To ensure the best performance from your camera, please read the Operating Manual before using the camera.
Thank you for purchasing this PENTAX Digital Camera. Please read this manual before using the camera in order to get the most out of all the features and functions. Keep this manual safe, as it can be a valuable tool in helping you to understand all the camera’s capabilities.

Regarding copyrights
Images taken using the PENTAX Digital Camera that are for anything other than personal enjoyment cannot be used without permission according to the rights as specified in the Copyright Act. Please take care, as there are cases where limitations are placed on taking pictures even for personal enjoyment during demonstrations, performances or of items on display. Images taken with the purpose of obtaining copyrights also cannot be used outside the scope of use of the copyright as laid out in the Copyright Act, and care should be taken here also.

Regarding trademarks
• PENTAX, Optio and smc PENTAX are trademarks of HOYA CORPORATION.
• SDHC logo (©) is a trademark.
• ©2008 ACD Systems Ltd. All rights reserved. ACDSee and the ACDSee logo are trademarks of ACD Systems Ltd. in Canada, the U.S., Europe, Japan and other countries.
• Microsoft and Windows are registered trademarks of Microsoft Corporation in the United States and other countries. Windows Vista is either a registered trademark or trademark of Microsoft Corporation in the United States and/or other countries.
• Macintosh and Mac OS are trademarks of Apple Inc., registered in the U.S. and other countries.
• This product supports PRINT Image Matching III. PRINT Image Matching enabled digital still cameras, printers and software help photographers to produce images more faithful to their intentions. Some functions are not available on printers that are not PRINT Image Matching III compliant. Copyright 2001 Seiko Epson Corporation. All Rights Reserved. PRINT Image Matching is a trademark of Seiko Epson Corporation. The PRINT Image Matching logo is a trademark of Seiko Epson Corporation.
• All other brands or product names are trademarks or registered trademarks of their respective companies.

Regarding Product Registration
In order to better serve you, we request that you complete the product registration, which can be found on the CD-ROM supplied with the camera or the PENTAX website. Thank you for your cooperation. Refer to “Connecting to a Computer” (p.211) for more information.
To users of this camera

• Do not use or store this device in the vicinity of equipment that generates strong electromagnetic radiation or magnetic fields. Strong static charges or the magnetic fields produced by equipment such as radio transmitters could interfere with the monitor, damage the stored data, or affect the product’s internal circuitry and cause camera misoperation.

• The liquid crystal panel used in the display is manufactured using extremely high precision technology. Although the level of functioning pixels is 99.99% or better, you should be aware that 0.01% or fewer of the pixels may not illuminate or may illuminate when they should not. However, this has no effect on the recorded image.

• If you point the camera toward an object that is bright, a band of light may appear on the screen display. This phenomenon is referred to as “smear” and is not a malfunction of the camera.

• There is a possibility that the illustrations and the display screen in this manual are different from the actual product.

• In this manual, both an SD Memory Card and an SDHC Memory Card are referred to as SD Memory Cards hereafter.

• In this manual, the generic term “computer(s)” refers to either a Windows PC or a Macintosh hereafter.

Using Your Camera Safely

We have paid close attention to the safety of this product. When using this product, we request your special attention regarding items marked with the following symbols.

⚠️ **Warning**  This symbol indicates that violating this item could cause serious personal injuries.

⚠️ **Caution**  This symbol indicates that violating this item could cause minor or medium personal injuries, or loss of property.
About the Camera

⚠️ Warning
- Do not disassemble or modify the camera. High voltage areas are present inside the camera, with the risk of electric shock.
- If the camera interior is exposed due to dropping or otherwise damaging the camera, never touch the exposed portion. There is a risk of electric shock.
- Wrapping the strap around your neck is dangerous. Take care that small children do not hang the strap around their necks.
- If any irregularities occur during use, such as smoke or a strange odor, stop use immediately, remove the battery or the AC adapter, and contact your nearest PENTAX Service Center. Continuing to use the product can cause a fire or electric shock.

⚠️ Caution
- Do not place your finger over the flash when discharging the flash. You may burn yourself.
- Do not cover the flash with clothing when discharging the flash. Discoloration may occur.
- Some portions of the camera heat up during use. There is a risk of low temperature burns when holding such portions for long periods.
- Should the monitor be damaged, be careful of glass fragments. Also, be careful not to allow the liquid crystal to get on your skin, in your eyes or mouth.
- Depending on your individual factors or physical condition, the use of the camera may cause itching, rashes or blisters. In case of any abnormality, stop using the camera and get medical attention immediately.

About the Battery Charger and the AC Adapter

⚠️ Warning
- Always use the battery charger and AC adapter exclusively developed for this product, with the specified power and voltage. Using a battery charger or AC adapter not exclusive to this product, or using the exclusive battery charger or AC adapter with an unspecified power or voltage can cause a fire, electric shock, or camera breakdown. The specified voltage is 100 - 240V AC.
• Do not disassemble or modify the product. This can cause a fire or electric shock.
• If the generation of smoke or strange odor from the product or other abnormality occurs, immediately discontinue use and consult a PENTAX Service Center. Continuing to use the product can cause a fire or electric shock.
• If water should happen to get inside the product, consult a PENTAX Service Center. Continuing to use the product can cause a fire or electric shock.
• If a thunder storm should occur while using the battery charger, unplug the AC plug cord and discontinue use. Continuing to use the product can cause damage to the equipment, fire, or electric shock.
• Wipe off the plug of the AC plug cord if it becomes covered with dust. Dust on the plug may cause a fire.

⚠️ Caution
• Do not place or drop heavy objects on or forcefully bend the AC plug cord. Doing so may damage the cord. Should the AC plug cord be damaged, consult a PENTAX Service Center.
• Do not touch or short-circuit the terminal area of the AC plug cord while the cord is plugged in.
• Do not plug or unplug the power cord with wet hands. This can cause an electric shock.
• Do not drop the product, or subject it to violent impact. This can cause equipment breakdown.
• Do not use the battery charger to charge a battery other than a rechargeable lithium-ion battery D-LI88. Attempting to charge other types of batteries may cause an explosion, or heating, or may damage the battery charger.
• To reduce the risk of hazards, use only a CSA/UL certified power supply cord set, cord is Type SPT-2 or heavier, minimum NO.18 AWG copper, one end with a molded-on male attachment plug cap (with a specified NEMA configuration), and the other is provided with a molded-on female connector body (with a specified IEC nonindustrial type configuration) or the equivalent.
About the Battery

⚠️ Warning
- Be sure to store the battery out of the reach of small children. Placing it in their mouths may cause an electric shock.
- If any leakage from the battery should come in contact with your eyes, do not rub them. Flush your eyes with clean water and get medical attention immediately.

⚠️ Caution
- Only use the specified battery with this camera. Use of other batteries may cause an explosion or fire.
- Do not disassemble the battery. Disassembling the battery may cause an explosion or leakage.
- The battery should be inserted correctly, observing (+) and (-) marks on the battery and the camera. Inserting the battery incorrectly may cause an explosion or fire.
- Remove the battery from the camera immediately if it becomes hot or begins to smoke. Be careful not to burn yourself during removal.
- Keep wires, hairpins, and other metal objects away from the + and - contacts of the battery.
- Do not short the battery or dispose of the battery in fire. This can cause an explosion or fire.
- If any leakage from the battery should come in contact with skin or clothes, wash the affected areas thoroughly with water.
- Precautions for D-LI88 Battery Usage:
  - BATTERY MAY EXPLODE OR FIRE IF MISTREATED.
  - DO NOT DISASSEMBLE OR DISPOSE OF IN FIRE.
  - DO NOT CHARGE EXCEPT SPECIFIED CHARGING CONDITION.
  - DO NOT HEAT ABOVE 140°F / 60°C, OR SHORT CIRCUIT.
  - DO NOT CRUSH OR MODIFY.

About the SD Memory Card

⚠️ Warning
- To avoid the risk of SD Memory Cards from being swallowed by mistake, keep them out of the reach of small children. Seek medical attention immediately if an SD Memory Card is accidentally swallowed.
Care to be Taken During Handling

### Before Using Your Camera

- When traveling, take the Worldwide Service Network that is included in the package. This will be useful if you experience problems abroad.
- When the camera has not been used for a long time, confirm that it is still working properly, particularly prior to taking important pictures (such as at a wedding or when traveling). Pictures and sound cannot be guaranteed if recording, playback or transferring your data to a computer, etc. is not possible due to a malfunction of your camera or recording media (SD Memory Card), etc.

### About the Battery and Charger

- Storing the battery fully charged may decrease the battery performance. Avoid storing in high temperatures.
- If the battery is left inserted and the camera is not used for a long time, the battery will over-discharge and shorten the battery’s usage span.
- Charging the battery a day before use or on the day of use is recommended.
- The AC plug cord provided with this camera is developed exclusively for the battery charger D-BC88. Do not use it with other devices.

### Precautions on Carrying and Using Your Camera

- Do not subject the camera to high temperatures or high humidity. Do not leave the camera in a vehicle, as the temperature can get very high.
- Do not subject the camera to strong vibrations, shocks, or pressure. Use a cushion to protect the camera from vibrations of motorcycles, automobiles, or ships.
- The temperature range for camera use is 0°C to 40°C (32°F to 104°F).
- The monitor may appear black at high temperatures, but will return to normal at normal temperatures.
- The monitor may respond more slowly at low temperatures. This is due to liquid crystal properties, and is not a malfunction.
- Sudden temperature changes will cause condensation on the inside and outside of the camera. Place the camera in your bag or a plastic bag, and remove it after temperature of the camera and surroundings are equalized.
• Avoid contact with garbage, mud, sand, dust, water, toxic gases, or salts. These could cause the camera to breakdown. Wipe dry any rain or water drops on the camera.
• Please do not press forcefully on the monitor. This could cause it to break or malfunction.
• Be careful not to sit down with the camera in your back pocket as this may damage the exterior of the camera or the display.
• Be careful not to overtighten the tripod screw when using a tripod.
• The lens on this camera is not interchangeable. The lens is not removable.

**Waterproof and Dustproof Function**

• This camera is provided with a waterproof/dustproof design complying with JIS waterproof grade 8 and JIS dustproof grade 6 (equivalent to IP68).
• To enhance the waterproof performance of the camera, the front of the lens is protected by glass. As any dirt or water on the glass will affect the quality of pictures taken, the glass should be kept clean at all times.
• Leaving the camera on the sand at the beach may cause the camera to exceed its operating temperature or cause the speaker or microphone to become blocked with sand.
• The camera will sink if dropped in water, so be sure to attach the strap and slip the strap over your wrist when using the camera in or near water.
• Be sure to check that the battery/card/terminal cover is securely locked before using the camera in an environment where it is likely to get wet or dirty, such as underwater or at the beach. Water, sand or dirt inside the camera may cause failure of the camera. Wipe off any water or dirt with a dry cloth as soon as possible after using the camera.
• Avoid opening the battery/card/terminal cover at the beach or by the sea. Wait until the camera is completely dry before changing the battery or the SD Memory Card. Avoid changing the battery or card where the camera is likely to get wet or dirty, and make sure that your hands are dry.
• If the camera is very dirty or after it has been used in the sea, make sure that it is turned off and the battery/card/terminal cover is firmly closed before rinsing it under running tap water or leaving it in a bowl of clean water for a short time (2 or 3 minutes).
• Avoid cleaning with agents such as soapy water, mild detergents, and alcohol as this may compromise the waterproof performance of the camera.
• Wipe off any dirt or sand on the waterproof packing or the packing contact surface. The camera waterproof function may be compromised by loose packing or cracks or dents in the packing or packing contact surface. If there is any such damage, contact your nearest PENTAX Service Center.

• To maintain the waterproof performance of the camera, you are recommended to change the waterproof packing once a year. Contact your nearest PENTAX Service Center regarding changing the packing. (A charge will be made.)

• Avoid subjecting the camera to substantial vibrations, shocks, or pressure as this may cause a loss in waterproof performance. If the camera is subjected to substantial vibrations, shocks or pressure, take your camera to your nearest PENTAX Service Center and have it checked.

• Avoid getting sunscreen or sun oil on the camera as it may cause discoloration of the surface. If any oil gets on the camera, wash it off immediately with warm water.

• The camera’s accessories are not waterproof.

### Cleaning Your Camera

- Do not clean the product with organic solvents such as thinner, alcohol or benzene.
- Use a lens brush to remove dust accumulated on the lens or viewfinder. Never use a spray blower for cleaning as it may damage the lens.

### Storing Your Camera

- Do not store the camera with preservatives or chemicals. Storage in high temperatures and high humidity can cause mold to grow on the camera. Remove the camera from its case and store it in a dry and well-ventilated location.
Other Precautions

• Periodic inspections are recommended every one to two years to maintain high performance.
• Refer to “Precautions When Using an SD Memory Card” (p.44) regarding the SD Memory Card.
• Please note that deleting the data recorded on an SD Memory Card or formatting an SD Memory Card using a camera or computer will not necessarily delete the data so that it cannot be recovered using off the shelf data recovery software. Such data should be handled and managed at your own risk.

Composition of the Operating Manual

This Operating Manual contains the following chapters.

1 Getting Started

This chapter explains what you need to do after purchasing the camera before you start taking pictures. Be sure to read it and follow the instructions.

2 Common Operations

This chapter explains common operations such as the functions of the buttons and how to use the menus. For more details, refer to the respective chapters below.

3 Taking Pictures

This chapter explains the various ways of capturing images and how to set the relevant functions.

4 Playing Back and Deleting Images

This chapter explains how to view still pictures and movies on the camera or on a TV screen and how to delete images from the camera.

