camera focuses on the subject at the correct distance.
   When the ▼ mode is selected, the focus frame follows the subject while the shutter release button is pressed halfway.

5. **Press the shutter release button fully.**
   The picture is taken.
Taking Pictures Indoors (Party Mode)

The 🎉 (Party) mode is suitable for taking pictures indoors, such as snapshots at parties.

1. Press the four-way controller (▼) in 📷 mode.
   The Capture Mode Palette appears.

2. Use the four-way controller (▲ ▼ ◀ ▶) to select 🎉.

3. Press the OK button.
   The 🎉 mode is selected and the camera returns to capture status. When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

4. Press the shutter release button halfway.
   The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5. Press the shutter release button fully.
   The picture is taken.
Taking Pictures (Text Mode)

The **A** (Text) mode allows you to take clear pictures of written text. This is convenient for capturing a digital copy of an important document or enhancing legibility of small print.

| **A** Color | Maintains the original color of the text. |
| **A** Neg. Color | Reverses the color of the text. |
| **A** B & W | Turns the color of the text into black and white. |
| **A** Neg. B & W | Turns the color of the text into reversed black and white. |

1. **Press the four-way controller (▼) in **A** mode.**
   The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to select **A**.**

3. **Press the OK button.**
   The **A** mode selection screen appears.

4. **Use the four-way controller (▲▼) to select **A**, **A**, **A**, or **A**.**
5 **Press the OK button.**
The selected icon appears and the camera returns to capture status.
When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

6 **Press the shutter release button halfway.**
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

7 **Press the shutter release button fully.**
The picture is taken.

---

**Framing Your Pictures (Frame Composite Mode)**

In 📷 (Frame Composite) mode, you can take pictures using the frames stored in the camera.

---

1 **Press the four-way controller (▼) in 📷 mode.**
The Capture Mode Palette appears.

2 **Use the four-way controller (▲▼◄►) to select 📷.**

3 **Press the OK button.**
The 9-frame display of the frame selection screen appears.
4. Use the four-way controller (▲ ▼ ◀▶) to choose the frame you want to use.

5. Turn the zoom lever to the right (✓).
   The selected frame appears in single-image display.
   You can choose another frame using either of the following operations.

<table>
<thead>
<tr>
<th>Four-way controller (◀▶)</th>
<th>Press to choose a different frame.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom lever to the left (●)</td>
<td>Returns to the 9-frame display of the frame selection screen, and then lets you choose a different frame in the same way as Step 4.</td>
</tr>
</tbody>
</table>

6. Press the OK button.
   The framed image appears on the display.
   When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

7. Press the shutter release button halfway.
   The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

8. Press the shutter release button fully.
   The picture is taken.

   - The number of recorded pixels is fixed at 3M (2048×1536).
   - When the camera leaves the factory, it includes 3 default frames built-in. (The CD-ROM supplied with the camera contains a total of 90 frames, including the default frames.)
Optional Frames
The optional frames are stored in the CD-ROM (S-SW121) supplied with the camera. To use these frames, copy them from the CD-ROM (p.172). These optional frames are deleted if the files on the built-in memory are deleted with a computer or if the built-in memory is formatted.

Adding a Frame to a captured image  p.169

Using the Self-timer
In Self-timer mode, the picture is taken ten seconds or two seconds after the shutter release button is pressed.
Stabilize the camera with a tripod or other support when taking a picture using the self-timer.

| 1 | Self-timer | Use this mode when you want to be included in a group picture. The picture is taken approximately ten seconds after the shutter release button is pressed. |
| 2 sec. Self-timer | Use this mode to avoid camera shake. The picture is taken approximately two seconds after the shutter release button is pressed. |

1 Press the four-way controller (▲) in ◎ mode.
The [Drive Mode] screen appears.

2 Use the four-way controller (◀▶) to select ◎ and press the four-way controller (▼).
3 **Use the four-way controller (◄►) to select ◊or ◌and press the OK button.**

The camera is ready to take the picture using the self-timer. When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

4 **Press the shutter release button halfway.**

The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5 **Press the shutter release button fully.**

The picture is taken ten seconds or two seconds later.

---

**Caution**

Focusing may be compromised if you move the camera while the self-timer lamp is blinking when taking still pictures.

---

**memo**

- In ◊ (Movie) mode, recording will start after ten seconds (or two seconds).
- Press the shutter release button halfway while the self-timer is engaged to stop the countdown and press fully to restart the countdown.
- ◌ cannot be selected while the ◊ (Green) mode setting remains the default. Select ◌ in another shooting mode and then switch the shooting mode to ◊.

---

**Taking a Series of Pictures**

**Taking a Series of Pictures (Continuous Shooting/Burst Shooting Mode)**

In these modes, pictures are taken continuously as long as the shutter release button is pressed.

| Continuous Shooting | Each time a picture is taken, the image is saved in the memory before the next image is taken. The higher the image quality, the longer the interval between shots. You can continue shooting until the memory of the SD Memory Card or the built-in memory is full. |
Taking Pictures

* When [Shake Reduction] in the [Rec. Mode] menu is set to [CCD-Shift] (p.118), the CCD shifting sound may occur during shooting. This is not a malfunction.

<table>
<thead>
<tr>
<th>Burst Shooting(L)</th>
<th>The number of recorded pixels is fixed at 5M (2592×1944) and pictures are taken consecutively. The interval between shots becomes shorter in the following sequence: L, M, and H.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Burst Shooting(M)</td>
<td></td>
</tr>
<tr>
<td>Burst Shooting(H)*</td>
<td></td>
</tr>
</tbody>
</table>

* The number of pictures that can be taken consecutively and the frame rate per second vary depending on the shooting condition.

1. Press the four-way controller (▲) in mode.
   The [Drive Mode] screen appears.

2. Use the four-way controller ( ◄►) to select, L, M, or H and press the OK button.
   The camera is ready to take a series of pictures.

3. Press the shutter release button halfway.
   The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

4. Press the shutter release button fully.
   Pictures are taken continuously as long as you keep the shutter release button pressed.
Taking Pictures

You can use the remote control (optional) to take pictures while you are away from the camera.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>3-sec Remote Control</td>
<td>The shutter will be released after about three seconds when the shutter release button on the remote control unit is pressed.</td>
</tr>
<tr>
<td>0-sec Remote Control</td>
<td>The shutter will be released immediately when the shutter release button on the remote control unit is pressed.</td>
</tr>
</tbody>
</table>

1. **Press the four-way controller (▲) in camera mode.**
   The [Drive Mode] screen appears.
2 Use the four-way controller (◄►) to select 3s and press the four-way controller (▼).

3 Use the four-way controller (◄►) to select 3s or i and press the OK button.

The self-timer lamp begins to blink slowly and the camera is ready to take a picture with the remote control. When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

4 Point the remote control at the remote control receiver and press the shutter release button on the remote control.

The focus frame turns green when the subject is in focus and the camera takes a picture at the following timing.

- When 3s (3-sec Remote Control) is selected:
  - The self-timer lamp blinks quickly and the camera takes a picture after about three seconds.
- When i (0-sec Remote Control) is selected:
  - The camera takes a picture immediately.

- The operating range is approx. 4 m (13 ft) from the front of the camera when using the remote control unit.
- In 🎥 (Movie) mode, pressing the shutter release button again stops the recording.
- The camera takes a picture even if the focus is not achieved.
- If the shutter release button on the camera is pressed halfway during the countdown, the countdown stops. If the shutter release button on the remote control is pressed again, the camera starts the countdown again.
- 3s/i cannot be selected in 🌿 (Green) mode.
- The self-timer lamp does not flash in 🐶 (Pet) mode.
Using the Digital Wide Function (Digital Wide Mode)

In **WIDE** (Digital Wide) mode, you can stitch two vertical images captured with this camera into a single frame up to approx. 19 mm coverage (35 mm film equivalent).

1. **Press the four-way controller (▼) in ** mode.**
The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to select ** **.**
3 Press the OK button.
The camera enters the WIDE mode.
Turn the camera 90° clockwise and align your first picture.
When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

4 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5 Press the shutter release button fully.
The first captured image is temporarily saved, and the shooting screen for the second image is displayed.

6 Take the second image.
Overlap the image on the preview guide on the left of the screen to compose the second image. Repeat Steps 4 and 5 to take the second image.
The stitched first and second image appears on the display (Instant Review), and then is saved.

- To minimize distortion when taking the second image, turn the camera so that it pivots around the right edge of the preview guide on the screen.
- Some distortion may result from moving objects, repeating patterns, or if nothing exists when overlapping the first and second image on the preview guide.
- When the Face Detection function is activated (p.72), it works only when taking the first image (Blink Detection does not work.).
- The stitched together images are saved with the pixel size of 5M (2592×1944).
To Cancel after Taking the First Shot

1 When the shooting screen for the second image is displayed in Step 5 on p.98, press the OK button. A confirmation dialog appears.

2 Use the four-way controller (▲▼) to select an option and press the OK button.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save</td>
<td>Saves the first image and you can retake the first shot. The first image is saved in [3M] (2048×1536).</td>
</tr>
<tr>
<td>Discard</td>
<td>Discards the first image and you can retake the first shot.</td>
</tr>
<tr>
<td>Cancel</td>
<td>Returns to the shooting screen for the second image.</td>
</tr>
</tbody>
</table>

Taking Panoramic Pictures (Digital Panorama Mode)

In \[\text{\textbf{A}}\] (Digital Panorama) mode, you can stitch together two or three captured frames to create a panoramic photograph with the camera.

1 Press the four-way controller (▼) in \[\text{\textbf{A}}\] mode. The Capture Mode Palette appears.

2 Use the four-way controller (▲▼◄►) to select \[\text{\textbf{A}}\].
3 Press the **OK** button.
The camera enters the **Set shift direction** mode and the message [Set shift direction] is displayed.

4 **Use the four-way controller ( ◄► ) to choose the direction in which the images will be joined.**
The screen for taking the first frame is displayed.

When the camera detects a person’s face, the Face Detection function is activated and the face detection frame appears (p.72).

5 **Press the shutter release button halfway.**
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

6 **Press the shutter release button fully.**
The screen for taking the second frame is displayed after you take the first frame.

**If you select right ( ► ) in Step 4:**
The right edge of the first frame appears in semi-transparent form on the left edge of the display.

**If you select left ( ◄ ) in Step 4:**
The left edge of the first frame appears in semi-transparent form on the right edge of the display.

7 **Take the second frame.**
Move the camera so that the semi-transparent image and the actual view overlap and press the shutter release button.
8 **Take the third frame.**
Repeat Steps 5 to 7 to take the third frame. The panorama images are joined and a stitched together image appears. The stitched together image does not appear when [Instant Review] (p.69, p.119) is □ (Off).

- Some distortion may result from moving objects, repeating patterns, or if nothing exists when overlapping the first and second frames or the second and third frames on the preview guide.
- When the Face Detection function is activated (p.72), it works only when taking the first frame (Blink Detection does not work.).

---

**To Cancel after Taking the First or Second Frame**

1 **After shooting the first frame in Step 6 on p.100 or the second frame in Step 7, press the OK button.**
A confirmation dialog appears.

2 **Use the four-way controller (▲ ▼) to select an option and press the OK button.**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save</td>
<td>Saves the captured image(s) and you can retake the first frame. When this option is selected after shooting the second frame, the first and the second frames are stitched together and saved as a panoramic photograph.</td>

Unstitched images captured in 2M mode are saved with a pixel size of (1600×1200).
### Selecting the Flash Mode

<table>
<thead>
<tr>
<th>Flash Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO (Auto)</td>
<td>The flash discharges automatically depending on the light conditions. If the Face Detection function is activated, the flash mode is automatically set to AUTO.</td>
</tr>
<tr>
<td>FLASH OFF</td>
<td>The flash does not discharge, regardless of the brightness. Use this mode to take pictures where flash photography is prohibited.</td>
</tr>
<tr>
<td>FLASH ON</td>
<td>The flash discharges regardless of the brightness.</td>
</tr>
<tr>
<td>AUTO + RED-EYE</td>
<td>This mode reduces the phenomenon of red eyes caused by the light from the flash being reflected in the subject’s eyes. The flash discharges automatically. A pre-flash discharges before the main flash.</td>
</tr>
<tr>
<td>FLASH ON + RED-EYE</td>
<td>This mode reduces the phenomenon of red eyes caused by the light from the flash being reflected in the subject’s eyes. The flash discharges regardless of the light conditions. A pre-flash discharges before the main flash.</td>
</tr>
</tbody>
</table>

- The flash mode is fixed at AUTO in the following situations:
  - When (Movie) or (Fireworks) is selected as the capture mode
  - When (Continuous Shooting), (Burst Shooting(L)), (Burst Shooting(M)) or (Burst Shooting(H)) is selected as the drive mode
  - When (Infinity) is selected as the focus mode
- In (Digital Wide) or (Digital Panorama) mode, the flash mode is set to AUTO. However other flash mode setting can be selected.
- In (Green) mode, you can only select AUTO or FLASH OFF.
- In (Night Scene) mode, you cannot select AUTO and FLASH OFF.

**Caution:** Using the flash when capturing images at a close distance may cause irregularities in the image due to the light distribution.
1 Press the four-way controller (▼) in  play mode.
The [Flash Mode] screen appears.
The flash mode changes each time the button is pressed. You can also change the setting using the four-way controller (▲ ▼).

2 Press the OK button.
The setting is saved and the camera returns to capture status.

About the red-eye phenomenon
Taking pictures using the flash may cause the subject’s eyes to appear red in the resulting picture. This phenomenon occurs when the light from the flash is reflected in the subject’s eyes. It can be reduced by illuminating the area around the subject or moving closer to the subject and zooming out to a wider angle. Setting the flash mode to  
 or  
 is also an effective way of reducing red eyes. If the subject’s eyes appear red despite such precautions, they can be corrected by the red-eye compensation function (p.168).

