To ensure the best performance from your camera, please read the Operating Manual before using the camera.
Thank you for buying the PENTAX OptioWP Digital Camera. Please read this manual before using the camera in order to get the most out of all the features and functions. Keep this manual safe, as it can be a valuable tool in helping you to understand all the camera’s capabilities.

**Regarding copyrights**
Images taken using the OptioWP that are for anything other than personal enjoyment cannot be used without permission according to the rights as specified in the Copyright Act. Please take care, as there are even cases where limitations are placed on taking pictures even for personal enjoyment during demonstrations, industrial enterprise or as items for display. Images taken with the purpose of obtaining copyrights also cannot be used outside the scope of use of the copyright as laid out in the Copyright Act, and care should be taken here also.

**Regarding trademarks**
- PENTAX and Optio are trademarks of PENTAX Corporation.
- The SD logo is a trademark.
- All other brands or product names are trademarks or registered trademarks of their respective owners.

**To users of this camera**
- There is a possibility that recorded data may be erased or that the camera may not function correctly when used in surroundings such as installations generating strong electromagnetic radiation or magnetic fields.
- The liquid crystal panel used in the LCD display is manufactured using extremely high precision technology. Although the level of functioning pixels is 99.99% or better, you should be aware that 0.01% or fewer of the pixels may not illuminate or may illuminate when they should not. However, this has no effect on the recorded image.

This product supports PRINT Image Matching III, PRINT Image Matching enabled digital still cameras, printers and software help photographers to produce images more faithful to their intentions. Some functions are not available on printers that are not PRINT Image Matching III compliant.

**Regarding PictBridge**
PictBridge allows the user to connect the printer and digital camera directly, using the unified standard for the direct printout of images. You can print images directly from the camera through a few simple operations.

- There is a possibility that the illustrations and the display screen of the LCD monitor in this manual are different from the actual product.
FOR SAFE USE OF YOUR CAMERA

Sufficient attention has been paid to the safety of this product but please pay particular attention to the warnings indicated by the following symbols during use.

⚠️ **Warning**

These symbols indicate that it is possible that the user may experience serious difficulties if the warnings are not heeded.

⚠️ **Caution**

These symbols indicate that it is possible that the user may experience minor or middling difficulties or physical difficulties if the warnings are not heeded.

---

**About the Camera**

⚠️ **Warning**

- Do not attempt to take the camera apart or remodel the camera. High voltages are present within the camera, and there is therefore a danger of electric shocks if the camera is taken apart.
- If the inside of the camera should become exposed as a result of, for example, the camera being dropped, please do not under any circumstances touch such exposed portions, as there is a danger of receiving an electric shock.
- To avoid the risk of it being swallowed by mistake, keep the SD Memory Card out of the reach of small children. Seek medical attention immediately if a card is accidentally swallowed.
- Wrapping the strap of the camera around your neck is also dangerous. Please take care that small children do not hang the strap around their necks.
- Use an AC adapter that is of the power and voltage specified for exclusive use with this product. The use of an AC adapter other than that specified exclusively for use with this product may cause fire or electric shocks.
- If the camera emits smoke or a strange smell, or in the event of any other irregularity, stop using the camera immediately, remove the battery and contact your nearest PENTAX Service Center. Continued use of the camera may result in fire or electric shock.
Caution

- Never try to disassemble or short the battery. Also, do not dispose of the battery in fire, as it may explode.
- Do not charge any batteries other than rechargeable lithium-ion battery D-LI8. The battery could explode or catch fire.
- Do not place your finger on the flash when it is discharging as there is a risk of burns.
- Do not discharge the flash while it is touching your clothing as there is a risk of discoloring.
- If any of the battery leakage should come in contact with your eyes, do not rub them. Flush your eyes with clean water and get medical attention immediately.
- If any of the battery leakage should come in contact with skin or clothes, wash the affected areas thoroughly with water.
- Remove the battery from the camera immediately if it becomes hot or begins to smoke. Be careful not to burn yourself during removal.
- Some portions of the camera heat up during use, so please take care, as there is a risk of low temperature burns if such portions are held for long periods of time.
- Should the LCD be damaged, be careful of glass fragments. Also, be careful not to allow the liquid crystal to get on your skin or in your eyes or in your mouth.

Warning

- Do not use the product at a voltage other than the specified voltage. Use with a power source or voltage other than that designed can cause a fire or electrical shock. The specified voltage is 100-240V AC.
- Do not disassemble or modify the product. This can cause a fire or electrical shock.
- If the generation of smoke or strange odor from the product or other abnormality occurs, immediately discontinue using and consult a PENTAX Service Center. Continuing to use the product can cause a fire or electrical shock.
- If water should happen to get inside the product, consult a PENTAX Service Center. Continuing to use the product can cause a fire or electrical shock.

About the Battery Charger and the AC Adapter
• If lightning should be present during use of the battery charger or AC adapter, unplug the power cord and discontinue use. Continuing to use the product can cause damage to the equipment, fire or electrical shock.
• Wipe off the plug of the power cord if it should become covered with dust. This can cause a fire.

⚠️ Caution
• Do not place heavy objects on the AC plug cord, allow heavy objects to drop onto it or allow the AC plug cord to become damaged due to excessive bending. If the AC plug cord becomes damaged, consult a PENTAX Service Center.
• Do not short or touch the output terminals of the product while it is still plugged in.
• Do not plug in the AC plug cord with wet hands. This can cause an electrical shock.
• Do not subject the product to strong impacts or allow it to drop onto a hard surface. This can cause a malfunction.
• Do not use the battery charger to charge batteries other than rechargeable lithium-ion battery D-LI8. This can cause overheating or malfunctions.

Care to be Taken During Handling
• Take the Worldwide Service Network that is included in the package. This will be useful if you experience problems abroad.
• When the camera has not been used for a long time, confirm that it is still working properly, particularly prior to taking important pictures (such as at a wedding or during traveling). Contents of the recording cannot be guaranteed if recording, playback or transferring your data to a computer, etc. is not possible due to a malfunction of your camera or recording media (SD Memory Card), etc.
• The lens on this camera is not exchangeable. The lens is not removable.
• Do not clean the product with organic solvents such as thinner, alcohol or benzene.
• Places of high temperature and humidity should be avoided. Particular care should be taken regarding vehicles, which can become very hot inside.
• Storing the camera where pesticides and chemicals are handled should be avoided. Remove from case and store in a well-ventilated place to prevent the camera from becoming moldy during storage.
• Ensure that the camera is not subjected to substantial vibrations, shocks or pressure. Place the camera on a cushion for protection when the camera is subjected to the vibrations of a motorbike, car, or ship, etc.
• The temperature range in which the camera can be used is 0°C to 40°C (32°F to 104°F).
• The liquid crystal display will become black at a high temperature but will return to normal when normal temperatures are returned to.
• The response speed of the liquid crystal display becomes slow at low temperatures. This is due to the properties of the liquid crystal and is not a fault.
• Periodic checks are recommended every 1 to 2 years in order to maintain high performance.
• If the camera is subjected to rapid temperature changes, condensation may form on the inside and outside of the camera. Therefore put the camera in a bag or plastic bag, and take the camera out when the difference in temperature has subsided.
• Avoid contact with garbage, dirt, sand, dust, water, toxic gases, salt, etc. as this may cause damage to the camera. If rain or drops of water get onto the camera, please wipe dry.
• Refer to “Precautions When Using an SD Memory Card” (p.30) regarding the SD Memory Card.
• Please do not press forcefully on the LCD monitor. This could cause breakage or malfunction.
• Be careful not to sit down with the camera in your back pocket as this may damage the exterior of the camera or the LCD monitor.
• When using a tripod with the camera, be careful not to overtighten the screw in the tripod socket on the camera.
• The AC plug cord supplied with the camera is for exclusive use with the battery charger D-BC8. Do not use it with any other equipment.
Waterproof Function

- This camera has a waterproof capability equivalent to JIS Class 8 protection (IPX8).
- To enhance the waterproof performance of the camera, the front of the lens is protected by glass. As any dirt or water on the glass will affect the quality of pictures taken, the glass should be kept clean at all times.
- Do not place the camera directly on the sand at the beach or similar places.
- The camera will sink if dropped in water, so be sure to attach the strap and slip the strap over your wrist when using the camera in or near water.
- Be sure to check that the battery/card cover is securely locked before using the camera in an environment where it is likely to get wet or dirty, such as underwater or at the beach. Water, sand or dirt inside the camera may cause failure of the camera. Wipe off any water or dirt with a dry cloth as soon as possible after using the camera.
- Avoid opening the battery/card cover at the beach or by the sea. Wait until the camera is completely dry before changing the battery or the SD Memory Card. Avoid changing the battery or card where the camera is likely to get wet or dirty, and make sure that your hands are dry.
- If the camera is very dirty or after it has been used in the sea, make sure that it is turned off and the battery/card cover is firmly closed before rinsing it under running tap water or leaving it in a bowl of clean water for a short time (2 or 3 minutes).
- Wipe off any dirt or sand on the waterproof packing or the packing contact surface. The camera's waterproof function may be compromised by loose packing, or cracks or dents in the packing or packing contact surface. If there is any such damage, contact your nearest PENTAX Service Center.
- To maintain the waterproof performance of the camera, you are recommended to change the waterproof packing once a year. Contact your nearest PENTAX Service Center regarding changing the packing. (A charge will be made.)
- Avoid getting sunscreen or sun oil on the camera as it may cause discoloration of the surface. If any oil gets on the camera, wash it off immediately with warm water.
- The waterproof function does not apply to the camera’s accessories.

### A mode
This is the mode for capturing still pictures and recording movies and sound files. In this manual, the mode for taking still pictures is referred to as the “Still Picture Capture mode”, the mode for recording movies is referred to as the “C mode” and the mode for recording sound files is referred to as the “O mode”.

### mode
This is the mode for viewing still pictures and playing back movies and sound files.

The icons above the title show the shooting modes that can activate the function.

Ex. Setting the Image Sharpness (Sharpness)
Composition of the Operating Manual

This operating manual contains the following chapters.

1 **Getting Started**
   This chapter explains what you need to do after purchasing the camera before you start taking pictures. Be sure to read it and follow the instructions.

2 **Quick Start**
   This chapter explains the simplest way to take pictures and play back images. Use it if you want to start taking pictures or playing back images straightaway.

3 **Common Operations**
   This chapter explains common operations such as the functions of the buttons and how to use the menus. For more details, refer to the respective chapters below.

4 **Taking Pictures**
   This chapter explains the various ways of capturing images and how to set the relevant functions.

5 **Playing Back and Deleting Images**
   This chapter explains how to view still pictures and movies on the camera or on a TV and how to delete images from the camera.

6 **Editing and Printing Images**
   This chapter explains the various ways of printing still pictures and how to edit images with the camera. Refer to the ACDSee for PENTAX User Guide for instructions on how to print or edit images using a computer.

7 **Recording and Playing Back Sound**
   This chapter explains how to record sound files or add sound (a voice memo) to an image, and how to play back sound files.

8 **Settings**
   This chapter explains how to set the camera-related functions.

9 **Appendix**
   This section deals with troubleshooting and lists the optional accessories.
In addition to basic picture-taking, the OptioWP has a variety of shooting modes to suit different situations. This section describes how to make the most of the key features of your camera. Together with the explanations of camera operations, it will enable you to enjoy your camera to the full.

**Forget Your Worries About Water Getting in the Camera!**

The OptioWP is the only camera of its class that lets you take pictures continuously 1.5 m underwater for 30 minutes. The lock mechanism of the battery/card cover is designed for underwater picture-taking. (p.70)

- For taking pictures while snorkeling.
- For taking pictures at the pool or while playing in a river or lake.
- For taking pictures while enjoying various outdoor activities without worrying about your camera getting a bit dirty. A quick wipe with a wet cloth is all it needs!
With the OptioWP, not only can you add a voice memo to a still picture, but by switching to Synchro Sound Record mode, the surrounding sounds are automatically captured until you press the shutter release button to take the picture. A total of 20 seconds of sound, 10 seconds before and 10 seconds after the shutter release button is pressed, are saved. (p.71)

- For recording yourself saying “Say cheese!” or “Look at the camera”.
- For including the cheers of the crowd at exciting moments of a sporting event.

The OptioWP lets you choose a frame and display it on the screen before you take the picture, so you can be sure that the frame complements your subject perfectly. (p.72) Of course, you can still use the editing functions to add a frame afterwards. (p.130)

- For decorating your pictures with a frame.
Easy-to-Navigate Capture and Playback Functions!

The user-friendly design of the OptioWP enables easy operation with the minimum number of buttons on the camera body. Simply by choosing the appropriate icon, you can select Capture mode (p.53) and choose the optimal settings for the situation, or Playback mode (p.104, p.122) and enjoy the various playback and editing functions. Pressing the Green button displays a guide on the LCD monitor to let you check the functions available in each mode and how to use them. (p.62)

- Press the Green button while the Mode Palette is displayed to display the guide. (p.62)
- Use the Green mode to take pictures easily using standard settings. (p.64)

Perfect Size for Carrying Around With You!

With its compact, stylish design, the OptioWP is just right to slip into a pocket of your bag or hang round your neck, so you always have it with you, like your cell phone. It has a useful clock function, “Clock Mode”, for telling the time too. (p.166)
Enjoy Playback and Editing Functions Without a Computer!

The OptioWP lets you play back and edit images without having to connect the camera to your computer and transfer the images first. The camera is all you need to take and edit still pictures and movies. (p.122) And no more worries about accidentally deleting images, because now, with the OptioWP, you can recover them again. (p.119)

- The wide range of editing functions includes resizing (p.122), trimming (p.124), changing the color (p.127) and adjusting the brightness (p.128).
- If your subject’s eyes appear red in the picture, you can correct them while the image is displayed in Playback mode. (p.129)
- You can divide a movie into two, stitch two movies together or select a frame from a movie to save as a still picture. (p.132)

Monitor Indications

Normal Display in Still Picture Capture Mode
The display shows information such as the shooting conditions.
19

1. Shooting mode (p.53)
2. Flash mode (p.83)
3. Drive mode (p.72, p.77, p.78)
4. Focus mode (p.81)
5. Camera shake icon (p.79)
6. Digital zoom icon (p.74)
7. Memory status (p.34)

- 📷: Built-in memory (without card)
- 📷: SD Memory Card
- 📷: Card is write-protected

8. Remaining image storage capacity
9. Battery indicator (p.24)
10. Key lock icon (p.64)
11. Focus frame (p.40)
12. EV compensation (p.76)
13. Date and time (p.38)
14. World time setting (p.155)

Full Display in Still Picture Capture Mode

- 📷: Built-in memory (without card)
- 📷: SD Memory Card
- 📷: Card is write-protected

1. Bright portion (blinks red)
2. Dark portion (blinks yellow)
3. Shutter speed
4. Aperture
5. Recorded pixels (p.85)
6. Quality (p.87)
7. White balance (p.88)
8. Sensitivity (p.92)
9. Histogram (p.80)

About the Bright and Dark Portions
When there is an area in the frame that is so bright it appears white, the indicated area blinks red as a warning. Similarly, when there is an area that is so dark it appears black, the indicated area blinks yellow as a warning.
Full Display in Still Picture Playback Mode
The display shows information such as the shooting conditions. B1 to B9 only appear when [Histogram + Info] is selected. (p.109)

Guide Indications
A guide to available button operations appears on the LCD monitor during operation. The buttons are indicated as shown below.
Attach the strap (O-ST20) supplied with the camera.

1 Pass the narrow end of the strap through the strap lug.
2 Pass the other end of the strap through the loop and pull tight.
Getting Started

Powering the Camera

Use the battery charger to charge the battery before using it in the camera for the first time or after a long period of non-use, or when the [Battery depleted] message appears.

1. Connect the AC plug cord to the battery charger D-BC8.
2. Plug the AC plug cord into the power outlet.
3. Place the battery in the charger so that the PENTAX logo is visible.
   The charging indicator lights red while the battery is charging and changes to green when charging is finished.
4. Remove the battery from the battery charger when charging is finished.