5 Editing and Printing Images

This chapter explains the various ways of printing still pictures and how to edit images with the camera.

6 Recording and Playing Back Sound

This chapter explains how to record sound files or add sound (a voice memo) to an image, and how to play back them.

7 Settings

This chapter explains how to set the camera-related functions.

8 Connecting to a Computer

This chapter explains how to connect the camera to a computer, and includes installation instructions and a general overview of the provided software.

9 Appendix

This chapter deals with troubleshooting and lists the optional accessories.
In addition to basic picture-taking, the Optio WS80 has a variety of shooting modes to suit different situations. This section describes how to make the most of the key features of your camera. Together with the explanations of camera operations, it will enable you to enjoy your camera to the full.

**Forget Your Worries About Water Getting in the Camera!**

The Optio WS80 is waterproof/dustproof, and the water resistant coating on the lens protective glass enables you to take pictures underwater for two hours at a depth of 1.5 meters (4.9 ft.). It also allows the camera to be sprayed by water, and you can use the camera in locations where it will be exposed to dust and dirt such as beaches, kitchens, and workshops. Because it utilizes a lock mechanism for the battery/card/terminal cover, when the cover is firmly locked, you can use the camera underwater safely, with the knowledge that the battery and card are also secure.

- For taking pictures while snorkeling (p.84)
- For taking pictures at the pool or while playing in a river or lake
- For taking pictures while enjoying various outdoor activities without worrying about your camera getting a bit dirty. A quick wipe with a wet cloth is all it needs!
Easy-to-Navigate Capture and Playback Functions!

The user-friendly design of the Optio WS80 enables easy operation with only a few buttons. Simply by choosing the appropriate icon, you can select the shooting mode (p.73) and choose the optimal settings for the situation, or the playback mode (p.140, p.162) and enjoy the various playback and editing functions. A guide on the display lets you check the functions available in each mode and how to use them.

- A shooting mode guide is displayed in the Capture Mode Palette and a playback mode guide in the Playback Mode Palette (p.73, p.140).
- Use the Green Mode to take pictures easily using standard settings (p.80).

Perfect for Portrait Shots!

The Optio WS80 comes with a “Face Recognition” function that spots the faces in your shot and automatically adjusts the focus and exposure for the faces. It can recognize up to 32 people per shot (*), so it will help you take perfect group shots too. It will automatically release the shutter when people are smiling, or if anyone blinked, it will tell you that so you can take the shot again until it is perfect. It also has a feature that lets you enlarge each person’s face in sequence during playback so you can quickly check their facial expressions.

* Up to 31 face recognition frames (up to 30 frames in Half-length Portrait mode) are displayed on the monitor.

- Face Recognition function (p.76)
- Modes for taking stunning pictures of people (p.88)
- Close-ups of people’s faces for easy checking during playback (p.148)
Add Various Frames to Your Pictures!

When you take a picture with the Optio WS80, you can choose from a wide range of fun frames to create attractive framed shots (p.93). You can also add frames to pictures you have taken. Adjust the position of the subject in the picture or reduce or enlarge the picture size to match the frame shape and size. Now you no longer have to worry about the subject not fitting into the frame (p.171).

● For decorating your pictures with a frame

Display Images and Sound Files in Calendar Format!

With the Optio WS80, you can display recorded images and sound files by date in calendar format (p.139). This lets you quickly find the image or sound file you want to play back.

Advanced Movie Recording Functions

The Optio WS80 has a shake reduction function (Movie SR) to reduce camera shake during movie recording (p.129). And it enables you to record movies in 1280×720 pixel (16:9) HDTV format (*) (p.128).

* When connecting to and playing back images on AV equipment, image data is output at normal screen resolution. To view movies in HDTV, transfer the data to a computer and play it back on the computer.

● Use the camera to shoot fun-filled movies of your children or pets as a visual diary of their development (p.126).
With its design and excellent portability, the Optio WS80 is just right to slip into a pocket of your bag or hang around your neck, so you always have it with you, like your cell phone. It has a useful clock function, “Clock Mode” for telling the time. You can also set the alarm to ring at a specified time (p.208).

The Optio WS80 has a variety of functions to let you enjoy playing back and editing images without having to connect the camera to your computer and transfer the images first. The camera is all you need to take and edit still pictures and movies (p.162). And no more worries about accidentally deleting images, because now, with the Optio WS80, you can recover them again (p.155).

- Resize (p.162), Cropping (p.163) and Red-eye Compensation (p.170) can be used, while the image is displayed in the playback mode.
- You can divide a movie into two or select a frame from a movie to save it as a still picture (p.174).

Using the Histogram

A histogram shows the brightness distribution of an image. The horizontal axis represents brightness (dark at the left and bright at the right) and the vertical axis represents the number of pixels. The shape of the histogram before and after shooting tells you whether the brightness and contrast are correct or not, and lets you decide if you need to use EV compensation and take the picture again.

Setting the Exposure (EV Compensation)  \( \Rightarrow \) p.112

Understanding Brightness

If the brightness is correct, the graph peaks in the middle. If the image is too dark, the peak is on the left side, and if it is too bright, the peak is on the right side.

Dark image  Correct image  Bright image
When the image is too dark, the part to the left is cut off (dark portions) and when the image is too bright, the part to the right is cut off (bright portions).

**Understanding Contrast**

The graph peaks gradually for images in which contrast is balanced. The graph peaks on both sides but sinks in the middle for images with a large difference in contrast and low amounts of mid-level brightness.
1 Getting Started

Attaching the Strap ........................................ 34
Powering the Camera .................................... 35
Installing the SD Memory Card ...................... 42
Turning the Camera On and Off .................... 46
Initial Settings ............................................... 48
Getting Started

Attaching the Strap

Attach the strap (O-ST51) supplied with the camera.

1. Pass the narrow end of the strap through the strap lug.
2. Pass the other end of the strap through the loop and pull tight.
Charging the Battery

Use the supplied battery charger (D-BC88) to charge the supplied rechargeable lithium-ion battery (D-LI88) before using it in the camera for the first time or after a long period of non-use, or when the [Battery depleted] message appears.

Note: AC plug cord “Listed, Type SPT-2 or NISPT-2, 18/2 flexible cord, rated 125 V, 7A, minimum 6 ft (1.8 m)”

1. Connect the AC plug cord to the battery charger.
2. Plug the AC plug cord into the power outlet.
3. Place the battery in the battery charger so that the PENTAX logo is facing up.
   The charging indicator lights while the battery is charging and turns off when charging is finished.
4. Remove the battery from the battery charger when charging is finished.
• Do not use the supplied battery charger (D-BC88) to charge batteries other than the rechargeable lithium-ion battery D-LI88, as the battery charger may overheat or be damaged.
• The battery has reached the end of its service life when it starts to run down soon after being charged. Replace it with a new battery.
• If the battery is inserted correctly but the charging indicator fails to light, the battery may be faulty. Replace it with a new battery.

The time required to fully charge the battery is about 120 minutes (max.). (The charging time may vary depending on the ambient temperature and charging conditions.) The appropriate ambient temperature for charging the battery is 0°C to 40°C (32°F to 104°F).

Installing the Battery

Use the rechargeable lithium-ion battery D-LI88 that is provided with the camera. Charge the battery before using it in the camera for the first time.

Open the battery/card/terminal cover.

While pushing the battery/card/terminal cover lock lever towards ①, slide the cover towards ② and open it towards ③.
2 Press the battery lock lever in the direction of (4) and insert the battery so that the PENTAX logo is facing toward the lens.
Match the marks on the battery to the marks inside the battery compartment and push the battery in until it is locked in place.

Caution: Make sure that the battery is inserted with the PENTAX logo pointing toward the lens. If the battery is incorrectly oriented, malfunction may result.

3 Close the battery/card/terminal cover.
Slide the battery/card/terminal cover in the opposite direction indicated by (2). If you hear a click, the cover is securely closed.

Removing the Battery

1 Open the battery/card/terminal cover.

2 Press the battery lock lever in the direction of (4).
The battery will be ejected. Take care not to drop the battery when removing it.
• This camera uses a rechargeable lithium-ion battery D-LI88. Use of any other type of battery may damage the camera and cause malfunction.

• Insert the battery correctly. If the battery is incorrectly oriented, malfunction may result.

• Do not remove the battery while the camera is turned on.

• Do not use excessive force when sliding the battery/card/terminal cover open and closed because the waterproof packing may peel off. If the packing is not in the correct position, the camera will not be waterproof.

• If the battery/card/terminal cover is not locked securely when you close it, water, sand, or dirt may get into the camera.

• Avoid changing the battery where the camera is likely to get wet or dirty, and make sure that the camera and your hands are dry completely.

• When storing the battery for more than 6 months, charge the battery for 30 minutes using the battery charger and store the battery separately. Be sure to recharge the battery every 6 to 12 months. Storing the battery below room temperature is ideal. Avoid storing it in high temperatures.

• The date and time may be returned to the default setting if the camera is left without the battery for a long time.

• Be careful as the camera or the battery may become hot when the camera is used continuously for a long period of time.

---

**Image Storage Capacity, Movie Recording Time, Sound Recording Time, and Playback Time**

*(at 23°C with the display on and the battery fully charged)*

<table>
<thead>
<tr>
<th>Image Storage Capacity*1 (flash used for 50% of shots)</th>
<th>Movie Recording Time*2</th>
<th>Sound Recording Time*2</th>
<th>Playback Time*2</th>

<td>Battery is exhausted.</td>
</tr>
</tbody>
</table>

![Battery depleted](image) The camera will turn off after this message appears.
Using the AC Adapter

Use of the optional AC adapter kit (K-AC88) is recommended if you intend to use the camera for a long time or connect it to a computer.

1 Make sure that the camera is turned off and open the battery/card/terminal cover.

2 Remove the battery.
   Refer to p.36 - p.37 on how to open/close the battery/card/terminal cover and remove the battery.

3 Insert the DC coupler, as shown in the illustration, while holding down the battery lock lever.
   Confirm the DC coupler is locked in place.
   The battery/card/terminal cover will not close while the DC coupler is inserted. Leave the cover open when using the AC adapter and do not attempt to close it.

4 Connect the DC terminal of the AC adapter to the DC terminal of the DC coupler.

5 Connect the AC plug cord to the AC adapter.

6 Plug the AC plug cord into the power outlet.
• Make sure that the camera is turned off before connecting or disconnecting the AC adapter.
• Make sure that the AC plug cord and the DC terminal connecting the AC adapter to the camera are inserted securely. Data may be lost if either becomes disconnected while data is being recorded on the SD Memory Card or the built-in memory.
• Do not use excessive force when sliding the battery/card/terminal cover open and closed because the waterproof packing may peel off. If the packing is not in the correct position, the camera will not be waterproof.
• Use the AC adapter with due care to avoid fire or electric shock. Be sure to read “About the Battery Charger and the AC Adapter” (p.2) before using the AC adapter.
• Be sure to read the operation manual accompanying the AC adapter kit K-AC88 before using the adapter.
• When connecting the AC adapter, you cannot set the camera upright on the table because the cord from the DC coupler comes out of the bottom of the camera.
Installing the SD Memory Card

This camera uses either an SD Memory Card or an SDHC Memory Card. (Both cards are referred to as SD Memory Cards hereafter.) Captured images and sound files are saved on the SD Memory Card if a card is inserted in the camera. They are saved in the built-in memory if a card is not inserted (p.46).

• Be sure to use this camera to format (initialize) an SD Memory Card that is unused or has been used on other cameras or digital devices. Refer to “Formatting an SD Memory Card” (p.192) for instructions on formatting.
• Make sure that the camera is turned off before inserting or removing the SD Memory Card.
• Do not use excessive force when sliding the battery/card/terminal cover open and closed because the waterproof packing may peel off. If the packing is not in the correct position, the camera will not be waterproof.
• Avoid changing the SD Memory Card where the camera is likely to get wet or dirty, and make sure that the camera and your hands are completely dry.

• The still picture storage capacity varies depending on the capacity of the SD Memory Card and the selected number of recorded pixels and quality level (p.45).
• The self-timer lamp blinks while the SD Memory Card is being accessed (data is being recorded or read).

Backing Up Data
The camera may not be able to access data in the built-in memory in the case of a malfunction. Use a computer or other device to back up important data in another location.
1 Open the battery/card/terminal cover.
While pushing the battery/card/terminal cover lock lever towards 1, slide the cover towards 2 and open it towards 3.

2 Insert the SD Memory Card into the SD Memory Card socket so that the label is facing toward the front of the camera (the side with the lens).
Push the card in all the way. Data may not be recorded correctly if the card is not inserted all the way.

3 Close the battery/card/terminal cover.
Slide the battery/card/terminal cover in the opposite direction indicated by 2. If you hear a click, the cover is securely closed.

To Remove the SD Memory Card

1 Open the battery/card/terminal cover.

2 Push the card into the SD Memory Card socket to eject it.
Pull the card out.

Caution: If the battery/card/terminal cover is not locked securely when you close it, water, sand, or dirt may get into the camera.
Precautions When Using an SD Memory Card

- The SD Memory Card is equipped with a write-protect switch. Setting the switch to LOCK prevents new data from being recorded on the card, the stored data from being deleted, and the card from being formatted by the camera or computer. 
  