Saving the Flash Mode setting p.131
### Selecting the Focus Mode

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AF Standard</strong></td>
<td>This mode is used when the distance to the subject is 40 cm (16 in.) or more. The camera is focused on the subject in the autofocus area when the shutter release button is pressed halfway.</td>
</tr>
<tr>
<td><strong>Macro</strong></td>
<td>This mode is used when the distance to the subject is approx. 10 cm to 50 cm (4 in. to 20 in.). The camera is focused on the subject in the autofocus area when the shutter release button is pressed halfway.</td>
</tr>
<tr>
<td><strong>Super Macro</strong></td>
<td>This mode is used when the distance to the subject is approx. 4 cm to 30 cm (1.6 in. to 12 in.). The camera is focused on the subject in the autofocus area when the shutter release button is pressed halfway.</td>
</tr>
<tr>
<td><strong>Pan Focus</strong></td>
<td>This mode is used when you ask someone to take pictures for you, or when taking pictures of the scenery through the window of a car or train. The entire picture, from the front to the back, is focused.</td>
</tr>
<tr>
<td><strong>Infinity</strong></td>
<td>This mode is used for taking distant objects. The flash is set to ④ (Flash Off).</td>
</tr>
<tr>
<td><strong>Manual Focus</strong></td>
<td>This mode lets you adjust the focus manually.</td>
</tr>
</tbody>
</table>

1. **Press the four-way controller (▶) in 📸 mode.**

   The [Focus Mode] screen appears. The focus mode changes each time the button is pressed. You can also change the setting using the four-way controller (▲ ▼).
Press the OK button.
The setting is saved and the camera returns to capture status.

- In (Green) mode, you can only select AF, or PF.
- The focus mode is fixed at in (Fireworks) mode.
- When AF is selected and the subject is closer than 40 cm, the camera automatically focuses from 10 cm (Auto-Macro function). In this case, appears on the display.
- When shooting with selected, if the subject is further than 50 cm away, the camera automatically focuses to (Infinity). By pressing the shutter release button fully, you can also take a picture even when the focus is not set.

Saving the Focus Mode setting p.131

To Set the Focus Manually (Manual Focus)

1 Press the four-way controller (▲) in mode.
The [Focus Mode] screen appears.

2 Press the four-way controller (▲) to select MF.

3 Press the OK button.
The central portion of the image is magnified to full screen on the display.

4 Use the four-way controller (▲▼) to adjust the focus.
The MF indicator appears on the display to indicate the approximate distance to the subject. Adjust the focus using the indicator as a guide.

▲ for distant focus
▼ for closer focus
Press the OK button.
The focus is fixed and the camera returns to capture status. After the focus is fixed, you can press the four-way controller (▶) again to display the MF indicator and readjust the focus.

Caution
The shooting mode and drive mode cannot be changed while the MF indicator is displayed.

Memo
To switch from MF to another focus mode, press the four-way controller (▶) while the MF indicator is displayed.

To Set the Focusing Area
You can change the autofocus area (Focusing Area).

<table>
<thead>
<tr>
<th>Multiple</th>
<th>Normal autofocus area</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spot</td>
<td>The autofocus area becomes smaller.</td>
</tr>
<tr>
<td>Automatic Tracking AF</td>
<td>Keeps moving subjects in focus.</td>
</tr>
</tbody>
</table>

2. Use the four-way controller (▲ ▼) to select [AF Setting].

4. Press the four-way controller (▶). A pull down menu appears.

5. Use the four-way controller (▲ ▼) to change the focusing area setting.

6. Press the OK button. The setting is saved.
Press the **MENU** button twice.
The camera returns to capture status.

**memo**
- In ‼️ (Movie) and 🎬 (Frame Composite) modes, the focusing area cannot be set to ‼️.
- In 🌿 (Green) and 🎯 (Auto Picture) modes, the focusing area is fixed at [ ].
- If you change the [Focusing Area] setting frequently, you can save time by assigning it to the Green button (p.123).

## Setting the AF Assist Light (Focus Assist)
The camera automatically emits the focus assist light in dark shooting situations. You can set the light to on or off.

1. **Press the MENU button in 📸 mode.**
The [📸 Rec. Mode] menu appears.

2. **Use the four-way controller ( ▲ ▼ ) to select [AF Setting].**

3. **Press the four-way controller ( ▶ ).**
The [AF Setting] screen appears.

4. **Use the four-way controller ( ▲ ▼ ) to select [Focus Assist].**

<table>
<thead>
<tr>
<th>AF Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Focusing Area</td>
</tr>
<tr>
<td>Focus Assist</td>
</tr>
</tbody>
</table>

5. **Use the four-way controller ( ◀ ▶ ) to select [✓ (On)/☐ (Off)].**
The setting is saved.

6. **Press the MENU button twice.**
The camera returns to capture mode.

**Caution**
Looking at the light directly will not create a safety hazard. However, do not look into the focus assist light from a very short distance since you may feel dazzled.
Taking Pictures

You can choose from six recorded pixels settings for still pictures. The larger the number of recorded pixels, the clearer the details will appear when you print your picture. As the quality of the printed picture also depends on the image quality, exposure control, resolution of the printer, and other factors, you do not need to select more than the required number of recorded pixels. The more pixels there are, the larger the picture and the bigger the file size.

Refer to the following table for the appropriate settings according to expected usage.

<table>
<thead>
<tr>
<th>Recorded Pixels</th>
<th>Expected Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>M 4608×3456</td>
<td>For printing high quality photos or A4-size pictures or larger, or editing images on a computer.</td>
</tr>
<tr>
<td>3456×3456</td>
<td>Clearer</td>
</tr>
<tr>
<td>4608×2592</td>
<td>For making postcard-size prints.</td>
</tr>
<tr>
<td>3072×2304</td>
<td>For a natural feeling of expansiveness with the same aspect ratio as HDTV.</td>
</tr>
<tr>
<td>1920×1080</td>
<td>For posting on a website or attaching to e-mail.</td>
</tr>
<tr>
<td>640×480</td>
<td></td>
</tr>
</tbody>
</table>

The default setting is M.

If you select 12M or 2M, the aspect ratio of the image is 16:9 and the monitor display for recording and playback is as shown on the right.

• The camera does not emit the focus assist light under the following conditions.
  - In (Movie), (Fireworks) modes.
  - When the focus mode is set to PF (Pan Focus), (Infinity) or MF (Manual Focus).
• The default setting in (Pet) mode is (Off).
1 Press the MENU button in  ▴ mode.
The [  ▴  Rec. Mode] menu appears.

2 Use the four-way controller ( ▲ ▼ ) to select [Recorded Pixels].

3 Press the four-way controller ( ◄ ).
A pull-down menu appears.

4 Use the four-way controller ( ▲ ▼ ) to change the number of recorded pixels.

5 Press the OK button.
The setting is saved.

6 Press the MENU button.
The camera returns to capture status.

- The number of recorded pixels for images captured in  ▴ (Green) mode is fixed at 16M.
- The number of recorded pixels for images captured in  □  (Frame Composite) is fixed at 3M.
- The number of recorded pixels for images captured in  ▶  (Digital SR) or  ▼  (Digital Wide) mode is fixed at 5M. (The number of recorded pixels will be 3M if you exit the ▼ mode without taking the second picture.)
- If you change the [Recorded Pixels] setting frequently, you can save time by assigning it to the Green button (p.123).
Setting the Exposure (EV Compensation)

You can adjust the overall brightness of the picture. Use this function to take pictures that are intentionally overexposed or underexposed.

1. **Press the MENU button in 📸 mode.**
   The [📸 Rec. Mode] menu appears.

2. **Use the four-way controller (▲ ▼) to select [EV Compensation].**

3. **Use the four-way controller (◄ ►) to select the EV value.**
   To brighten, select a positive (+) value. To darken, select a negative (–) value.
   You can choose the EV setting in the range of –2.0 EV to +2.0 EV in 1/3 EV steps.

4. **Press the MENU button.**
   The camera returns to capture status.

   - When the histogram is displayed in still picture capture mode/playback mode, you can check the exposure (p.28).
   - The EV compensation function cannot be used in 📸 (Green) or 📸 (Auto Picture) mode.
   - If you change the [EV Compensation] setting frequently, you can save time by assigning it to the Green button (p.123).

**Saving the EV Compensation value setting**

p.131
Correcting the Brightness (D-Range Setting)

Expands the dynamic range and prevents bright and dark areas from occurring. [Highlight Correction] adjusts the bright areas when the image is too bright and [Shadow Correction] adjusts the dark areas when the image is too dark.

2. Use the four-way controller (▲▼) to select [D-Range Setting].

4. Use the four-way controller (▲▼) to select [Highlight Correction] or [Shadow Correction].

5. Use the four-way controller (◀▶) to select (On) or (Off).

6. Press the MENU button twice. The camera returns to capture status. The D-Range Setting icon appears on the display.

<table>
<thead>

- Set another white balance if you are not satisfied with the color balance of pictures taken with the [White Balance] set to AWB.
- Depending on the selected shooting mode, the white balance setting may not be selected. Refer to “Functions Available for Each Shooting Mode” (p.228) for details.

1. **Press the MENU button in Camera mode.**
   The [Rec. Mode] menu appears.

2. **Use the four-way controller (↑ ↓) to select [White Balance].**

3. **Press the four-way controller (►).**
4 Use the four-way controller (▲ ▼) to change the setting.
You can check the result of selected white balance setting on the preview image each time you press the four-way controller (▲ ▼).

5 Press the OK button.
The setting is saved.

6 Press the MENU button.
The camera returns to capture status.
Refer to the section "To Set the White Balance Manually" (p.113) for instructions on adjusting the white balance manually.

memo
If you change the [White Balance] setting frequently, you can save time by assigning it to the Green button (p.123).

Saving the White Balance setting p.131

To Set the White Balance Manually

Have a blank sheet of white paper or similar material ready.

1 In the [White Balance] screen, use the four-way controller (▲ ▼) to select (Manual).

2 Point the camera at the blank sheet of paper or other material so that it fills the frame displayed in the center of the screen.

3 Press the shutter release button fully.
The white balance is automatically adjusted.
4 Press the OK button.
The setting is saved and the [Rec. Mode] menu reappears.

5 Press the MENU button.
The camera returns to capture status.

Setting the AE Metering

You can set the area of the screen where the brightness is metered to
determine the exposure.

<table>
<thead>
<tr>
<th>Multi-segment metering</th>
<th>The camera divides the image into 256 areas, meters the brightness and determines the exposure.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Center-weighted metering</td>
<td>The camera takes a reading of the overall brightness of the picture with the center of the image having more influence on the exposure.</td>
</tr>
<tr>
<td>Spot AE metering</td>
<td>The camera determines the exposure by metering the brightness only at the center of the image.</td>
</tr>
</tbody>
</table>

1 Press the MENU button in 📷 mode.
The [Rec. Mode] menu appears.

2 Use the four-way controller (▲ ▼) to select [AE Metering].

3 Press the four-way controller (►).
A pull-down menu appears.

4 Use the four-way controller (▲ ▼) to select the AE Metering setting.

5 Press the OK button.
The setting is saved.

6 Press the MENU button.
The camera returns to capture status.
• When the shutter release button is pressed halfway, the brightness is metered and the exposure is determined.
• When the subject is outside the focusing area and you want to use (Spot AE metering), aim the camera at the subject and press the shutter release button halfway to lock the exposure, then compose your picture again and press the shutter release button fully.
• Depending on the selected shooting mode, the AE metering setting may not be changed. Refer to “Functions Available for Each Shooting Mode” (p.228) for details.
• If you change the [AE Metering] setting frequently, you can save time by assigning it to the Green button (p.123).

Saving the AE Metering setting p.131

Setting the Sensitivity

You can select the sensitivity to suit the brightness of the surroundings.

<table>
<thead>
<tr>
<th>AUTO</th>
<th>The sensitivity is automatically adjusted by the camera. (Sensitivity 80 - 1600)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>The lower the sensitivity, the less noise that affects the image. The shutter speed will be slower in low light conditions.</td>
</tr>
<tr>
<td>100</td>
<td></td>
</tr>
<tr>
<td>200</td>
<td></td>
</tr>
<tr>
<td>400</td>
<td></td>
</tr>
<tr>
<td>800</td>
<td></td>
</tr>
<tr>
<td>1600</td>
<td>Higher sensitivity settings use faster shutter speeds in low light conditions to reduce camera shake, but the image may be affected by noise.</td>
</tr>
<tr>
<td>3200</td>
<td></td>
</tr>
<tr>
<td>6400</td>
<td></td>
</tr>
</tbody>
</table>

1 Press the MENU button in  mode.
The [Rec. Mode] menu appears.

2 Use the four-way controller (▲▼) to select [Sensitivity].

3 Press the four-way controller (►).A pull-down menu appears.
4 Use the four-way controller (▲▼) to change the sensitivity.

5 Press the OK button.
The setting is saved.

6 Press the MENU button.
The camera returns to capture status.

- When the sensitivity is set to 3200 or 6400, the number of recorded pixels is fixed at 5M (2592×1944).
- When set to ❖ (Green) or 🎥 (Movie) mode, only AUTO (sensitivity 80-800) is available.
- When set to 🎈 (Digital SR) mode, only AUTO (sensitivity 80-6400) is available.
- When set to 🎆 (Fireworks) mode, the sensitivity is fixed at its minimum setting.
- If you change the [Sensitivity] setting frequently, you can save time by assigning it to the Green button (p.123).

Saving the Sensitivity setting ➔ p.131

Setting the AUTO ISO Range

Set the sensitivity range when the sensitivity is set to AUTO. You can select from 80-100, 80-200, 80-400, 80-800, and 80-1600.

1 Press the MENU button in ✸ mode.
The [Rec. Mode] menu appears.

2 Use the four-way controller (▲▼) to select [AUTO ISO Range].

3 Press the four-way controller (▶).
A pull-down menu appears.
4 Use the four-way controller (▲▼) to select the sensitivity adjustment range.

5 Press the OK button.
The setting is saved.

6 Press the MENU button.
The camera returns to capture status.

When [Highlight Correction] in [D-Range Setting] is set to ✓ (On), select from 160-200, 160-400, 160-800, and 160-1600.

Setting the Blink Detection Function

This specifies whether the Blink Detection function works when the Face Detection function is activated. The default setting is ✓ (On).

1 Press the MENU button in _APPS mode.
The [ _APPS Rec. Mode] menu appears.

2 Use the four-way controller (▲▼) to select [Blink Detection].

3 Use the four-way controller ( ◄►) to select ✓ or □.
   ✓ Blink Detection function works.
   □ Blink Detection function does not work.

The setting is saved.

4 Press the MENU button.
The camera returns to capture status.

Blink Detection  p.69
Setting the Shake Reduction Function

You can set this function to correct camera shake which can occur during shooting. You can correct camera shake using optical shake reduction only (CCD-Shift), or the both optical and electronic shake reductions (Dual). The default setting is the optical shake reduction only (CCD-Shift).