Charging the Battery

Use the battery charger to charge the battery before using it in the camera for the first time or after a long period of non-use, or when the [Battery depleted] message appears.

1. Connect the AC plug cord to the battery charger D-BC8.
2. Plug the AC plug cord into the power outlet.
3. Place the battery in the charger so that the PENTAX logo is visible.
   The charging indicator lights red while the battery is charging and changes to green when charging is finished.
4. Remove the battery from the battery charger when charging is finished.

- The time required to fully charge the battery is about 100 minutes (max.). The appropriate ambient temperature for charging the battery is 0°C to 40°C (32°F to 104°F). (The charging time may vary depending on the ambient temperature and charging conditions.)
- The battery has reached the end of its service life when it starts to run down soon after being charged. Replace with a new battery.

- Do not use the battery charger to charge batteries other than the rechargeable lithium-ion battery D-LI8, as the charger may overheat or be damaged.
- If the battery is inserted correctly but the charging indicator fails to light, the battery may be faulty. Replace with a new battery.
Use the battery that is provided with the camera. Charge the battery before using it in the camera for the first time.

1 **Open the battery/card cover.**
   Press the battery cover lock lever in the direction of 1, slide the battery/card cover in the direction of 2 and flip the cover open in the direction of 3.

2 **Using the side of the battery to press the battery lock lever in the direction of 4, insert the battery with the ▲ symbol pointing toward the lens.**
   Push the battery in until it is locked in place.

3 **Close the battery/card cover.**
   Press the battery cover lock lever in the opposite direction to 1.

---

**Removing the Battery**

1 **Open the battery/card cover.**

2 **Release the battery by using your finger to press the battery lock lever in the direction of 4.**
   The battery will be ejected. Pull the battery out of the camera.

---

**Caution:**
Do not apply excessive pressure to the front or back of the camera when opening and closing the battery/card cover as this may dislodge the waterproof packing. If the packing is not in the correct position, the waterproof performance of the camera will be compromised.
• This camera uses a rechargeable lithium-ion battery D-LI8. Use of any other type of battery may damage the camera and cause malfunction.
• Insert the battery correctly. If the battery is incorrectly oriented, malfunction may result.
• Do not remove the battery while the camera is turned on.
• If you do not intend to use the camera for a long time, remove the battery.
• The date and time may be returned to the default setting if the camera is left without the battery for a long time.
• Allow the camera to dry completely before changing the battery. Avoid changing the battery where the camera is likely to get wet or dirty, and make sure that your hands are dry.

• Image Storage Capacity and Playback Time
(at 23°C with the LCD monitor on, the flash used for 50% of shots and the battery fully charged)

<table>
<thead>
<tr>
<th>Image Storage Capacity</th>
<th>Playback Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approx. 180 pictures</td>
<td>Approx. 230 min.</td>
</tr>
</tbody>
</table>

• The still picture storage capacity is based on measuring conditions in accordance with CIPA standards. The playback time is based on PENTAX measuring conditions. Some deviation from the above figures may occur in actual use depending on shooting mode and shooting conditions.

• In general, battery performance may temporarily deteriorate as the temperature decreases.
• Be sure to take a spare battery with you when traveling abroad or to a cold region, or if you intend to take a lot of pictures.

• Battery Level Indicator
You can check the battery level by the icon indicator on the LCD monitor.

Recycling Batteries

This symbol indicates that the battery is recyclable. Cover the terminals with insulating tape and take the battery to a store displaying this symbol.

Li-ion

Charging the Battery Abroad

The battery charger supplied with the camera is designed to switch automatically to the voltage (100-240V) and frequency (50Hz, 60Hz) of the electricity supply in the country or region where used. However, electrical socket shapes differ from country to country. Before traveling abroad, you are advised to check the socket shape in the country of your destination (see “Main Socket Types in the Major Countries and Regions of the World” (p.26)) and take an appropriately shaped adapter plug with you. The socket shape does not affect the charging method.

![Adapter plug image]

- Use of an off-the-shelf transformer may lead to defective operation.
- Unplug the adapter plug from the power outlet when the battery charger is not in use.

Getting Started

Use of the AC adapter D-AC8 (optional) is recommended if you intend to use the camera for a long time or connect it to a PC.

1. Make sure that the camera is turned off and open the battery/card cover.
2. Connect the DC terminal of the AC adapter to the DC input terminal of the camera with the ▲ symbol pointed toward the LCD monitor.
3. Connect the AC plug cord to the AC adapter.
4. Plug the AC plug cord into the power outlet.

Using the AC Adapter

Use of the AC adapter D-AC8 (optional) is recommended if you intend to use the camera for a long time or connect it to a PC.

1. Make sure that the camera is turned off and open the battery/card cover.
2. Connect the DC terminal of the AC adapter to the DC input terminal of the camera with the ▲ symbol pointed toward the LCD monitor.
3. Connect the AC plug cord to the AC adapter.
4. Plug the AC plug cord into the power outlet.

- Make sure that the camera is turned off before connecting or disconnecting the AC adapter.
- Make sure that the AC plug cord and the power cord connecting the AC adapter to the camera are inserted securely. The data may be lost if either becomes disconnected while data being recorded on the SD Memory Card or the built-in memory.
- Use the AC adapter with due care to avoid fire or electric shock. Be sure to read “FOR SAFE USE OF YOUR CAMERA” (p.1) before using the AC adapter.
- Be sure to read the operation manual accompanying the AC adapter before using the adapter.
- The battery inside the camera is not charged by connecting the AC adapter to the camera.
- Do not apply excessive pressure to the front or back of the camera when opening and closing the battery/card cover as this may dislodge the waterproof packing. If the packing is not in the correct position, the waterproof performance of the camera will be compromised.
This camera uses an SD Memory Card. Captured images and sound files are saved on the SD Memory Card if a card is inserted in the camera. They are saved in the built-in memory if a card is not inserted. (p.34)

- Make sure that the camera is turned off before inserting or removing the SD Memory Card.
- Be sure to format an SD Memory Card that is unused or has been used on another camera. Refer to “Formatting an SD Memory Card or the Built-in Memory” (p.149) for instructions on formatting.
- Allow the camera to dry completely before changing the SD Memory Card. Avoid changing the card where the camera is likely to get wet or dirty, and make sure that your hands are dry.
- Do not apply excessive pressure to the front or back of the camera when opening and closing the battery/card cover as this may dislodge the waterproof packing. If the packing is not in the correct position, the waterproof performance of the camera will be compromised.

**Caution**

- The still picture storage capacity varies depending on the capacity of the SD Memory Card and the selected number of recorded pixels and quality level. (p.31)
- The power indicator blinks while the SD Memory Card is being accessed (data is being recorded or read).
1 Open the battery/card cover. 
Press the battery cover lock lever in the direction of ①, slide the battery/card cover in the direction of ② and flip the cover open in the direction of ③.

2 Insert the SD Memory Card into the SD Memory Card socket so that the label is facing toward the LCD monitor. 
Push the card in until it clicks. Images and sound may not be recorded correctly if the card is not inserted all the way.

3 Close the battery/card cover. 
Press the battery cover lock lever in the opposite direction to ①.

Removing the SD Memory Card

1 Open the battery/card cover. 

2 Push the card into the SD Memory Card socket to eject it. 
Pull the card out.
**Precautions When Using an SD Memory Card**

- The SD Memory Card is equipped with a write-protect switch. Setting the switch to LOCK protects the existing data by prohibiting recording of new data, deletion of existing data or formatting of the card.
- appears on the LCD monitor when the card is write-protected.
- Care should be taken when removing the SD Memory Card immediately after using the camera, as the card may be hot.
- Do not remove the SD Memory Card or turn the camera off while data is being saved to the card, images or sound files are being played back, or the camera is connected to a computer with the USB cable, as this may cause the data to be lost or the card to be damaged.
- Do not bend the SD Memory Card or subject it to violent impact. Keep it away from water and store away from high temperature.
- Do not remove the SD Memory Card during formatting as this may damage the card and render it unusable.
- The data on the SD Memory Card may be deleted in the following circumstances. PENTAX does not accept any liability for data that is deleted
  (1) when the SD Memory Card is mishandled by the user.
  (2) when the SD Memory Card is exposed to static electricity or electrical interference.
  (3) when the card has not been used for a long time.
  (4) when the card is ejected or the battery is removed while the data on the card is being recorded or accessed.
- The SD Memory Card has a limited service life. If it is not used for a long time, the data on the card may become unreadable. Be sure to make a backup of important data on a computer.
- Avoid using or storing the card where it may be exposed to static electricity or electrical interference.
- Avoid using or storing the card in direct sunlight or where it may be exposed to rapid changes in temperature or to condensation.
- When using an SD Memory Card with a slow recording speed, recording may stop while you are taking movies even when there is adequate space in the memory, or shooting and playback may take a long time.
- For information on compatible SD Memory Cards, visit the PENTAX website or contact your nearest PENTAX Service Center.
**Recorded Pixels and Quality Level of Still Pictures**

Choose the number of pixels (size) and quality level (data compression rate) of still pictures according to how you intend to use the pictures you have taken.

Higher quality levels and numbers of pixels produce clearer images for printing, but the resulting increase in data volume reduces the total number of pictures that can be stored in the camera’s built-in memory or on the SD Memory Card.

The quality of the captured photo or printed picture also depends on the quality level, exposure compensation, resolution of the printer and a variety of other factors, so you do not need to select more than the required number of pixels. As a rough guide, 2M (1600×1200) is adequate for making postcard-size prints. Refer to the table below for the appropriate settings according to use.

- **Appropriate Number of Recorded Pixels According to Use**

<table>
<thead>
<tr>
<th>Recorded Pixels</th>
<th>Use</th>
</tr>
</thead>
<tbody>
<tr>
<td>5M 2560×1920</td>
<td>For printing high quality photos or A4-size pictures, or editing images on a PC.</td>
</tr>
<tr>
<td>4M 2304×1728</td>
<td>For making postcard-size prints.</td>
</tr>
<tr>
<td>3M 2048×1536</td>
<td>For posting on a website or attaching to e-mail.</td>
</tr>
<tr>
<td>2M 1600×1200</td>
<td></td>
</tr>
<tr>
<td>1M 1024×768</td>
<td></td>
</tr>
<tr>
<td>640 640×480</td>
<td></td>
</tr>
</tbody>
</table>

The default setting is 5M (2560×1920).

- **Appropriate Quality Level According to Use**

| ★★★ Best | Lowest compression rate. Suitable for photo prints. |
| ★★ Better | Standard compression rate. Suitable for viewing the image on a computer screen. |
| ★ Good    | Highest compression rate. Suitable for posting on a website or attaching to e-mail. |

The default setting is ★★ (Better).

Choose the appropriate number of recorded pixels and quality level for still pictures on the [Rec. Mode] menu.

Selecting the Recorded Pixels p.85

Selecting the Quality Level p.87
### Recorded Pixels, Quality Level and Image Storage Capacity

(Approximate numbers of pictures)

<table>
<thead>
<tr>
<th>Pixels</th>
<th>★★★ (Best)</th>
<th>★★ (Better)</th>
<th>★ (Good)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Built-in Memory</td>
<td>64MB</td>

<td>33</td>
</tr>
<tr>
<td>640 640×480</td>
<td>39</td>
<td>227</td>
<td>61</td>
</tr>
</tbody>
</table>

- The above figures may vary depending on the subject, shooting conditions, shooting mode and SD Memory Card, etc.
Recorded Pixels and Frame Rate of Movies

Choose the recorded pixels and frame rate according to how you intend to use the movies you have taken. The number of recorded pixels indicates the resolution of the image. The higher the number of recorded pixels, the clearer the image, but the bigger the file size. The frame rate indicates the number of frames per second. The more frames per second, the better the quality of the movie, but the bigger the file size. Choose the appropriate number of recorded pixels and frame rate in [Movie] on the [Rec. Mode] menu.

Selecting the Recorded Pixels for Movies p.101
Selecting the Frame Rate p.102

● Appropriate Number of Recorded Pixels According to Use

<table>
<thead>
<tr>
<th></th>
<th>Suitable for viewing the movie on a computer.</th>
</tr>
</thead>
<tbody>
<tr>
<td>D (320×240)</td>
<td>File size is smaller, but total recording time is increased. Suitable for posting on a website or attaching to e-mail.</td>
</tr>
</tbody>
</table>

The default setting is D (320×240).

● Appropriate Frame Rate According to Use

<table>
<thead>
<tr>
<th></th>
<th>Produces high quality movies, but reduces the total recording time.</th>
</tr>
</thead>
<tbody>
<tr>
<td>30fps</td>
<td>Increases the total recording time because the file size is smaller.</td>
</tr>
</tbody>
</table>

The default setting is 30 fps (frames per second).

● Recorded Pixels, Frame Rate and Recording Time

<td>1 min. 1 sec.</td>
<td>5 min. 52 sec.</td>
<td>1 min. 52 sec.</td>
<td>10 min. 45 sec.</td>
<td></td>
</tr>
</tbody>
</table>

- The above figures are based on PENTAX standard shooting conditions and may vary depending on the subject, shooting conditions and type of SD Memory Card used.
1  **Press the power switch.**

The camera turns on.
If the Initial Setting screen or Date Adjust screen appears when you turn the camera on, follow the procedure on p.36 to set the display language and/or current date and time.

2  **Press the power switch again.**

The camera turns off and the power indicator turns off.

---

### Checking the Memory Card

The memory card is checked automatically when the camera turns on. 

- appears on the LCD monitor when there is no SD Memory Card inserted in the camera. In this case, images and sound files will be saved in the built-in memory.
- appears instead of when the write-protect switch on the SD Memory Card is in the locked position. Images and sound cannot be recorded when the write-protect switch is locked.
Getting Started

Use this mode when you want to play back an image or sound file straightaway without taking any more pictures. Pressing the shutter release button does not change the mode to A mode.

1. **Press the power switch while holding down the ➤ button.**
   
The camera turns on in Playback Only Mode.

   **memo**
   To switch from Playback Only mode to A mode, turn the camera off and then turn it on again.

Playback Only Mode

Playing Back Still Pictures p.42
If the Initial Setting screen or Date Adjust screen appears when you turn the camera on, follow the procedure below to set the display language and/or current date and time.

**If the Initial Setting screen appears**

If the Initial Setting screen appears

- p.37 “Setting the Display Language”
- p.38 “Setting the Date and Time”

**If the Date Adjust screen appears**

- p.38 “Setting the Date and Time”

If neither screen appears, setting is not required.
Setting the Display Language

You can choose the language in which the menus, error messages, etc. are displayed.

1  Press the four-way controller (▶).  
The Language/言語 screen appears.

2  Use the four-way controller (▲ ▼ ◀ ▶) to choose the display language.

3  Press the OK button.  
The screen for setting the city and daylight saving time appears.

4  Press the four-way controller (▼).  
The frame moves to [Hometown].

5  Press the four-way controller (▶).  
The Hometown screen appears.

6  Use the four-way controller (◀ ▶) to choose the city.

7  Press the four-way controller (▼).  
The frame moves to [DST] (Daylight Saving Time).

8  Use the four-way controller (◀ ▶) to select ✓ (On) or □ (Off).

9  Press the OK button twice.  
The Date Adjust screen appears.

---

You can change the display language. (☞ p.157)  
The video output format is set to the format of the country or region selected in [Language/言語] on the Initial Setting screen. You can change the setting.  
(☞ p.160)
Setting the Date and Time

Set the current date and time and the display style.

1. **Press the four-way controller (▶).**
   The frame moves to [mm/dd/yy].

2. **Use the four-way controller (▲▼) to choose the date and time display style.**

3. **Press the four-way controller (▶).**
   The frame moves to [24h].

4. **Use the four-way controller (▲▼) to select [24h] (24-hour display) or [12h] (12-hour display).**

5. **Press the four-way controller (▶).**
   The frame returns to [Date Style].

6. **Press the four-way controller (▼).**
   The frame moves to [Date].

7. **Press the four-way controller (▶).**
   The frame moves to the month.

8. **Use the four-way controller (▲▼) to change the month.**
   Change the day and year in the same manner.
   Next, change the time.
   If you selected [12h] in Step 4, the setting switches between am and pm corresponding to the time.
9 Press the **OK** button.
The camera is ready to take pictures. If you set the date and time from the [Setting] menu, the screen will return to the menu. Press the **OK** button again.