  $\,”$ appears on the display when the card is write-protected.
- Care should be taken when removing the SD Memory Card immediately after using the camera, as the card may be hot.
- Do not remove the SD Memory Card or turn the camera off while the data is being played back or saved to the card, or the camera is connected to a computer with the USB cable, as this may cause the data to be lost or the card to be damaged.
- Do not bend the SD Memory Card or subject it to violent impact. Keep it away from water and store away from high temperature.
- Do not remove the SD Memory Card during formatting as this may damage the card and render it unusable.
- The data on the SD Memory Card may be deleted in the following circumstances. We do not accept any liability for data that is deleted
  (1) when the SD Memory Card is mishandled by the user.
  (2) when the SD Memory Card is exposed to static electricity or electrical interference.
  (3) when the SD Memory Card has not been used for a long time.
  (4) when the SD Memory Card is ejected or the battery is removed while the data on the card is being recorded or accessed.
- If it is not used for a long time, the data on the card may become unreadable. Be sure to regularly make a backup of important data on a computer.
- Avoid using or storing the card where it may be exposed to static electricity or electrical interference.
- Avoid using or storing the card in direct sunlight or where it may be exposed to rapid changes in temperature or to condensation.
- When using an SD Memory Card with a slow recording speed, recording may stop while you are taking movies even when there is adequate space in the memory, or shooting and playback may take a long time.
- Be sure to format SD Memory Cards that are unused or have been used on another camera. Refer to “Formatting an SD Memory Card” (p.192).
- Please note that formatting the SD Memory Card will not necessarily delete the data so that it cannot be recovered using off-the-shelf data recovery software. There are off-the-shelf secure data deletion software programs available that will completely delete the data. If you are going to discard, give away or sell your SD Memory Card, you should ensure that the data on the card is completely deleted or the card itself is destroyed if it contains any personal or sensitive information. In any case, the data on your SD Memory Card should be managed at your own risk.
Number of Images Recordable on an SD Memory Card

The sizes of the recorded images differ depending on the number of recorded pixels of the images, so the number of images that will be saved on an SD Memory Card also differs.

Choose the appropriate number of recorded pixels for still pictures on the [Rec. Mode] menu.

Selecting the Number of Recorded Pixels  p.110

Choose the appropriate number of recorded pixels and frame rate in [Movie] on the [Rec. Mode] menu.

Selecting the Recorded Pixels and Frame Rate for Movies  p.128

For an approximate guide to the number of images or the length of recorded movies that can be saved on an SD Memory Card, see “Main Specifications” (p.248).
1 Press the power switch.
The camera turns on and the display turns on.
If the [Language/言語] screen or [Date Adjustment] screen appears when you turn the camera on, follow the procedure on p.48 to set the display language and/or current date and time.

2 Press the power switch again.
The display turns off, the lens closes, and the camera turns off.

Taking Still Pictures p.70

Checking the SD Memory Card

The SD Memory Card is checked when the camera turns on and the memory status is displayed.

- The SD Memory Card is inserted. Images and sound files will be saved on the SD Memory Card.
- The SD Memory Card is not inserted. Images and sound files will be saved in the built-in memory.
- The write-protect switch on the SD Memory Card is in the LOCK position (p.44). Images and sounds cannot be recorded.
Starting-up in the Playback Mode

If you want to play back images or sound files straightaway without taking any pictures, you can start up the camera in the playback mode.

1 Press the power switch while holding down the button.
The display turns on and the camera turns on in the playback mode.

To switch from the playback mode to the capture mode, press the button or press the shutter release button halfway.

Playing Back Still Pictures p.136
Initial Settings

The [Language/言語] screen appears when the camera is turned on for the first time. Perform the operations in “Setting the Display Language” below to set the language, and in “Setting the Date and Time” (p.52) to set the current date and time.

The language, date, and time can be changed later. Refer to the pages below for instructions.
- To change the language, follow the steps in “Changing the Display Language” (p.199).
- To change the date and time, follow the steps in “Changing the Date and Time” (p.194).

Setting the Display Language

1 Use the four-way controller (▲▼◄►) to choose the display language.
2 Press the OK button.
The [Initial Setting] screen appears in the selected language. If the desired settings for [Hometown] and [DST] (Daylight Saving Time) appear, proceed to Step 3. Proceed to “To Set Hometown and DST” (p.51) if the desired settings do not appear.

3 Press the four-way controller (▼) twice to select [Settings complete].

4 Press the OK button.
The [Date Adjustment] screen appears. Set the date and time by following the procedure in “Setting the Date and Time” (p.52).
If you accidentally select the wrong language and proceed to the next procedure, perform the following operation to set the desired language.

● When the Wrong Language Has Been Inadvertently Selected

1 Press the four-way controller (►).
2 Use the four-way controller (▲ ▼ ◀▶) to select the language and press the OK button.
   The [Initial Setting] screen appears in the selected language.

● When the Screen After Step 2 Appears in the Wrong Language

1 Press the MENU button.
   The setting screen is ended and the camera returns to capture status.
2 Press the MENU button.
   The [Rec. mode] menu appears.
3 Press the four-way controller (►).
4 Use the four-way controller (▼ ▲) to select [Language/言語].
5 Press the four-way controller (►).
   The [Language/言語] screen appears.
6 Use the four-way controller (▲ ▼ ◀▶) to select the language.
7 Press the OK button.
   The [Setting] menu appears in the selected language.

The language is now switched to your desired language. To reset [Hometown], [Date] and [Time], refer to the pages below for instructions.
• To change [Hometown], follow the steps in “Setting the World Time” (p.197).
• To change the [Date] and [Time], follow the steps in “Changing the Date and Time” (p.194).
To Set Hometown and DST

3 **Press the four-way controller (▼).**
The frame moves to [Hometown].

4 **Press the four-way controller (►).**
The [Hometown] screen appears.

5 **Use the four-way controller (◄►) to choose a city.**

6 **Press the four-way controller (▼).**
The frame moves to [DST] (Daylight Saving Time).

7 **Use the four-way controller (◄►) to select ✓ or □.**

8 **Press the OK button.**
The [Initial Setting] screen reappears.

9 **Press the four-way controller (▼) to select [Settings complete].**

10 **Press the OK button.**
The [Date Adjustment] screen appears. Next, set the date and time.
The video output format (NTSC/PAL) is set to the format of the city selected in [Hometown] on the [Initial Setting] screen. Refer to “List of World Time Cities” (p.245) for the video output format of each city set as the initial setting, and “Changing the Video Output Format” (p.201) for changing the setting of the video output format.

## Setting the Date and Time

Set the current date and time and the display style.

1. **Press the four-way controller (▶).**
   
The frame moves to [mm/dd/yy].

2. **Use the four-way controller (▲ ▼) to choose the date and time display style.**
   
   Choose from [mm/dd/yy], [dd/mm/yy] or [yy/mm/dd].

3. **Press the four-way controller (▶).**
   
The frame moves to [24h].

4. **Use the four-way controller (▲ ▼) to select [24h] (24-hour display) or [12h] (12-hour display).**

5. **Press the four-way controller (▶).**
   
The frame returns to [Date Format].

6. **Press the four-way controller (▼).**
   
The frame moves to [Date].
Press the four-way controller (▶).  
The frame moves to the month.

Use the four-way controller (▲▼) to change the month.  
Change the day and year in the same manner.  
Next, change the time.  
If you selected [12h] in Step 4, the setting switches between am and pm corresponding to the time.

Press the four-way controller (▼) to select [Settings complete].

Press the OK button.  
This confirms the date and time and completes the initial setting. The camera returns to capture status.

If you press the OK button in Step 10, the camera clock is reset to 00 seconds. To set the exact time, press the OK button when the time signal (on the TV, radio, etc.) reaches 00 seconds.

When the [Initial Setting] or [Date Adjustment] screen is displayed, you can cancel the setting operation and switch to the capture mode by pressing the MENU button. In this case, the [Initial Setting] screen will appear next time you turn the camera on.
[Language/言語], [Date], [Time], [Hometown] and [DST] can be changed. Refer to the pages below for instructions.

- To change the language, follow the steps in “Changing the Display Language” (p.199).
- To change the date and time, follow the steps in “Changing the Date and Time” (p.194).
- To change the city or turn DST on and off, follow the steps in “Setting the World Time” (p.197).
2 Common Operations

Understanding the Button Functions ..... 56
Setting the Camera Functions ............... 61
Understanding the Button Functions

## Mode

### Power switch
Turns the camera on and off (p.46).

### Shutter release button
Focuses the camera on the subject when pressed halfway in still picture capture mode (except in PF, ▲, and MF modes). Takes a still picture when pressed down fully (p.71). Starts and stops movie recording in (Movie) and (Underwater Movie) modes (p.126). Starts and stops sound file recording in Voice Recording (p.185).

### Zoom button
Changes the captured area (p.82).

### button
Switches to the mode (p.60).

### MENU button
Displays the [Rec. Mode] menu (p.61).
6  **button**
Switches the Face Recognition function (p.76). The Face Recognition function is switched as follows each time the ‘button is pressed:
Smile Capture → Face Priority Off → Face Priority On

7  **Four-way controller**
▲  Changes the drive mode (p.95, p.96, p.98).
▼  Displays the Capture Mode Palette (p.73).
◄  Changes the flash mode (p.105).
►  Changes the focus mode (p.107).
▲▼  Adjusts the focus when the focus mode is set to MF (p.108).

8  **OK/DISPLAY button**
Changes the information on the display (p.23).

9  **Green button**
Switches to the (Green) mode (p.80).
Calls up the assigned function (p.124).
**Common Operations**

**1. Power switch**
Turns the camera on and off (p.46).

**2. Shutter release button**
Switches to **A** mode (p.60).

**3. Zoom button**
Press towards the left (.LEFT) during single-image display to change to four-image display. Changes to nine-image display when pressed towards the left again. Returns to the previous display when pressed towards the right (RIGHT) (p.138).
Enlarges the image when pressed towards the right (RIGHT) during single-image display. Returns to the previous display when pressed towards the left (LEFT) (p.146).
Press towards the left (LEFT) during nine-image display to change to folder or calendar display (p.139).
Press towards the right (RIGHT) during folder/calendar display to change to nine-image display (p.139).
Adjusts the volume during playback of movies, sound files or voice memo (p.137, p.186, p.189).

**4. ** button
Switches to ** mode (p.60).

**5. MENU button**
Displays the [Setting] menu during single-image display (p.61).
Returns to single-image display during Playback Mode Palette display (p.140).
Returns to single-image display during four-/nine-image display or zoom display (p.138).
Changes to nine-image display of the selected folder during folder display (p.139).
Changes to nine-image display of the selected date during calendar display (p.139).

6. **button**
Zooms in on the subject’s faces in the face-recognized image in the order the faces were recognized when the picture was taken. (Face close-up playback) (p.148).

7. **Four-way controller**
- \(\uparrow\) Plays back and pauses a movie or sound file (p.137, p.186).
- \(\downarrow\) Displays the Playback Mode Palette (p.140).
- \(\leftrightarrow\) Displays a movie or sound file during playback (p.137, p.186).
- \(\leftarrow\rightarrow\) Displays the previous or next image or sound file during single-image display (p.136).
  Fast-forwards, fast-reverses, frame forwards, frame reverses, reverses a movie and makes a movie play forwards during playback (p.137).
  Fast-forwards, fast-reverses, and moves to the next index in sound file playback (p.186).
- \(\uparrow\downarrow\leftarrow\rightarrow\) Selects an image in four-/nine-image display, a folder in folder display, and a date in calendar display (p.138, p.139).
  Moves the display area during zoom display (p.146).
  Moves the image when using the Frame Composite function (p.171).

8. **OK/DISPLAY button**
Changes the information on the display (p.28).
Returns to single-image display during four-/nine-image display or zoom display (p.138, p.146).
Changes to nine-image display of the selected folder during folder display (p.139).
Changes to single-image display of the selected date during calendar display (p.140).

9. **Green/\(\text{H}\) button**
Switches from single-image display to the Delete screen (p.150).
Switches from four-/nine-image display to the Select & Delete screen (p.152).
Switches from folder display to the calendar display screen (p.139).
Switches from calendar display to the folder display screen (p.139).
### Switching Between 📸 Mode and 🎥 Mode

In this manual, the capture mode, such as for taking still pictures, is referred to as “📸 mode” (the capture mode). The playback mode, such as for displaying captured images on the display, is referred to as “🎥 mode” (the playback mode). In 🎥 mode, you can perform simple editing operations on the captured images.

Follow the procedure below to switch between 📸 mode and 🎥 mode.

#### To Switch from 📸 Mode to 🎥 Mode

1. **Press the 🎥 button.**
   The camera switches to 🎥 mode.

#### To Switch from 🎥 Mode to 📸 Mode

1. **Press the 🎥 button or the shutter release button halfway.**
   The camera switches to 📸 mode.

### Displaying data stored in the built-in memory

When an SD Memory Card is inserted in the camera, images, movies, and sounds on the SD Memory Card are displayed. If you want to display images, movies and sounds in the built-in memory, turn the camera off and remove the SD Memory Card, or follow the procedure below to use the “Built-in memory display” function.

- **Viewing images in the built-in memory while the SD Memory Card is inserted (built-in memory display)**
  When you press and hold down the 🎥 button for more than one second in 📸 mode, the message [Display image/sound from built-in memory] appears, and the images, movies and sound files stored in the built-in memory are displayed.
  - In the built-in memory display, you can play back still pictures (including enlarged display) (p.136, p.146), movies (p.137) and sounds (p.186), and switch between four-/nine-image display, folder display and calendar display (p.138).
  - In the built-in memory display, you cannot delete data, delete a selection, display the Playback Mode Palette or display the menu. If you want to perform any of these operations on images, movies or sounds in the built-in memory, do so after removing the SD Memory Card.