<table>
<thead>
<tr>
<th>CCD-Shift</th>
<th>Optical shake reduction only is used.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dual</td>
<td>Both optical and electronic shake reductions are used.</td>
</tr>
<tr>
<td>Off</td>
<td>No shake reductions are used.</td>
</tr>
</tbody>
</table>

Use the Movie SR function (p.130) to correct camera shake in (Movie) mode.

2. Use the four-way controller (▲ ▼) to select [Shake Reduction].
3. Press the four-way controller (►). A pull-down menu appears.
4. Use the four-way controller (▲ ▼) to choose the Shake Reduction setting.
5. Press the OK button. The setting is saved.
6. Press the MENU button. The camera returns to capture status. One of the following icons appears on the display.
When the shutter release button is pressed halfway with [Shake Reduction] set to [CCD-Shift] or [Dual].

When [Shake Reduction] is set to [Off]. (If the camera shake is likely to occur, 📸 is indicated when the shutter button is pressed halfway.)

- When [Shake Reduction] is set to [Dual], camera shake is corrected after shooting, and then the corrected image is saved.
- When [Shake Reduction] is set to [CCD-Shift], CCD shifting sound may occur during shooting with 📸 (Burst Shooting(H)). This is not malfunction.

In the following situations, [Shake Reduction] cannot be set to [Dual] (only [CCD-Shift] or [Off] can be selected in the pull-down menu.). If [Shake Reduction] is set to [Dual] beforehand, setting automatically changes to [CCD-Shift].
- When 🎥 (Movie), 🎨 (Fireworks), 🎨 (Frame Composite), 📜 (Digital Wide) or 🧿 (Digital Panorama) mode is selected as the shooting mode
- When 🕒 (Self-timer), 📸 (Continuous Shooting), 📸 (Burst Shooting(L)), 📸 (Burst Shooting(M)) or 📸 (Burst Shooting(H)) is selected as the drive mode
- When the flash discharges
- When the shutter speed is slower than 1/4 sec.
- When the sensitivity is set to 1600 or higher
- During Voice Recording

**Setting the Instant Review**

Use this setting to specify whether or not an Instant Review is displayed immediately after images are taken. The default setting is ✅ (On).

1. **Press the MENU button in 📸 mode.**
The [📸 Rec. Mode] menu appears.

2. **Use the four-way controller (▲▼) to select [Instant Review].**
3 Use the four-way controller ( ◀ ▶ ) to select ✔ or □.
   ✔ Instant Review is displayed.
   □ Instant Review is not displayed.

4 Press the MENU button.
The camera returns to capture status.

Instant Review ➝ p.69

If the Blink Detection function worked when shooting, the message [Closed eyes have been detected] appears for 3 seconds during Instant Review.

Setting the Image Sharpness (Sharpness)
You can give the image sharp or soft outlines.

1 Press the MENU button in ◌ mode.
The [ ◌ Rec. Mode] menu appears.

2 Use the four-way controller ( ▲ ▼ ) to select [Sharpness].

3 Use the four-way controller ( ◀ ▶ ) to change the sharpness level.
   ▼ ▼ ▼ Soft
   ▼ ▼ ▼ Normal
   ▼ ▼ ▼ Sharp

4 Press the MENU button.
The camera returns to capture status.

If you change the [Sharpness] setting frequently, you can save time by assigning it to the Green button (p.123).
Setting the Color Saturation (Saturation)
You can set the color saturation.

1 Press the MENU button in  mode. The [  Rec. Mode] menu appears.

2 Use the four-way controller ( ▲ ▼ ) to select [Saturation].

3 Use the four-way controller ( ◀▶ ) to change the saturation level.

- ▼+ Low
- ▲+ Normal
- ▼▼ High

4 Press the MENU button. The camera returns to capture status.

If you change the [Saturation] setting frequently, you can save time by assigning it to the Green button (p.123).

Setting the Image Contrast (Contrast)
You can set the image contrast level.

1 Press the MENU button in  mode. The [  Rec. Mode] menu appears.

2 Use the four-way controller ( ▲ ▼ ) to select [Contrast].

3 Use the four-way controller ( ◀▶ ) to change the contrast level.

- ▼+ Low
- ▲+ Normal
- ▼▼ High
Press the MENU button.  
The camera returns to capture status.

If you change the [Contrast] setting frequently, you can save time by assigning it to the Green button (p.123).

**Setting the Date Imprint Function**

You can choose whether to imprint the date and/or time when taking still pictures.

1. **Press the MENU button in ** mode.  
The [Rec. Mode] menu appears.

2. **Use the four-way controller (▲▼) to select [Date Imprint].**

3. **Press the four-way controller (►).**  
A pull-down menu appears.

4. **Use the four-way controller (▲▼) to select the Date Imprint details.**  
Choose from [Date], [Date & Time], [Time] or [Off].

5. **Press the OK button.**  
The setting is saved.

6. **Press the MENU button.**  
The camera returns to capture status.

- The date and/or time imprinted with the Date Imprint function cannot be deleted.
- Note that if the printer or the image editing software is set to print the date and the images to be printed already have the date and/or time imprinted, the imprinted dates and/or times may overlap.
Taking Pictures

You can take pictures with clearer details by using image processing with IQ enhancer technique.

1 Press the MENU button in ◆ mode.
The [◆ Rec. Mode] menu appears.

2 Use the four-way controller (▲▼) to select [IQ Enhancer].

3 Use the four-way controller (◄►) to select [✓ (On)/ □ (Off)].

   ✓ (On)  IQ enhancer function works
   □ (Off) IQ enhancer function does not work

The setting is saved.

4 Press the MENU button.
The camera returns to capture mode.

• Date appears on the display in ◆ mode when [Date Imprint] is set.
• The date and/or time are imprinted on the picture with the display style set in the [Date Adjustment] screen (p.48).

Setting the IQ Enhancer Processing

IQ enhancer does not function in the following situations:
• When the sensitivity is set to 3200 or 6400
• In the ◆ (Digital SR) mode
• When the drive mode is set to ◄ ◄ ◄ (Burst Shooting(L/M/H))

Setting the Green Button

You can assign one of the following functions to the ◆ (Green) button:
[◆ Green Mode] (p.76), [Voice Recording] (p.182), [Movie] (p.127) or [Fn Setting]. You can activate the assigned function by just pressing the ◆ (Green) button.

Green Mode  Press the ◆ button to shoot in ◆ (Green) mode. (Default setting)
Voice Recording | Press the button to record sound.
---|---
Movie | Press the button to record a movie.

**Fn Setting**

Press the button to use the functions assigned to the four-way controller (▲▼◄►). By assigning frequently used functions to the four-way controller, you can easily change the settings during shooting.

The functions that can be set differ depending on the capture mode used before the menu button is pressed.

- When you press the **menu** button in still picture capture mode: Still picture capture functions are assigned.
- When you press the **menu** button in movie recording mode: Movie recording functions are assigned.

### Default settings of Fn Setting

<table>
<thead>
<tr>
<th>Four-way Controller</th>
<th>Still Picture Mode</th>
<th>Movie Mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>▲</td>

<td>White Balance</td>
</tr>
</tbody>
</table>

1. **Press the menu button in mode.**
   The [Rec. Mode] menu appears.

2. **Use the four-way controller (▲▼) to select [Green Button].**

   ![Rec. Mode Menu]

   When the camera is the mode by pressing the button, you cannot select [Green Button] in the [Rec. Mode] menu. Change the shooting mode other than first to select [Green Button].

3. **Press the four-way controller (►).**
   The [Green Button] screen appears.

   ![Menu Options]

   If [Fn Setting] have already been registered, press the four-way controller (►) once again.
4 Use the four-way controller (▲▼) to select the function you want to register and press the OK button.
When [Green Mode], [Voice Recording] or [Movie] is selected, the setting is saved.
When [Fn Setting] is selected, proceed to Step 6.

5 Press the MENU button.
The camera returns to capture mode.

When Fn Setting is Selected

6 Use the four-way controller (▲▼) to select a key to which to assign a function.

7 Press the four-way controller (▶). A pull-down menu appears.

8 Use the four-way controller (▲▼) to select the function you want to register.
The following functions can be registered.

<table>
<thead>
<tr>
<th>Still picture mode functions</th>
<th>Recorded Pixels/White Balance/Focusing Area/AE Metering/Highlight Correction/Shadow Correction/Sensitivity/EV Compensation/Sharpness/Saturation/Contrast</th>
</tr>
</thead>
<tbody>
<tr>
<td>Movie mode functions</td>
<td>Recorded Pixels/Movie SR/White Balance/Focusing Area/EV Compensation/Sharpness/Saturation/Contrast</td>
</tr>
</tbody>
</table>
9  Press the OK button.
The setting is registered.
Repeat Steps 6 to 9 to register other keys.

10 Press the MENU button twice.
The camera returns to capture status.

Memo
Only one function can be registered to each key.

To Use Fn Setting

1  Press the button in mode.
The functions registered with Fn Setting on the [Fn Setting] screen appear.
The displayed functions differ depending on whether the camera is in still picture mode or movie mode before the button is pressed.

2  Use the four-way controller (▲▼◄►) to select the function you want to change.

3  Use the four-way controller (▲▼ or ◄►) to change the setting.

4  Press the OK button.
The setting is saved and the camera returns to capture status.
Recording a Movie

This mode enables you to record movies. Sound is recorded at the same time.

1. **Press the four-way controller (▼) in Mode.**
   The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to select (Movie).**

3. **Press the OK button.**
   The camera enters the mode and returns to capture status.

The following information appears on the display.

1. Movie mode icon
2. Recording indicator (blinks during recording)
3. Remaining recordable time
4. Focus frame (does not appear during recording)
5. Movie shake reduction icon
You can change the captured area by turning the zoom lever to the left or right.
Right (↑) Enlarges the subject.
Left (↓↓) Widens the area that is captured by the camera.

4 **Press the shutter release button fully.**
Recording starts. You can continue recording until the built-in memory or the SD Memory Card is full, or the size of the recorded movie reaches 2 GB.

5 **Press the shutter release button fully.**
Recording stops.

### Playing Back a Movie  → p.135

- The flash does not discharge in 📷 mode.
- The focus mode can be changed before recording starts.
- When the focus mode is set to MF (Manual Focus), you can adjust the focus before recording starts.
- You can use the optical zoom only before recording, while the Digital Zoom is available both before and during recording.
- Even if you change the display mode by pressing the OK/DISPLAY button while recording a movie, the histogram cannot be displayed on the monitor.
- When the shooting mode is set to 📺, the Face Detection function is automatically activated. You can switch to Smile Capture or Face Detection Off by pressing the 📼 button before starting recording a movie (p.72). When the Smile Capture function is selected, movie recording starts automatically when the camera detects the subject’s smile. However, depending on the condition of the detected faces, movie recording may not start automatically because the Smile Capture function may not work. If this happens, press the shutter release button to start movie recording.
- You can record a movie using the remote control unit (optional) (p.95).

### Keeping the Shutter Release Button Pressed

If you keep the shutter release button pressed for more than one second, recording will continue as long as you keep the button pressed. Shooting stops when you take your finger off the shutter release button.
Selecting the Recorded Pixels and Frame Rate for Movies

You can choose from the following recorded pixels and frame rate settings for movies. The more pixels there are, the clearer the details and the bigger the file size. The more frames per second, the better the quality of the movie, but the file size becomes larger.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Recorded Pixels</th>
<th>Frame Rate</th>
<th>Use</th>
</tr>
</thead>
<tbody>
<tr>
<td>M</td>
<td>1280×720</td>
<td>30 fps</td>
<td>Records images in HDTV format (16:9). Movement is recorded smoothly. (default setting)</td>
</tr>
<tr>
<td>F</td>
<td>1280×720</td>
<td>15 fps</td>
<td>Records images in HDTV format (16:9). Increases the total recording time by making the file size smaller.</td>
</tr>
<tr>
<td>G</td>
<td>640×480</td>
<td>30 fps</td>
<td>Suitable for viewing on a TV or computer screen. Movement is recorded smoothly.</td>
</tr>
<tr>
<td>H</td>
<td>640×480</td>
<td>15 fps</td>
<td>Suitable for viewing on a TV or computer screen. Increases the total recording time by making the file size smaller.</td>
</tr>
<tr>
<td>I</td>
<td>320×240</td>
<td>30 fps</td>
<td>Suitable for posting on a website or attaching to e-mail. Movement is recorded smoothly.</td>
</tr>
<tr>
<td>J</td>
<td>320×240</td>
<td>15 fps</td>
<td>Suitable for posting on a website or attaching to e-mail. Increases the total recording time by making the file size smaller.</td>
</tr>
</tbody>
</table>

* The frame rate (fps) indicates the number of frames per second.

1. **Press the MENU button in ◓ mode.**
   The [ ◓ Rec. Mode] menu appears.

2. **Use the four-way controller ( ▲ ▼) to select [Movie].**

3. **Press the four-way controller ( ► ).**
   The [Movie] screen appears.

4. **Use the four-way controller ( ▲ ▼) to select [Recorded Pixels].**

5. **Press the four-way controller ( ► ).**
   A pull-down menu appears.
6 Use the four-way controller (▲▼) to select the number of recorded pixels and frame rate.

7 Press the OK button.  
The setting is saved.

8 Press the MENU button twice.  
The camera returns to capture status.

Setting the Movie SR (Movie Shake Reduction) Function

In 🎥 mode, you can correct camera shake while you are recording a movie with the Movie SR (Movie Shake Reduction) function.

1 Press the MENU button in 📹 mode.  
The [📸 Rec. Mode] menu appears.

2 Use the four-way controller (▲▼) to select [Movie].

3 Press the four-way controller (►).  
The [Movie] screen appears.

4 Use the four-way controller (▲▼) to select [Movie SR].

5 Use the four-way controller (◄►) to select ✓ or □.  
   ✓ Corrects camera shake.  
   □ Does not correct camera shake.

   The setting is saved.

6 Press the MENU button twice.  
The camera returns to capture status.
The Memory function is for saving the current camera settings when the camera is turned off.
For some camera settings, the Memory function is always set to ☑️ (On) (the settings are saved when the camera is turned off), while for others you can choose ☑️ or ☐️ (Off) (to choose whether the settings are saved or not when the camera is turned off). The items which can be set to ☑️ or ☐️ in the Memory function are shown in the table below. (Items not listed here are always saved in the selected settings when the camera is turned off.)
If you select ☑️, the settings will be saved in the status they were in immediately before the camera was turned off. If you select ☐️, the settings will be reset to the defaults when the camera is turned off. The table below also shows whether the Memory default setting for each item is ☑️ or ☐️.