When the Initial Setting or Date Adjust screen is displayed, you can cancel the setting operation and switch to Capture mode by pressing the **MENU** button. In this case, the Initial Setting screen will appear next time you turn the camera on.

**Caution**

- When you finish the settings and press the **OK** button, the camera clock is reset to 00 seconds. To set the exact time, press the **OK** button when the time signal (on the TV, radio, etc.) reaches 00 seconds.
- You can change the language and date and time settings with the menu operations. (p.150, p.157)
Taking Still Pictures

The standard procedure for taking still pictures is described below. The flash fires automatically depending on the light conditions.

1. **Press the power switch.**
   The camera turns on and is ready to take still pictures. This is called Still Picture Capture mode.

2. **Confirm the subject and shooting information on the LCD monitor.**
   The focus frame in the middle of the LCD monitor indicates the zone of automatic focusing.
   You can change the captured area by pressing the Zoom/ button to the left or right.
   - : enlarges the subject
   - : enlarges the area captured by the camera

3. **Press the shutter release button halfway.**
   The focus frame turns green if the subject is in focus.

4. **Press the shutter release button fully.**
   The picture is taken.
   The image appears on the LCD monitor for one second (Instant Review) and is saved to the SD Memory Card or built-in memory. (p.41)

**memo**
Press the Green button to switch to the Green mode and let the camera set all the shooting functions automatically. Selecting the Green mode is the easiest way to ensure that pictures come out well. (p.64)
Using the Shutter Release Button

The shutter release button works in a two-step action as follows.

Press halfway

The focus and exposure are locked when the shutter release button is pressed halfway. The green focus frame lights on the LCD monitor when the shutter release button is pressed halfway and the subject is in focus. If the subject is out of focus, the frame will light red.

Press fully

Press the shutter release button all the way down to take the picture.

[Poor focusing conditions]

The camera may not be able to focus under the following conditions. In this case, lock the focus on an object the same distance away as the subject (by pressing the shutter release button halfway), then aim the camera at your subject and press the shutter release button fully.

- Objects that lack contrast such as a blue sky or white wall
- Dark places or objects, or conditions that prevent light being reflected back
- Horizontal lines or intricate patterns
- Fast moving objects
- When there is an object in the foreground and an object in the background in the same picture
- Strongly reflected light or strong backlighting (bright background)

Instant Review

The image appears on the LCD monitor for one second (Instant Review) immediately after it is captured. You can change the Instant Review time. (p.93)

You can delete the image during Instant Review by pressing the button.
Playing Back Still Pictures

1. Press the Q button after taking a picture. The image appears on the LCD monitor. In this manual, this is called Q mode (Playback mode). Displaying one image in full in Q mode (Q mode default setting) is called single-image display. Press the Q button again in Q mode or press the shutter release button halfway to return to A mode.

Playing Back Images

Playing Back the Previous or Next Image

1. Press the Q button after taking a picture. The image appears on the LCD monitor.

2. Press the four-way controller (◄ ►). The previous or next image appears.
Quick Start

1 Press the \button after taking a picture. The image appears on the LCD monitor.

2 Press the four-way controller (▼). The Playback Mode Palette appears.

3 Use the four-way controller (▲▼◄►) to select (Image Rotation).

4 Press the OK button. The image is rotated 90 degrees clockwise each time the button is pressed.

5 Press the \button. The rotated image appears.

- Movies cannot be rotated.
- Protected images can be rotated, but they cannot be saved in a rotated state.

Rotating the Displayed Image

Deleting the Displayed Image

Press the \button while the image is displayed to display the Delete screen. Use the four-way controller (▲) to select [Deletion] and press the OK button. (p.114)
Common Operations

Understanding the Button Functions

1. **Power switch**
   Turns the camera off. (p.34)

2. **Shutter release button**
   Focuses the camera on the subject when pressed halfway. (Except in \[^{a},^{p},^{m}]\, PF, and MF modes) (p.40)
   Takes the still picture when pressed down fully. (p.40)
   Starts and stops movie recording in \(\mathbb{M}\) mode. (p.99)
   Starts and stops sound file recording in \(\mathbb{T}\) mode. (p.144)

3. **Green button**
   Switches to the Green mode. (p.64)
   Calls up the assigned menu. (p.58)
   Displays an explanation of the function selected on the Mode Palette. (p.62)

4. **Zoom/\(\mathbb{H}/\mathbb{U}/\mathbb{P}/\mathbb{Q}\) button**
   Changes the captured area. (p.74)
   Removes/adds a shooting mode on the Capture Mode Palette. (p.57)
5  **button**  
Switches to the mode. (p.104)

6  **Four-way controller**  
(▲) : Changes the drive mode. (p.72, p.77, p.78)  
(▼) : Displays the Capture Mode Palette. (p.53)  
(◄) : Changes the flash mode. (p.83)  
(►) : Changes the focus mode. (p.81)  
(▲ ▼) : Adjusts MF in MF mode. (p.82)

7  **OK/DISPLAY button**  
Changes the information displayed on the LCD monitor. (p.79)

8  **MENU button**  
Displays the [Rec. Mode] menu. (p.48)
Common Operations

1. **Power switch**
   Turns the camera off. (p.34)

2. **Shutter release button**
   Switches to \( \text{A} \) mode when pressed down halfway or fully. (p.104)

3. **Green/\( \text{i} \) button**
   Switches from single-image display to the Delete screen. (p.114)
   Switches from nine-image display to the Select & Delete screen. (p.116)
   Displays a guide of the function selected on the Playback Mode Palette. (p.62)

4. **Zoom/\\( \text{f} \)/\\( \text{Q} \) button**
   Switches from single-image display to nine-image display when \( \text{f} \) is pressed and to folder display when \( \text{Q} \) is pressed again. Returns to the previous display when \( \text{Q} \) is pressed. (p.105)
   Enlarges the image when \( \text{Q} \) is pressed during single-image display.
   Returns to the previous display when \( \text{Q} \) is pressed. (p.107)
   Can be used to adjust the volume during movie or sound file playback. (p.112, p.146)

5. **\\( \text{D} \) button**
   Switches to \( \text{D} \) mode. (p.104)
6 **Four-way controller**

(▲) : Plays back and pauses a movie or sound file. (pp.112, 146)
(▼) : Displays the Playback Mode Palette. (p.61)
      Stops a movie or sound file during playback. (pp.112, 146)
(◄ ►) : Displays the previous or next image and sound file during single-image display. (p.42)
      Frame forwards, frame reverses and reverses a movie during playback. (p.112)
      Fast forwards, reverses, and moves to the index in sound file playback. (p.146)
(▲ ▼ ◄ ►) : Moves the display area during zoom display. (p.107)
      Selects an image in nine-image display and a folder in folder display. (p.105)

7 **OK/DISPLAY button**

Changes the information displayed on the LCD monitor. (p.109)
Returns zoom display or nine-image display to single-image display. (p.105, p.107)
Changes to nine-image display of the selected folder during folder display. (p.106)

8 **MENU button**

Displays the [Rec. Mode] menu during single-image display. (p.48)
Returns to single-image display during Playback Mode Palette display. (p.60)
Returns zoom display or nine-image display to single-image display. (p.105, p.107)
Changes to nine-image display of the selected folder during folder display. (p.106)
To change the camera settings, press the **MENU** button to display the [Rec. Mode] menu or [Setting] menu. Menus for playing back and editing images and sound files are displayed from the Playback Mode Palette.

### Setting with the Menus

Pressing the **MENU** button displays the [Rec. Mode] menu.

**During recording**

- Press halfway
- Change the setting and go to **P** mode

**During playback**

- **MENU** or **OK**
- Press halfway
- Change the setting and go to **Q** mode
Ex.) To set the [Quality Level] on the [Rec. Mode] menu

1 Press the MENU button in mode.
The [Rec. Mode] menu appears.

2 Press the four-way controller (▼).
The frame moves to [Recorded Pixels].

3 Press the four-way controller (▼).
The frame moves to [Quality Level].

4 Press the four-way controller (►).
A pull-down menu appears with the items that can be selected.
The pull-down menu displays only those items that can be selected with the current camera settings.

5 Use the four-way controller (▲ ▼) to change the setting.
The quality level changes each time the four-way controller (▲ ▼) is pressed.
To Save the Setting and Start Taking Pictures

6 Press the shutter release button halfway.
The setting is saved and the camera returns to capture status.
When the shutter release button is pressed fully, the picture is taken.

To Save the Setting and Begin Playback of Images

6 Press the Q button.
The setting is saved and the camera returns to playback status.

To Save the Setting and Continue with Menu Operations

6 Press the OK button or the four-way controller ( ).
The setting is saved and the screen returns to Step 3.

To Cancel the Changes and Continue with Menu Operations

6 Press the MENU button.
The changes are canceled and the screen returns to Step 3.

The MENU button function differs depending on the screen. Refer to the guide indications.

MENU Exit : Saves the current setting, exits the menu and returns to the original screen.

MENU : Saves the current setting and returns to Step 3.

MENU Cancel : Cancels the current selection, exits the menu and returns to Step 3.
## Menu List

This displays the items that can be set with the menus and provides descriptions of each item. See the list of default settings in the Appendix (p.168) to decide whether you want the settings saved when the camera is turned off and whether you want the settings returned to the defaults when the camera is reset.

### Rec. Mode Menu

This menu shows the functions related to taking still pictures and recording movies.

Setting the Shooting Mode

The OptioWP has a variety of shooting modes that let you take pictures or record movies and sound in different situations simply by choosing the right mode for the particular situation from the Capture Mode Palette.

1. **Press the four-way controller (▼) in mode.**
   The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to choose a shooting mode.**
   Choose a shooting mode and press the Green button to display a guide of the shooting mode. (p.62)

3. **Press the OK button.**
   The shooting mode is selected and the camera returns to capture status.

**memo**

In shooting modes other than P, R, O and F, the flash, focus, saturation, contrast, sharpness, white balance etc. are automatically set to the optimal settings for each mode.
There are 20 available shooting modes.

1. **Program**
The basic picture-taking mode. You can let the camera set the functions or choose various functions yourself.

2. **Night Scene**
Ideal for taking night views. It is best to use a tripod in this mode. Use the flash if including people in your picture.

3. **Movie**
Use this mode for taking movies. Sound is recorded at the same time.

4. **Voice Recording**
Use this mode to record sound files. Be careful not to cover the microphone on the top of the camera with your hand.

5. **Panorama Assist**
For capturing images to make a panoramic image. Use the supplied software to join images easily.

6. **Landscape**
Use this mode for taking landscape views. The focus encompasses a wide area.

7. **Flower**
Use this mode for taking bright, colorful pictures of flowers with soft outlines.
8  **Portrait**
Use this mode for taking pictures of people. Gives your subject a bright, healthy look.

9  **Underwater**
Use this mode for taking pictures underwater. Captures the blueness of the sea.

10 **Surf & Snow**
For capturing images with dazzling backgrounds, such as beaches or snowy mountains.

11 **Sport**
Ideal for taking fast-moving action shots. The camera keeps the moving subject in focus until the shutter release button is pressed.

12 **Synchro Sound Record**
Automatically records the sound 10 sec. before and after the shutter is released.

13 **Pet**
Ideal for taking pictures of pets. The camera keeps the moving pet in focus until the shutter release button is pressed. You can select settings according to the color of your pet’s coat.
14 Candlelight
Ideal for capturing a candlelit atmosphere. The number of recorded pixels is set at 1280×960.

15 SOFT Soft
For taking pictures with soft, blurred outlines.

16 Fireworks
Use this mode to take spectacular pictures of fireworks. It is best to use a tripod as the shutter speed is fixed at 4 sec.

17 Self-portrait
Use this mode to take pictures of yourself or include yourself in pictures. The camera adjusts the focus and color.

18 Natural Skin Tone
Adjusts the color and brightness to reproduce skin tone more beautifully than Portrait mode.

19 Food
Use this mode for taking pictures of food. The increased saturation gives pictures a bright, vivid finish.
**Museum**
For taking pictures in museums and art galleries where flash photography is not permitted. Take care to avoid camera shake.

Use the Capture mode to assign shooting modes to the Capture Mode Palette. In default status, the 15 shooting modes from ① to ⑮ are assigned to the palette. You can change the modes on the palette.

### Changing the Shooting Mode Icons

In addition to the Green mode, this camera has 20 shooting modes, of which 15 are assigned to the Capture Mode Palette. You can change the modes that appear on the Palette.

1. **Press the four-way controller (▼) in マ mode.**
   The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to choose the shooting mode you want to remove.**

3. **Press Q on the Zoom/□/Q button.**
   The shooting mode selection screen appears.

4. **Use the four-way controller (◄►) to choose the mode icon you want to add and press the OK button.**
   The selected mode icon is added to the Mode Palette.

   - Choose a shooting mode and press the Green button to display a guide of the shooting mode. (☞p.62)
   - The shooting modes assigned to the Capture Mode Palette and the order in which they appear are not returned to their defaults by selecting [Reset] on the [.party Setting] menu.
Calling Up a Specific Menu

When you assign functions to the Green button, pressing the Green button displays the menus one after another. This is useful for going straight to the setting screens of frequently used functions such as EV Compensation, Sensitivity and White Balance.

- The following functions can be assigned to the Green button: Green Mode, Recorded Pixels, Quality Level, White Balance, Focusing Area, Focus Limiter, Sensitivity, EV Compensation, Sharpness, Saturation and Contrast.
- The default setting is Green mode in [1] and no function in [2], [3] or [4].
- The setting is returned to the default setting by selecting [Reset] on the [-setting] menu.
- The functions assigned to the Green button can be used in the usual manner on the original menus ([Rec. Mode] and [Setting]).
- You cannot save different settings for the same function on the Green button and on the original menu.

Assigning a Function to the Green Button

1. **Select [Green Button] on the [Setting] menu.**
2. **Press the four-way controller ( ).**
   The Green Button screen appears.
3. **Use the four-way controller (▲▼) to choose a number.**
4. **Press the four-way controller ( ).**
   A pull-down menu appears.
5. **Choose a function and press the OK button.**
6. **Repeat Steps 3 to 5 to register the necessary functions.**
7. **Press the shutter release button halfway.**
   The setting is saved and the camera returns to capture status.
Using the Green Button

1  **Press the Green button in 📸 mode.**
   The function assigned to [1] in [Green Button] on the [Setting] menu is called up.

2  **Press the Green button again.**
   The function assigned to [2] is called up.
   While the screen at right is displayed, use the Green button to recall functions allocated to [3] and [4].

3  **Change the settings and press the OK button.**
   The camera returns to capture status.

   - If the Green mode has been assigned to the Green button, the camera enters the Green mode one second after the Green button is pressed (p.64).
   - If a function other than the Green mode has been assigned to the Green button, the camera returns to the original screen if no operation is performed for five seconds after the Green button is pressed.
Setting the Playback Mode

Press the four-way controller (▼) in Playback mode to display the Playback Mode Palette. You can display the playback function you want to use simply by using the four-way controller (▲ ▼ ◀ ▶) to choose an icon and pressing the OK button.

Close the Playback Mode Palette and go to mode. Go to screen for selected playback function.

Viewing a Guide of the Shooting and Playback Modes

Selecting a mode on the Capture Mode Palette or Playback Mode Palette and pressing the Green button displays an explanation of the selected item.

1. **Press the four-way controller (▼) in 📷 mode.**
   The Capture Mode Palette appears.
   Press the four-way controller (▼) in 📀 mode to display the Playback Mode Palette.

2. **Use the four-way controller (▲▼◂►) to choose a shooting mode.**

3. **Press the Green button.**
   A guide of the selected shooting mode appears.

4. **Press the OK button.**
   The camera returns to capture status with the selected shooting mode.

Memo: Press the Green button while the guide is displayed to return to the Capture Mode Palette or Playback Mode Palette.
Taking Pictures

Letting the Camera Choose the Optimal Settings (Program Mode)

In (Program) mode, the camera automatically sets the shutter speed and aperture for taking still pictures. However, you can select other functions such as the flash mode and recorded pixels.