Caution: Make sure that the camera is turned off before inserting or removing the SD Memory Card.
To change the camera settings, press the **MENU** button to display the
[Rec. Mode] menu or [Setting] menu. Menus for playing back and
editing images and sound files are displayed from the Playback Mode
Palette (p.140).

### Operating the Menus

Press the **MENU** button in **Record** mode to display the [Rec. Mode] menu.
Press the **MENU** button in **Playback** mode to display the [Setting] menu.
Use the four-way controller (↕️️) to switch between [Rec. Mode] menu and [Setting] menu.
Common Operations

Available button operations appear on the display during menu operation (p.30).
Ex.) To set the [Focusing Area] on the [Rec. Mode] menu

1 Press the MENU button in mode.
The [Rec. Mode] menu appears.

2 Press the four-way controller (▼).
The frame moves to [Pixel Track SR].

3 Press the four-way controller (▼) three times.
The frame moves to [Focusing Area].

4 Press the four-way controller (▲). A pull-down menu appears with the items that can be selected.
The pull-down menu displays only those items that can be selected with the current camera settings.

5 Use the four-way controller (▲▼) to change the setting.
The focusing area changes each time the four-way controller (▲▼) is pressed.

6 Press the OK button or the four-way controller (▼). The setting is saved and then the camera is ready for setting the other functions.
To exit the settings, press the MENU button.

To use another operation, refer to the alternate Step 6 options on the next page.
To Save the Setting and Start Taking Pictures

6 Press the shutter release button halfway.
The setting is saved and the camera returns to capture status. When the shutter release button is pressed fully, the picture is taken.

When the [Setting] menu is displayed from mode, you can switch to mode by pressing the button.

To Save the Setting and Start Playback of Images

6 Press the button.
When the [Rec. Mode] menu is displayed from mode, the setting is saved and the camera returns to playback status.

To Cancel the Changes and Continue with Menu Operations

6 Press the MENU button.
The changes are canceled and the screen shown in Step 3 reappears.

The MENU button function differs depending on the screen. Refer to the guide indications.

| MENU Exit | Exits the menu and returns to the original screen. |
| MENU ➔ | Returns to the previous screen with the current setting. |
| MENU Cancel | Cancels the current selection, exits the menu and returns to the previous screen. |

Menu List

This displays the items that can be set with the menus and provides descriptions of each item. See the list of default settings in the Appendix “Default Settings” (p.240) to check whether the settings are saved when the camera is turned off and whether the settings return to the defaults when the camera is reset.
**[Rec. Mode] Menu**

This menu shows the functions related to taking still pictures and recording movies.

Taking Still Pictures ........................................... 70
Setting the Shooting Functions ........... 105
Recording Movies ........................................... 126
Saving the Settings (Memory) ............ 133
Taking Pictures

The Optio WS80 features a wide range of shooting modes and functions to suit almost any subject or scene. This chapter describes how to take pictures with the most commonly used standard settings (the factory default settings).

1. **Press the power switch.**
   The camera turns on and is ready to take still pictures. In this manual, this is called “still picture capture mode”.

2. **Confirm the subject and shooting information on the display.**
   The focus frame in the middle of the display indicates the zone of automatic focusing.

   When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

   You can change the captured area by pressing the zoom button (p.82).
   - Right (➡) Enlarges the subject.
   - Left (⬅) Widens the area that is captured by the camera.
3 Press the shutter release button halfway.
The focus frame (or face recognition frame) on the display turns green when the camera focuses on the subject at the correct distance.

4 Press the shutter release button fully.
The picture is taken.
The flash discharges automatically depending on the light conditions. The image appears on the display (Instant Review: p.73) and is saved to the SD Memory Card or the built-in memory.

Press the Green button to switch to the (Green) mode and let the camera set all the shooting functions automatically (p.80).
Using the Shutter Release Button

The shutter release button works in a two-step action as follows.

Press halfway
This refers to pressing the shutter release button gently to the first position. This locks the focus setting and the exposure. The green focus frame lights on the display when the shutter release button is pressed halfway and the subject is in focus. If the subject is out of focus, the frame turns white.

Press fully
This refers to pressing the shutter release button all the way down to the fully depressed position. This takes a picture.

Poor focusing conditions
The camera may not be able to focus under the following conditions. In these cases, lock the focus on an object the same distance away as the subject (by pressing and holding the shutter release button halfway), then aim the camera at your subject and press the shutter release button fully.

- Objects that lack contrast such as a blue sky or white wall
- Dark places or objects, or conditions that prevent light being reflected back
- Horizontal lines or intricate patterns
- Fast moving objects
- When there is an object in the foreground and an object in the background in the captured area
- Strongly reflected light or strong backlighting (bright background)
Taking Pictures

The Optio WS80 has a variety of shooting modes that let you take pictures or record movies in different situations simply by choosing the appropriate mode for the particular situation from the Capture Mode Palette.

1. Press the four-way controller (▼) in ◆ mode.
   The Capture Mode Palette appears.

2. Use the four-way controller (▲▼◄►) to choose a shooting mode.
   When an icon is selected in the Capture Mode Palette, the selected shooting mode guide appears.
Press the OK button.
The shooting mode is selected and the camera returns to capture status.

There are 24 shooting modes which can be selected from the Capture Mode Palette.

</table>

* In shooting modes other than [P], [A], [C], [V], [X], [c], [F] and [N], saturation, contrast, sharpness, white balance, etc. are automatically set to the optimal settings for the selected mode.

* Some functions may not be available or may not work fully depending on the selected shooting mode. For details, refer to “Functions Available for Each Shooting Mode” (p.234).
Using the Face Recognition Function

With the Optio WS80, the Face Recognition function is available with all shooting modes. When the camera detects a person’s face in the image, the Face Recognition function displays a yellow face recognition frame around the face on the display screen, sets the focus (Face Recognition AF) and compensates the exposure (Face Recognition AE).

If the subject in the face recognition frame moves, the frame also moves and changes its own size as it tracks the face.

The Face Recognition function can recognize up to 32 people’s faces. If it recognizes multiple faces, the camera displays a yellow frame over the main face and white frames over the other face(s). It can display up to a total of 31 frames (up to 30 frames in Half-length Portrait mode), including a main frame and white frame(s).

Memo

- Face Recognition AF and AE may not work if the subject is wearing sunglasses, has part of their face covered or is not looking toward the camera.
- If the camera cannot recognize the subject’s face, the camera focuses using the setting currently selected in [Focusing Area].
- When the Smile Capture function is activated, the shutter may not be released automatically because the Smile Capture function may not work in some situations, such as when the recognized face is too small.

To Switch the Face Recognition Function

By default, the Face Recognition function is set to Face Priority On. You can switch to the Smile Capture function, which automatically releases the shutter when your subject smiles. The Face Recognition function is switched as follows each time the 📸 button is pressed:

Smile Capture → Face Priority Off → Face Priority On
Taking Pictures

An icon indicating either Face Priority On or Smile Capture appears on the display. (The icon does not appear when the Face Recognition function is not activated.)

![Face Priority On, Smile Capture, Face Priority Off icons](image)

- The Face Recognition function cannot be set to off in AUTO (Auto Picture), PORTRAIT (Portrait), KIDS (Kids), HALF-LIFE (Half-length Portrait), NIGHTSCENEPORTRAIT (Night Scene Portrait) or NATSKTONE (Natural Skin Tone) mode. You can select either Face Priority On or Smile Capture in these modes.

- Even if the Face Recognition function is set to off, it is automatically turned on when GREEN (Green), AUTO (Auto Picture), MOVIE (Movie), UNDERWATER (Underwater Movie), PORTRAIT (Portrait), KIDS (Kids), HALF-LIFE (Half-length Portrait), NIGHTSCENEPORTRAIT (Night Scene Portrait) or NATSKTONE (Natural Skin Tone) mode is selected. When switching to another mode from one of these modes, the Face Recognition setting returns to the previous setting.

- If you use the Face Recognition function when the flash mode is set to AUTO (Auto), the flash mode automatically changes to FLASHON+RED-EYE (Flash On + Red-eye) when shooting.
Taking Pictures Automatically (Auto Picture Mode)

In AUTO (Auto Picture) mode, the camera automatically selects the most appropriate mode depending on the situations and subjects.

1. Press the four-way controller (▼) in 📷 mode. The Capture Mode Palette appears.

2. Use the four-way controller (▲▼◄►) to select AUTO. The AUTO mode is selected and the camera returns to capture status.

3. When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

4. Press the shutter release button halfway. The selected shooting mode is displayed on the top left of the screen.

5. Press the shutter release button fully. The picture is taken.
Taking Pictures

In (Program) mode, the camera automatically sets the shutter speed and aperture for taking still pictures. However, you can change other settings such as the flash mode and the number of recorded pixels.

1. Press the four-way controller (▼) in mode. The Capture Mode Palette appears.
2. Use the four-way controller (▲▼◄►) to select ．

The following restrictions apply in mode:
- You cannot turn the Face Recognition function off.
- The focusing area setting is fixed at (Multiple).
- The (Flower) mode cannot be selected when using Digital Zoom or Intelligent Zoom.
- If the (Night Scene) mode is selected when the flash mode is (Auto) or (Auto + Red-eye), the flash mode automatically changes to (Flash Off).
- If the (Night Scene Portrait) mode is selected when the flash mode is (Auto), the flash mode automatically changes to (Flash On + Red-eye) when the camera recognizes a face and determines that the flash is needed.
- The camera automatically focuses on the subject when the focus mode is set to AF (Standard) or (Macro).
3 Press the OK button.
The P mode is selected and the camera returns to capture status.
When the camera recognizes a person's face, the Face Recognition function is activated and the face recognition frame appears (p.76).

4 Set the functions you want to change.
Refer to “Setting the Shooting Functions” (p.105 - p.125) for details on how to set the functions.

5 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

6 Press the shutter release button fully.
The picture is taken.

Taking Pictures in the Basic Mode (Green Mode)

In (Green) mode, you can enjoy easy picture-taking using standard settings, regardless of the settings in the [Rec. Mode] menu. The (Green) mode settings are as shown below.

Press the Green button in 📸 mode.
The camera switches to 📸 mode. **Press the Green button again to return to the status before 📸 mode was selected.** When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

Press the shutter release button fully.
The picture is taken.

---

- **memo**
- Assign 📸 mode to the [Green Button] on the [📸 Rec. Mode] for using 📸 mode (p.124). The default setting is 📸 mode.
- In 📸 mode, you cannot change the information on the display by pressing the OK/DISPLAY button.
- If you press the MENU button in 📸 mode, the [📸 Setting] menu appears. The [📸 Rec. Mode] menu cannot be displayed.
- When the camera is turned off in 📸 mode, it turns on in 📸 mode next time the power switch is pressed.
Using the Zoom

You can use the zoom to change the captured area.

Press the zoom button in 拍照 mode.

Right (↑) Elongs the subject.
Left (↓↓↓) Widens the area that is captured by the camera.

When you continue to press the button towards the right (↑), the camera automatically switches from optical zoom to Intelligent Zoom.
Once the button is released and pressed again, the camera switches to Digital Zoom.

The zoom bar is displayed as follows.

*1 You can zoom in to a maximum of 5× optically.
*2 The Intelligent Zoom range differs depending on the number of recorded pixels. See the following table.

Using the Zoom

</table>

- It is recommended to use a tripod to prevent camera shake when taking pictures at high zoom.
- Pictures taken in the Digital Zoom range appear grainier than pictures taken in the optical zoom range.
- Intelligent Zoom is not available under the following conditions:
  - When the number of recorded pixels is set to 10M/10M (5x optical zoom available)
  - In (Digital SR) mode
  - When the sensitivity is set to 3200 or 6400
- The image enlarged using Intelligent Zoom may appear rough on the display. This does not affect the quality of the recorded image.
- In (Movie) and (Underwater Movie) modes, only Digital Zoom is available while recording.

To Set the Digital Zoom

The Digital Zoom is set to (On) in the default settings. To take pictures using only the optical zoom and Intelligent Zoom, set the Digital Zoom to (Off).

2. Use the four-way controller (▲▼) to select [Digital Zoom].
3 **Use the four-way controller (◀ ▶) to select ✓ or □.**

- ✓ Uses Digital Zoom
- □ Uses only optical zoom and Intelligent Zoom

The setting is saved.

4 **Press the MENU button.**
The camera returns to capture status.

**Saving the Digital Zoom Function setting** p.133

---

**Taking Underwater Pictures (Underwater Mode/Underwater Movie Mode)**

This camera has been proven to comply with JIS waterproof grade 8 and can be used to take pictures at a depth of 1.5 m continuously for 2 hours. In addition, this camera complies with JIS dustproof grade 6 (IP68).

<table>

1 **Press the four-way controller (▼) in ída mode.**
The Capture Mode Palette appears.
2 Use the four-way controller (▲▼◄►) to select 📸 or 📽.

3 **Press the OK button.**

   The camera enters 📸 or 📽 mode and returns to capture status. When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

4 **Press the shutter release button halfway.**

   The focus frame (or face recognition frame) on the display turns green when the camera focuses on the subject at the correct distance.

5 **Press the shutter release button fully.**

   If you selected 📸, a picture is taken.
   If you selected 📽, movie recording starts. To stop recording, press the shutter release button fully again. Perform the same steps as 📽 (Movie) to record movies.

   **Recording Movies ➤ p.126**

   **Caution**

   - Before taking pictures underwater, make sure that there is no dirt or sand on the waterproof packing of the battery/card/terminal cover and check that the cover is securely locked.
   - Before opening the battery/card/terminal cover after using the camera underwater, make sure that there is no water, dirt or sand on the camera. Wipe the camera before opening the cover.
   - In 📸 mode, AE metering is fixed at 📸 (Multi-segment metering).