Playing Back and Deleting Images

### Playing Back Still Pictures

1. **Press the button after taking a picture.**
   The camera enters the mode and the captured image appears on the display (single-image display).

   ![Camera Display](image)

   - button
   - Four-way controller

2. **Press the four-way controller ( ).**
   The previous or next image appears.

   To Play Back the Previous or Next Image

3. **To Delete the Displayed Image**
   Press the button while the image is displayed to display the Delete screen. Press the four-way controller ( ) to select [Delete] and press the OK button.

   ![Delete Screen](image)

   - Delete
   - Cancel
   - OK

For information on other deletion procedures p.148
Playing Back a Movie

You can play back the movies you have taken. The sound is played back at the same time.

1. **In ** mode, use the four-way controller (➡️➡️) to choose the movie you want to play back.

2. **Press the four-way controller (▲).**

   Playback starts.

   **Available operations during playback**

<table>
<thead>
<tr>
<th>Operation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom lever to the right (↑)</td>
<td>Increases the volume.</td>
</tr>
<tr>
<td>Zoom lever to the left (↓↓↓↓)</td>
<td>Reduces the volume.</td>
</tr>
<tr>
<td>Four-way controller (▲)</td>
<td>Pauses playback.</td>

</tbody>
</table>

3. **Press the four-way controller (▼).**

   Playback stops.
Multi-Image Display

You can display four or nine thumbnails of captured images at a time.

1 In \( \Rightarrow \) mode, turn the zoom lever to the left (\( \Rightarrow \)).

The four-image display appears showing a page consisting of four thumbnail images. Turn the zoom lever to the left (\( \Rightarrow \)) again to switch to nine-image display.

A page consisting of four or nine thumbnail images appears. The displayed images change four or nine images at a time page by page.

Use the four-way controller (\( \uparrow \downarrow \leftarrow \rightarrow \)) to move the frame. If there are too many images to display on one page, pressing the four-way controller (\( \uparrow \leftarrow \)) while the image ① is selected will display the previous page. Similarly, if you choose image ② and press the four-way controller (\( \downarrow \rightarrow \)), the next page appears.
The icons that appear on the images indicate the following:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(No icon)</td>
<td>Still picture without sound</td>
</tr>
<tr>

<td>Movie (the first frame appears)</td>
</tr>
<tr>
<td>🎧 (With image)</td>
<td>Still picture with sound</td>
</tr>
<tr>
<td>🎧 (Without image)</td>
<td>Sound file only</td>
</tr>
</tbody>
</table>

Press the OK button to switch to single-image display of the selected image.
Press the ➤ button to switch to 📷 mode.

**Folder Display/Calendar Display**

In nine-image display, turn the zoom lever to the left (ToLeft) to switch to folder display or calendar display. Press the Green button to switch between folder display and calendar display.

**1 In 📷 mode, turn the zoom lever to the left (ToLeft) three times.**
The screen changes to folder display or calendar display.

**Folder display**
The list of folders with recorded images and sound files appears.

- **Four-way controller (▲▼◄►)**: Moves the frame.
- **Zoom lever to the right (Zoom)/OK button**: Displays the images in the selected folder in nine-image display.
- **MENU button**: Returns to nine-image display.
**Calendar display**
Images and sound files are displayed by date in calendar format. A thumbnail of the first image recorded on each date is displayed on the calendar. ¶ appears for dates on which a sound file was the first recorded file.

### Using the Playback Functions

1. **Press the four-way controller (▼) in Playback Mode.**
   The Playback Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◆ ◆) to choose a playback mode.**
   The guide for the selected function appears below.

3. **Press the OK button.**
   The selected playback function is called up.
Playing Back and Deleting Images

For continuously playing back images, screen or sound effects can be set.

Rotates captured images. Useful when viewing vertical images on a TV.

Press halfway

Closes the Playback Mode Palette and goes to  mode.

Goes to the screen for selected playback function.

Playing Back and Deleting Images

You can play back recorded images one after another.

1. **In** mode, use the four-way controller (◀▶) to choose the image to start the slideshow with.

2. **Press the four-way controller (▼).**
   The Playback Mode Palette appears.

3. **Use the four-way controller (▲▼ ◀▶) to select ▶ (Slideshow).**

4. **Press the OK button.**
   The slideshow setting screen appears.

5. **Use the four-way controller (▲▼) to select [Start].**

6. **Press the OK button.**
   The slideshow starts.
   Pressing the OK button during the slideshow pauses the slideshow.
   To resume the slideshow, press the OK button again.

7. **Press any button other than the OK button.**
   The slideshow stops.
To Set the Slideshow Conditions

You can set the playback interval and also a screen effect and sound effect for when one image changes to the next.

1. Use the four-way controller (▲ ▼) to select [Interval] in Step 5 on p.141.

2. Press the four-way controller (►). A pull-down menu appears.

3. Use the four-way controller (▲ ▼) to select the interval and press the OK button. Choose from [3sec.], [5sec.], [10sec.], [20sec.] or [30sec.].

4. Use the four-way controller (▲ ▼) to select [Screen Effect].

5. Press the four-way controller (►). A pull-down menu appears.

6. Use the four-way controller (▲ ▼) to choose the screen effect and press the OK button.

<table>
<thead>
<tr>
<th>Effect</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wipe</td>
<td>The next image slides over the previous one from left to right</td>
</tr>
<tr>
<td>Checker</td>
<td>The next image appears in small square mosaic blocks</td>
</tr>
<tr>

<td>The current image gradually fades out and the next image fades in</td>
</tr>
<tr>
<td>Random</td>
<td>Various effects are used randomly</td>
</tr>
<tr>
<td>Off</td>
<td>No effect</td>
</tr>
</tbody>
</table>

7. Use the four-way controller (▲ ▼) to select [Sound Effect].
8 Use the four-way controller (◀▶) to select ✅ or ❌.
Except when the [Screen Effect] is set to [Off], you can choose ✅ (On) or ❌ (Off) for the sound that is played when one image changes to the next.

9 Use the four-way controller (▲▼) to select [Start] and press the OK button.
The slideshow starts using the selected interval and effect.

- The slideshow will continue until you press any button other than the OK button.
- Movies or pictures with sound will be played through to the end before the next picture is played back, regardless of the interval setting. However, pressing the four-way controller (▶) while playing back a movie or a picture with sound skips to the next image.
- Sound files made in Voice Recording are not played back in the slideshow.
- Panorama images are displayed by scrolling from left to right in 4 seconds before the next picture is played back, regardless of the interval or screen effect setting.
- When [Random] is selected for the screen effect, the interval is fixed and the sound effect is set to off. Also the sound of pictures with sound will not be played back.

Connecting the Camera to AV Equipment ➔ p.156

Rotating the Image

1 Press the ▶ button after taking a picture.
The image appears on the display.
2 Press the four-way controller (▼).
The Playback Mode Palette appears.

3 Use the four-way controller (▲▼◄►) to select ◊ (Image Rotation).

4 Press the OK button.
The rotation selection screen (0°, Right 90°, Left 90°, or 180°) appears.

5 Use the four-way controller (▲▼◄►) to choose the rotation direction and press the OK button.
The rotated image is saved.

- Panoramic images and movies cannot be rotated.
- Protected images can be rotated, but they cannot be saved in a rotated state.
Zoom Playback

You can magnify an image up to ten times.

1 In Q mode, use the four-way controller (elfth) to choose the image you want to magnify.

2 Turn the zoom lever to the right (Q).
   The image is magnified (×1.1 to ×10). Continuing to turn the zoom lever to the right (Q) changes the magnification continuously.
   You can use the guide mark “+” appears at the bottom left of the screen to check which portion of the image is magnified.

Available operations while an image is magnified

<table>
<thead>
<tr>
<th>Four-way controller (↑ ↓ ← →)</th>
<th>Moves the position to be magnified.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom lever to the right (Q)</td>
<td>Makes the image bigger (max. ×10).</td>
</tr>
<tr>
<td>Zoom lever to the left (℮)</td>
<td>Makes the image smaller (min. ×1.1).</td>
</tr>
</tbody>
</table>

3 Press the OK button.
   The image returns to single-image display.

Memo

Movies cannot be magnified.
**Zoom In on the Subject’s Face Automatically** *(Face Close-up Playback)*

You can enjoy playing back images with the subjects’ faces zoomed up simply by pressing the "佃" button (Face close-up playback) if the Face Detection function operated when the images were taken.

1. **In  fierc mode, use the four-way controller (  ◀ ▶ ) to choose the image you want to magnify.**

2. **Confirm that the "佃" icon is displayed in the image and press the "佃" button.**
   The image is magnified around the face first detected when the image was taken.

If multiple faces were detected when the image was taken, the subjects’ faces are zoomed up on each time the "佃" button is pressed in order of the detection during shooting.
Available operations during the Face close-up playback mode

<table>
<thead>
<tr>
<th>Zoom lever to the right (🔍)</th>
<th>Zooms on the subject being displayed for Face close-up playback at an equal or slightly larger magnification ratio.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom lever to the left (🔍)</td>
<td>Zooms on the subject being displayed for Face close-up playback at an equal or slightly smaller magnification ratio.</td>
</tr>
</tbody>
</table>

3

Press the OK button.
The image returns to single-image display.

- Face close-up playback is not available for movies and images that are saved as still pictures from the movies.
- The magnification ratio for Face close-up playback may differ depending on the conditions such as the size of the face detected when shooting.
- Face close-up playback is also available for images taken with the pet detection function.
Deleting Images and Sound Files

You can delete images and sound files that you do not want to keep.

Deleting a Single Image

You can delete a single image or sound file.

- Protected images and sound files cannot be deleted (p.153).

1. In \( \square \) mode, use the four-way controller (\(<\downarrow\uparrow>\)) to choose the image/sound file you want to delete.

2. Press the \( \boxplus \) button.
   A confirmation dialog appears.

3. Use the four-way controller (\( \uparrow\downarrow \)) to select [Delete].

4. Press the \( \text{OK} \) button.
   The image or sound file is deleted.
To Delete the Sound from an Image

If sound (voice memo) has been added to an image (p.186), you can delete the sound without deleting the image.

1. **In ** mode, use the four-way controller ( ◄ ► ) to choose the image with sound. □ appears on the images with sound.

2. **Press the ** button.
   A confirmation dialog appears.

3. **Use the four-way controller ( ▲ ▼ ) to select [Delete Sound].**

4. **Press the OK button.**
   The sound data is deleted.

**memo**
- Select [Delete] in Step 3 to delete both the image and sound data.
- You cannot delete only the sound in a movie.
Deleting Selected Images and Sound Files

You can delete several images/sound files selected from the four-/nine-image display at once.

**Caution**
Protected images and sound files cannot be deleted (p.153).

1. **In mode,** turn the zoom lever to the left (小小的) once or twice.
   Four-image display or nine-image display appears.

2. **Press the button.**
   appears on the images and sound files.
Use the four-way controller (▲▼◄►) to choose the images and sound files that you want to delete and press the OK button. ✓ appears on the selected images and sound files.

If you select an image and turn the zoom lever to the right (Zoom), the selected image appears in single-image display as long as the lever is turned, enabling you to check whether you really want to delete it or not. (The display returns to four-/nine-image display when you release the lever.) However, protected images cannot be displayed in single-image display.

Press the button.
A confirmation dialog appears.

Use the four-way controller (▲▼) to select [Select & Delete].

Press the OK button.
The selected images and sound files are deleted.
Deleting All Images and Sound Files

You can delete all the images and sound files at once.

Protected images and sound files cannot be deleted (p.153).

1. Press the MENU button in  
   mode.
   The [\ Setting] menu appears.
   When you press the MENU button in  
   mode, press the four-way
   controller (  ) once.

2. Use the four-way controller ( ▲▼)  
   to select [Delete All].

3. Press the four-way controller ( ).
   The [Delete All] screen appears.

4. Use the four-way controller ( ▲▼)  
   to select [Delete All].
5 Press the OK button.
All the images and sound files are deleted.

Protecting Images and Sound Files from Deletion (Protect)
You can protect stored images and sound files from being accidentally deleted.

1 In mode, use the four-way controller (قبول) to choose the image you want to protect.

2 Press the four-way controller (قبول). The Playback Mode Palette appears.

3 Use the four-way controller (قبول) to select (Protect).

4 Press the OK button.

5 Use the four-way controller (قبول) to select [Single Image/Sound].

6 Press the OK button.
The message [Protects this image/sound] appears.
To protect another image or sound file, use the four-way controller (قبول) to select another image or sound file.
Use the four-way controller (▲▼) to select [Protect].

Press the OK button.

The selected image or sound file is protected and the screen shown in Step 5 reappears.
To protect other images or sound files, repeat Steps 5 to 8.
Select [Cancel] to exit the Protect setting.

- To cancel the protection of the data, select [Unprotect] in Step 7.
- ☑ appears on the protected images and sound files during playback.
- The maximum number of images and sound files you can protect in succession with [Single Image/Sound] is 99.

To Protect All Images and Sound Files

Press the OK button.

Use the four-way controller (▲▼) to select [Protect].
4 Press the **OK** button.
All the images and sound files are protected and the screen shown in Step 1 reappears.

5 **Use the four-way controller (▲▼) to select [Cancel] and press the **OK** button.**
The Playback Mode Palette reappears.

<table>

Connecting the Camera to AV Equipment

By using the supplied AV cable (I-AVC7), you can capture and play back images on equipment with a video IN jack, such as a TV.

1. **Turn the AV device and camera off.**

2. **Connect the AV cable to the PC/AV terminal of the camera.**
   Connect the terminal of the AV cable with arrow mark → facing the side of the display.

3. **Connect the other ends of the AV cable to the video input terminal and audio input terminal of the AV device.**
   When using stereo sound equipment, insert the sound terminal into the L (white) terminal.

4. **Turn the AV device on.**
   When the device that the camera is connected to and the device that plays back images are different, turn both devices on.
   When viewing images on AV equipment with multiple video input terminals (such as a TV), refer to the operation manual of the device and select the video input terminal to which the camera is connected.
5 Turn the camera on.

- It is recommended to use the optional AC adapter kit K-AC117 if you intend to use the camera for a long time (p.37).
- Depending on the country or region, images and sound files may fail to be played back if the video output format is set differently from the one in use there. If this happens, change the video output format setting (p.200).
- The camera display turns off and the volume cannot be adjusted with the zoom lever while the camera is connected to AV equipment.
- When the camera is connected to an AV device, you can change the images with the remote control (optional).