1 **Press the power switch.**
   The camera turns on and is ready to take still pictures.

2 **Set the functions you want to use.**
   Refer to “Setting the Shooting Functions” (p.81 - p.96) for details of how to set the functions.

3 **Press the shutter release button halfway.**
   The focus frame on the LCD monitor turns green if the subject is in focus.

4 **Press the shutter release button fully.**
   The picture is taken.

---

**memo**

If a shooting mode other than (Program) mode has been selected, select (Program) mode from the Capture Mode Palette. (p.53)

Taking Still Pictures p.40
In the Green mode, you can enjoy easy picture-taking using standard settings*, regardless of the settings in the [Rec. Mode] menu.

1. **Press the Green button in ** mode.  
The camera switches to the Green mode. Press the Green button again to return to the status before the Green mode was selected.

2. **Press the shutter release button halfway.**  
The focus frame turns green if the subject is in focus.

3. **Press the shutter release button fully.**  
The picture is taken.
• If any other functions have been assigned to the Green button, the menus appear in sequence each time the button is pressed. (p.59)
• In Green mode, you cannot change the information displayed on the LCD monitor by pressing the OK button.
• You cannot use the [Rec. Mode] menu or Capture Mode Palette in Green mode. If you try to display the [Rec. Mode] menu or Capture Mode Palette, (key lock icon) appears.
• If you switched to Q mode from Green mode, you cannot display the [Rec. Mode] menu by pressing the MENU button. If you try to display the [Rec. Mode] menu, (key lock icon) appears.
• When the camera is turned off in the Green mode, it turns on in the Green mode next time the power switch is pressed.

* The Green mode settings are as shown below.

<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image_url" alt="Image" /></td>
<td><img src="image_url" alt="Image" /></td>
</tr>
</tbody>
</table>

1. **Press the four-way controller (▼) in 📸 mode.**  
The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to select 📸 (Night Scene), 🕯️ (Candlelight) or 🎆 (Fireworks).**

3. **Press the OK button.**  
The shooting mode is selected and the camera returns to capture status.

4. **Press the shutter release button halfway.**  
The focus frame turns green if the subject is in focus.

5. **Press the shutter release button fully.**  
The picture is taken.

**memo**

- The shutter speed is slower when taking pictures of dark scenes.
- To prevent camera shake, use a tripod and the self-timer function. (p.77)
- The number of recorded pixels is set at 1280×960 in 🕯️ mode.
- You can assign the 🎆 mode to the Capture Mode Palette if it does not appear there already. (p.57)
- The sensitivity is set at 50 in 🎆 mode.
Taking Pictures of Your Pet (Pet Mode)

Use this mode to keep your moving pet in focus while you take the picture and capture the color of your pet’s coat. Choose the appropriate icon depending on what color your pet is (closer to black or white or in between).

1. **Press the four-way controller (▼) in **_epochs mode.**
   The Capture Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◀▶) to select **_epochs (Pet).**

3. **Press the OK button.**
   The Pet mode selection screen appears.

4. **Use the four-way controller (▲ ▼) to select **_epochs, **_epochs, **_epochs, **_epochs or **_epochs.**
   There are two icons of a cat and a dog.
   (Choosing either the cat or dog icon does not affect the resulting picture. Choose whichever you prefer.)

5. **Press the OK button.**
   The Pet mode is selected and the camera returns to capture status.

6. **Press the shutter release button halfway.**
   The focus frame turns green if the subject is in focus.

7. **Press the shutter release button fully.**
   The picture is taken.
You can take a number of images and join them together to form a panorama picture. The panorama software (ACDSee for PENTAX, ACD photostitcher) on the CD-ROM (S-SW30) supplied with the camera and a computer are necessary for joining the images. The Panorama Assist mode enables you to overlap the edges of the images so that they are easier to join together later into a panorama picture.

1. **Press the four-way controller (▼) in  mode.**
   The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to select  (Panorama Assist).**

3. **Press the OK button.**

4. **Use the four-way controller to choose the direction in which the images will be joined.**
   - ▼: Joins the images at the left.
   - ►: Joins the images at the right.
   - ▲: Joins the images at the top.
   - ▼: Joins the images at the bottom.

   The example shows the images when ► is selected.
5 **Take the first image.**
Press the shutter release button fully to take the first image. The right edge of the image appears in semi-transparent form on the left of the LCD monitor.

6 **Move the camera to the right and take the second image.**
Move the camera until the semi-transparent image and the actual view overlap and press the shutter release button. Repeat Steps 5 and 6 to take the third and subsequent images.

*Caution*

The camera cannot join the images. Use the panorama software supplied with the camera (ACDSee for PENTAX, ACD photostitcher). Refer to the ACDSee for PENTAX User Guide for instructions on stitching images.
Taking Pictures

This camera has a waterproof capability equivalent to JIS Class 8 protection (IPX8) and can be used to take pictures at a depth of 1.5 m continuously for 30 minutes.
Use the Underwater mode to take underwater pictures that capture the blueness of the sea.

1. **Press the four-way controller (▼) in mode.**
The Capture Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◄ ►) to select (Underwater).**

3. **Press the OK button.**
The Underwater mode is selected and the camera returns to capture status.

4. **Press the shutter release button halfway.**
The focus frame turns green if the subject is in focus.

5. **Press the shutter release button fully.**
The picture is taken.

**Caution:**
- Before taking pictures underwater, make sure that there is no dirt or sand on the waterproof packing of the battery/card cover and check that the cover is securely locked. (p.23)
- Before opening the battery/card cover after using the camera underwater, make sure that there is no water, dirt or sand on the battery/card cover or anywhere on the camera. Wipe the camera before opening the cover.

**Waterproof Function** p.5
Taking Still Pictures with Sound (Synchro Sound Record)

This mode lets you record a total of 20 seconds of sound with a still picture, 10 seconds before and 10 seconds after you press the shutter release button.

1. Press the four-way controller (▼) in \( \) mode. The Capture Mode Palette appears.
2. Use the four-way controller (▲▼◄►) to select \( \) (Synchro Sound Record).
3. Press the OK button. The Synchro Sound Record mode is selected and the camera returns to capture status.
4. Press the shutter release button halfway. The focus frame turns green if the subject is in focus.
5. Press the shutter release button fully. The picture is taken. A countdown of the recording time appears on the Instant Review screen.

- You can play back sound recorded in Synchro Sound Record mode in the same way as playing a voice memo. (p.148)
- If you press the shutter release button fully while the camera is recording sound after taking the picture, the camera immediately switches to capture status, so the time that sound is recorded may be reduced.
In this mode you can take pictures using the frames stored in the camera. There are three frames already stored in the camera.

1 Press the four-way controller (▲) in oubles mode. The drive mode selection screen appears.

2 Use the four-way controller (◄►) to select (Frame Composite) and press the OK button. The frame selection screen appears.

3 Use the four-way controller (◄►) to choose the frame you want to use and press the OK button. The frame appears on the screen.
4 Press the shutter release button halfway.  
The focus frame turns green if the subject is in focus.

5 Press the shutter release button fully.  
The picture is taken.

• The frame function is not available in  or  mode.
• Press the MENU button in the frame selection screen to display the [Rec. Mode] menu.
• The frames used in this function are stored in the camera’s built-in memory. They can be replaced with frames from the SD Memory Card by pressing the Green button in the frame selection screen. (p.131)
• The number of recorded pixels is fixed at  when taking pictures using the frame function.
Using the Zoom

You can use the zoom to change the captured area.

1. **Press the Zoom/ワイド/↑ button in 撮影模式.**
   - Tele: enlarges the subject
   - Wide: enlarges the area captured by the camera
   - The zoom bar indicates the current level of magnification.

   When the digital zoom function is set to (Off), you can take pictures at up to three times magnification using the optical zoom. When the digital zoom function is set to (On), you can combine it with the optical zoom to enlarge the subject to a maximum magnification equivalent to 12 times.

**Memo**

- You are recommended to use a tripod to prevent camera shake when taking pictures at a high magnification rate.
- Pictures taken in the digital zoom range appear grainier than pictures taken in the optical zoom range.
Setting the Digital Zoom

The digital zoom is set to  ✔ (On) in the default settings. To take pictures using only the optical zoom, set the digital zoom to □ (Off).

1. **Press the MENU button in  📷 mode.**
   The [ 📷 Rec. Mode] menu appears.

2. **Use the four-way controller ( ▲ ▼ ) to select [Digital Zoom].**

3. **Use the four-way controller ( ◀▶ ) to select  ✔ (On) or □ (Off).**

4. **Press the shutter release button halfway.**
   The digital zoom function setting is saved and the camera returns to capture status.

---

Saving the Digital Zoom Function Setting ↪ p.97
Setting the Exposure (EV Compensation)

You can adjust the overall brightness of the picture. Use this function to take pictures that are intentionally overexposed or underexposed.

1 **Press the MENU button in **\( \text{REC} \) **mode.**
   The [\( \text{REC} \) Rec. Mode] menu appears.

2 **Use the four-way controller (\( \text{\uparrow} \text{\downarrow} \)) to select [EV Compensation].**

3 **Press the four-way controller (\( \text{\leftarrow} \text{\rightarrow} \)).**
   You can change the EV setting.
   To brighten, select a positive (\(+\)) value. To darken, select a negative (\(-\)) value.
   You can choose the EV setting in the range of \(-2.0 \text{ EV} \) to \(+2.0 \text{ EV} \) in 1/3 EV steps.

4 **Press the OK button.**
   The EV compensation value is saved and the camera returns to capture status.

- If you use the EV compensation function frequently, you can save time by assigning it to the Green button. (\( \text{\ref \text{p.58}} \))
- When the histogram is displayed, bright portions and dark portions are indicated on the LCD monitor, enabling you to check the exposure. (\( \text{\ref \text{p.79}} \))

Saving the EV Compensation Value \( \text{\ref \text{p.97}} \)
Taking Pictures

Using the Self-timer

In Self-timer mode, the picture is taken ten seconds or two seconds after the shutter release button is pressed.

1. Press the four-way controller (▲) in mode.

2. Use the four-way controller (◄ ► ▼) to select ◽ or ◽ and press the OK button.

   The camera is ready to take the picture using the self-timer.

3. Press the shutter release button halfway.

   The focus frame turns green if the subject is in focus.

4. Press the shutter release button fully.

   The picture is taken ten seconds or two seconds later.

   Focusing may be compromised if you move the camera while the self-timer lamp is blinking when taking still pictures.

   In mode, recording will start after ten seconds (or two seconds).

   Press the shutter release button halfway while the self-timer is engaged to stop the countdown and press fully to restart the countdown.
Taking a Series of Pictures (Continuous Shooting Mode/High Speed Continuous Shooting Mode)

In this mode, pictures are taken continuously for as long as the shutter release button is pressed.

1. Press the four-way controller (▲) in  mode.
2. Use the four-way controller (◄►▼▼) to select (Continuous Shooting) or (HS Cont. Shooting) and press the OK button.

The camera is ready to take a series of pictures.

3. Press the shutter release button halfway.
The focus frame turns green if the subject is in focus.

4. Press the shutter release button fully.
Pictures are taken continuously for as long as you keep the shutter release button pressed.

- The flash will not discharge in Continuous Shooting and High Speed Continuous Shooting mode.
- The continuous shooting function is not available in , , , , , or  mode.

**Caution**

- You can continue shooting until the memory capacity of the SD Memory Card or built-in memory is full.
- The interval of continuous shooting will vary according to the Recorded Pixels and Quality Level settings.
- The number of recorded pixels is fixed at 1280×960 in high speed continuous shooting mode.
- The focus, exposure and white balance are locked with the first image.
Displaying Shooting Information in Capture Mode

The LCD monitor display changes in the following sequence each time you press the **OK** button: Normal Display, Histogram + Info, No Icons, Backlight Off.

For details of each display mode, refer to “Monitor Indications” (p.18).

- All the camera buttons function as normal even when the backlight is off. Press the shutter release button to take pictures as normal.
- **■**) appears when camera shake is likely to occur. To prevent camera shake, use a tripod and the self-timer function. (p.77)
Using the Histogram

A histogram is a graph showing the brightness distribution of the image, with the brightness on the horizontal axis (darkest at the left and brightest at the right) and the number of pixels on the vertical axis. The shape of the histogram tells you whether the exposure of the image is correct or not. If the exposure is correct, the graph peaks in the middle. If the image is too dark, the peak is on the left side, and if it is too bright, the peak is on the right side.

With the OptioWP, you can check the brightness distribution of the image by displaying it on the LCD monitor as well as by referring to the histogram. Bright portions (where the image is so bright that it is totally white) blink red on the LCD monitor and dark portions (where the image is so dark that it is totally black) blink yellow. (☞p.19)
**Setting the Shooting Functions**

**Taking Pictures**

**Selecting the Focus Mode**

**Focus Mode**

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
</table>
| **AF** | Autofocus
Use this mode when the distance to the subject is 40cm (16 in.) or more. The camera is focused on the subject in the autofocus area when the shutter release button is pressed halfway. |
| **/></p><p>| **Macro mode**
This mode is used when the distance to the subject is approx. 1 cm to 60 cm (0.4 in. to 24 in.). The camera is focused on the subject in the autofocus area when the shutter release button is pressed halfway. |
| **Infinity-landscape mode**
This mode is used for taking distant objects. The flash is set to (flash off). |
| **PF** | Pan focus
This mode is used when you ask someone to take pictures for you, or when taking pictures of the scenery through the window of a car or train. The entire picture, from the front to the back, is focused sharply. |
| **MF** | Manual Focus
This mode lets you adjust the focus manually. |

1. **Press the four-way controller (▶) in mode.**
The focus mode changes each time the button is pressed. You can also change the setting using the four-way controller (▲▼). 

2. **Press the OK button.**
The focus mode setting is saved and the camera returns to capture status.
Manual Focus

The procedure for setting the focus manually (MF) is described below.

1. **Press the four-way controller (►)** in AccountId mode.

2. **Use the four-way controller (►) to select MF and press the OK button.**

The central portion of the screen is magnified to twice its size when focusing.

3. **Press the four-way controller (▲ ▼).**

   The MF indicator appears on the LCD monitor to indicate the approximate distance to the subject. Use the four-way controller (▲ ▼) to adjust the focus using the indicator as a guide.

   ▲ : for distant focus
   ▼ : for closer focus

4. **Press the OK button.**

   The focus is fixed and the camera returns to capture status.

   The focus position is fixed five seconds after you remove your finger from the four-way controller (►).
## Selecting the Flash Mode

### Flash Modes

<table>
<thead>
<tr>
<th>Flash Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO (ijkstra)</td>
<td>The flash discharges automatically depending on the light conditions.</td>
</tr>
<tr>
<td>On (Bias)</td>
<td>The flash will not discharge, regardless of the brightness. Use this mode to take pictures where flash photography is prohibited.</td>
</tr>
<tr>
<td>Flash On</td>
<td>The flash discharges regardless of the brightness.</td>
</tr>
<tr>
<td>Auto + Red-eye</td>
<td>This mode reduces the phenomenon of red eyes caused by the light from the flash being reflected in the subject’s eyes. The flash discharges automatically.</td>
</tr>
<tr>
<td>Flash On + Red-eye</td>
<td>This mode reduces the phenomenon of red eyes caused by the light from the flash being reflected in the subject’s eyes. The flash will discharge regardless of the light conditions.</td>
</tr>
<tr>
<td>Soft Flash</td>
<td>This mode reduces the intensity of the flash so that the flash is not too bright even when fired at close range. The flash will discharge regardless of the light conditions.</td>
</tr>
</tbody>
</table>

### Memo

- The flash will not discharge (Flash Off) in AUTO mode or On mode, or when the drive mode is set to Single Shot or Continuous, or the focus mode is set to Manual Focus.
- A pre-flash discharges when using the red-eye reduction function.
- In AUTO mode, you can only select AUTO or On.
1  **Press the four-way controller (↓) in  mode.**
   The flash mode changes each time the button is pressed. You can also change the setting using the four-way controller (▲▼).

2  **Press the OK button.**
   The camera is ready to take pictures in the selected flash mode.