   **Waterproof and Dustproof Function ➤ p.6**
Taking Pictures

You can choose settings appropriate for taking pictures of dark scenes, such as nightscapes.

### Taking Pictures of Dark Scenes (Night Scene/Night Scene Portrait/Digital SR/Fireworks/Candlelight Mode)

You can choose settings appropriate for taking pictures of dark scenes, such as nightscapes.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Night Scene</td>
<td>For night time images. Use of a tripod or other support is suggested.</td>
</tr>
<tr>
<td>Digital SR</td>
<td>Higher sensitivity reduces blur. The sensitivity is automatically set to Auto and the number of recorded pixels is fixed at [5M] (2592×1944).</td>
</tr>
<tr>

<tr>
<td>Night Scene Portrait</td>
<td>For images of people at night. Use of a tripod or other support is advised. If you use the Face Recognition function when the flash mode is set to [Auto], the flash mode automatically changes to [Flash On + Red-eye] when shooting.</td>
</tr>
</tbody>
</table>

**Memo**

- The flash will not discharge in [Rec] mode.
- When the focus mode is set to [AF] or [MF] in [Rec] mode, press the shutter release button halfway to lock the focus before recording a movie. When the focus mode is set to [MF], you can only adjust the focus before recording starts.
- Optical and digital zoom in [Rec] mode are only available before recording starts. Only digital zoom is available during recording.

Although the camera is provided with waterproof and dustproof functions, avoid using the camera under the following conditions. It may momentarily be subjected to water pressure beyond that covered in the guarantee and water may enter the interior of the camera.
- Jumping into the water while holding the camera
- Swimming while holding the camera in your hand
- Using the camera in environments where water is applied forcefully, such as strong river currents and waterfalls
1 **Press the four-way controller (▼) in 📷 mode.**
The Capture Mode Palette appears.

2 **Use the four-way controller (▲ ▼ ◀▶) to select 📷, 🧑, 🌷, 🌼 or 🌟.**

3 **Press the OK button.**
The 📷, 🧑, 🌷, 🌼 or 🌟 mode is selected and the camera returns to capture status.
When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

4 **Press the shutter release button halfway.**
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5 **Press the shutter release button fully.**
The picture is taken.

- The shutter speed tends to be slower when taking pictures of dark scenes.
- To prevent camera shake, set the Pixel Track SR function (p.119) or use a tripod and/or the self-timer function (p.95).
Taking Pictures of People (Portrait/Half-length Portrait/Natural Skin Tone Mode)

The 📸 (Portrait), 🏷️ (Half-length Portrait) and 🌟 (Natural Skin Tone) modes are suitable for taking pictures of people. The Face Recognition function (p.76) operates for each shooting mode, making it easier to emphasize the subject’s face when taking pictures.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

1. **Press the four-way controller (▼) in 📸 mode.**
   The Capture Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◀▶) to select 📸, 👤 or 🌟.**

3. **Press the OK button.**
   The 📸, 👤 or 🌟 mode is selected and the camera returns to capture status.
   When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).
   If the camera recognizes a person’s face in 👤 mode, an orange frame appears showing the area to be zoomed in.
4 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.
If the camera recognizes a person’s face in mode, the camera automatically zooms in to enlarge the area in the orange frame shown in Step 3.

5 Press the shutter release button fully.
The picture is taken.

**Taking Pictures of Children (Kids Mode)**
The (Kids) mode is suitable for taking pictures of moving children. It also reproduces healthy and bright skin tone. The Face Recognition function (p.76) operates automatically for this mode, making it easier to emphasize the subject’s face when taking pictures.

1 Press the four-way controller (▼) in mode.
The Capture Mode Palette appears.

2 Use the four-way controller (▲▼◄►) to select .

3 Press the OK button.
The mode is selected and the camera returns to capture status.
When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).
4 **Press the shutter release button halfway.**
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5 **Press the shutter release button fully.**
The picture is taken.

**Taking Pictures of Your Pet (Pet Mode)**

Use 🐱 (Pet) mode to keep your moving pet in focus and capture the color of your pet’s coat when you take a picture. Choose the appropriate icon depending on what color your pet is (closer to black or white or in between).

1 **Press the four-way controller (▼) in 📸 mode.**
The Capture Mode Palette appears.

2 **Use the four-way controller (▲▼◄►) to select 🐱.**

3 **Press the OK button.**
The 🐱 mode selection screen appears.

4 **Use the four-way controller (▲▼) to select 🐱, 🐱, 🐱, 🐱, 🐱 or 🐱.**

There are two types of icons: a cat and dog icon. Choosing either the cat or dog icon does not affect the resulting picture. Choose whichever you prefer.
Choose an icon (white, gray, or black) whose tone best matches your pet’s coat or fur.
5 Press the OK button.
The selected icon appears and the camera returns to capture status. When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

6 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance. The focus frame follows the subject while the shutter release button is pressed halfway.

7 Press the shutter release button fully.
The picture is taken.

Taking Pictures of Sports and Leisure Activities (Surf & Snow/Sport Mode)

<table>

</table>

1 Press the four-way controller (▼) in ◯ mode. The Capture Mode Palette appears.

2 Use the four-way controller (▲ ▼ ◄►) to select Ø or ◯.
Press the **OK** button.
The **Q** or **W** mode is selected and the camera returns to capture status. When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance. When the **S** (Sport) mode is selected, the focus frame follows the subject while the shutter release button is pressed halfway.

Press the shutter release button fully.
The picture is taken.

**Taking Pictures Indoors (Party Mode)**
The **Y** (Party) mode is perfect for taking pictures indoors, such as snapshots at parties.

Press the **OK** button.
The **Y** mode is selected and the camera returns to capture status. When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).
4 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses
on the subject at the correct distance.

5 Press the shutter release button fully.
The picture is taken.

Framing Your Pictures (Frame Composite Mode)

In (Frame Composite) mode, you can take pictures using the frames
stored in the camera.

1 Press the four-way controller (▼) in ◊ mode.
The Capture Mode Palette appears.

2 Use the four-way controller (▲ ▼ ◄ ►) to select ◊.

3 Press the OK button.
The 9-frame display of the frame selection screen appears.

4 Use the four-way controller (▲ ▼ ◄ ►) to choose the frame you
want to use.
Taking Pictures

5 Press the zoom button towards the right (🔍).
The selected frame appears in single-image display.
You can choose another frame using either of the following operations.

<table>
<thead>
<tr>
<th>Four-way controller (◄►)</th>
<th>Press to choose a different frame.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom button towards the left (☒)</td>
<td>Press to return to the 9-frame display of the frame selection screen, and then perform Step 4 to choose a different frame.</td>
</tr>
</tbody>
</table>

6 Press the OK button.
The framed image appears on the display. When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

7 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

8 Press the shutter release button fully.
The picture is taken.

- The number of recorded pixels is fixed at 3M (2048×1536).
- At shipment, the camera includes 3 default frames and 87 optional frames built-in. (The CD-ROM supplied with the camera contains a total of 90 frames, including the default frames.)

Optional Frames
The optional frames are stored in the built-in memory in the Optio WS80. These optional frames are deleted if the files on the built-in memory are deleted with a computer or the built-in memory is formatted. To reload the optional frames into the built-in memory, copy the files from the CD-ROM (S-SW87) supplied with the camera (p.173).

Adding a Frame to a captured image ☞ p.171
Taking Pictures

In Self-timer mode, the picture is taken ten seconds or two seconds after the shutter release button is pressed. Stabilize the camera with a tripod or other support when taking a picture using the self-timer.

<table>
<thead>
<tr>
<th>Self-timer</th>
<th>Use this mode when you want to be included in a group picture. The picture is taken approximately ten seconds after the shutter release button is pressed.</th>
</tr>

</tbody>
</table>

1. Press the four-way controller (▲) in  mode. The [Drive Mode] screen appears.

2. Use the four-way controller (◄►) to select ◼️ and press the four-way controller (▼).

3. Use the four-way controller (◄►) to select ◼️ or ◽️ and press the OK button. The camera is ready to take the picture using the self-timer.
   When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

4. Press the shutter release button halfway. The focus frame on the display turns green when the camera focuses on the subject at the correct distance.
Press the shutter release button fully.
The picture is taken ten seconds or two seconds later.

Caution
Focusing may be compromised if you move the camera while the self-timer lamp is blinking when taking still pictures.

- In (Movie) and (Underwater Movie) modes, recording will start after ten seconds (or two seconds).
- Press the shutter release button halfway while the self-timer is engaged to stop the countdown and press fully to restart the countdown.
- cannot be selected while (Green) mode setting remains the default. Select in another shooting mode and then switch the shooting mode to .

Taking a Series of Pictures (Continuous Shooting/Burst Shooting Mode)

In these modes, pictures are taken continuously as long as the shutter release button is pressed.

<table>
<thead>
<tr>
<th>Continuous Shooting</th>
<th>Each time a picture is taken, the image is saved in the memory before the next image is taken. The higher the image quality, the longer the interval between shots. You can continue shooting until the memory of the SD Memory Card or the built-in memory is full.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Burst Shooting</td>
<td>The number of recorded pixels is fixed at 5M (2592×1944) and up to 7 pictures are taken consecutively at 3.3 frames per second (5.6 frames per second when the sensitivity is 3200 or 6400).</td>
</tr>
</tbody>
</table>

1 Press the four-way controller (▲) in Photo mode.
The [Drive Mode] screen appears.
2 Use the four-way controller ( ◄ ► ) to select  and press the four-way controller ( ◄ ).

3 Use the four-way controller ( ◄ ► ) to select  or  and press the OK button.
The camera is ready to take a series of pictures.

4 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

5 Press the shutter release button fully.
Pictures are taken continuously as long as you keep the shutter release button pressed.

Caution
• The flash does not discharge in  and  modes.
•  and  cannot be selected in  (Green), AUTO (Auto Picture),  (Night Scene),  (Movie),  (Underwater Movie), WIDE (Digital Wide),  (Fireworks),  (Digital Panorama) or  (Frame Composite) mode.

Memo
• The interval of  (Continuous Shooting) varies according to the Recorded Pixels and Quality Level settings.
• The focus, exposure and white balance are locked with the first shot.
• When the Face Recognition function is activated (p.76), it works only when taking the first shot.
• The Blink Detection function works only for the last shot.
Taking Pictures

In (Interval Shoot) mode, pictures can be taken automatically at a certain interval from a set time. Specify the following settings.

| Interval | Set the camera to take pictures in intervals from 10 seconds to 99 minutes. You can set the camera to take pictures in one second increments from ten seconds to four minutes intervals or in one minute increments from four minutes to 99 minutes intervals.
| Number of Shots | Set the number of shots to be taken. You can take pictures from 2 to the number of recordable images. However, 1000 shots is the maximum.
| Start Delay | Set the start delay from 0 minutes to 24 hours. The start delay can be set in increments of 1 minute for a delay time up to 59 minutes, and increments of 1 hour for a delay time longer than one hour. When set to 0 min., the first picture is taken as soon as the shutter release button is pressed.

1. Press the four-way controller (▲) in 📷 mode. The [Drive Mode] screen appears.

2. Use the four-way controller (◀ ▶) to select 🕒 and press the OK button. The current settings for interval shooting appear for approximately 1 minute. To take pictures with the current settings, proceed to Step 7.

3. Press the OK button. The [Interval Shoot] screen appears.
4 Use the four-way controller (▲▼) to select [Interval], [Number of Shots] or [Start Delay].

5 Press the four-way controller (►), then use the four-way controller (▲▼) to change the settings. To change another setting, press the four-way controller (►).

6 When finished, press the MENU button.
The screen shown in Step 3 reappears.
The camera returns to capture status after approximately one minute.

7 Press the shutter release button halfway.
The focus frame (or face recognition frame) on the display turns green when the camera focuses on the subject at the correct distance.

8 Press the shutter release button fully.
After the message [Start interval shooting] appears, the display turns off. When [Start Delay] is set to [0 min.], the display turns off after the first image taken appears in Instant Review.
When the number of images set in [Number of Shots] is taken, the message [Interval shooting complete] appears and the camera turns off.

- Interval shooting is not available in AUTO (Auto Picture), WIDE (Digital Wide), ◦ (Fireworks) or □ (Digital Panorama) mode.
- The alarm will not ring during interval shooting.

- Refer to p.130 for instructions on interval shooting in ◇ (Movie) and ◇ (Underwater Movie) modes.
- The display turns off between shots (during standby). Press the power switch during standby to display the remaining number of shots and interval on the display.
- The message [Stop interval shooting?] appears when the power switch and then the MENU button are pressed during standby. To cancel interval shooting, press the OK button.
- Settings for interval shooting can also be made in [Interval Shoot] in the [Rec. Mode] menu. Perform Steps 4 to 6 to make the settings.
Taking Pictures

In **WIDE** (Digital Wide) mode, you can stitch two vertical images captured with this camera into a single frame up to approx. 25.4 mm coverage (35 mm film equivalent).

1. Press the four-way controller (▼) in 📷 mode. The Capture Mode Palette appears.
2. Use the four-way controller (▲▼◄►) to select **WIDE**.
Press the OK button.
The camera enters the **WIDE** mode. Turn the camera 90° counterclockwise and align your first picture. When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

Press the shutter release button fully.
The first captured image is temporarily saved, and the shooting screen for the second image is displayed.

Take the second image.
Overlap the image on the preview guide on the left of the screen to compose the second image. Repeat Steps 4 and 5 to take the second image. The stitched first and second image appears on the display (Instant Review), and then is saved.