Caution
When connecting to and playing back images on AV equipment, image data is output at normal screen resolution. To view movies recorded at 1280x720 (1280×720, 30 fps) and 1280x700 (1280×720, 15 fps) in HDTV, transfer the data to a computer and play it back on the computer (p.209).
5 Editing and Printing Images

Editing Images ........................................ 160
Setting the Printing Service (DPOF) ...... 178

About printing
The following options are available for printing images taken with this camera.

1 Use a printing service.
2 Use your printer with an SD Memory Card slot to print directly from the SD Memory Card.
3 Use your computer’s software to print images.
Editing and Printing Images

Changing the Image Size (Resize)

By changing the recorded pixels of a selected image, you can make the file size smaller than the original. You can use this function to continue taking pictures when the SD Memory Card or the built-in memory is full, by making the images smaller and overwriting the original images to make more space available.

• Images taken with the recorded pixels of 12M (3456×3456)/2M (1920×1080) or panoramic images and movies cannot be resized.
• You cannot select a larger resolution than that of the original image.

1 In mode, use the four-way controller (◄►) to choose the image you want to resize.

2 Press the four-way controller (▼).
The Playback Mode Palette appears.

3 Use the four-way controller (▲▼◄►) to select (Resize).

4 Press the OK button.
The screen for choosing the number of recorded pixels appears.

5 Use the four-way controller (◄►) to select the number of recorded pixels.
Press the **OK** button.
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

**7** Use the four-way controller (▲▼) to select [Overwrite] or [Save as].

**8** Press the **OK** button.
The resized image is saved.

---

**Cropping Images**

You can delete the unwanted part of a picture and save the cropped image as a new image.

Images taken with the recorded pixels of 12M (3456×3456) / 12M (4608×2592) / 2M (1920×1080) or panoramic images and movies cannot be cropped.

**1** In **dio** mode, use the four-way controller (▼) to choose the image you want to crop.

**2** Press the four-way controller (▼).
The Playback Mode Palette appears.

**3** Use the four-way controller (▲▼) to select (Cropping).
Press the OK button.
The cropping screen appears.
The largest size of cropped image is shown with a green frame on the screen. The cropped image cannot be larger than this cropping frame size.

Choose the cropping area.
The following operations move the green frame and set the area for cropping on the screen.

Press the OK button.
The cropped image is saved with a new file name.
The number of recorded pixels is selected automatically according to the size of the cropped image.

Processing Images to Make Faces Look Smaller
Images are processed to reduce the size of people’s faces detected with the Face Detection function (p.72) when taking pictures so that they look smaller.

1. In mode, use the four-way controller (◄►) to choose the image you want to edit.

2. Press the four-way controller (▼). The Playback Mode Palette appears.

3. Use the four-way controller (▲▼◄►) to select (Small Face Filter).
4 **Press the OK button.**
Face detection frames for faces that can be corrected are displayed. Proceed to Step 6 when there is only one detection frame.

5 **Use the four-way controller (▲▼◄▶) to select a face to be processed.**
A green frame indicates the face that is to be processed.

6 **Press the OK button.**

7 **Use the four-way controller (◄►) to change the reduction ratio.**
- + Approx. 5 %
- + Approx. 7 %
- + Approx. 10 %

8 **Press the OK button.**
A confirmation dialog for overwriting the image appears. If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

9 **Use the four-way controller (▲▼) to select [Overwrite] or [Save as].**

10 **Press the OK button.**
The camera returns to Q mode and the processed image is displayed.
Editing and Printing Images

This function lets you change the color tones and perform special processing on a selected image.

7 Press the OK button.
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a
new image and the following confirmation dialog does not appear.

8 Use the four-way controller (▲▼) to select [Overwrite] or [Save as].

9 Press the OK button.
The image processed with the filter is saved.

Compensating for an Unwanted Red-eye Effect
You can correct images where the flash has caused the subject to
appear with red eyes.

- The red-eye compensation function cannot be used on panoramic
images, movies or on images where red eyes cannot be detected on
the camera. An error message appears in Step 4.
- The red-eye compensation function can only be used with still pictures
taken with this camera.

1 In ▼ mode, use the four-way controller (◄►) to
choose the image you want to correct.

2 Press the four-way controller (▼). The Playback Mode Palette appears.
3 Use the four-way controller (▲▼◄►) to select ◐ (Red-eye Compensation).

4 Press the OK button.
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

5 Use the four-way controller (▲▼) to select [Overwrite] or [Save as].

6 Press the OK button.
The processed image is saved.

Adding a Frame (Frame Composite)
This function lets you add a decorative frame to still pictures. There are 3 frames already stored in the camera.

Caution: The Frame Composite function cannot be used on images taken with the recorded pixels of 12M 111 (3456×3456)/12M 135 (4608×2592)/2M 169 (1920×1080), panoramic images, movies, images of size 3M (2048×1536) or smaller. An error message appears in Step 4.

1 In ◄ mode, use the four-way controller (◄►) to choose the image to which you want to add a frame.

2 Press the four-way controller (▼).
The Playback Mode Palette appears.
3 Use the four-way controller (▲ ▼ ◀ ▶) to select (Frame Composite).

4 Press the OK button.
The 9-frame display of the frame selection screen appears.

5 Use the four-way controller (▲ ▼ ◀ ▶) to choose a frame.

6 Turn the zoom lever to the right (☞).
The selected frame appears in single-image display.
You can choose another frame using either of the following operations.

</tr>
</thead>
<tbody>
<tr>
<td>Zoom lever</td>
<td>Makes the image larger or smaller.</td>
</tr>
</tbody>
</table>

8 Press the OK button.
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

9 Use the four-way controller (▲▼) to select [Overwrite] or [Save as].

10 Press the OK button.
The processed image is saved with the recorded pixels of 3M (2048×1536).
Optional Frames
The optional frames are stored in the CD-ROM (S-SW121) supplied with the camera. To use these frames, copy them from the CD-ROM. These optional frames are deleted if the files on the built-in memory are deleted with a computer or if the built-in memory is formatted.

To Copy Frames

1 Remove the SD Memory Card from the camera.
   If you leave the SD Memory Card in the camera, the frames will be copied onto the card, not into the camera’s built-in memory.

2 Connect the camera to the computer using the provided USB cable (I-USB7).
   Refer to “Connecting to a Computer” (p.209) for instructions on connecting the camera to a computer.

3 When the device detection window opens, click [Cancel].

4 Insert the CD-ROM (S-SW121) into the CD-ROM drive.

5 When the installer window opens, click [EXIT].

6 If there is not already a “FRAME” folder in the root directory of the camera (removable disk), create the folder.

7 Copy the desired files from the FRAME folder in the root directory of the CD-ROM to the FRAME folder on the camera (removable disk).
   For information on working with files on your computer, refer to the instruction manual supplied with the computer.

8 Disconnect the USB cable from the computer and camera.
   Refer to “Connecting to a Computer” (p.209) for instructions on disconnecting the cable.

Caution
Frames can be stored both in the built-in memory and on the SD Memory Cards, but using large numbers of frames may slow down processing speed.
To Use a New Frame

The frames downloaded from the PENTAX website or other source can be used for adding a frame to pictures.

- Extract the downloaded frame and copy it to the FRAME folder in the built-in memory or the SD Memory Card.
- The FRAME folder is created when the SD Memory Card is formatted with this camera.
- For more information on downloading, refer to the PENTAX website.

Memo

Editing Movies

You can select a frame from the recorded movie to save as a still picture or divide a movie into two.

1  In EQ mode, use the four-way controller (↑↓) to choose the movie you want to edit.

2  Press the four-way controller (▼).

   The Playback Mode Palette appears.

3  Use the four-way controller (▲▼◀▶) to select  (Movie Editing).

4  Press the OK button.

   The movie edit selection screen appears. Subsequent steps vary depending on your selection.
To Save a Frame from a Movie as a Still Picture

5 Select [Save as Still Image] on the movie edit selection screen.

6 Press the OK button.
The screen appears for selecting a frame to be saved as a still picture.

7 Use the four-way controller (▲▼◄►) to choose the frame you want to save.
   - ▲ Plays or pauses the movie
   - ▼ Stops the movie and returns to the first frame
   - ◄ Reverses the movie frame by frame
   - ► Advances the movie frame by frame

8 Press the OK button.
The selected frame is saved as a still picture.

To Divide a Movie

5 Select [Divide Movies] on the movie edit selection screen.

6 Press the OK button.
The screen for choosing the dividing position appears.

7 Use the four-way controller (▲▼◄►) to determine the dividing position.
   - ▲ Plays or pauses the movie
   - ▼ Stops the movie and returns to the first frame
   - ◄ Reverses the movie frame by frame
   - ► Advances the movie frame by frame
8 Press the OK button.
A confirmation dialog appears.

9 Use the four-way controller (▲ ▼) to select [Divide].

10 Press the OK button.
The movie is divided at the specified position, the two portions are saved as new files, and the original one is deleted.

Caution The protected movies cannot be divided.

Copying Images and Sound Files
You can copy images and sound files from the built-in memory to the SD Memory Card and vice versa. This function can be selected only when an SD Memory Card has been inserted in the camera.

Caution Make sure that the camera is turned off before inserting or removing the SD Memory Card.

1 Press the four-way controller (▼) in ▶ mode.
The Playback Mode Palette appears.

2 Use the four-way controller (▲ ▼ ◄ ►) to select [Image/Sound Copy).
3 Press the OK button.
The copying method selection screen appears.
Subsequent steps vary depending on your selection.

**To Copy Files from the Built-in Memory to the SD Memory Card**

All the images and sound files in the built-in memory are copied to the SD Memory Card at once. Before copying the images, make sure that there is enough space on the SD Memory Card.

4 Use the four-way controller (▲▼) to select [◀⇒SD].

5 Press the OK button.
All the images and sound files are copied to the SD Memory Card.

**To Copy Files from the SD Memory Card to the Built-in Memory**

Selected images and sound files from the SD Memory Card are copied to the built-in memory one by one.

4 Use the four-way controller (▲▼) to select [SD⇒◊].

5 Press the OK button.

6 Use the four-way controller (◄►) to select the image/sound file you want to copy.
Press the OK button.

The selected image/sound file is copied to the built-in memory. To copy other images or sound files, repeat Steps 4 to 7. Select [Cancel] to exit the copy operation.

- If sound (voice memo) has been added to an image, the image is copied with the sound.
- When a file is copied from the SD Memory Card to the built-in memory, it is assigned a new file name.
Setting the Printing Service (DPOF)

DPOF (Digital Print Order Format) is the format for storing print order data on still pictures captured with a digital camera. Once the print order data has been stored, the pictures can be printed according to the DPOF settings using a DPOF-compatible printer or photo processing lab. You cannot store print order data for movies or sound-only files.

Caution

If the picture already has the date and/or time imprinted on it (p.122), do not set [Date] to ✓ (On) in DPOF setting. If you select ✓, the imprinted date and/or time may overlap.

Printing a Single Image

Set the following items for each image.

<table>
<thead>
<tr>
<th>Items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Copies</td>
<td>Choose the number of copies up to 99.</td>
</tr>
<tr>
<td>Date</td>
<td>Specify whether you want the date inserted on the print.</td>
</tr>
</tbody>
</table>

1. **In **Q** mode, press the four-way controller (▼).**

   The Playback Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◄ ►) to select ☑ (DPOF).**

3. **Press the OK button.**

   The DPOF setting method selection screen appears.
4 Use the four-way controller (▲▼) to select [Single Image].

5 Press the OK button.
The message [Applies DPOF settings to this image] appears.

6 Use the four-way controller (◄►) to select an image.
If DPOF settings have already been made for the selected image, the previous number of copies and date setting (✓ or □) will be displayed.

7 Use the four-way controller (▲▼) to choose the number of copies.

8 Press the Green button to switch ✓ or □ for [Date] setting.
✓ The date will be imprinted.
□ The date will not be imprinted.
To continue setting DPOF print order data, repeat Steps 6 to 8.

9 Press the OK button.
The settings are saved and the screen shown in Step 4 reappears.

Caution
Depending on the printer or printing equipment at the photo processing lab, the date may not be imprinted on the pictures even if ✓ (On) is selected for [Date] in DPOF setting.

Memo
To cancel DPOF settings, set the number of copies to [00] in Step 7 and press the OK button.
Printing All Images

When you choose the number of copies and whether or not to insert the date, the settings are applied to all the images stored in the camera.

2. Press the OK button.
The message [Applies DPOF settings to all images] appears.

3. Choose the number of copies and switch ✓ or ✗ for [Date] setting.
Refer to Steps 7 and 8 in “Printing a Single Image” (p.179) for details on how to make the settings.

4. Press the OK button.
The settings for all the images are saved and the DPOF setting method selection screen reappears.

• The number of copies specified in the [All Images] setting applies to all the images. Before printing, check that the number is correct.
• Settings for single images are canceled when settings are made with [All Images].
Recording and Playing Back Sound

Recording Sound (Voice Recording) .......................................................... 182
Adding a Voice Memo to Images ............... 186
Recording and Playing Back Sound

Recording Sound (Voice Recording)

You can record sound with the camera. The microphone is located on the front of the camera. When recording sound, aim the camera at the sound source to obtain the best sound quality.

Setting the Voice Recording Function

To use the Voice Recording function, assign it to the Green button first.

1. Press the MENU button in Camera mode.
The [Rec. Mode] menu appears.

2. Use the four-way controller (△ ▼) to select [Green Button].

3. Press the four-way controller (►).
A pull-down menu appears.

4. Use the four-way controller (△ ▼) to select [Voice Recording] and press the OK button.

5. Press the MENU button.
The Voice Recording function is assigned to the Green button.
Recording Sound

1. **Press the Green button in 📸 mode.**
   The camera enters the Voice Recording mode. The remaining recordable time and the recording time of the current file appear on the display.
   1. Recording time
   2. Remaining recordable time

2. **Press the shutter release button fully.**
   Recording starts. The self-timer lamp blinks during recording.
   You can record sounds continuously for up to 18 hours.
   When the Green button is pressed during recording, an index is added to the current sound file.

3. **Press the shutter release button fully.**
   Recording stops.

   - If you press and hold down the shutter release button for more than one second in Step 2, recording continues until you take your finger off the button. This is useful for recording short sound.
   - The sound is saved in WAVE monaural files.
Playing Back Sound

You can play back the sound files you made in Voice Recording.