---

[About the red-eye phenomenon]

Taking pictures using the flash may cause the subject's eyes to appear red in the resulting picture. This phenomenon occurs when the light from the flash is reflected in the subject's eyes. It can be reduced by illuminating the area around the subject or moving closer to the subject and zooming out. Setting the flash mode to  (Auto + Red-eye) or  (Flash On + Red-eye) is also an effective way of preventing red eyes.

If the subject's eyes appear red despite such precautions, they can be corrected by the red-eye compensation function ( p.129).

---

**Saving the Flash Mode** p.97
Selecting the Recorded Pixels

You can choose from six recorded pixels settings for still pictures. The larger your recorded pixels, the clearer the details will appear when you print your picture. As the quality of the printed picture also depends on the image quality, exposure control, resolution of the printer and other factors, you do not need to select more than the required number of recorded pixels. **2M** (1600×1200) is adequate for making postcard-size prints. The more pixels there are, the larger the picture and the bigger the file size. The data volume also varies depending on the quality level setting (p.87).

**Recorded Pixels**

<table>
<thead>
<tr>
<th>Recorded Pixels</th>
<th>Use</th>
</tr>
</thead>
<tbody>
<tr>
<td>5M 2560×1920</td>
<td>For printing high quality photos or A4-size pictures, or editing images on a PC.</td>
</tr>
<tr>
<td>4M 2304×1728</td>
<td>Clearer</td>
</tr>
<tr>
<td>3M 2048×1536</td>
<td>For making postcard-size prints.</td>
</tr>
<tr>
<td>2M 1600×1200</td>
<td></td>
</tr>
<tr>
<td>1024 1024×768</td>
<td>For posting on a website or attaching to e-mail.</td>
</tr>
<tr>
<td>640 640×480</td>
<td></td>
</tr>
</tbody>
</table>

1. **Press the MENU button in ** mode.  
The [Rec. Mode] menu appears.

2. **Use the four-way controller (▲▼) to select [Recorded Pixels].**
3 Press the four-way controller (▶). A pull-down menu appears.

4 Use the four-way controller (▲▼) to change the number of recorded pixels.

5 Press the shutter release button halfway.
   The Recorded Pixels setting is saved and the camera returns to capture status.

If you use the [Recorded Pixels] function frequently, you can save time by assigning it to the Green button. (p.58)

Recorded Pixels and Quality Level of Still Pictures  p.31
Selecting the Quality Level

You can select the quality (compression rate) of still pictures. The more stars, the lower the compression rate and the clearer the picture, but the file size becomes larger. The recorded pixels setting also affects the file size (p.85).

Quality Level

| ★★★ | Best | Lowest compression rate. Suitable for photo prints. |
| ★★  | Better | Standard compression rate. Suitable for viewing the image on a computer screen. |
| ★   | Good | Highest compression rate. Suitable for posting on a website or attaching to e-mail. |

1. **Press the MENU button in ** mode. The [Rec. Mode] menu appears.
2. **Use the four-way controller (▲ ▼) to select [Quality Level].
3. **Press the four-way controller (►). A pull-down menu appears.
4. **Use the four-way controller (▲ ▼) to change the quality level.
5. **Press the shutter release button halfway. The Quality Level setting is saved and the camera returns to capture status.

Memo

If you use the [Quality Level] function frequently, you can save time by assigning it to the Green button. (p.58)

Recorded Pixels and Quality Level of Still Pictures (p.31)
Adjusting the White Balance

You can take pictures in natural colors by adjusting the white balance according to the light conditions at the time of shooting.

**White Balance**

<table>
<thead>
<tr>
<th>AWB</th>
<th>Daylight</th>
<th>Shade</th>
<th>Tungsten Light</th>
<th>Fluores. Light</th>
<th>Manual</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Use this mode when taking pictures outside in sunlight.</td>
<td>Use this mode when taking pictures outside in the shade.</td>
<td>Use this mode when taking pictures under electric or other tungsten light.</td>
<td>Use this mode when taking pictures under fluorescent light.</td>
<td>Use this mode when adjusting the white balance manually.</td>
</tr>
</tbody>
</table>

1. **Press the MENU button in ** mode.**
The [Rec. Mode] menu appears.

2. **Use the four-way controller (▲ ▼) to select [White Balance].**

3. **Press the four-way controller (►).**
The White Balance screen appears.

4. **Use the four-way controller (▲ ▼) to change the setting.**
5 Press the shutter release button halfway.
The White Balance setting is saved and the camera returns to capture status.
Refer to “Manual Setting” below for instructions on adjusting the white balance manually.

If you use the [White Balance] function frequently, you can save time by assigning it to the Green button. (p.58)

Saving the White Balance p.97

Manual Setting

Have a blank sheet of white paper or similar material ready.

1 Select (manual) on the [White Balance] screen and press the OK button.

2 Point the camera at the blank sheet of paper or other material so that it fills the screen of the LCD monitor.

3 Press the shutter release button fully.
The white balance is automatically adjusted.

4 Press the OK button.
The setting is saved and the screen returns to the [Rec. Mode] menu.

5 Press the MENU button.
The camera is ready to take pictures.
Setting the Autofocus Conditions

You can set various conditions for autofocus.

Changing the Focusing Area

You can change the autofocus area (Focusing Area).

Focusing Area

<table>
<thead>
<tr>
<th></th>
<th>Multiple</th>
<th>Normal range</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ ]</td>
<td>Spot</td>
<td>The autofocus range becomes smaller.</td>
</tr>
</tbody>
</table>

Setting the Focus Limiter

You can limit the lens movement area according to the conditions. Set the [Focus Limiter] to ✓ to limit the focus to far distances from normal range during normal shooting and to close distances during macro shooting. This enables quicker focusing.

1 Press the MENU button in  mode.
   The [  Rec. Mode] menu appears.

2 Use the four-way controller (▴ ▼) to select [AF Setting].

3 Press the four-way controller (►).
   The AF Setting screen appears.

4 Use the four-way controller (▴ ▼) to select [Focusing Area].
5 Press the four-way controller (►).
A pull-down menu appears.

6 Use the four-way controller (▲▼) to change the setting.

7 Use the four-way controller (◄) and then the four-way controller (▼) to select [Focus Limiter].

8 Use the four-way controller (◄►) to select ✔ or □.

9 Press the shutter release button halfway.
The AF setting is saved and the camera returns to capture status.

Memo
If you use the [Focusing Area] and [Focus Limiter] functions frequently, you can save time by assigning them to the Green button. (☞ p.58)
Setting the Sensitivity

You can select the sensitivity to suit the brightness of the surroundings. The default setting is Auto.

Sensitivity

<table>
<thead>
<tr>
<th>Auto</th>
<th>The camera sets the sensitivity automatically.</th>
</tr>
</thead>
<tbody>
<tr>
<td>50</td>
<td>• The lower the sensitivity, the less noise that affects the image. The shutter speed will be slower in low light conditions.</td>
</tr>
<tr>
<td>100</td>
<td>• Higher sensitivity settings use faster shutter speeds in low light conditions to reduce camera shake, but the image may be affected by noise.</td>
</tr>
<tr>
<td>200</td>
<td></td>
</tr>
<tr>
<td>400</td>
<td></td>
</tr>
</tbody>
</table>

1 Press the MENU button in mode.

The Rec. Mode menu appears.

2 Use the four-way controller (▲▼) to select [Sensitivity].

3 Press the four-way controller (▶). A pull-down menu appears.

4 Use the four-way controller (▲▼) to change the sensitivity.

5 Press the shutter release button halfway.

The Sensitivity setting is saved and the camera returns to capture status.

If you use the [Sensitivity] function frequently, you can save time by assigning it to the Green button. (p.58)

Saving the Sensitivity p.97
Setting the Instant Review Time (Instant Review)

You can choose the Instant Review time (the length of time the image is displayed immediately after capture) from 0.5sec, 1sec, 2sec, 3sec, 5sec and Off (no display). The default setting is 1sec.

1. Press the MENU button in [ mode.
   The [Rec. Mode] menu appears.

2. Use the four-way controller (▲▼) to select [Instant Review].

3. Press the four-way controller (▲). A pull-down menu appears.

4. Use the four-way controller (▲▼) to change the display time.

5. Press the shutter release button halfway.

   The Instant Review setting is saved and the camera returns to capture status.

Instant Review p.41
Setting the Image Sharpness (Sharpness)

You can give the image sharp or soft outlines.

1. **Press the MENU button in ** mode. The [ Rec. Mode] menu appears.
2. **Use the four-way controller ( ▲▼ ) to select [Sharpness].
3. **Use the four-way controller ( ◄► ) to change the setting from [Normal] to [Hard (+)] or [Soft (–)].

   To soften the contours, choose (–) and to sharpen the contours, choose (+).

4. **Press the shutter release button halfway.

   The Sharpness setting is saved and the camera returns to capture status.

   If you use the [Sharpness] function frequently, you can save time by assigning it to the Green button. (p.58)
You can set the color saturation.

1. Press the MENU button in 📷 mode.
   The [Rec. Mode] menu appears.

2. Use the four-way controller (▲ ▼) to select [Saturation].

3. Use the four-way controller (◄ ►) to change the setting from
   ───[Normal] to ───[High (+)] or ───[Low (–)].
   To reduce the saturation, choose (–) and to increase the saturation, choose (+).

4. Press the shutter release button halfway.
   The Saturation setting is saved and the camera returns to capture status.

memo
If you use the [Saturation] function frequently, you can save time by
assigning it to the Green button. (☞ p.58)
Setting the Image Contrast (Contrast)

You can set the image contrast level.

1. **Press the MENU button in mode.**
   The [Rec. Mode] menu appears.

2. **Use the four-way controller (▲▼) to select [Contrast].**

3. **Use the four-way controller (◄►) to change the setting from [Normal] to [High (+)] or [Low (–)].**
   To reduce the contrast, choose (–) and to increase the contrast, choose (+).

4. **Press the shutter release button halfway.**
   The Contrast setting is saved and the camera returns to capture status.

**memo** If you use the [Contrast] function frequently, you can save time by assigning it to the Green button. (p.58)
The Memory function is for saving the current camera settings when the camera is turned off.

For some camera settings, the Memory function is always set to ✓ (On) (the settings are saved when the camera is turned off), while for others you can choose On or Off (whether the settings are saved or not when the camera is turned off). The items which can be set to On or Off in the Memory function are shown in the table below. (Items not listed here will be saved in the selected settings when the camera is turned off.) If you select ✓ (On), the settings will be saved in the status they were in immediately before the camera was turned off. If you select □ (Off), the settings will be reset to the defaults when the camera is turned off. The table below also shows whether the Memory default setting for each item is On or Off.

<table>

</tr>
</tbody>
</table>
1. Press the **MENU** button in **Rec. Mode**.
   The [Rec. Mode] menu appears.

2. Press the four-way controller (▲ ▼) to select [Memory].

3. Press the four-way controller (▶). The Memory screen appears.

4. Use the four-way controller (▲ ▼) to choose an item.

5. Use the four-way controller ( ◄ ►) to select ✔ (On) or □ (Off).

6. Press the shutter release button halfway.
   The Memory setting is saved and the camera returns to capture status.
Recording Movies

Recording a Movie

This mode enables you to record movies. Sound is recorded at the same time.

1. Press the four-way controller (▼) in mode.
   The Capture Mode Palette appears.

2. Use the four-way controller (▲ ▼ ◀▶) to select (Movie).

3. Press the OK button.
   mode is selected and the camera returns to capture status.
   The following information appears on the LCD monitor.
   1. Movie mode icon
   2. Recording indicator (blinks during recording)
   3. Recording time
   You can change the captured area by pressing the Zoom/ button to the left or right.
   : enlarges the subject
   : enlarges the area captured by the camera
4 Press the shutter release button fully.
Recording starts.

• The flash will not discharge in \( \text{C} \) mode.
• The only focus modes that can be used in \( \text{C} \) mode are \( \text{PF} \), \( \text{A} \), and \( \text{MF} \).
• You can use the optical zoom and digital zoom before starting to record, and the digital zoom while recording.
• Changing the LCD monitor display mode by pressing the \( \text{OK} \) button while recording a movie will not display the histogram.

5 Press the shutter release button fully.
Recording stops.

Playing Back Movies \( \Rightarrow \) p.112

Keeping the Shutter Release Button Pressed
If you keep the shutter release button pressed for more than one second, recording will continue for as long as you keep the button pressed. Shooting stops when you take your finger off the shutter release button.
Taking Pictures

You can choose from two recorded pixels settings for movies: [(320×240)] and [(160×120)]. The more pixels there are, the bigger the file size. The data volume also varies depending on the frame rate setting. (p.33)

Recorded Pixels for Movies

<table>
<thead>
<tr>
<th>Recorded Pixels</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(320×240)</td>
<td>Suitable for viewing the movie on a computer.</td>

<tr>
<td>(160×120)</td>
<td>The file size is smaller, but the total recording time is increased. Suitable for posting on a website or e-mail.</td>
</tr>
</tbody>
</table>

1 Press the MENU button in ⚽ mode.
The [Rec. Mode] menu appears.

2 Use the four-way controller (▲ ▼) to select [Movie].

3 Press the four-way controller (►).
The Movie screen appears.

4 Use the four-way controller (▲ ▼) to select [Recorded Pixels].

5 Press the four-way controller (►).
A pull-down menu appears.

6 Use the four-way controller (▲ ▼) to change the number of recorded pixels.

7 Press the shutter release button halfway.
The recorded pixels setting is saved and the camera returns to capture status.

Recorded Pixels and Frame Rate of Movies p.33
Selecting the Frame Rate

You can choose the frame rate (number of frames per second). The more frames per second, the better the quality of the movie, but the file size becomes larger. You can choose 30fps (frames per second) or 15 fps (frames per second).

1 Press the MENU button in mode.
The [Rec. Mode] menu appears.
2 Use the four-way controller (▲▼) to select [Movie].
3 Press the four-way controller (▶).
The Movie screen appears.
4 Use the four-way controller (▲▼) to select [Frame Rate].
5 Press the four-way controller (▶).
A pull-down menu appears.
6 Use the four-way controller (▲▼) to select [30fps] or [15fps].
7 Press the shutter release button halfway.
The frame rate setting is saved and the camera returns to capture status.

Recorded Pixels and Frame Rate of Movies p.33
Recording Movies in Black and White or Sepia Tones (Color Mode)

You can set the color mode to black and white or sepia, as well as full color, when recording a movie.

1. Press the **MENU** button in  
   mode.
   The [Rec. Mode] menu appears.

2. Use the four-way controller (▲ ▼) to select [Movie].

3. Press the four-way controller (►).
   The Movie screen appears.

4. Use the four-way controller (▲ ▼) to select [Color Mode].

5. Press the four-way controller (►).
   A pull-down menu appears.

6. Use the four-way controller (▲ ▼) to choose a color.

7. Press the shutter release button halfway.
   The color mode setting is saved and the camera returns to capture status.
To Switch Between \( \text{Capture} \) Mode and \( \text{Playback} \) Mode

In this manual, the capture mode, such as for taking still pictures, is referred to as \( \text{Capture} \) mode. The playback mode, such as for displaying captured images on the LCD monitor, is referred to as \( \text{Playback} \) mode. In \( \text{Playback} \) mode, you can perform simple editing operations on the images that are played back.
Follow the procedure below to switch between \( \text{Capture} \) mode and \( \text{Playback} \) mode.

**To Switch From \( \text{Capture} \) Mode to \( \text{Playback} \) Mode**

1. Press the \( \text{Playback} \) button.
   The camera switches to \( \text{Playback} \) mode.

**To Switch From \( \text{Playback} \) Mode to \( \text{Capture} \) Mode**

1. Press the \( \text{Capture} \) button or shutter release button halfway or fully.
   The camera switches to \( \text{Capture} \) mode.

Playing Back Still Pictures

Refer to “Playing Back Images” (p.42) for instructions.
Nine-Image Display and Folder Display

Nine-Image Display

You can display nine thumbnails of captured images at a time.

1. **In** 
   mode, press on the Zoom/ 
   button.