**memo**
- To minimize distortion when taking the second image, turn the camera so that it pivots around the right edge of the preview guide on the screen.
- Some distortion may result from moving objects, repeating patterns, or if nothing exists when overlapping the first and second image on the preview guide.
- When the Face Recognition function is activated (p.76), it works only when taking the first image.
- The stitched together images are saved with the pixel size of **5M** (2592×1944).
To Cancel after Taking the First Shot

1 When the shooting screen for the second image is displayed in Step 5 on p.101, press the OK button. A confirmation dialog appears.

2 Use the four-way controller (▲▼) to select an option and press the OK button.

<table>
<thead>
<tr>
<th>Option</th>

</tbody>
</table>

Taking Panoramic Pictures (Digital Panorama Mode)

In [ ] (Digital Panorama) mode, you can stitch together two or three captured frames to create a panoramic photograph with the camera.

1 Press the four-way controller (▼) in [ ] mode. The Capture Mode Palette appears.

2 Use the four-way controller (▲▼◄►) to select [ ].
3 Press the OK button.
The camera enters the [ ] mode and the message [Set shift direction] is displayed.

4 Use the four-way controller ( ◄ ► ) to choose the direction in which the images will be joined.
The screen for taking the first frame is displayed.

When the camera recognizes a person’s face, the Face Recognition function is activated and the face recognition frame appears (p.76).

5 Press the shutter release button halfway.
The focus frame on the display turns green when the camera focuses on the subject at the correct distance.

6 Press the shutter release button fully.
The screen for taking the second frame is displayed after you take the first frame.

If you select right ( ► ) in Step 4:
The right edge of the first frame appears in semi-transparent form on the left edge of the display.

If you select left ( ◄ ) in Step 4:
The left edge of the first frame appears in semi-transparent form on the right edge of the display.

7 Take the second frame.
Move the camera so that the semi-transparent image and the actual view overlap and press the shutter release button.
8 Take the third frame.
Repeat Steps 5 to 7 to take the third frame.
The panorama images are joined and a stitched together image appears.
The stitched together image does not appear when [Instant Review] (p.73, p.120) is □ (Off).

- Some distortion may result from moving objects, repeating patterns, or if nothing exists when overlapping the first and second frames or the second and third frames on the preview guide.
- When the Face Recognition function is activated (p.76), it works only when taking the first frame.

To Cancel after Taking the First or Second Frame

1 After shooting the first frame in Step 6 on p.103 or the second frame in Step 7, press the OK button.
A confirmation dialog appears.

2 Use the four-way controller (▲▼) to select an option and press the OK button.

<table>
<thead>
<tr>
<th></th>

Selecting the Flash Mode

<table>
<thead>
<tr>
<th>Flash Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto (A)</td>
<td>The flash discharges automatically depending on the light conditions. If you use the Face Recognition function, the mode is automatically set to Flash Off when shooting.</td>
</tr>
<tr>
<td>Flash Off (O)</td>
<td>The flash does not discharge, regardless of the brightness. Use this mode to take pictures where flash photography is prohibited.</td>
</tr>
<tr>
<td>Flash On ($)</td>
<td>The flash discharges regardless of the brightness.</td>
</tr>
<tr>
<td>Auto + Red-eye (A)</td>
<td>This mode reduces the phenomenon of red eyes caused by the light from the flash being reflected in the subject’s eyes. The flash discharges automatically (A pre-flash discharges before the main flash).</td>
</tr>
<tr>
<td>Flash On + Red-eye ($)</td>
<td>This mode reduces the phenomenon of red eyes caused by the light from the flash being reflected in the subject’s eyes. The flash discharges regardless of the light conditions (A pre-flash discharges before the main flash).</td>
</tr>
<tr>
<td>Soft Flash (S)</td>
<td>This mode reduces the intensity of the flash so that the flash is not too bright even when fired at close range. The flash discharges regardless of the light conditions.</td>
</tr>
</tbody>
</table>

**Memo**

- The flash mode is fixed at Flash Off in the following situations:
  - When (Movie), (Underwater Movie) or (Fireworks) is selected as the capture mode
  - When (Continuous Shooting) or (Burst Shooting) is selected as the drive mode
  - When (Infinity) is selected as the focus mode
- In (Green) mode, you can only select Auto or Flash Off.
- In (Night Scene) mode, you cannot select Auto and Flash Off.

**Caution**

Using the flash when capturing images at a close distance may cause irregularities in the image due to the light distribution.
Press the four-way controller (▼) in (Flash Mode) mode.
The [Flash Mode] screen appears. The flash mode changes each time the button is pressed. You can also change the setting using the four-way controller (▲ ▼).

Press the OK button.
The setting is saved and the camera returns to capture status.

About the red-eye phenomenon
Taking pictures using the flash may cause the subject's eyes to appear red in the resulting picture. This phenomenon occurs when the light from the flash is reflected in the subject's eyes. It can be reduced by illuminating the area around the subject or moving closer to the subject and zooming out to a wider angle. Setting the flash mode to [Flash Off] or [Flash Off] is also an effective way of reducing red eyes. If the subject’s eyes appear red despite such precautions, they can be corrected by the red-eye compensation function (p.170).

Saving the Flash Mode setting — p.133
Selecting the Focus Mode

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AF</td>
<td>Standard Use this mode when the distance to the subject is 40 cm (16 in.) or more. The camera is focused on the subject in the autofocus area when the shutter release button is pressed halfway.</td>

</table>

1. **Press the four-way controller (▶) in 📷 mode.**
   The [Focus Mode] screen appears.
   The focus mode changes each time the button is pressed. You can also change the setting using the four-way controller (▲ ▼).

2. **Press the OK button.**
   The setting is saved and the camera returns to capture status.
Taking Pictures

1. Press the four-way controller (▶) in 📷 mode.
   The [Focus Mode] screen appears.

2. Press the four-way controller (▶) to select MF.

3. Press the OK button.
   The central portion of the image is magnified to full screen on the display.

4. Use the four-way controller (▲ ▼) to adjust the focus.
   The MF indicator appears on the display to indicate the approximate distance to the
   subject. Adjust the focus using the indicator as a guide.
   ▲  for distant focus
   ▼  for closer focus

Saving the Focus Mode setting p.133

To Set the Focus Manually (Manual Focus)

- In 🎨 (Green) mode, you can only select AF, 📷 or PF.
- The focus mode is fixed at ▲ in 🎵 (Fireworks) mode.
- The noise from focusing is recorded when the focus mode is set to AF, 📷 or MF in 🎥 (Movie) and 🌊 (Underwater Movie) modes.
- When AF is selected and the subject is closer than 40 cm, the camera automatically focuses from 10 cm (Auto-Macro function). In this case, 📷 appears on the display.
- When shooting with 📷 selected, if the subject is further than 50 cm away, the camera automatically focuses to ∞ (Infinity). By pressing the shutter release button fully, you can also take a picture even when the focus is not set.

• In 🎨 (Green) mode, you can only select AF, 📷 or PF.
• The focus mode is fixed at ▲ in 🎵 (Fireworks) mode.
• The noise from focusing is recorded when the focus mode is set to AF, 📷 or MF in 🎥 (Movie) and 🌊 (Underwater Movie) modes.
• When AF is selected and the subject is closer than 40 cm, the camera automatically focuses from 10 cm (Auto-Macro function). In this case, 📷 appears on the display.
• When shooting with 📷 selected, if the subject is further than 50 cm away, the camera automatically focuses to ∞ (Infinity). By pressing the shutter release button fully, you can also take a picture even when the focus is not set.
5 Press the OK button.
The focus is fixed and the camera returns to capture status. After the focus is fixed, you can press the four-way controller (▶) again to display the MF indicator and readjust the focus.

Caution: The shooting mode and drive mode cannot be changed while the MF indicator is displayed.

Memo: To switch from MF to another focus mode, press the four-way controller (▶) while the MF indicator is displayed.

To Set the Focusing Area
You can change the autofocus area (Focusing Area).

<table>
<thead>
<tr>
<th></th>
<th>Multiple</th>
<th>Normal autofocus area</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Spot</td>
<td>The autofocus area becomes smaller.</td>
</tr>
<tr>
<td></td>
<td>Automatic Tracking AF</td>
<td>Keeps moving subjects in focus.</td>
</tr>
</tbody>
</table>

1 Press the MENU button in mode. The [Rec. Mode] menu appears.

2 Use the four-way controller (▲ ▼) to select [Focusing Area].

3 Press the four-way controller (▶). A pull-down menu appears.

4 Use the four-way controller (▲ ▼) to change the focusing area setting.

5 Press the OK button. The setting is saved.
6 Press the MENU button.
The camera returns to capture status.

memo
• In 🎥 (Movie), 🌊 (Underwater Movie), and 📷 (Frame Composite) modes, the focusing area cannot be set to 🌊.
• In 📷 (Green) and 📷 (Auto Picture) modes, the focusing area is fixed at 📷.
• If you change the focusing area setting frequently, you can save time by assigning it to the Green button (p.124).

Selecting the Number of Recorded Pixels

You can choose from eight recorded pixels settings for still pictures. The larger the number of recorded pixels, the clearer the details will appear when you print your picture. As the quality of the printed picture also depends on the image quality, exposure control, resolution of the printer, and other factors, you do not need to select more than the required number of recorded pixels. 📷 is adequate for making postcard-size prints. The more pixels there are, the larger the picture and the bigger the file size.

Refer to the following table for the appropriate settings according to expected usage.

<table>
<thead>
<tr>
<th>Recorded Pixels</th>
<th>Expected Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>📷 10M</td>
<td>3648×2736</td>
</tr>
<tr>
<td>📷 7M</td>
<td>3072×2304</td>
</tr>
<tr>
<td>📷 5M</td>
<td>2592×1944</td>
</tr>
<tr>
<td>📷 3M</td>
<td>2048×1536</td>
</tr>
<tr>
<td>📷 2.1M</td>
<td>1920×1080 (16:9)</td>
</tr>
<tr>
<td>📷 1024</td>
<td>1024×768</td>
</tr>
<tr>
<td>📷 640</td>
<td>640×480</td>
</tr>
</tbody>
</table>

The default setting is 📷 10M.
1 Press the **MENU** button in **Camera** mode. The [Camera Rec. Mode] menu appears.

2 Use the four-way controller (▲ ▼) to select [Recorded Pixels].

3 Press the four-way controller (►). A pull-down menu appears.

4 Use the four-way controller (▲ ▼) to change the number of recorded pixels.

5 Press the **OK** button. The setting is saved.

6 Press the **MENU** button. The camera returns to capture status.

- Selecting **10M** provides better image quality than the **10M** setting, but the file sizes will be larger.
- If you select **2.1M**, the aspect ratio of the image is 16:9 and the monitor display for recording and playback is as shown on the right.

- Selecting **G** provides better image quality than the **N** setting, but the file sizes will be larger.
- If you select **L**, the aspect ratio of the image is 16:9 and the monitor display for recording and playback is as shown on the right.
Taking Pictures

You can adjust the overall brightness of the picture. Use this function to take pictures that are intentionally overexposed or underexposed.

2. Use the four-way controller (▲▼) to select [EV Compensation].

3. Use the four-way controller (◄►) to select the EV value.
   To brighten, select a positive (+) value. To darken, select a negative (−) value.
   You can choose the EV setting in the range of −2.0 EV to +2.0 EV in 1/3 EV steps.

4. Press the MENU button.
   The camera returns to capture status.

   • When the histogram is displayed in still picture capture mode/playback mode, you can check the exposure (p.30).
   • The EV compensation function cannot be used in 3 (Green) or AUTO (Auto Picture) mode.
   • If you change the [EV Compensation] setting frequently, you can save time by assigning it to the Green button (p.124).
Correcting the Brightness (D-Range Setting)

Expands the dynamic range and prevents bright and dark areas from occurring. [Highlight Correction] adjusts the bright areas when the image is too bright and [Shadow Correction] adjusts the dark areas when the image is too dark.

1. **Press the MENU button in  mode.**
   The [Rec. Mode] menu appears.

2. **Use the four-way controller (▲ ▼) to select [D-Range Setting].**

3. **Press the four-way controller (►).**
   The [D-Range Setting] screen appears.

4. **Use the four-way controller (▲ ▼) to select [Highlight Correction] or [Shadow Correction].**

5. **Use the four-way controller (◄ ►) to select ✔ or □.**

6. **Press the MENU button twice.**
   The camera returns to capture status. The D-Range Setting icon appears on the display.

<table>
<thead>
<tr>

</tbody>
</table>
Taking Pictures

You can take pictures in natural colors by adjusting the white balance according to the light conditions at the time of shooting.

1. Press the button in mode.
The [Rec. Mode] menu appears.

2. Use the four-way controller (▲ ▼) to select [White Balance].

3. Press the four-way controller (►).

Adjusting the White Balance

You can take pictures in natural colors by adjusting the white balance according to the light conditions at the time of shooting.