1 Press the ▶ button.

2 Use the four-way controller (◀ ▶) to choose the sound file to play back.

3 Press the four-way controller (▲). Playback starts.
   1 Total file recording time
   2 Playback time

Available operations during playback

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

#### 4

**Press the four-way controller (▼).**

Playback stops.
Adding a Voice Memo to Images

You can add a voice memo to your still pictures.

**Recording a Voice Memo**

1. **In \( \mathbf{Q} \) mode, use the four-way controller (\( \downarrow \uparrow \) \( \leftarrow \rightarrow \)) to choose the still picture to which you want to add a voice memo.**

2. **Press the four-way controller (\( \downarrow \)).**
The Playback Mode Palette appears.

3. **Use the four-way controller (\( \uparrow \downarrow \leftarrow \rightarrow \)) to select (Voice Memo).**

4. **Press the OK button.**
Recording starts. You can record a voice memo continuously for up to 18 hours.

5. **Press the OK button.**
Recording stops.

- A voice memo cannot be added to the image that already has a voice memo. Delete the old voice memo (p.149) and record a new one.
- A voice memo cannot be added to protected images (p.153).
Playing Back a Voice Memo

1. In ▶ mode, use the four-way controller ( ◵► ) to choose the still picture with the voice memo that you want to play back.

   ■ appears on images with voice memos in single-image display.

2. **Press the four-way controller ( ▲ ).**
   Playback starts.

   **Available operations during playback**

<table>
<thead>
<tr>
<th>Operation</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom lever to the right (►)</td>
<td>Increases the volume</td>
</tr>
<tr>
<td>Zoom lever to the left (◄)</td>
<td>Reduces the volume</td>
</tr>
</tbody>
</table>

3. **Press the four-way controller ( ▼ ).**
   Playback stops.

   To Delete the Sound from an Image ➔ p.149

Camera Settings ............................................. 190
Camera Settings

Formatting the Memory

Formatting deletes all the data on the SD Memory Card or the built-in memory.
Be sure to use this camera to format (initialize) an SD Memory Card that is unused or has been used on other cameras or digital devices.

- Do not remove the SD Memory Card during formatting as this may damage the card and render it unusable.
- Formatting deletes protected images and any data recorded on the card with a computer or any camera.
- SD Memory Cards formatted on a computer or device other than this camera cannot be used. Be sure to format the card with this camera.
- To format the built-in memory, be sure to eject the SD Memory Card beforehand. Otherwise, the SD Memory Card will be formatted.
- When you intend to use a brand-new Eye-Fi card for the first time, copy the Eye-Fi Manager installation file to your computer before formatting the card.
- The optional frames copied from the CD-ROM (S-SW121) are deleted when the SD Memory Card or the built-in memory is formatted (3 default frames are not deleted.).

1. **Press the MENU button in **③** mode.**
The [\ Setting] menu appears.
When you press the MENU button in ③ mode, press the four-way controller (▲) once.

2. **Use the four-way controller (▲ ▼) to select [Format].**

3. **Press the four-way controller (▲).**
The [Format] screen appears.

4. **Use the four-way controller (▲ ▼) to select [Format].**
5 Press the OK button.
Formatting starts.
When formatting is completed, the camera returns to  mode or  mode.

## Changing the Sound Settings

You can adjust the volume of operation sounds and change the type of sound.

### 1 Press the MENU button in  mode.
The [Setting] menu appears.
When you press the MENU button in  mode, press the four-way controller ( ) once.

### 2 Use the four-way controller ( ▲▼ ) to select [Sound].

### 3 Press the four-way controller ( ).
The [Sound] screen appears.

### To Change the Operation Volume/Playback Volume

#### 4 Use the four-way controller ( ▲▼ ) to select [Operation Volume].

#### 5 Use the four-way controller ( ◀▶ ) to adjust the volume.
Set the volume to 0 to mute the start-up sound, shutter sound, operation sound, and self-timer sound.

#### 6 Change [Playback Volume] in the same way as in Steps 4 and 5.
To Change the Sound Type

4 Use the four-way controller (▲ ▼) to select [Start-up Sound].

5 Press the four-way controller (►).
   A pull-down menu appears.

6 Use the four-way controller (▲ ▼) to select the sound type.
   Choose from [1], [2], [3] or [Off].

7 Press the OK button.

8 Set [Shutter Sound], [Operation Sound] and [Self-timer Sound] in the same way as in Steps 4 to 7.

9 Press the MENU button twice.
   The camera returns to Media mode or Video mode.

Changing the Date and Time

You can change the initial date and time settings (p.48). You can also set the format in which the date appears on the camera.

1 Press the MENU button in Media mode.
   The [Setting] menu appears.
   When you press the MENU button in Media mode, press the four-way controller (►) once.

2 Use the four-way controller (▲ ▼) to select [Date Adjustment].

3 Press the four-way controller (►).
   The [Date Adjustment] screen appears.
4 Press the four-way controller (▲). 
The frame moves to [mm/dd/yy].
Depending on the initial setting or previous setting, [dd/mm/yy] or [yy/mm/dd] may be displayed.

5 Use the four-way controller (▲▼) to choose the date format.
Choose from [mm/dd/yy], [dd/mm/yy] or [yy/mm/dd].

6 Press the four-way controller (▲). 
The frame moves to [24h].

7 Use the four-way controller (▲▼) to select [24h] (24-hour display) or [12h] (12-hour display).

8 Press the four-way controller (▲). 
The frame returns to [Date Format].

9 Press the four-way controller (▼). 
The frame moves to [Date].

10 Press the four-way controller (▲). 
The frame moves to one of the following items depending on the date format set in Step 5.
   Month for [mm/dd/yy]
   Day for [dd/mm/yy]
   Year for [yy/mm/dd]
The following operations and screen use [mm/dd/yy] as an example. The operations are the same even if another date format has been selected.

11 Use the four-way controller (▲▼) to change the month.

12 Press the four-way controller (►). The frame moves to the day field. Use the four-way controller (▲▼) to change the day. After changing the day, change the year in the same manner.

13 Change the time in the same way as in Steps 8 to 12. If you selected [12h] in Step 7, the setting switches between am and pm corresponding to the time.

14 Press the four-way controller (▼) to select [Settings complete].

15 Press the OK button. The date and time settings are saved.

When you press the OK button in Step 15, the camera clock is reset to 00 seconds. To set the exact time, press the OK button when the time signal (on the TV, radio, etc.) reaches 00 seconds.
Setting the World Time

The date and time selected in “Setting the Date and Time” (p.48) and “Changing the Date and Time” (p.192) serve as the Hometown date and time. If you set the Destination city using the world time function, you can display the Destination date and time when taking pictures in a different time zone.

To Set the Destination

1. **Press the MENU button in ▶ mode.**
   - The [ Setting] menu appears.
   - When you press the MENU button in ◀ mode, press the four-way controller (▶) once.

2. **Use the four-way controller (▲ ▼) to select [World Time].**

3. **Press the four-way controller (▶).**
   - The [World Time] screen appears.

4. **Use the four-way controller (▲ ▼) to select [Destination].**

5. **Press the four-way controller (▶).**
   - The [Destination] screen appears. The city that is currently selected blinks on the map.

6. **Use the four-way controller (◄ ▶) to change the Destination city.**
   - The current time, location and time difference of the selected city appear.
7 Use the four-way controller (▲▼) to select [DST].

8 Use the four-way controller (◄►) to select ☑ (On) or □ (Off).
Select ☑ if the Destination city uses daylight saving time.

9 Press the OK button.
The settings are saved and the [World Time] screen reappears.

10 Press the MENU button twice.
The camera returns to capture status with the current setting.

memo Select [.executor Hometown] in Step 4 to set the city and DST setting for the Hometown city.

To Display the Time of the Destination (Select Time)

1 Press the MENU button in Play mode.
The [executor Setting] menu appears.
When you press the MENU button in Play mode, press the four-way controller (►) once.

2 Use the four-way controller (▲▼) to select [World Time].

3 Press the four-way controller (►).
The [World Time] screen appears.

4 Use the four-way controller (▲▼) to select [Select Time].

5 Press the four-way controller (►).
A pull-down menu appears.
6 Use the four-way controller ( ▲ ▼ ) to select ► or ◄.

- ◄ Displays the time of the Destination city
- ◄ Displays the time of the Hometown city

7 Press the OK button.
The setting is saved.

8 Press the MENU button twice.
The camera returns to ◄ mode or ◄ mode.
When ◄ (Destination) is selected in Step 6, the ◄ icon appears on the display to indicate that the destination date and time are displayed in ◄ mode.

Setting the Text Size on the Menu

You can set the text size of the item selected with the cursor on the menu to [Standard] (normal display) or [Large] (magnified display).

1 Press the MENU button in ◄ mode.
The [ ◄ Setting] menu appears.
When you press the MENU button in ◄ mode, press the four-way controller ( ► ) once.

2 Use the four-way controller ( ▲ ▼ ) to select [Text Size].

3 Press the four-way controller ( ► ).
A pull-down menu appears.
4 Use the four-way controller (▲▼) to select the text size.
Select from [Standard] or [Large].

5 Press the OK button.
The setting is saved.

Changing the Display Language
You can change the language in which the menus, error messages, etc. are displayed.
The camera supports the following languages: English, French, German, Spanish, Portuguese, Italian, Dutch, Japanese, Danish, Swedish, Finnish, Polish, Czech, Hungarian, Turkish, Greek, Russian, Thai, Korean, Traditional Chinese and Simplified Chinese.

1 Press the MENU button in Q mode.
The [Setting] menu appears.
When you press the MENU button in A mode, press the four-way controller (▶) once.

2 Use the four-way controller (▲▼) to select [Language/言語].

3 Press the four-way controller (▶).
The [Language/言語] screen appears.

4 Use the four-way controller (▲▼◄►) to select the desired language.
5 **Press the OK button.**
The menus and messages are displayed in the selected language.

### Changing the Naming System of the Folder

You can change the naming system of the folder for storing images. When the naming system is set to [Date], pictures are saved in separate folders by the date they were taken.

<table>
<thead>
<tr>
<th>PENTX</th>
<th>xxxPENTX (where xxx is the 3-digit folder number)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Date</td>
<td>xxx_mmdd (3-digit folder number_month_day)</td>
</tr>
<tr>
<td></td>
<td>* xxx_ddmm (3-digit folder number_day_month) when the [Date Format] is set to [dd/mm/yy]</td>
</tr>
</tbody>
</table>

Taken with the folder name setting [PENTX]. (e.g. September 25)

Taken with the folder name setting [Date]. (e.g. September 25)

Next time, taken with the folder name setting [Date] again. (e.g. October 1)

1 **Press the MENU button in 📷 mode.**
The [Setting] menu appears.
When you press the MENU button in 📷 mode, press the four-way controller (▼) once.

2 **Use the four-way controller (▲ ▼) to select [Folder Name].**

3 **Press the four-way controller (►).**
A pull-down menu appears.

- Up to 900 folders can be created.
- Up to 9999 images or sounds can be saved in a folder.
4 Use the four-way controller (▲ ▼) to select [PENTX] or [Date].

5 Press the OK button.
The setting is saved.

### Changing the Video Output Format

When you connect the camera to AV equipment, choose the appropriate video output format (NTSC or PAL) for taking and playing back images.

1 Press the MENU button in  mode.
The [Setting] menu appears.
When you press the MENU button in  mode, press the four-way controller (►) once.

2 Use the four-way controller (▲ ▼) to select [Video Out].

3 Press the four-way controller (►).
A pull-down menu appears.

4 Use the four-way controller (▲ ▼)
to select a video output format.
Choose the video output format to match the input format of the AV equipment.

5 Press the OK button.
The setting is saved.

**Memo**

Depending on the country or region, images and sound files may fail to be played back if the video output format is set differently from the one in use there. If this happens, change the video output format setting.

Connecting the Camera to AV Equipment p.156
Video output format of each city p.239
Setting Eye-Fi Communication

You can transfer images to your computer automatically via wireless LAN using an Eye-Fi card. Refer to “Transferring Images Using an Eye-Fi Card” (p.224) for details on how to transfer images. The default setting is □ (Off).

1 **Press the MENU button in □ mode.**

   The [Setting] menu appears.
   When you press the MENU button in □ mode, press the four-way controller (►) once.

2 **Use the four-way controller (▲ ▼) to select [Eye-Fi].**

3 **Use the four-way controller (◄ ►) to select ✔ or □.**
   ✔ Starts transferring using the Eye-Fi card
   □ Does not transfer using the Eye-Fi card

4 **Press the MENU button.**

   The camera returns to □ mode or □ mode.
   The images will be transferred automatically.
Adjusting the Brightness of the Display

You can adjust the brightness of the display.

1. **Press the MENU button in 📷 mode.**
   
   The [📸 Setting] menu appears.
   
   When you press the MENU button in 📷 mode, press the four-way controller (➡️) once.

2. **Use the four-way controller (⬆️ ⬇️) to select [Brightness Level].**

3. **Use the four-way controller (⬅️ ➡️) to adjust the brightness.**

   - Dark
   - Normal
   - Bright

4. **Press the MENU button.**
   
   The camera returns to 📷 mode or 🎥 mode.
   
   The display appears with the set brightness.
Using the Power Saving Function

You can save battery power by setting the display to dim automatically when no operation is performed for a fixed time. After the power saving function has been activated, the display returns to the ordinary brightness if any button is pressed.

1 Press the MENU button in 

The [Setting] menu appears.
When you press the MENU button in 

2 Use the four-way controller ( ▲ ▼ ) to select [Power Saving].

3 Press the four-way controller ( ► ).
A pull-down menu appears.

4 Use the four-way controller ( ▲ ▼ ) to select the time until the camera enters the power saving mode.
Choose from [2min.], [1min.], [30sec.], [15sec.], [5sec.] or [Off].

5 Press the OK button.
The setting is saved.

- Power Saving does not function in the following situations:
  - While taking pictures in (Continuous Shooting), (Burst Shooting (L/M/H)) modes.
  - In the playback mode
  - While recording a movie
  - While the camera is connected to a computer
  - While a menu is being displayed
- When no operation is performed after the camera is turned on, the Power Saving function is activated only after 15 seconds elapse even if [5sec.] is set.
Setting the Auto Power Off Function

You can set the camera to turn off automatically when no operation is performed for a fixed time.

1. Press the MENU button in ➤ mode.
The [✏ Setting] menu appears.
When you press the MENU button in ◀ mode, press the four-way controller (مبادئ) once.