   A page consisting of nine thumbnail images appears. The displayed images change nine at a time page by page.

   Use the four-way controller (↑↓←→) to move the frame. When 10 or more images have been saved, if you choose image 1 and press the four-way controller (↑), the previous page appears. Similarly, if you choose image 2 and press the four-way controller (↓), the next page appears.

   The icons that appear on the images indicate the following:

   - No icon : Still picture without sound
   - (with image) : Still picture with sound
   - : Movie (first frame appears)
   - (without image) : Sound file only

   Press the **OK** button, **MENU** button or on the Zoom/ button to switch to single-image display of the selected image.

   Press the button to switch to **Camera** mode.
Folder Display

If images and sound files are stored in several folders, follow the procedure below to find the folder that you are looking for.

1. **In** ** mode, press on the Zoom/fb/fy button.**
   The screen changes to nine-image display.

2. **Press on the Zoom/fb/fy button.**
   The list of folders appears.

3. **Use the four-way controller (▲▼◄►) to choose a folder.**
   Press the **OK** button, **MENU** button or on the Zoom/fb/fy button to display thumbnails of the images inside the folder. Next, press the **OK** button, **MENU** button or on the Zoom/fb/fy button to switch to single-image display of a selected image.

Changing the Image Folder Name ➔ p.158
Playing Back and Deleting Images

You can magnify an image up to eight times. A guide showing the center of the magnified portion of the image appears on the LCD monitor during zoom playback.

1. Enter the mode and use the four-way controller ( ) to choose the image you want to magnify.

2. Press on the Zoom/ button.

The image is magnified (×1 to ×8). Holding down on the Zoom/ button changes the magnification continuously. You can use the guide at the bottom left of the screen to check which portion of the image is magnified.

The following operations can be performed while the magnified image is displayed.

- Four-way controller ( ) Moves the position to be magnified
- Zoom/ button ( ) Makes the image bigger (max. ×8)
- Zoom/ button ( ) Makes the image smaller (min. ×1)

3. Press the OK button.

The image returns to single-image display.

- Movies cannot be magnified.
- The guide does not appear if the LCD monitor display mode is set to [No Icons].
Setting the Quick Zoom Function

When the Quick Zoom function is enabled, you can display an image at maximum magnification (×8) simply by pressing on the Zoom/ button once.

1. Press the button in mode.
   The [Rec. Mode] menu appears.

2. Press the four-way controller ( ).
   The [Setting] menu appears.

3. Use the four-way controller (▲▼) to select [Quick Zoom].

4. Use the four-way controller (◀▶) to select ✓ (On) or □ (Off).
   ✓: Jumps to ×8 magnification
   □: Pressing on the Zoom/ button once magnifies the image in stages from ×1.0 to ×8.0

5. Press the button.
   The camera is ready to play back images.
Displaying Shooting Information in Playback Mode

Shooting information can be displayed on the LCD monitor in  
 mode. Pressing the OK button changes the display mode. Refer to p.20 for details of each display mode.

Normal Display

Histogram + Info

No Icons

Displaying Shooting Information in Capture Mode  p.79
Playing Back and Deleting Images

You can play back recorded images one after another.

1. **Enter the ▼ mode and use the four-way controller (◀ ▶) to choose an image to start the slideshow with.**

2. **Press the four-way controller (▼).**
   The Playback Mode Palette appears.

3. **Use the four-way controller (▲ ▼ ◀ ▶) to select ▶ (Slideshow).**

4. **Press the OK button twice.**
   The slideshow starts.
   Pressing the OK button during the slideshow pauses the slideshow.
   To resume the slideshow, press the OK button while the slideshow is paused.

5. **Press any button.**
   The slideshow stops.

### Setting the Slideshow Conditions

You can set the playback interval and also a screen effect and sound effect for when one image changes to the next.

1. **Press the four-way controller (▼) in ▶ mode.**
   The Playback Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◀ ▶) to select ▶.**
3 Press the OK button.
The screen for setting the slideshow conditions appears.

4 Use the four-way controller (▲▼) to select [Interval].

5 Press the four-way controller (▶).
A pull-down menu appears.

6 Use the four-way controller (▲▼) to change the interval and press the OK button.
You can choose from 3sec, 5sec, 10sec, 20sec, and 30sec.

7 Repeat Steps 4 to 6 to select [Screen Effect].
You can choose from Off, Wipe, Checker, and Fade.

<table>
<thead>
<tr>
<th>Off</th>
<th>No effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wipe</td>
<td>The next image slides over the previous one from left to right</td>
</tr>
<tr>
<td>Checker</td>
<td>The next image appears in small square mosaic blocks</td>
</tr>
<tr>
<td>Fade</td>
<td>The current image gradually fades out and the next image fades in.</td>
</tr>
</tbody>
</table>

8 Use the four-way controller (▲▼) to select [Sound Effect].

9 Use the four-way controller (◄▶) to select ✔ (On) or □ (Off).
Except when the screen effect is set to Off, you can choose ✔ (On) or □ (Off) for the sound that is played when one image changes to the next.

10 Press the OK button.
The slideshow starts using the selected interval and effect.

- The slideshow will continue until you press one of the buttons.
- Movies or pictures with sound will be played through to the end before the next picture is played back, regardless of the set interval.
- Pressing the four-way controller (▶) while playing back a movie displays the next image.
- Sound files made in Voice Recording mode are not played back in the slideshow.

Connecting the Camera to AV Equipment p.113
Playing Back and Deleting Images

Playing Back Movies

You can play back the movies you have taken. Sound is played back at the same time.

1. Enter the 
   mode and use the four-way controller ( 
   ) to choose the movie you want to play back.

2. Press the four-way controller ( ).
   Playback starts.

   The following operations can be performed during playback.
   - Four-way controller ( ) Reverse playback
   - Four-way controller ( ) Pause
   - Zoom/ ( ) Increases the volume
   - Zoom/ ( ) Reduces the volume

   The following operations can be performed while playback is paused.
   - Four-way controller ( ) Frame reverse
   - Four-way controller ( ) Frame forward
   - Four-way controller ( ) Releases the Pause function (Play)

3. Press the four-way controller ( ).
   Playback stops and the screen returns to single-image display.
Connecting the Camera to AV Equipment

By using the AV cable, you can capture and play back images on equipment with a video IN jack, such as a TV. Make sure the camera is turned off before connecting it to the TV.

1. Open the battery/card cover and connect the AV cable to the PC/AV terminal.

2. Connect the other ends of the AV cable (image: yellow, sound: white) to the TV’s image input terminal and sound input terminal.

   When using stereo sound equipment, insert the sound terminal into the L (white) terminal.

3. Turn the TV and camera on.

   - You are recommended to use the AC adapter D-AC8 (optional) if you intend to use the camera for a long time.
   - Depending on the country or region, images and sound files may fail to be played back if the video output format is set different from the one in use there. If this happens, change the video output format setting.

Changing the Video Output Format p.160
Deleting Images

Deleting a Single Images/Sound Files

You can delete single images and sound files one at a time.

1. Enter the mode and use the four-way controller ( ) to choose the image/sound file you want to delete.
2. Press the button.
   The confirmation screen appears.
3. Use the four-way controller ( ) to select [Deletion].
4. Press the OK button.
   The image or sound file is deleted.

Caution: Protected images and sound files cannot be deleted. (p.120)

memo: If you press the button during Instant Review, the screen in Step 2 appears, enabling you to delete the image you have just taken. (p.43)

Recovering Deleted Images p.119
Deleted a Sound File

If sound has been recorded with an image (p.147), you can delete the sound without deleting the image.

1 Enter the ﬁ mode and use the four-way controller (▲▼) to choose an image with sound.
2 Press the button.
The confirmation screen appears.
3 Use the four-way controller (▲▼) to select [Sound Deletion]
4 Press the OK button.
The sound file is deleted.

Select [Deletion] in Step 3 above to delete both the image and sound file.
Playing Back and Deleting Images

You can delete several images/sound files selected from the nine-image display at once.

1  In ** mode, press ** on the Zoom/ **/ ** button.
   Nine thumbnail images appear.
2  Press the ** button.
   ** appears on the images and sound files.
3  Use the four-way controller (▲▼◄►) to choose the images and sound files that you want to delete and press the OK button.
   ** appears on the selected images and sound files.
   If you select an image and press ** on the Zoom/ **/ ** button, the selected image appears in single-image display for as long as the button is pressed, enabling you to check whether you really want to delete it or not. (The display returns to the nine-image display when you release the button.) However, protected images cannot be displayed in single-image display.
4 Press the 📷 button.
A confirmation dialog appears.

5 Use the four-way controller (▲▼) to select [Select & Delete].

6 Press the OK button.
The selected images and sound files are deleted.
Deleting All Images

You can delete all the images and sound files at once.

Protected images and sound files cannot be deleted. (☞ p.120)

1. Press the button in Q mode.
   A confirmation dialog appears.

2. Press the button.
   A confirmation dialog appears.

3. Use the four-way controller (▲) to select [Delete All].

4. Press the OK button.
   All the images and sound files are deleted.

Recovering Deleted Images ☞ p.119
Recovering Deleted Images

You can recover images or sound files that were taken with this camera and then deleted.

1. **After deleting a file, press the four-way controller (▼).**
   The Playback Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◀▶) to select 📌 (Image Recovery).**

3. **Press the OK button.**
   The number of recoverable images appears.

4. **Use the four-way controller (▲ ▼) to select [Recover].**

5. **Press the OK button.**
   Deletion of the images is cancelled and the files are recovered.

---

**Caution**

If you take pictures or edit data between deleting and recovering the image, by setting DPOF print order data, protecting, resizing or trimming images that were not deleted, the message “No image to be processed” appears in Step 3 and the deleted image cannot be recovered.

**Memo**

Recovered images and sound files have the same file name as before they were deleted.
Protecting Images and Sound Files from Deletion (Protect)

You can protect stored images and sound files from being accidentally deleted.

1. **Press the four-way controller (▼) in [mode.**
   The Playback Mode Palette appears.
2. **Use the four-way controller (▲▼◄►) to select [Protect].**
3. **Press the OK button.**
   The protect screen appears.
4. **Use the four-way controller (▲▼) to select [Select image/sound].**
5. **Press the OK button.**
   The screen for choosing an image or sound file to protect appears.
6. **Use the four-way controller (◄►) to choose the image or sound file you want to protect.**
7. **Use the four-way controller (▲) to select [Protect].**
8. **Press the OK button.**
   The selected image or sound file is protected.

- To cancel the Protect setting, select [Unprotect] in Step 7.
- "ㄇ" appears below the file number on protected images and sound files during playback.
Playing Back and Deleting Images

Protecting All Images and Sound Files

1. Press the four-way controller (▼) in □ mode.
   The Playback Mode Palette appears.

2. Use the four-way controller (▲▼◀▶) to select ◄ (Protect).

3. Press the OK button.
   The protect screen appears.

4. Use the four-way controller (▲▼) to select [All Images/Sounds].

5. Press the OK button.
   A confirmation dialog appears.

6. Use the four-way controller (▲) to select [Protect].

7. Press the OK button.
   All the images and sound files are protected.

Caution: Protected images and sound files will be deleted when the SD Memory Card or built-in memory is formatted.

Memo: To cancel the Protect setting on all your images and sound files, select [Unprotect] in Step 6.
Changing the Image Size and Quality (Resize)

By changing the size and quality of a selected image, you can make the file size smaller than the original. You can use this function to continue taking pictures when the SD Memory Card or built-in memory is full, by making the images smaller and overwriting the original images to make more space available.

- Movies cannot be resized.
- You cannot select a larger resolution or higher quality than that of the original image.

1. Enter the □ mode and use the four-way controller (▲ ▼ ◄ ►) to choose the image you want to resize.
2. Press the four-way controller (▼).
   The Playback Mode Palette appears.
3. Use the four-way controller (▲ ▼ ◄ ►) to select □ (Resize).
4. Press the OK button.
   The screen for choosing the size and quality appears.
5 Select [Recorded Pixels] and [Quality Level].
Use the four-way controller (◀▶) to choose the size and quality.
Use the four-way controller (▲▼) to switch between [Recorded Pixels] and [Quality Level].

6 Press the OK button.
A confirmation dialog for overwriting the image appears.
[Save as] is the only available option for protected images.

7 Use the four-way controller (▲▼) to select [Overwrite] or [Save as].

8 Press the OK button.
The resized image is saved.
Trimming Images

You can delete the unwanted part of a picture and save the trimmed image as a separate image.

1. **Enter the mode and use the four-way controller (верху) to choose the image you want to trim.**
2. **Press the four-way controller (▼).**
   The Playback Mode Palette appears.
3. **Use the four-way controller (верху внизу) to select (Trimming).**
4. **Press the OK button.**
   The Trimming screen appears.
5. **Choose the trimming conditions.**
   - **Zoom/×/÷ button**
     Changes the size of the trimmed section
   - **Four-way controller (верху внизу) (лево вправо)**
     Moves the trimming position up, down, left and right
   - **Green button**
     Rotates the trimming frame
6. **Press the OK button.**
   The trimmed image is saved with a new file name.
   The trimmed image is saved in the same quality as the original image. The number of recorded pixels is selected automatically according to the size of the trimmed section.

**memo**
Movies cannot be trimmed.
Copying Images and Sound Files

You can copy images and sound files from the built-in memory to the SD Memory Card and vice versa. This function can only be selected when an SD Memory Card has been inserted in the camera.

Caution: Make sure that the camera is turned off before inserting or removing the SD Memory Card.

1. Press the four-way controller (▼) in → mode.
   The Playback Mode Palette appears.

2. Use the four-way controller (▲▼◄►) to select (Image/Sound Copy).

3. Press the OK button.
   The copying method selection screen appears.

To Copy Files from the Built-in Memory to the SD Memory Card

All the images and sound files in the built-in memory are copied to the SD Memory Card at once. Before copying the images, make sure that there is enough space in the SD Memory Card.

4. Use the four-way controller (▲▼) to select [.stdin]

5. Press the OK button.
   All the images and sound files are copied.
To Copy Files from the SD Memory Card to the Built-in Memory

Selected images and sound files from the SD Memory Card are copied to the built-in memory one at a time.

4 Use the four-way controller (▲▼) to select [SD ➤ ]

5 Press the OK button.

6 Use the four-way controller ( ◄ ► ) to select the file you want to copy.

7 Press the OK button.

The selected image/sound file is copied.

memo

• If sound has been recorded with the image, the sound file is copied with the image.
• When a file is copied from the SD Memory Card to the built-in memory, it is assigned a new file name.
Using the Digital Filters

This function lets you edit selected images with digital filters to change the color, etc. You can choose from nine filters: B&W, sepia, red, pink, purple, blue, green, yellow and soft.

1. **Enter the OK mode and use the four-way controller (◄►) to choose the image you want to edit.**
2. **Press the four-way controller (▼).** The Playback Mode Palette appears.
3. **Use the four-way controller (▲▼◄►) to select 0 (Digital Filter).**
4. **Press the OK button.** The digital filter selection screen appears.
5. **Use the four-way controller (▲▼) to choose a digital filter.** You can preview the results of the filter effect.
6. **Press the OK button.** A confirmation dialog for overwriting the image appears.
7. **Use the four-way controller (▲▼) to select [Overwrite] or [Save as].** [Save as] is the only available option for protected images.
8. **Press the OK button.** The edited image is saved with the same number of recorded pixels and quality level as the original.
Using the Brightness Filter

This function lets you adjust the brightness of the selected image.

1. **Enter the mode and use the four-way controller (◀▶) to choose the image you want to edit.**

2. **Press the four-way controller (▼).**
   The Playback Mode Palette appears.

3. **Use the four-way controller (▲▼◀▶) to select (Brightness Filter).**

4. **Press the OK button.**
   The brightness adjustment screen appears.

5. **Use the four-way controller (◀▶) to adjust the brightness.**
   You can preview the results of the brightness adjustment.

6. **Press the OK button.**
   A confirmation dialog for overwriting the image appears.

7. **Use the four-way controller (▲▼) to select [Overwrite] or [Save as].**
   [Save as] is the only available option for protected images.

8. **Press the OK button.**
   The edited image is saved with the same number of recorded pixels and quality level as the original.