<table>
<thead>
<tr>
<th>AWB</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>The camera adjusts the white balance automatically.</td>
</tr>
<tr>
<td>☀ Daylight</td>
<td>Use this mode when taking pictures outside in sunlight.</td>
</tr>
<tr>
<td>☁ Shade</td>
<td>Use this mode when taking pictures outside in the shade.</td>
</tr>
<tr>
<td>☀ Tungsten Light</td>
<td>Use this mode when taking pictures under electric or other tungsten light.</td>
</tr>
<tr>
<td>☀ Fluores. Light</td>
<td>Use this mode when taking pictures under fluorescent light.</td>
</tr>
<tr>
<td>☀ Manual</td>
<td>Use this mode when adjusting the white balance manually.</td>
</tr>
</tbody>
</table>

- Set another white balance if you are not satisfied with the color balance of pictures taken with the white balance set to AWB.
- Depending on the selected shooting mode, the white balance setting may not be changed. Refer to “Functions Available for Each Shooting Mode” (p.234) for details.

memo

- When [Highlight Correction] is set to ☐, the minimum sensitivity becomes 2× the minimum sensitivity available for this camera.
- If you change the [Highlight Correction] or [Shadow Correction] setting frequently, you can save time by assigning it to the Green button (p.124).
4 Use the four-way controller (▲▼) to change the setting.
You can check the results of selected white balance settings on the preview image each time you press the four-way controller (▲▼).

5 Press the OK button.
The setting is saved.

6 Press the MENU button.
The camera returns to capture status.

memo
If you change the [White Balance] setting frequently, you can save time by assigning it to the Green button (p.124).

Saving the White Balance setting p.133

To Set the White Balance Manually

Have a blank sheet of white paper or similar material ready.

1 In the [White Balance] screen, use the four-way controller (▲▼) to select (Manual).

2 Point the camera at the blank sheet of paper or other material so that it fills the frame displayed in the center of the screen.

3 Press the shutter release button fully.
The white balance is automatically adjusted.
Press the **OK** button.
The setting is saved and the [Rec. Mode] menu reappears.

Press the **MENU** button.
The camera returns to capture status.

**Setting the AE Metering**

You can set the area of the screen where the brightness is metered to determine the exposure.

<table>
<thead>
<tr>
<th>Multi-segment metering</th>
<th>The camera divides the image into 256 areas, meters the brightness and determines the exposure.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Center-weighted metering</td>
<td>The camera takes a reading of the overall brightness of the picture with the center of the image having more influence on the exposure.</td>
</tr>
<tr>
<td>Spot AE metering</td>
<td>The camera determines the exposure by metering the brightness only at the center of the image.</td>
</tr>
</tbody>
</table>

1. **Press the **MENU** button in **Rec. Mode** mode.**
The [Rec. Mode] menu appears.

2. **Use the four-way controller (◼ ▼) to select [AE Metering].**

3. **Press the four-way controller (▸).**
A pull-down menu appears.

4. **Use the four-way controller (◼ ▼) to select the AE Metering setting.**

5. **Press the **OK** button.**
The setting is saved.

6. **Press the **MENU** button.**
The camera returns to capture status.
• When the shutter release button is pressed halfway, the brightness is metered and the exposure is determined.
• When the subject is outside the focusing area and you want to use • (Spot AE metering), aim the camera at the subject and press the shutter release button halfway to lock the exposure, then compose your picture again and press the shutter release button fully.
• Depending on the selected shooting mode, the AE metering setting may not be changed. Refer to “Functions Available for Each Shooting Mode” (p.234) for details.
• If you change the [AE Metering] setting frequently, you can save time by assigning it to the Green button (p.124).

Saving the AE Metering setting ➔ p.133

Setting the Sensitivity

You can select the sensitivity to suit the brightness of the surroundings.

<table>
<thead>
<tr>
<th>Auto</th>
<th>The sensitivity is automatically adjusted by the camera. (Sensitivity 64 - 800)</th>
</tr>
</thead>
<tbody>
<tr>
<td>64</td>
<td>The lower the sensitivity, the less noise that affects the image. The shutter speed will be slower in low light conditions.</td>
</tr>
<tr>
<td>100</td>
<td>Higher sensitivity settings use faster shutter speeds in low light conditions to reduce camera shake, but the image may be affected by noise.</td>
</tr>
<tr>
<td>200</td>
<td></td>
</tr>
<tr>
<td>400</td>
<td></td>
</tr>
<tr>
<td>800</td>
<td></td>
</tr>
<tr>
<td>1600</td>
<td></td>
</tr>
<tr>
<td>3200</td>
<td></td>
</tr>
<tr>
<td>6400</td>
<td></td>
</tr>
</tbody>
</table>

1 Press the MENU button in  mode.
The [  Rec. Mode] menu appears.

2 Use the four-way controller ( ▲ ▼ ) to select [Sensitivity].

3 Press the four-way controller ( ► ).
A pull-down menu appears.
4 Use the four-way controller (▲▼) to change the sensitivity.

5 Press the OK button.
The setting is saved.

6 Press the MENU button.
The camera returns to capture status.

- When the sensitivity is set to 3200 or 6400, the number of recorded pixels is fixed at 5M (2592×1944).
- When set to Green, Movie or Underwater Movie mode, only Auto (sensitivity 64 - 800) is available.
- When set to Digital SR mode, only Auto (sensitivity 64 - 6400) is available.
- When set to Fireworks mode, the sensitivity is fixed at its minimum setting.
- If you change the [Sensitivity] setting frequently, you can save time by assigning it to the Green button (p.124).

Saving the Sensitivity setting  p.133

**Setting Blink Detection**

This specifies whether Blink Detection function works when you use the Face Recognition function. The default setting is (On).

1 Press the MENU button in mode.
The [Rec. Mode] menu appears.

2 Use the four-way controller (▲▼) to select [Blink Detection].
3 Use the four-way controller (◀▶) to select ✓ or □.
   ✓ Blink Detection function works.
   □ Blink Detection function does not work.

The setting is saved.

4 Press the MENU button.
The camera returns to capture status.

Blink Detection nar p.73

Setting Pixel Track SR

You can set this function to correct camera shake which occurs during shooting. If you set Pixel Track SR, the camera automatically corrects any camera shake in the images you shot. The default setting is □ (Off).

memo
Use the Movie SR function (p.129) to correct camera shake in  영화 (Movie) and  水下电影 (Underwater Movie) modes.

1 Press the MENU button in  拍照 mode.
The [  拍照 Rec. Mode] menu appears.

2 Use the four-way controller (▲ ▼) to select [Pixel Track SR].

3 Use the four-way controller (◀▶) to select ✓ or □.
   ✓ Corrects camera shake.
   □ Does not correct camera shake.
Press the **MENU** button.
The camera returns to capture status.
One of the following icons appears on the display.

| (AUTO) | When [Pixel Track SR] is set to ✓
| 🔄 | When the shutter release button is pressed halfway with [Pixel Track SR] set to □, and the shutter speed is slow or the flash mode is set to 🕳️ (Flash Off) (Camera shake warning).

When [Pixel Track SR] is set to ✓, camera shake is corrected after shooting, and then the corrected image is saved.

The **Pixel Track SR** function does not work in the following situations:
- When 🎥 (Movie), 🎥 (Underwater Movie), 🌈 (Digital Wide), 📸 (Half-length Portrait), 🎨 (Fireworks), 📸 (Digital Panorama) or 🖼️ (Frame Composite) mode is selected as the shooting mode
- When 🕳️ (Self-timer), 📸 (Continuous Shooting) or 📸 (Burst Shooting) is selected as the drive mode
- When the flash discharges
- When the sensitivity is set to 1600 or higher
- During Voice Recording

### Setting the Instant Review

Use this setting to specify whether or not an Instant Review is displayed immediately after images are shot. The default setting is ✓ (On).

1. Press the **MENU** button in 📸 mode.
The [📸 Rec. Mode] menu appears.

2. Use the four-way controller (▲▼) to select [Instant Review].

3. Use the four-way controller (◄►) to select ✓ or □.
   - ✓ Instant Review is displayed.
   - □ Instant Review is not displayed.
4 Press the MENU button.
The camera returns to capture status.

Instant Review  p.73

If the Blink Detection function worked when shooting, the message [Closed eyes have been detected] appears for 3 seconds during Instant Review.

Setting the Image Sharpness (Sharpness)
You can give the image sharp or soft outlines.

1 Press the MENU button in  mode.
The [Rec. Mode] menu appears.

2 Use the four-way controller ( ▲ ▼ ) to select [Sharpness].

3 Use the four-way controller ( ◀▶ ) to change the sharpness level.
   - Soft
   - Normal
   - Sharp

4 Press the MENU button.
The camera returns to capture status.

If you change the [Sharpness] setting frequently, you can save time by assigning it to the Green button (p.124).
Setting the Color Saturation (Saturation)

You can set the color saturation.

1 Press the MENU button in ☮ mode.
The [_BORDER Rec. Mode] menu appears.

2 Use the four-way controller ( ▲▼ ) to select [Saturation].

3 Use the four-way controller ( ◀▶ ) to change the saturation level.

- Low
- Normal
- High

4 Press the MENU button.
The camera returns to capture status.

Memo
If you change the [Saturation] setting frequently, you can save time by assigning it to the Green button (p.124).

Setting the Image Contrast (Contrast)

You can set the image contrast level.

1 Press the MENU button in ☮ mode.

2 Use the four-way controller ( ▲▼ ) to select [Contrast].

3 Use the four-way controller ( ◀▶ ) to change the contrast level.

- Low
- Normal
- High
4 Press the MENU button.
The camera returns to capture status.

If you change the [Contrast] setting frequently, you can save time by assigning it to the Green button (p.124).

Setting the Date Imprint Function
You can choose whether to imprint the date and/or time when taking still pictures.

1 Press the MENU button in  mode.
The [Rec. Mode] menu appears.

2 Use the four-way controller (▲ ▼) to select [Date Imprint].

3 Press the four-way controller (▶). A pull-down menu appears.

4 Use the four-way controller (▲ ▼) to select the Date Imprint details.
Choose from [Date], [Date & Time], [Time] or [Off].

5 Press the OK button.
The setting is saved.

6 Press the MENU button.
The camera returns to capture status.

• The date and/or time imprinted with the Date Imprint function cannot be deleted.
• Note that if the printer or the image editing software is set to print the date and the images to be printed already have the date and/or time imprinted, the imprinted dates and/or times may overlap.
Taking Pictures

You can assign a function to the Green button and recall it quickly by simply pressing the Green button. This is useful for going straight to the setting screens of frequently used functions.

The following functions can be assigned to the Green button:

- (Green) Mode
- Recorded Pixels
- White Balance
- Focusing Area
- AE Metering
- Sensitivity
- EV Compensation
- Highlight Correction
- Shadow Correction
- Sharpness
- Saturation
- Contrast
- Voice Recording

**Calling Up a Specific Function**

You can assign a function to the Green button and recall it quickly by simply pressing the Green button. This is useful for going straight to the setting screens of frequently used functions.

The following functions can be assigned to the Green button:

- (Green) Mode
- Recorded Pixels
- White Balance
- Focusing Area
- AE Metering
- Sensitivity
- EV Compensation
- Highlight Correction
- Shadow Correction
- Sharpness
- Saturation
- Contrast
- Voice Recording

**Memo**

- The Green button setting can be returned to its default setting by selecting [Reset] on the [Setting] menu.
- The functions other than (Green) mode and Voice Recording can be set in the usual manner on the [Rec. Mode] menu.
- You cannot save different settings for the same function on the Green button and on the [Rec. Mode] menu.

**To Assign a Function to the Green Button**

1. Press the MENU button in mode.
   The [Rec. Mode] menu appears.

2. Use the four-way controller (▲▼) to select [Green Button].
3 Press the four-way controller (▲).  
A pull-down menu appears.

4 Use the four-way controller (▲▼) to choose a function and press the OK button.

5 Press the MENU button.  
The selected function is assigned to the Green button.

To Use the Green Button

1 Press the Green button in  
mode.  
The function assigned to the Green button is called up.

2 Use the four-way controller (◄►) to change the settings and press the OK button.  
The camera returns to capture status.

Taking Pictures in the Basic Mode (Green Mode) p.80  
Recording Sound (Voice Recording) p.184

Memo

If a function other than the (Green) mode and Voice Recording has been assigned to the Green button, the camera returns to the original screen if no operation is performed for 1 minute after the Green button is pressed.
Recording Movies

Recording a Movie

This mode enables you to record movies. Sound is recorded at the same time.

1. **Press the four-way controller (▼) in ** mode.**
The Capture Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to select  (Movie) or  (Underwater Movie).**

3. **Press the OK button.**
The camera enters  or  mode and returns to capture status.

The following information appears on the display.
1. Movie mode icon
2. Recording indicator (blinks during recording)
3. Remaining recordable time
4. Focus frame (does not appear during recording)
5. Movie shake reduction icon
You can change the captured area by pressing the zoom button towards the left or right.

- Right ( 
  - Enlarges the subject.
- Left ( 
  - Widens the area that is captured by the camera.

<table>
<thead>
<tr>
<th>4</th>
<th>Press the shutter release button fully.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Recording starts. You can continue recording until the built-in memory or the SD Memory Card is full, or the size of the recorded movie reaches 2 GB.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>5</th>
<th>Press the shutter release button fully.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Recording stops.</td>

</tbody>
</table>

Playing Back a Movie ➝ p.137

- The flash does not discharge in 📷 mode.
- The focus mode can be changed before recording starts.
- When the focus mode is set to AF or 📷, press the shutter release button halfway to lock the focus before recording a movie. When the focus mode is set to MF, you can only adjust the focus before recording starts.
- You can use the optical zoom only before recording, while the digital zoom is available both before and during recording.
- Even if you change the display mode by pressing the OK/DISPLAY button while recording a movie, the histogram cannot be displayed on the monitor.
- When the shooting mode is set to 📷 or 📷, the Face Recognition function is automatically activated. You can switch to Smile Capture or Face Priority Off by pressing the 📷 button before starting recording a movie (p.76). When the Smile Capture function is selected, movie recording starts automatically when the camera recognizes the subject’s smile. However, depending on the condition of the recognized faces, movie recording may not start automatically because the Smile Capture function may not work. If this happens, press the shutter release button to start movie recording.