2. Use the four-way controller (▲ ▼) to select [Auto Power Off].

3. Press the four-way controller (▶).
A pull-down menu appears.

4. Use the four-way controller (▲ ▼) to select the time until the camera turns off automatically.
Choose from [5min.], [3min.] or [Off].

5. Press the OK button.
The setting is saved.

Auto Power Off does not function in the following situations:
- While recording sound in the Voice Recording mode
- While taking pictures in ◀ (Continuous Shooting), ◀/▶/<<( Burst Shooting (L/M/H)) modes.
- While recording a movie
- During a slideshow or movie/sound playback
- While the camera is connected to a computer
- While transferring images using an Eye-Fi card
Changing the Start-up Screen

You can choose the start-up screen displayed when the camera is turned on.
You can choose any of the following images as the start-up screen:
- The Guide Display Start-up Screen showing a guide to the shooting modes and buttons
- One of the 3 pre-installed images
- One of your own images (compatible images only)

1. **In ** mode, press the four-way controller (▼). The Playback Mode Palette appears.

2. Use the four-way controller (▲ ▼ ◀▶) to select  (Start-up Screen).

3. Press the OK button. The image selection screen appears.

4. Use the four-way controller ( ◀▶) to choose the image for the start-up screen.
   Only images available for the start-up screen are displayed. You can also choose one of the 3 pre-installed images or the Guide Display Start-up screen already stored in the camera.

5. Press the OK button. The start-up screen is set.
Pixel Mapping is a function for mapping out and correcting defective pixels in the CCD sensor. Run the Pixel Mapping function if image dots always seem to be defective in the same place.

1. Press the **MENU** button in **
** mode, and press the four-way controller (▶).
   The [Setting] menu appears.
   [Pixel Mapping] cannot be selected when the **MENU** button is pressed in **
** mode.

2. Use the four-way controller (▲▼) to select [Pixel Mapping].

3. Press the four-way controller (▶).
4 Use the four-way controller (▲▼) to select [Pixel Mapping].

5 Press the OK button.
Defective pixels are mapped and corrected.

When the battery level is low, [Not enough battery power remaining to activate Pixel Mapping] is displayed on the monitor. Use the AC adapter kit K-AC117 (optional) or load a fully charged battery.

Resetting to Default Settings (Reset)
You can reset the camera settings to their defaults. Refer to “Default Settings” (p.234) for the reset settings.

1 Press the MENU button in Q mode.
The [ Setting] menu appears.
When you press the MENU button in A mode, press the four-way controller (▶) once.

2 Use the four-way controller (▲▼) to select [Reset].

3 Press the four-way controller (▶).
The [Reset] screen appears.

4 Use the four-way controller (▲▼) to select [Reset].
Press the OK button.
The settings return to the defaults.

The following settings are not affected by resetting:
- Date Adjustment
- World Time
- Language/言語
- Video Out
8 Connecting to a Computer

Setting Up Your Computer ................. 210
Connecting to Your Computer .............. 217
Transferring Images Using an Eye-Fi Card........................................ 224
Setting Up Your Computer

By installing the software included on the provided CD-ROM on your computer and connecting the camera to your computer with the USB cable, you can transfer images and movies captured with your camera to the computer and then display and manage them. This section explains how to install the provided software and the other necessary preparations for enjoying the captured pictures and movies on your computer.

Provided Software

The following software is included in the provided CD-ROM (S-SW121).

Image viewing/managing/editing software

Windows
• “MediaImpression 3.1 for PENTAX”

Macintosh
• “MediaImpression 2.1 for PENTAX”

Applicable languages: English, French, German, Spanish, Portuguese, Italian, Dutch, Swedish, Russian, Korean, Chinese (traditional and simplified), Japanese

Caution

It is recommended to use the optional AC adapter kit K-AC117 when the camera is connected to the computer (p.37). If the battery runs out of power while images are being transmitted to the computer, the image data may be lost or damaged.

System Requirements

The following system requirements must be met for you to fully enjoy the images and movies captured with the camera on your computer.
**Windows**

| OS | Windows XP (SP3), Windows Vista or Windows 7  
|    | • The OS must be preinstalled and updated to the latest version. |
| CPU | Pentium IV 1.6 GHz or equivalent AMD Athlon  
|    | (Intel Core 2 Duo 2.0 GHz or equivalent AMD Athlon X2 processor recommended) |
| Memory | 512 MB minimum (1 GB or more recommended) |
| Hard Disk Space | 300 MB minimum |
| Others | CD-ROM drive  
|    | USB port as standard equipment  
|    | 1024 × 768 pixels, 16-bit color monitor or greater |

* Operation is not guaranteed on all computers meeting the system requirements.  
* The system requirements describe the minimum environment for playing and editing movies.

**Macintosh**

| OS | Mac OS X (Ver.10.3.9, 10.4, 10.5, 10.6, 10.7)  
|    | • The OS must be preinstalled and updated to the latest version. |
| CPU | PowerPC G4 800 MHz processor or equivalent CPU (Power PC G5 or Intel Core Duo processor recommended) |
| Memory | 512 MB minimum (1 GB or more recommended) |
| Hard Disk Space | 300 MB minimum |
| Others | CD-ROM drive  
|    | USB port as standard equipment  
|    | 1024 × 768 pixels, 16-bit color monitor or greater |

* Operation is not guaranteed on all computers meeting the system requirements.  
* The system requirements describe the minimum environment for playing and editing movies.
Installing the Software

Install the image viewing/managing/editing software “MediaImpression”.

- Make sure your computer meets the system requirements before installing the software.
- When multiple accounts have been set up in your computer, log on with an account that has administrative rights before installing the software.

Windows

1. Turn your Windows PC on.
2. Insert the provided CD-ROM into the CD-ROM/DVD drive.
   If the installation screen appears, go to Step 5.
3. Click [Computer] in the Start menu.
4. Double-click the CD-ROM/DVD drive (S-SW121) icon.
   The installation screen appears.
5. Click [MediaImpression 3.1 for PENTAX], choose a language in the “Choose Setup Language” screen and click [OK].
   The setup screen appears. Follow the on-screen guidance and install the software.
6 Select the file format to use and click [Next].
All files in the checked format will open with MediaImpression 3.1 for PENTAX. Remove the check to open the file using another application.

7 Click [Finish].
Installation is complete. Reboot your computer.

Macintosh

1 Turn your Macintosh on.

2 Insert the provided CD-ROM (S-SW121) into the CD-ROM/DVD drive.

3 Double-click the CD-ROM (S-SW121) icon.

4 Double-click the [PENTAX Software Installer] icon.
The installation screen appears.

5 Click [MediaImpression 2.1 for PENTAX].
The setup screen appears. Follow the on-screen guidance and install the software.
6 Click [Close].
Installation is complete.

7 Click [Exit] on the installation screen.
The window is closed.

Product Registration on the Internet

In order to better serve you, we request that you complete the product registration.

If your computer is connected to the Internet, please click [Product Registration] on the installation screen. The world map screen shown on the right for Internet Product Registration is displayed. Click the displayed country or region and then follow the instructions to register your product.

Only customers in countries and regions displayed on the software installation screen can register their products on the Internet Product Registration.
Setting the USB Connection Mode

Set the device to which the camera is connected with the USB cable.

Caution
Make sure to set the USB Connection mode before connecting your camera to the computer. You cannot perform the following setting if the camera is connected to your computer with the USB cable.

1. **Turn your camera on.**

2. **Press the MENU button in mode.**
The [Setting] menu appears.
When you press the MENU button in mode, press the four-way controller ( ) once.

3. **Use the four-way controller (▲▼) to select [USB Connection].**

4. **Press the four-way controller (►).**
A pull-down menu appears.

5. **Use the four-way controller (▲▼) to select [MSC].**

6. **Press the OK button.**
The setting is saved.
MSC (Mass Storage Class) and PTP (Picture Transfer Protocol)

MSC (Mass Storage Class)
A general-purpose driver program that handles devices connected to the computer via USB as a memory device. Also indicates a standard for controlling USB devices with this driver.
By simply connecting a device that supports USB Mass Storage Class, you can copy, read, and write files from a computer without installing a dedicated driver.

PTP (Picture Transfer Protocol)
A protocol that allows transfer of digital images and control of digital cameras via USB, standardized as ISO 15740.
You can transfer image data between devices that support PTP without installing a device driver.

Unless otherwise specified, select MSC when connecting this camera to your computer.
Connecting to Your Computer

Connecting the Camera and Your Computer

Connect your camera to the computer using the provided USB cable.

1. **Turn your computer on.**
2. **Turn your camera off.**
3. **Connect your camera to the computer using the USB cable.**
   Connect the terminal of the USB cable with ◄ pointing toward the ◄ on the PC/AV terminal of the camera.

4. **Turn your camera on.**
   For Windows, the “AutoPlay” screen appears on the computer.
   If the “AutoPlay” screen does not appear, follow the steps in “When the [AutoPlay] screen does not appear” (p.218).
   For Macintosh, the camera is recognized as [NO NAME] on the desktop.
When the [AutoPlay] screen does not appear

1 Double-click the [MediaImpression] icon on the desktop.
MedialImpression starts and the Start page appears.

2 Click [PhotoImpression].

3 Click the connected camera on top left of the screen.
The import screen appears. For subsequent steps, go to Step 6 on p.219.

Transferring Images

Import the images captured with the camera into your computer.

- If there is no SD Memory Card in the camera, the images stored in the built-in memory will be transferred to your computer.
- If you are using a Macintosh, go to p.220.
5 Click [Import media files to local disk].
MediaImpression 3.1 for PENTAX starts and the import screen appears.

6 Select an image to import.
To select multiple images, choose the images while pressing the Ctrl key.
To specify the destination location, click the folder icon.

7 Click [Import].
A message appears indicating that import is complete.
An arrow mark appears on the imported image.
Connecting to a Computer

5 Double-click the [MediaImpression 2.1 for PENTAX] icon in the [Applications] folder.
MediaImpression 2.1 for PENTAX starts and the Start page appears.

6 Click [Import].
The import screen appears. For subsequent steps, refer to Step 6 and 7 on p.219.

memo If the images from the camera are not displayed in the import screen, select [NO NAME] (or the volume label name) in [Get Media from].
Disconnecting the Camera from Your Computer

Windows

1. Click the [Safely Remove Hardware] icon in the task bar. The “Safely Remove Hardware” screen appears.

2. Click [Eject (the device connected)]. A message appears indicating that the hardware can be safely removed.

3. Disconnect the USB cable from your Windows PC and the camera.

Macintosh

1. Drag [NO NAME] on the desktop to the trash. If the SD Memory Card has a volume label, drag the icon of that name to the trash.

2. Disconnect the USB cable from your Macintosh and the camera.

• If the camera (removable disk) is being used by an application such as “MediaImpression”, the camera cannot be disconnected until the application is closed.
• The camera will automatically switch to the playback mode when the USB cable is disconnected from your computer or the camera.
Starting “MediaImpression”

“MediaImpression” lets you view, edit, manage, search for, share, and print images.

1 Double-click the [MediaImpression] icon on the desktop (for Windows) or in the [Applications] folder (for Macintosh).
   MediaImpression starts and the Start page appears.

2 Click [PhotoImpression].
   The Media Browser screen appears.

3 Select and click the folder containing the images you wish to view.
   The images are displayed.

4 Select and double-click an image you wish to view.
   You can enlarge/reduce the display size of the image or edit the image.
   You can also play back movies.

* The screen shown is for a Windows PC. Items shown will differ depending on the operating system and settings.
Details on How to Use “MedialImpression”

You can find more information on how to use “MedialImpression” by using the help pages.

1 Select [Help] in [Menu] at the top right of the screen (for Windows) or [MedialImpression Help] in [Help] on the menu bar (for Macintosh).
   The help screen appears in the web browser.

2 Click the desired topic.
   The explanation is displayed.
Transferring Images Using an Eye-Fi Card

You can transfer images to your computer automatically when a built-in wireless LAN memory card (Eye-Fi card) is inserted in the camera.

1. **Specify the wireless LAN access point and transfer destination on the Eye-Fi card.**
   
   For details on how to set up the card, refer to the operating manual supplied with the Eye-Fi card.

2. **Turn the camera off.**

3. **Insert the Eye-Fi card into the camera.**

4. **Turn the camera on.**

5. **Select ✔ (On) for [Eye-Fi] on the [Setting] menu.**
   
   The images are transferred automatically. For details on how to set up the camera, refer to “Setting Eye-Fi Communication” (p.201).

   One of the following icons will appear on the display.

   - **Eye-Fi ➔** Transferring. When [Eye-Fi] is set to ✔, and either transferring images or searching for the access point.
   - **Eye-Fi ➔** Waiting for transferring. When [Eye-Fi] is set to ✔, and not transferring.
   - **Eye-Fi ➔** Transferring is not allowed. When [Eye-Fi] is set to □.
   - **Eye-Fi ➔** Version error. When the version of the Eye-Fi card is out of date, or when the Eye-Fi card is write-protected.

   - **Memo**
     - Endless Memory Mode is not supported.
     - Update the Eye-Fi card firmware as necessary before using the card.
• When you intend to use a brand-new Eye-Fi card for the first time, copy the Eye-Fi Manager installation file to your computer before formatting the card.
• Images are transferred via wireless LAN. Set [Eye-Fi] to □ (Off), or do not use an Eye-Fi card in locations where the use of wireless LAN devices is restricted or prohibited, such as on airplanes.
• An error message appears on the display if an old version Eye-Fi card is inserted.
• Images will not be transferred in the following situations:
  - When available wireless LAN access points cannot be found
  - When the battery level is low (the color of the battery level indicator is red)
• Voice recording sound files cannot be transferred.
• Transferring a large number of images may take a while. Use of the optional AC adapter kit (K-AC117) is recommended.
• Auto Power Off does not function while transferring images.
• The camera may be turned off automatically to protect the internal components when the inside of the camera reaches a high temperature caused by transferring a large file such as a movie.
• Use of a wireless access point, Internet and suitable Internet settings are required to transfer images via wireless LAN. For more information, refer to the website (http://www.eye.fi/).
• Refer to the instruction manual on how to use an Eye-Fi card.
• In case of malfunction of an Eye-Fi card, refer to the manufacturer of the card.
• Operation is not guaranteed for all Eye-Fi card functions, regardless of whether this camera has the function of turning ON or OFF the wireless communication of an Eye-Fi card.
• Use of an Eye-Fi card is permitted only in the country where the Eye-Fi card is purchased. Observe local and national regulations of the country where the card is to be used.