---

**Caution:**
Movies or images taken with another camera cannot be edited using the digital filters or brightness filter. An error message appears if you choose this function from the Playback Mode Palette and press the OK button.
You can correct images where the flash has caused the subject to appear with red eyes.

1. Enter the 
   mode and use the four-way controller (▲▼) to choose the image you want to correct.
2. Press the four-way controller (▼).
   The Playback Mode Palette appears.
3. Use the four-way controller (▲▼◀▶) to select 🎥 (Red-eye Compensation).
4. Press the OK button.
   A confirmation dialog for overwriting the image appears.
5. Use the four-way controller (▲▼) to select [Overwrite] or [Save as].
   [Save as] is the only available option for protected images.
6. Press the OK button.
   The edited image is saved with the same number of recorded pixels and quality level as the original.

Caution:
- The red-eye compensation function cannot be used on movies or on images where red eyes cannot be detected on the camera. An error message appears in Step 4.
- The red-eye compensation function can only be used with still pictures taken with this camera.
Adding a Frame (Frame Composite)

This function lets you add a decorative frame to still pictures. There are three frames already stored in the camera.

1. Enter the [Q] mode and use the four-way controller ([▲▼▼▼]) to choose the image to which you want to add a frame.

2. Press the four-way controller ([▼]).
   The Playback Mode Palette appears.

3. Use the four-way controller ([▲▼▼▼]) to select [Frame Composite].

4. Press the OK button.
   The frame selection screen appears.

5. Use the four-way controller ([▲▼▼▼]) to choose a frame.

6. Press the OK button.
   A confirmation dialog for overwriting the image appears.

7. Use the four-way controller ([▲▼▼▼]) to select [Overwrite] or [Save as].
   [Save as] is the only available option for protected images.
8 Press the OK button.
The edited image is saved with the recorded pixels of 3M.

The frame composite function cannot be used on movies or images of size 2M and smaller. An error message appears in Step 4.

To Register a New Frame

To switch to the screen for registering a frame, press the Green button in Step 5. You can register frames which you have downloaded from the internet, etc. When you register a new frame, it replaces one of the existing frames in the built-in memory. Before you can register a new frame, copy it first to the SD Memory Card.

When a new frame on the SD Memory Card is registered in the built-in memory, it replaces one of the existing frames in the built-in memory. The replaced frame is deleted from the built-in memory.

1 In the frame selection screen, choose the frame you want to remove and press the Green button.
A message appears and the frames on the SD Memory Card that you can register in the built-in memory appear.

2 Use the four-way controller (◀▶) to choose the frame you want to register and press the OK button.
The frame is registered in the built-in memory instead of the frame selected in Step 1.
Editing Movies

You can select a frame from a recorded movie to save as a still picture, divide a movie into two or stitch two movies together.

1 Enter the ▶ mode and use the four-way controller (◀▶) to choose the movie you want to edit.

To stitch two movies together (p.135), choose the first movie (first half).

2 Press the four-way controller (▼).

The Playback Mode Palette appears.

3 Use the four-way controller (▲▼◀▶) to select (Movie Edit).

4 Press the OK button.

The editing method selection screen appears.

Go to the following pages.
“Saving a Frame from a Movie as a Still Picture” p.133
“Dividing a Movie” p.134
“Stitching Movies” p.135

Caution: Protected movies cannot be divided or stitched.
Saving a Frame from a Movie as a Still Picture

5 Use the four-way controller (▲▼) to select [Save as Still Image].

6 Press the OK button.
   The screen appears for selecting a frame to be saved as a still picture.

7 Use the four-way controller (◄►) to choose the frame you want to save.

8 Press the OK button.
   The selected frame is saved as a still picture.
Dividing a Movie

5 Select [Divide Movies] on the Movie Edit menu.

6 Press the OK button.
   The screen for choosing the dividing position appears.

7 Use the four-way controller (▲▼◄►) to determine the dividing position.
   ▲ : Plays or pauses the movie
   ▼ : Stops the movie
   ◄ : Reverses the movie frame by frame
   ► : Advances the movie frame by frame

8 Press the OK button.
   A confirmation dialog appears.

9 Use the four-way controller (▲▼) to select [Divide].

10 Press the OK button.
    The movie is divided at the specified position and the two portions are saved as new files.
5 Select [Stitch Movies] on the Movie Edit menu.
6 Press the OK button.
The movie selection screen appears.
7 Use the four-way controller (        ) to choose the second movie (latter half).
8 Press the OK button.
A confirmation dialog appears.
9 Use the four-way controller (        ) to select [Stitch].
10 Press the OK button.
The two selected movies are stitched together and saved in the first movie file. (The movie that was selected as the first half is overwritten by the stitched movie and the movie that was selected as the second half is deleted.)

- When a stitched movie is played back, it may appear to stop for about one second at the point where the two movies were joined. This is because, in Movie Edit mode, the movie data is edited in units of one second, so if the last frame of the first movie lasts less than one second, it is drawn out to one second when it is joined to the second movie.
- When two movies are joined together, the second movie file is deleted.
Setting the Printing Service (DPOF)

DPOF (Digital Print Order Format) is the format for storing print order data on still pictures captured with a digital camera. Once the print order data has been stored, the pictures can be printed according to the DPOF settings using a DPOF-compatible printer or photo processing lab. You cannot store print order data for movies or sound-only files.

Set the following items for each image.

1. In mode, use the four-way controller (▲▼) to choose the image you want to print.
2. Press the four-way controller (▼).
   The Playback Mode Palette appears.
3. Use the four-way controller (▲▼◀▶) to select (DPOF).
4. Press the OK button.
   The DPOF screen appears.
5. Use the four-way controller (▲▼) to select [Select image].
6 Press the OK button.
The screen for setting the DPOF print order data for the selected image appears. If DPOF settings have already been made for an image, the previous number of copies and date setting (✓ or ☐) will be displayed.

7 Use the four-way controller (▲ ▼) to choose the number of copies.

8 Use the Green button to choose whether to insert the date or not.
✓ (On) : The date will be imprinted.
☐ (Off) : The date will not be imprinted.
To continue setting DPOF print order data, use the four-way controller (◄ ►) to choose another image and repeat Steps 7 and 8.

9 Press the OK button.
The DPOF settings are saved and the screen returns to the DPOF menu.

To cancel DPOF settings, set the number of copies to [00] in Step 7 and press the OK button.

Depending on the printer or printing equipment at the photo processing lab., the date may not be imprinted on the pictures even if ✓ (On) was selected in the DPOF settings.
Editing and Printing Images

When you choose the number of copies and whether or not to insert the date, the settings are applied to all the images stored in the camera.

1. Display the screen for DPOF settings in \( \text{Q} \) mode. Refer to Steps 2 to 4 on p.136.

2. Use the four-way controller (\( \uparrow \downarrow \)) to select [All Images].

3. Press the OK button.
   The screen for DPOF settings appears.

4. Choose the number of copies and whether to insert the date or not.
   Refer to Steps 7 and 8 in “Printing Single Images” (p.137) for details of how to make the settings.

5. Press the OK button.
   The DPOF settings for all the images are saved and the camera returns to the DPOF setting screen.

Caution: The number of copies specified in the DPOF settings applies to all the images. Before printing, check that the number is correct.

Memo: Settings for single images are canceled when settings are made for all images.

Printing All Images

When you choose the number of copies and whether or not to insert the date, the settings are applied to all the images stored in the camera.

1. Display the screen for DPOF settings in \( \text{Q} \) mode. Refer to Steps 2 to 4 on p.136.

2. Use the four-way controller (\( \uparrow \downarrow \)) to select [All Images].

3. Press the OK button.
   The screen for DPOF settings appears.

4. Choose the number of copies and whether to insert the date or not.
   Refer to Steps 7 and 8 in “Printing Single Images” (p.137) for details of how to make the settings.

5. Press the OK button.
   The DPOF settings for all the images are saved and the camera returns to the DPOF setting screen.

Caution: The number of copies specified in the DPOF settings applies to all the images. Before printing, check that the number is correct.

Memo: Settings for single images are canceled when settings are made for all images.
By connecting the camera to a printer that supports PictBridge using the USB cable (I-USB7) provided, you can print images directly from the camera without using a PC. Connect the camera to the printer and select the images you want to print and the number of copies on the camera.

- You are recommended to use the AC adapter D-AC8 when the camera is connected to the printer. The printer may not work properly or the image data may be lost if the battery runs out of power while the camera is connected to the printer.
- Do not disconnect the USB cable during data transfer.
- Depending on the type of printer, not all the settings made on the camera (such as print settings and DPOF settings) may be valid.
- A printing error may occur if the selected number of copies exceeds 500.
- You cannot use the camera to select multiple images for printing on a single sheet. Make the settings on the printer. For details, refer to the operating manual for your printer.

### Connecting the Camera to the Printer

2. Turn off the camera.
3. Connect the camera to the printer using the USB cable provided.
4. Turn the printer on.
5. When the printer is ready to print, turn the camera on.

The printing mode selection screen appears.
Printing Single Images

1. In the printing mode selection screen, use the four-way controller (▲▼) to select [Select image].

2. Press the OK button.
The setting screen appears.

3. Use the four-way controller (◄►) to choose an image to print.

4. Use the four-way controller (▲▼) to choose the number of copies.
You can print up to 99 copies.

5. Use the Green button to choose whether to insert the date or not.
☑ (On) : The date will be imprinted.
☐ (Off) : The date will not be imprinted.

6. Press the OK button.
A confirmation dialog appears.
To print the pictures according to the print settings on the printer, press the OK button.
To change the print settings, go to Step 7.

7. Press the Green button.
The screen for changing the print settings appears.

8. Select [Paper Size] and press the four-way controller (►). 
The Paper Size screen appears.
9 Use the four-way controller (▲▼◄►) to choose the paper size.
You can only choose a size that is supported by your printer.

10 Press the OK button.

11 Repeat Steps 8 to 10 to set [Paper Type], [Quality] and [Border Status].
If you select [Setting], images are printed according to the settings made on the printer.
Paper Type with more ★ supports higher quality paper.
Quality with more ★ indicates higher print quality.
A confirmation dialog appears after each item has been set.

12 Press the OK button twice.
The image is printed according to the settings.
Press the MENU button to cancel printing.

- The power indicator lights while the camera is communicating with the printer, and blinks while the card is being accessed and during printing. Do not disconnect the USB cable while the power indicator is blinking.
- The [Paper Size], [Paper Type], [Quality] and [Border Status] settings are reset to the defaults when the camera is turned off.

Disconnecting the Cable from the Printer  p.143
Printing All Images

1 In the printing mode selection screen, use the four-way controller (▲▼) to select [All images].

2 Press the OK button.
The setting screen appears.

3 Choose the number of copies and whether to insert the date or not and confirm the settings.
The number of copies and date setting that you choose apply to all the images.
Refer to Steps 4 to 11 in “Printing Single Images” (p.140 - p.141) for details of how to make the settings.

4 Press the OK button on the print settings confirmation screen.
All the images are printed according to the settings.
Press the MENU button to cancel printing.
1 In the printing mode selection screen, use the four-way controller (▲ ▼) to select [DPOF setting].

2 Press the OK button.
   The DPOF settings you have made appear. Use the four-way controller (◄ ►) to check the settings for each image. Refer to p.136 for instructions on how to make the DPOF settings.

3 Press the OK button.
   A confirmation dialog appears.

4 Press the OK button.
   The images are printed according to the settings. Press the MENU button to cancel printing.

Disconnecting the Cable from the Printer

Disconnect the USB cable from the camera and printer when you have finished printing.

1 Turn off the camera.

2 Disconnect the USB cable from the camera and printer.
Recording and Playing Back Sound

Recording Sound (Voice Recording Mode)

You can record sound with the camera. The microphone is located on the top of the camera. When recording sound, aim the camera to obtain the best conditions.

1. Press the four-way controller (▼) in ◁ mode.
   The Capture Mode Palette appears.

2. Use the four-way controller (▲▼◄►) to select ⌘ (Voice Recording).

3. Press the OK button.
   The remaining recordable time and the recording time of the current file appear on the LCD monitor.
   1 Recording time
   2 Remaining recordable time

4. Press the shutter release button fully.
   Recording starts. The self-timer lamp blinks during recording.
   When the Green button is pressed during recording, an index can be added to the current sound file.

5. Press the shutter release button fully.
   Recording stops.
• If you press and hold down the shutter release button in Step 4, recording continues until you take your finger off the button. This is useful for making short sound recordings, such as for the user sound in the [Sound] menu.
• Sound is saved in WAVE monaural files.
• Pressing the OK button clears the voice recording screen from the LCD monitor. Press the OK button again to display the voice recording screen.
You can play back the sound files you made in 🎧 mode.

1. Press the ▶ button.
2. Use the four-way controller (◀ ►) to choose a sound file to play back.
3. Press the four-way controller (▲).
   The sound file is played back.
   1. Total file recording time
   2. Playback time

   The following operations can be performed during playback.
   - Four-way controller (▲) Pauses playback
   - Zoom/◢ ◢ (◢) Increases the volume
   - Zoom/◣ ◢ (◣) Reduces the volume
   If there are no recorded indexes:
   - Four-way controller (◄) Reverses playback
   - Four-way controller (►) Fast forwards playback
   If there are recorded indexes:
   - Four-way controller (◄) Plays back starting from the previous index
   - Four-way controller (►) Plays back starting from the next index

   The following operations can be performed while playback is paused.
   - Four-way controller (▲) Resumes playback
   - Four-way controller (◄) Rewinds approx. 5 seconds
   - Four-way controller (►) Advances approx. 5 seconds

4. Press the four-way controller (▼).
   Playback stops.
Adding a Voice Memo to Images

You can add a voice memo to your still pictures.

**Recording a Voice Memo**

1. **Enter 
   mode and use the four-way controller ( ◀▶ ) to choose the still picture to which you want to add a voice memo.**

2. **Press the four-way controller (▼).**
   The Playback Mode Palette appears.

3. **Use the four-way controller (▲▼◀▶) to select (Voice Memo).**

4. **Press the OK button.**
   Recording starts. You can record until the SD Memory Card or built-in memory is full.

5. **Press the OK button.**
   Recording stops.

- A voice memo cannot be added to an image that already has a voice memo or that was taken in Synchro Sound Record mode. Delete the old voice memo and record a new one. (p.115)
- A voice memo cannot be added to protected (●) images (p.120).
Recording and Playing Back Sound

1 Enter the Playback mode and use the four-way controller (imbledon) to choose the still picture with the voice memo that you want to play back.

Appears on images with voice memos in single-image display.

2 Press the four-way controller (▲).

Playback starts.

The following operations can be performed during playback.

Zoom/ (/ (↑) Increases the volume
Zoom/ (/ (↓) Reduces the volume

3 Press the four-way controller (▼).

Playback stops.

Playing Back a Voice Memo

Sound files for images taken in Synchro Sound Record mode can be played back in the same manner.

Deleting a Sound File p.115
Formatting an SD Memory Card or the Built-in Memory

Formatting will delete all the data on the SD Memory Card. All the data in the built-in memory will be deleted if no SD Memory Card has been inserted in the camera.

- Do not remove the SD Memory Card during formatting as this may damage the card and render it unusable.
- Formatting will delete protected images and any data recorded on the card with a camera other than this camera.
- SD Memory Cards formatted on a PC or device other than the camera cannot be used. Be sure to format the card with the camera.

2. Press the four-way controller (▲). The Format screen appears.
3. Use the four-way controller (▲ ■) to select [Format].
4. Press the OK button.
   Formatting starts. When formatting is completed, the camera is ready to take pictures.
Changing the Date and Time

You can change the initial date and time settings. You can also set the style in which the date appears on the camera. Choose [mm/dd/yy], [dd/mm/yy] or [yy/mm/dd].

1. **Select [Date Adjust] on the [Setting] menu.**
2. **Press the four-way controller (►).**
   The Date Adjust screen appears.
   Refer to “Setting the Date and Time” (p.38) for the setting procedure.
You can adjust the volume of operation sounds and change the type of sound.

1. Select [Sound] on the [Setting] menu.
2. Press the four-way controller (▲). The Sound screen appears.

### Changing the Operation Volume

3. Use the four-way controller (▲▼) to select [Volume].
4. Use the four-way controller (◄►) to adjust the volume.
   Set the volume to 0 to mute operation sounds.

### Changing the Sound Type

5. Use the four-way controller (▲▼) to select [Start-up Sound].
7. Use the four-way controller (▲▼) to select [1], [2], [3], [Off] or [USER] and press the four-way controller (▼).
8 Repeat Steps 5 to 7 to set [Shutter Sound], [Operation Sound] and [Self-timer Sound].
Select [On], [Off] or [USER] for the self-timer sound.

9 Press the OK button.
The setting is saved.

**Setting the User Sound**

You can set the first two seconds of your favorite recorded sound as the user sound and then use this as the start-up sound or shutter sound. The sound to be used is recorded with the camera. (p.144)

1 Select [USER] in Steps 7 and 8 above.
2 Press the OK button.
The Playback screen appears if a sound that can be used as the user sound has been saved in the camera. USER appears for the sound set as the user sound.

3 Use the four-way controller (➡️) to choose a sound file.
   - Four-way controller (▲) Plays back the first two seconds of the sound file
   - Four-way controller (▼) Stops playback

4 Press the OK button.
The selected sound is set as the user sound for the start-up sound or shutter sound.
Setting the Alarm

You can set the alarm to ring at a specified time. You can choose whether the alarm will ring at the same time every day or only once at the set time.

**Setting the Alarm**

1. **Select [Alarm] on the [Setting] menu.**
2. **Press the four-way controller (▲).** The Alarm screen appears.
3. **Press the four-way controller (▲).** A pull-down menu appears.
4. **Use the four-way controller (▲ ▼) to select [Off], [Once] or [Everyday] and press the four-way controller (▼).**
5. **Press the four-way controller (▼).** Next, set the time.
6. **Press the four-way controller (▲).** The frame moves to the hour field.
7. **Use the four-way controller (▲ ▼) to change the hour, then press (▲).** The frame moves to the minute field. Change the minutes in the same manner.
8 **Press the OK button.**

The screen returns to the [ Setting] menu. Check that [Alarm] is set to ☑ (On).

9 **Press the OK button.**

[Alarm is set] appears and the camera turns off.

---

### Checking the Alarm

1 **Select [Alarm] on the [ Setting] menu.**

Check that [Alarm] is set to ☑ (On).

2 **Press the four-way controller ( ).**

The Alarm screen appears.

Check the alarm frequency and time.

3 **Press the MENU button twice.**

The camera is ready to take pictures.

---

### Turning the Alarm Off

The Clock mode screen appears and the alarm rings for one minute when the set time is reached while the camera is turned off.

You can stop the alarm by pressing any button on the camera, except the shutter release button, while the alarm is ringing.

---

**Caution**

The alarm will not ring when the set time is reached if the camera has been turned on.
The date and time selected in “Setting the Date and Time” (p.38) serve as the \( \text{Hometown} \) date and time. By using the world time function, you can display the time in a city other than the Hometown \( \text{Destination} \). This is useful when taking pictures in a different time zone. The procedure for setting the Destination date and time is described below.

1. **Select [World Time] on the [Setting] menu.**
2. **Press the four-way controller (\( \uparrow \)).**
   The World Time screen appears.
3. **Use the four-way controller (\( \downarrow \uparrow \)) to select \( \text{Destination} \) or \( \text{Hometown} \).**
   \( \text{Destination} \): Displays the time in the city selected as the Destination city
   \( \text{Hometown} \): Displays the time in the city selected as the Hometown city
4. **Press the four-way controller (\( \uparrow \)).**
   The Destination screen appears. The city that is currently selected blinks on the map.
5. **Use the four-way controller (\( \downarrow \uparrow \)) to change the Destination city.**
   The current time, location and time difference of the selected city appear.
6. **Use the four-way controller (\( \downarrow \)) to select [DST].**
7 Use the four-way controller (⬅➡) to select ✓ (On) or □ (Off).
Select ✓ (On) if the Destination city uses daylight saving time.

8 Press the OK button twice.
The World Time setting is saved.

memo Select ⌂ in Step 3 to set the city and DST setting for the Hometown city.
Changing the Display Language

You can change the language in which the menus, error messages, etc. are displayed. You can choose from English, French, German, Spanish, Italian, Swedish, Dutch, Russian, Korean, Chinese (traditional and simplified) and Japanese.

2. Press the four-way controller (►). The Language/言語 screen appears. Refer to “Setting the Display Language” (p.37) for the setting procedure.

<table>
<thead>
<tr>
<th>Language/言語</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>Svenska</td>
</tr>
<tr>
<td>Français</td>
<td>Русский</td>
</tr>
<tr>
<td>Deutsch</td>
<td>한국어</td>
</tr>
<tr>
<td>Español</td>
<td>中文（简体)</td>
</tr>
<tr>
<td>Italiano</td>
<td>中文（繁体)</td>
</tr>
<tr>
<td>Nederlands</td>
<td>日本語</td>
</tr>
</tbody>
</table>

If you select an option, press [OK] to confirm.
Changing the Image Folder Name

You can change the image folder name from the standard name to the date that pictures were taken. When the name is changed to the date, pictures are saved in separate folders by the date they were taken.

Folder Name

<table>
<thead>
<tr>
<th>Standard</th>
<th>XXXPENTX (where XXX is the 3-digit folder number)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Date</td>
<td>XXX_mmdd (3-digit folder number_month day)</td>
</tr>
</tbody>
</table>

Picture taken with standard folder name (Example: March 25)  
Folder name changed to date setting (Example: March 25)  
Next time a picture is taken (Example: April 1)

1. **Select [Folder Name] on the [ Setting] menu.**
2. **Press the four-way controller (►).**  
   A pull-down menu appears.
3. **Use the four-way controller (▲▼) to select [Standard] or [Date].**
4. **Press the OK button.**  
The Folder Name setting is saved.
Changing the USB Connection Mode

Choose the appropriate USB connection mode depending on whether you are going to connect the USB cable to a PC or a PictBridge-compatible printer.

Refer to the PC Connection Manual for instructions on connecting the camera to a computer.

2. Press the four-way controller (▲). A pull-down menu appears.

3. Use the four-way controller (▲▼) to select [PC] or [PictBridge].
   - [PC]: Select this option when transferring image data to a computer
   - [PictBridge]: Select this option when connecting the camera to a PictBridge-compatible printer

4. Press the OK button.
   The USB Connection setting is saved.

Do not connect the camera to your PC while [PictBridge] is selected for the USB Connection mode. And do not connect the camera to your printer while [PC] is selected.
When you connect the camera to AV equipment, choose the appropriate video output format (NTSC or PAL) for taking and playing back images.

1. **Select [Video Out] on the [Setting] menu.**
2. **Press the four-way controller (▶).**
   A pull-down menu appears.
3. **Use the four-way controller (▲▼) to select [NTSC] or [PAL].**
   Choose the video output format to match the output format of the AV equipment.
4. **Press the OK button.**
   The Video Out setting is saved.

Depending on the country or region, images and sound files may fail to be played back if the video output format is set different from the one in use there. If this happens, change the video output format setting.

**Changing the Video Output Format**

Connect the Camera to AV Equipment p.113
You can adjust the brightness of the LCD monitor.

1. **Use the four-way controller (▲▼) to select [Brightness Level].**

2. **Use the four-way controller ( ◄►) to adjust the brightness.**
   The monitor gets darker as the bar slider moves to the left (toward [–]) and brighter as it moves to the right (toward [+]).

3. **Press the MENU button.**
   The Brightness Level setting is saved.
Using the Power Saving Function

You can save battery power by setting the LCD monitor to turn off automatically when no operation is performed for a fixed time. After the power saving function has been activated, you can turn the LCD monitor on again by pressing any of the buttons.

1. **Select [Power Saving] on the [Setting] menu.**
2. **Press the four-way controller (▲).**
   A pull-down menu appears.
3. **Use the four-way controller (▲▼) to select [2min], [1min], [30sec], [15sec], [5sec] or [Off].**
4. **Press the OK button.**
   The Power Saving setting is saved.

*Memo*

Power Saving does not function in the following situations:
- in Playback mode
- while the camera is connected to a PC or printer
- when using the AC adapter
- while recording a movie
You can set the camera to turn off automatically when no operation is performed for a fixed time.

2. Press the four-way controller (▲). A pull-down menu appears.
3. Use the four-way controller (▲▼) to select [5min], [3min] or [Off].
4. Press the OK button. The Auto Power Off setting is saved.

Auto Power Off does not function in the following situations:
- during a slideshow or movie playback
- while the camera is connected to a PC or printer
**Changing the Start-up Screen**

You can choose an image to be displayed as the start-up screen when the camera is turned on.

1. **Press the 
   button.**
   The camera enters 
   mode.

2. **Press the four-way controller (▼).**
   The Playback Mode Palette appears.

3. **Use the four-way controller (▲ ▼ ◀ ▶) to select 
   .**

4. **Press the OK button.**
   The image selection screen appears.

5. **Use the four-way controller ( ◀ ▶) to choose an image for the start-up screen.**

6. **Press the OK button.**
   The Start-up Screen setting is saved.

- Once the start-up screen has been set, it will not be deleted even if the original image is deleted or the SD Memory Card or built-in memory is formatted.
- Select [Off] to hide the start-up screen.
You can reset the camera settings to their defaults. Refer to “Default Settings” (p.168) for the reset settings.

1. **Select [Reset] on the [Setting] menu.**
2. **Press the four-way controller (►).**
   The Reset screen appears.
3. **Use the four-way controller (▲) to select [Reset].**
4. **Press the OK button.**
   The settings return to the defaults.

**Memo**

The following settings are not affected by resetting:
Date Adjust, Language/言語, World Time, Video Out and Mode Palette setting.
Displaying the Clock Mode

You can use the camera as a clock. With the camera turned off, press and hold down the OK button to display the clock on the LCD monitor.

1. **Press and hold down the OK button.**
   
The camera turns on and the clock appears on the screen.
   The camera turns off automatically after approximately 10 seconds.
   Pressing the power switch turns the camera off immediately.

Default Settings

The table below lists the factory default settings. The meaning of the indications for menu items with a default setting is explained below.

**Last Memory Setting**

Yes : The current setting (last memory) is saved when the camera is turned off.

No : The setting returns to the default setting when the camera is turned off.

* : The setting depends on the Memory setting (p.97).

**Reset Setting**

Yes : The setting returns to the default setting with the Reset function (p.165).

No : The setting is saved even after reset.

### White Balance
- Auto, Daylight, Shade, Tungsten Light, Fluores. Light, Manual

### Lens
- **Focal Length**: 6.3 mm - 18.9 mm (equivalent to 38 mm - 114 mm in 35 mm format)
- **Aperture**: f/3.3 - f/4
- **Lens Composition**: 11 elements in 9 groups (three aspherical elements)
- **Zoom Type**: Electrically driven
- **Picture Range**: Approx. 16.5 mm × 12.3 mm (screen is filled) (Macro mode)

### Digital Zoom
- **Capture Mode**: Max. 4× (combines with 3× optical zoom to give zoom magnification equivalent to 12×)

### LCD Monitor
- 2-inch low-reflection TFT color LCD monitor (with backlight) with brightness adjustment, approx. 85 kilopixels

### Playback Functions
- Single-frame, 9-frame index, enlargement (max. 8×, scroll), folder display, rotating, sound playback, slideshow, movie playback and editing (saving as still image, dividing, stitching), histogram display, bright/dark portion display, image/sound copying, digital filter, brightness filter, trimming, resizing, framing, red-eye compensation, image recovery

### Focus Modes
- Autofocus, Macro, Infinity, Pan Focus, Manual Focus

### Autofocus
- **Type**: TTL contrast detection system by sensor 9-point autofocus (multiple/spot changeable)
- **Still Picture (from lens front)**
  - Normal: Approx. 0.4 m - ∞ (full zoom range. Tele only: approx. 0.5 m - ∞)
  - Macro: Approx. 0.01 m - 0.6 m (Wide)
  - Pan Focus
  - Landscape: ∞ (full zoom range)
  - Manual focus: Approx. 0.01 m - ∞ (Wide) Approx. 0.5 m - ∞ (Tele)

</table>
All PENTAX cameras purchased through authorized bona fide photographic distribution channels are guaranteed against defects of material or workmanship for a period of twelve months from date of purchase. Service will be rendered, and defective parts will be replaced without cost to you within that period, provided the equipment does not show evidence of impact, sand or liquid damage, mishandling, tampering, battery or chemical corrosion, operation contrary to operating instructions, or modification by an unauthorized repair shop. The manufacturer or its authorized representatives shall not be liable for any repair or alterations except those made with its written consent and shall not be liable for damages from delay or loss of use or from other indirect or consequential damages of any kind, whether caused by defective material or workmanship or otherwise; and it is expressly agreed that the liability of the manufacturer or its representatives under all guarantees or warranties, whether expressed or implied, is strictly limited to the replacement of parts as hereinbefore provided. No refunds will be made on repairs by non-authorized PENTAX service facilities.

Procedure During 12-month Warranty Period
Any PENTAX which proves defective during the 12-month warranty period should be returned to the dealer from whom you purchased the equipment or to the manufacturer. If there is no representative of the manufacturer in your country, send the equipment to the manufacturer, with postage prepaid. In this case, it will take a considerable length of time before the equipment can be returned to you owing to the complicated customs procedures required. If the equipment is covered by warranty, repairs will be made and parts replaced free of charge, and the equipment will be returned to you upon completion of servicing. If the equipment is not covered by warranty, regular charges of the manufacturer or of its representatives will apply. Shipping charges are to be borne by the owner. If your PENTAX was purchased outside of the country where you wish to have it serviced during the warranty period, regular handling and servicing fees may be charged by the manufacturer’s representatives in that country. Notwithstanding this, your PENTAX returned to the manufacturer will be serviced free of charge according to this procedure and warranty policy. In any case, however, shipping charges and customs clearance fees to be borne by the sender. To prove the date of your purchase when required, please keep the receipt or bills covering the purchase of your equipment for at least a year. Before sending your equipment for servicing, please make sure that you are sending it to the manufacturer’s authorized representatives or their approved repair shops, unless you are sending it directly to the manufacturer. Always obtain a quotation for the service charge, and only after you accept the quoted service charge, instruct the service station to proceed with the servicing.
• This warranty policy does not affect the customer’s statutory rights.
• The local warranty policies available from PENTAX distributors in some countries can supersede this warranty policy. Therefore, we recommend that you review the warranty card supplied with your product at the time of purchase, or contact the PENTAX distributor in your country for more information and to receive a copy of the warranty policy.

The CE Mark is a Directive conformity mark of the European Community.
For customers in USA
STATEMENT OF FCC COMPLIANCE
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not approved by the party responsible for compliance could void the user’s authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
  Increase the separation between the equipment and receiver.
  Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
* Consult the dealer or an experienced radio/TV technician for help.

For customers in Canada
This Class B digital apparatus meets all requirements of the Canadian Interference - Causing Equipment Regulations.

Pour les utilisateurs au Canada
Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.
Declaration of Conformity
According to 47CFR, Parts 2 and 15 for
Class B Personal Computers and Peripherals

We: PENTAX Imaging Company
A Division of PENTAX of America, Inc.

Located at: 600 12th Street, Suite 300
Golden, Colorado 80401 U.S.A.
Phone: 303-799-8000 FAX: 303-790-1131

Declare under sole responsibility that the product identified herein
complies with 47CFR Parts 2 and 15 of the FCC rules as a Class B digital
device. Each product marketed is identical to the representative unit
tested and found to be compliant with the standards. Records
maintained continue to reflect the equipment being produced can be
expected to be within the variation accepted, due to quantity production
and testing on the statistical basis as required by 47CFR §2.909.
Operation is subject to the following two conditions: (1) This device may
not cause harmful interference, and (2) This device must accept any
interference received, including interference that may cause undesired
operation. The above named party is responsible for ensuring that the
equipment complies with the standards of 47CFR §15.101 to §15.109.