</table>
The subject is not in focus

The subject is difficult to focus on with autofocus

The camera may have difficulty in focusing on such subjects as: low contrast subjects (a white wall, a blue sky, etc.), dark subjects, finely-patterned objects, rapidly-moving objects. It is also difficult to get proper focus when shooting through a window or a net. Try shooting using the focus lock (p.68), or adjust the focus manually (Manual Focus) (p.105).

The camera may have difficulty in focusing on such subjects as: low contrast subjects (a white wall, a blue sky, etc.), dark subjects, finely-patterned objects, rapidly-moving objects. It is also difficult to get proper focus when shooting through a window or a net. Try shooting using the focus lock (p.68), or adjust the focus manually (Manual Focus) (p.105).

Locate the desired subject in the focus frame (focusing area) in the center of the display. If it is difficult to do so, first lock the focus on the desired subject (focus lock), and then move the camera to recompose.

The flash does not discharge

The flash mode is set to انية (Auto) or ² (Flash On) (p.102).

The drive mode is set to ¼, ½, ¾ or ¼. The focus mode is set to ¼. The shooting mode is set to ¼ or ¼. The flash does not discharge in these modes.

Very occasionally, static electricity may cause camera malfunction. In this case, remove the battery and install it again. If the camera is then working properly, normal condition is restored and you can continue using the camera.
Default Settings

The table below lists the factory default settings. The meaning of the indications for menu items with a default setting is explained below.

**Last Memory Setting**
- **Yes**: The current setting (last memory) is saved when the camera is turned off.
- **No**: The setting returns to the default setting when the camera is turned off.
- ****: The setting depends on the [Memory] setting (p.131).
- **—**: N/A

**Reset Setting**
- **Yes**: The setting returns to the default setting with the Reset function (p.207).
- **No**: The setting is saved even after reset.
- **—**: N/A

Optional Accessories

A number of dedicated accessories are available for this camera. Products marked with an asterisk (*) are the same as those supplied with the camera.

- **Power supply**
  - Rechargeable lithium-ion battery D-LI92 (*)
  - Battery charger kit K-BC92 (*)
    (Battery charger D-BC92, AC plug cord)
  - AC adapter kit K-AC117
    (AC adapter D-AC115, DC coupler D-DC92, AC plug cord)

  The battery charger and AC plug cord are only sold as a kit.

- **Cable**
  - USB cable I-USB7 (*)
  - AV cable I-AVC7 (*)

- **Strap**
  - O-ST104 (*)
  - O-ST8 Silver chain strap
  - O-ST24 Genuine leather strap
  - O-ST81 Waterproof strap

- **Remote Control**
  - REMOTE CONTROL WATERPROOF O-RC1
  - REMOTE CONTROL E
  - REMOTE CONTROL F
## Main Specifications

<table>

</tr>
<tr>
<td>Image Sensor</td>
<td>1/2.33 inch CCD</td>
</tr>
</tbody>
</table>
| Number of Recorded Pixels | **Still**  
  - 16M (4608×3456), 12M (3456×2592), 7M (3072×2304), 2M (1920×1080), 640 (640×480)  
  * Fixed at 5M in Digital SR mode.  
  * Fixed at 3M in Frame Composite mode.  
  * Fixed at 5M in Digital Wide mode, however, the first frame uses 3M.  
  * Fixed at 2M for one frame in Digital Panorama mode.  
  * Fixed at 5M when the sensitivity is set to 3200 or 6400.  
  * Fixed at 5M in Burst Shooting L/M/H mode.  
  **Movie**  
  - 1280 (1280×720/30 fps), 640 (640×480/30 fps), 320 (320×240/30 fps)  
  * Fixed at AUTO (ISO 80 - 6400) in Digital SR mode. |
| Sensitivity (Standard Output Sensitivity) | AUTO (ISO 80, 100, 200, 400, 800, 1600)  
  Manual (ISO 80, 100, 200, 400, 800, 1600, 3200, 6400)  
  * Fixed at AUTO (ISO 80 - 6400) in Digital SR mode. |
| File Format | **Still** JPEG (Exif 2.3), DCF 2.0, DPOF, PRINT Image Matching III  
  **Movie** AVI (Motion JPEG), approx. 30fps/15fps, PCM system, monaural sound, Movie SR (Movie Shake Reduction)  
  **Sound** Voice memo, Voice recording: WAV (PCM) system, monaural |
| Storage Media | Built-in memory (approx. 96 MB), SD Memory Card, SDHC Memory Card, SDXC Memory Card, Eye-Fi card |
Approximate Image Storage Capacity and Recording Time

### Still Pictures

<table>
<thead>
<tr>
<th>Resolution</th>
<th>Built-in Memory</th>
<th>2 GB SD Memory Card</th>
</tr>
</thead>
<tbody>
<tr>
<td>16M</td>
<td>4608×3456</td>
<td>32 pictures</td>
</tr>
<tr>
<td>12M</td>
<td>3456×3456</td>
<td>42 pictures</td>
</tr>
<tr>
<td>12M</td>
<td>4608×2592</td>

<tr>
<td>640</td>
<td>640×480</td>
<td>683 pictures</td>
</tr>
</tbody>
</table>

- The image storage capacity is for reference only when images are recorded on blank built-in memory or SD Memory Card. If movies or sound are recorded, the image storage capacity is decreased. The actual image storage capacity may vary depending on the SD Memory Card and the subject.

### Movie/Sound

<table>
<thead>
<tr>
<th>Resolution</th>
<th>Built-in Memory</th>
<th>2 GB SD Memory Card</th>
</tr>
</thead>
<tbody>
<tr>
<td>1280</td>
<td>(1280×720/30 fps)</td>
<td>30 sec.</td>
</tr>
<tr>
<td>1280</td>
<td>(1280×720/15 fps)</td>
<td>59 sec.</td>
</tr>
<tr>

<td>4 min. 5 sec.</td>
</tr>
<tr>
<td>Sound</td>
<td></td>
<td>26 min. 14 sec.</td>
</tr>
</tbody>
</table>

- The above figures are based on our standard shooting conditions and may vary depending on the subject, shooting conditions and type of the SD Memory Card used. If other data such as still images are recorded, recording time becomes shorter.

- Recording can continue until the built-in memory or the SD Memory Card is full, or the size of the recorded movie reaches 2 GB (when using an SDHC card/SDXC Memory Card). If recording stops at 2 GB, start recording again to continue to record the rest of the movie in blocks of 2 GB.

**White Balance**
- Auto, Daylight, Shade, Tungsten Light, Fluorescent Light, Manual

**Lens**
- Focal Length: 4.5 mm - 81 mm (approx. 25 mm - 450 mm in 35 mm equivalent focal length)
- Aperture: F3.5 (W) - F5.9 (T)
- Lens Composition: 12 elements in 11 groups (4 aspherical elements)
- Zoom Type: Electrically driven

**Optical Zoom**: 18×

### Digital Filters
- B&W, Sepia, Toy Camera, Retro (Blue, Amber), Color (Red, Pink, Purple, Blue, Green, Yellow), Extract Color (Red, Green, Blue), Color Emphasis (Sky Blue, Fresh Green, Delicate Pink, Autumn Leaves), High Contrast, Starburst, Soft, Brightness, Miniature

### Movie
- **Continuous Recording Time**: Approx. 1 second - until built-in memory or SD Memory Card is full (however, maximum size is limited to 2 GB)

### Shutter Speed
- 1/2000 sec. - 1/4 sec., max. 4 sec. (Night Scene mode)

### Built-in Flash
- **Modes**: Auto, Flash Off, Flash On, Auto + Red-eye, Flash On + Red-eye
- **Flash Range**
  - Wide-angle: approx. 0.2 m - 4.3 m (approx. 0.66 ft - 14 ft) (Sensitivity: in AUTO condition)
  - Telephoto: approx. 1.3 m - 2.6 m (approx. 4.3 ft - 8.5 ft) (Sensitivity: in AUTO condition)

### Drive Modes
- Single-frame, Self-timer (approx. 10 sec., approx. 2 sec.), Remote Control (3-sec Remote Control, 0-sec Remote Control), Continuous, Burst Shooting (L/M/H)

### Self-timer
- Electronic control type, control time: Approx. 10 sec., 2 sec.

### Time Function
- **World Time**: 75 cities (28 time zones)

### Power Source
- Rechargeable lithium-ion battery D-LI92, AC adapter kit (optional)

### Battery Life
- **Number of Recordable Images**: approx. 240 pictures

*Recording capacity shows approximate number of shots recorded during CIPA-compliant testing (with display on, flash used for 50% of the shots, and 23 degrees centigrade). Actual performance may vary according to operating conditions.

### Playback Time
- approx. 230 min.

*According to the result of in-house testing. Actual time may differ depending on usage conditions.

### Movie Recording Time
- approx. 100 min.

### Sound Recording Time
- approx. 300 min.

### Interfaces
- USB 2.0 (high-speed compatible) /PC/AV terminal

### Video Output
- NTSC/PAL (monaural)

### Dimensions
- Approx. 108 (W) x 60 (H) x 34.5 (D) mm (excluding operating or protruding parts)

### Weight
- Approx. 170 g (excluding battery and SD Memory Card)
- Approx. 191 g (including battery and SD Memory Card)

### Accessories
- Rechargeable lithium-ion battery, battery charger, AC plug cord, USB cable, AV cable, software (CD-ROM), strap, Operating Manual, Quick Guide
WARRANTY POLICY

All PENTAX cameras purchased through authorized bona fide photographic distribution channels are guaranteed against defects of material or workmanship for a period of twelve months from date of purchase. Service will be rendered, and defective parts will be replaced without cost to you within that period, provided the equipment does not show evidence of impact, sand or liquid damage, mishandling, tampering, battery or chemical corrosion, operation contrary to operating instructions, or modification by an unauthorized repair shop. The manufacturer or its authorized representatives shall not be liable for any repair or alterations except those made with its written consent and shall not be liable for damages from delay or loss of use or from other indirect or consequential damages of any kind, whether caused by defective material or workmanship or otherwise; and it is expressly agreed that the liability of the manufacturer or its representatives under all guarantees or warranties, whether expressed or implied, is strictly limited to the replacement of parts as hereinbefore provided. No refunds will be made on repairs by non-authorized PENTAX service facilities.

Procedure During 12-month Warranty Period
Any PENTAX which proves defective during the 12-month warranty period should be returned to the dealer from whom you purchased the equipment or to the manufacturer. If there is no representative of the manufacturer in your country, send the equipment to the manufacturer, with postage prepaid. In this case, it will take a considerable length of time before the equipment can be returned to you owing to the complicated customs procedures required. If the equipment is covered by warranty, repairs will be made and parts replaced free of charge, and the equipment will be returned to you upon completion of servicing. If the equipment is not covered by warranty, regular charges of the manufacturer or of its representatives will apply. Shipping charges are to be borne by the owner. If your PENTAX was purchased outside of the country where you wish to have it serviced during the warranty period, regular handling and servicing fees may be charged by the manufacturer’s representatives in that country. Notwithstanding this, your PENTAX returned to the manufacturer will be serviced free of charge according to this procedure and warranty policy. In any case, however, shipping charges and customs clearance fees to be borne by the sender. To prove the date of your purchase when required, please keep the receipt or bills covering the purchase of your equipment for at least a year. Before sending your equipment for servicing, please make sure that you are sending it to the manufacturer’s authorized representatives or their approved repair shops, unless you are sending it directly to the manufacturer. Always obtain a quotation for the service charge, and only after you accept the quoted service charge, instruct the service station to proceed with the servicing.
• This warranty policy does not affect the customer’s statutory rights.
• The local warranty policies available from PENTAX distributors in some countries can supersede this warranty policy. Therefore, we recommend that you review the warranty card supplied with your product at the time of purchase, or contact the PENTAX distributor in your country for more information and to receive a copy of the warranty policy.

The CE Mark is a Directive conformity mark of the European Union.
For customers in USA
STATEMENT OF FCC COMPLIANCE
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not approved by the party responsible for compliance could void the user’s authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
  Increase the separation between the equipment and receiver.
  Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
* Consult the dealer or an experienced radio/TV technician for help.

For customers in Canada
This Class B digital apparatus complies with Canadian ICES-003.

Pour les utilisateurs au Canada
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

FOR CALIFORNIA, U.S.A. ONLY
Perchlorate Material-special handling may apply. The lithium battery used in this camera contains perchlorate material, which may require special handling. See www.dtsc.ca.gov/hazardouswaste/perchlorate
Declaration of Conformity
According to 47CFR, Parts 2 and 15 for
Class B Personal Computers and Peripherals

We: PENTAX RICOH IMAGING AMERICAS CORPORATION
Located at: 633 17th Street, Suite 2600
Denver, Colorado 80202 U.S.A.
Phone: 800-877-0155 Fax: 303-790-1131

Declare under sole responsibility that the product identified herein complies with 47CFR Parts 2 and 15 of the FCC rules as a Class B digital device. Each product marketed is identical to the representative unit tested and found to be compliant with the standards. Records maintained continue to reflect the equipment being produced can be expected to be within the variation accepted, due to quantity production and testing on the statistical basis as required by 47CFR §2.909. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. The above named party is responsible for ensuring that the equipment complies with the standards of 47CFR §15.101 to §15.109.

Date and Place: October, 2011, Colorado
Information for Users on Collection and Disposal of Old Equipment and Used Batteries

1. In the European Union
These symbols on the products, packaging and/or accompanying documents mean that used electrical and electronic equipment and batteries should not be mixed with general household waste.

Used electrical/electronic equipment and batteries must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of these products.

By disposing of these products correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

If a chemical symbol is added beneath the symbol shown above, in accordance with the Battery Directive, this indicates that a heavy metal (Hg = Mercury, Cd = Cadmium, Pb = Lead) is present in the battery at a concentration above an applicable threshold specified in the Battery Directive.

For more information about collection and recycling of used products, please contact your local authorities, your waste disposal service or the point of sale where you purchased the products.

2. In other countries outside the EU
These symbols are only valid in the European Union. If you wish to discard used products, please contact your local authorities or dealer and ask for the correct method of disposal.

For Switzerland: Used electrical/electronic equipment can be returned free of charge to the dealer, even when you don’t purchase a new product. Further collection facilities are listed on the home page of www.swico.ch or www.sens.ch.