Keeping the Shutter Release Button Pressed

If you keep the shutter release button pressed for more than one second, recording will continue as long as you keep the button pressed. Shooting stops when you take your finger off the shutter release button.
Selecting the Recorded Pixels and Frame Rate for Movies

You can choose the number of recorded pixels and frame rate settings for movies. The more pixels there are, the clearer the details and the bigger the file size. The more frames per second, the better the quality of the movie, but the file size becomes larger.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Recorded Pixels</th>
<th>Frame Rate</th>
<th>Use</th>
</tr>
</thead>
<tbody>

<td>15 fps</td>
<td>Suitable for posting on a website or attaching to e-mail. Increases the total recording time by making the file size smaller.</td>
</tr>
</tbody>
</table>

* The frame rate (fps) indicates the number of frames per second.

1. **Press the MENU button in 📷 mode.**
   The [_rec. Mode] menu appears.

2. **Use the four-way controller (▲▼) to select [Movie].**

3. **Press the four-way controller (▶).**
   The [Movie] screen appears.

4. **Use the four-way controller (▲▼) to select [Recorded Pixels].**

5. **Press the four-way controller (▶).**
   A pull-down menu appears.
6 Use the four-way controller (▲▼) to change the number of recorded pixels and frame rate.

7 Press the OK button. The setting is saved.

8 Press the MENU button twice. The camera returns to capture status.

Setting the Movie SR (Movie Shake Reduction) Function

In 📹 or 🎥 mode, you can correct camera shake while you are recording a movie with the Movie SR (Movie Shake Reduction) function.

1 Press the MENU button in 📸 mode. The [📷 Rec. Mode] menu appears.

2 Use the four-way controller (▲▼) to select [Movie].

3 Press the four-way controller (▲). The [Movie] screen appears.

4 Use the four-way controller (▲▼) to select [Movie SR].

5 Use the four-way controller (◄►) to select ✔️ or ☐.
   ✔️ Corrects camera shake.
   ☐ Does not correct camera shake.

The setting is saved.

6 Press the MENU button twice. The camera returns to capture status.
Recording a Movie from Pictures Taken at a Set Interval (Interval Movie)

In 🎥 (Interval Movie) mode, you can record multiple still pictures taken at a certain interval from a set time, and save them as a movie file. Specify the following settings.

<table>
<thead>
<tr>
<th>Interval</th>
<th>You can set the interval to 1 minute, 5 minutes, 10 minutes, 30 minutes or 1 hour.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Time</td>
<td>Set the total recording time from 10 minutes to 359 hours. The total time and settable units (p.128) vary depending on the [Interval] setting and movie frame rate (p.132).</td>
</tr>
<tr>
<td>Start Delay</td>
<td>Set the start delay from 0 minutes to 24 hours. The start delay can be set in increments of 1 minute for a delay time up to 59 minutes, and increments of 1 hour for a delay time longer than one hour. When set to 0 min., the first picture is taken as soon as the shutter release button is pressed.</td>
</tr>
</tbody>
</table>

1 Press the four-way controller (▼) in 🎥 mode. The Capture Mode Palette appears.

2 Use the four-way controller (▲▼◄►) to select 🎥 (Movie) or 🎥 (Underwater Movie).

3 Press the four-way controller (▲). The [Drive Mode] screen appears.

4 Use the four-way controller (◄►) to select 📏 and press the OK button. The current settings for interval shooting appear for approximately 1 minute. To record movies with the current settings, proceed to Step 12.
5 Press the OK button.
The [Interval Shoot] screen appears.

6 Use the four-way controller (▲▼) to select [Interval].

7 Press the four-way controller (▶). A pull-down menu appears.

8 Use the four-way controller (▲▼) to select the interval and press the OK button.

9 Use the four-way controller (▲▼) to select [Total Time] or [Start Delay].

10 Press the four-way controller (▶), then use the four-way controller (▲▼) to change the settings. To change another setting, press the four way controller (▶).

11 When finished, press the MENU button. The screen shown in Step 5 reappears. The camera returns to capture status after approximately one minute.

12 Press the shutter release button halfway. The focus frame (or face recognition frame) on the display turns green when the camera focuses on the subject at the correct distance.
Press the shutter release button fully.

After the message [Start interval shooting] appears, the display turns off. When [Start Delay] is set to [0 min.], the display turns off after the image immediately taken appears in Instant Review.

When the time set in [Total Time] elapses, the message [Interval shooting complete] appears and the camera turns off.

- Confirm that the battery is sufficiently charged before starting recording. If the battery is not sufficiently charged, it may become depleted during recording and cause recording of the movie to stop.
- The alarm will not ring during interval shooting.

- The display turns off between shots (during standby). Press the power switch during standby to display the remaining recordable time and interval on the display.
- The message [Stop interval shooting?] appears when the power switch and then the MENU button are pressed during standby. To cancel interval shooting, press the OK button.
- In Interval Movie mode, the number of recorded pixels for still pictures is fixed at 3 (640×480) and the flash mode is fixed at 5 (Flash Off).
- MF cannot be selected for the focus mode.
- The time remaining until recording starts is displayed on the monitor up until recording begins.
- [Total Time] varies depending on the [Interval] setting and movie frame rate (p.128). The total time that can be set are as follows.

<table>
<thead>
<tr>
<th>Interval (Settable Units)</th>
<th>Frame Rate</th>
<th>30 fps</th>
<th>15 fps</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 min.</td>
<td>10 minutes to 5 hours and 59 minutes</td>
<td>10 minutes to 5 hours and 59 minutes</td>
<td></td>
</tr>
<tr>

</tr>
</tbody>
</table>

When the frame rate setting is 30 fps, 30 frames of still pictures are played back each second, as a movie. When the frame rate setting is 15 fps, 15 frames are played back each second.

- Settings for interval movie can also be made in [Movie] in the [Rec. Mode] menu. Perform Steps 6 to 11 to make the settings.
The Memory function is for saving the current camera settings when the camera is turned off.

For some camera settings, the Memory function is always set to ✓ (On) (the settings are saved when the camera is turned off), while for others you can choose on or off (to choose whether the settings are saved or not when the camera is turned off). The items which can be set to ✓ (On) or ☑ (Off) in the Memory function are shown in the table below. (Items not listed here are always saved in the selected settings when the camera is turned off.)

If you select ✓ (On), the settings will be saved in the status they were in immediately before the camera was turned off. If you select ☑ (Off), the settings will be reset to the defaults when the camera is turned off. The table below also shows whether the Memory default setting for each item is on or off.

</tbody>
</table>

3 Press the four-way controller (▼).
   Playback stops.
Multi-Image Display

Four-Image Display/Nine-Image Display

You can display four or nine thumbnails of captured images at a time.

1. In 
   mode, press the zoom button towards the left ( ).

   The four-image display appears showing a page consisting of four thumbnail images. Press the zoom button towards the left ( ) again to switch to nine-image display.

   A page consisting of four or nine thumbnail images appears. The displayed images change four or nine images at a time page by page.

   Use the four-way controller (▲ ▼ ◄ ►) to move the frame. If there are too many images to fit on one page, pressing the four-way controller (▲ ◄) while the image ① is selected will display the previous page. Similarly, if you choose image ② and press the four-way controller (▼ ►), the next page appears.
The icons that appear on the images indicate the following:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(No icon)</td>
<td>Still picture without sound</td>
</tr>
<tr>
<td>🎥</td>
<td>Movie (the first frame appears)</td>
</tr>
<tr>
<td>🎧 (With image)</td>
<td>Still picture with sound</td>
</tr>
<tr>
<td>🎧 (Without image)</td>
<td>Sound file only</td>
</tr>
</tbody>
</table>

Press the **OK** button to switch to single-image display of the selected image.
Press the **Left** button to switch to **A** mode.

### Folder Display/Calendar Display

In nine-image display, press the zoom button towards the left (➡️) to switch to folder display or calendar display. Press the Green button to switch between folder display and calendar display.

1. **In ➡️ mode, press the zoom button towards the left (➡️) three times.**
   The screen changes to folder display or calendar display.

### Folder display

The list of folders with recorded images and sound files appears.

<table>
<thead>
<tr>
<th>Control</th>
<th>Description</th>
</tr>

</table>
1. In **mode, use the four-way controller (◄ ►) to choose the image to start the slideshow with.

2. Press the four-way controller (▼). The Playback Mode Palette appears.

3. Use the four-way controller (▲ ▼ ◄ ►) to select ▶ (Slideshow).

4. Press the OK button. The slideshow setting screen appears.

5. Use the four-way controller (▲ ▼) to select [Start].

6. Press the OK button. The slideshow starts. Pressing the OK button during the slideshow pauses the slideshow. To resume the slideshow, press the OK button again.

7. Press any button other than the OK button. The slideshow stops.
To Set the Slideshow Conditions

You can set the playback interval and also a screen effect and sound effect for when one image changes to the next.

1. Use the four-way controller (▲ ▼) to select [Interval] in Step 5 on p.143.

2. Press the four-way controller (►). A pull-down menu appears.

3. Use the four-way controller (▲ ▼) to change the interval and press the OK button. Choose from [3sec.], [5sec.], [10sec.], [20sec.] or [30sec.].

4. Use the four-way controller (▲ ▼) to select [Screen Effect].

5. Press the four-way controller (►). A pull-down menu appears.

6. Use the four-way controller (▲ ▼) to choose the screen effect and press the OK button.

<table>
<thead>
<tr>
<th>Effect</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wipe</td>
<td>The next image slides over the previous one from left to right</td>
</tr>
<tr>
<td>Checker</td>
<td>The next image appears in small square mosaic blocks</td>
</tr>
<tr>
<td>Fade</td>
<td>The current image gradually fades out and the next image fades in</td>
</tr>
<tr>
<td>Off</td>
<td>No effect</td>
</tr>
</tbody>
</table>

7. Use the four-way controller (▲ ▼) to select [Sound Effect].

8. Use the four-way controller ( ◀ ►) to select ✓ or □. Except when the [Screen Effect] is set to [Off], you can choose ✓ (On) or □ (Off) for the sound that is played when one image changes to the next.
Use the four-way controller (▲▼) to select [Start] and press the OK button.
The slideshow starts using the selected interval and effect.

- The slideshow will continue until you press any button other than the OK button.
- Movies or pictures with sound will be played through to the end before the next picture is played back, regardless of the interval setting. However, pressing the four-way controller (►) while playing back a movie or a picture with sound skips to the next image.
- Sound files made in Voice Recording are not played back in the slideshow.
- Panorama images are displayed by scrolling from left to right in 4 seconds before the next picture is played back, regardless of the Interval or Screen Effect setting.

Connecting the Camera to AV Equipment  p.159

### Rotating the Image

![Diagram](image.png)

1. **Press the ▶ button after taking a picture.**
   The image appears on the display.

2. **Press the four-way controller (▼).**
   The Playback Mode Palette appears.
3 Use the four-way controller (↑↓←→) to select ◇ (Image Rotation).

4 Press the OK button.
The rotation selection screen (0°, Right 90°, Left 90°, or 180°) appears.

5 Use the four-way controller (↑↓←→) to choose the rotation direction and press the OK button.
The rotated image is saved.

 memo • Panoramic images and movies cannot be rotated.
• Protected images can be rotated, but they cannot be saved in a rotated state.

Zoom Playback
You can magnify an image up to ten times.
1. In ** mode, use the four-way controller (◀ ▶) to choose the image you want to magnify.

2. Press the zoom button towards the right (🔍). The image is magnified (×1.1 to ×10). Continuing to press the zoom button towards the right (🔍) changes the magnification continuously. You can use the + mark of the guide at the bottom left of the screen to check which portion of the image is magnified.

   **Available operations while an image is magnified**

<table>
<thead>
<tr>
<th>Four-way controller (🔼 ▼ ◀ ▶)</th>
<th>Moves the position to be magnified.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom button towards the right (🔍)</td>
<td>Makes the image bigger (max. ×10).</td>
</tr>
<tr>
<td>Zoom button towards the left (знак)</td>
<td>Makes the image smaller (min. ×1.1).</td>
</tr>
</tbody>
</table>

3. Press the **OK** button. The image returns to single-image display.

   **memo** Movies cannot be magnified.
Zoom In on the Subject’s Face Automatically (Face Close-up Playback)

You can enjoy playing back images with the subject’s faces zoomed up simply by pressing the \( \text{□} \) button (Face close-up playback) if the Face Recognition function operated when the images were taken.

1. In \( \text{□} \) mode, use the four-way controller (\( \text{◄} \) \( \text{►} \)) to choose the image you want to magnify.

2. Confirm that the \( \text{□} \) icon is displayed in the image and press the \( \text{□} \) button.
   The image is magnified around the face first recognized when the image was taken.

If multiple faces were recognized when the image was taken, the subject’s faces are zoomed up on each time the \( \text{□} \) button is pressed in order of the recognition during shooting.
Available operations during Face close-up playback mode

<table>
<thead>
<tr>
<th>Zoom button towards the right (🔍)</th>
<th>Zooms up on the subject being displayed for Face close-up playback at an equal or slightly larger magnification ratio.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom button towards the left (🗘)</td>
<td>Zooms up on the subject being displayed for Face close-up playback at an equal or slightly smaller magnification ratio.</td>
</tr>
</tbody>
</table>

3 Press the OK button.  
The image returns to single-image display.

- Face close-up playback is not available for movies or images that are saved as still pictures from movies.  
- The magnification ratio for Face close-up playback may differ depending on the conditions such as the size of the face recognized when shooting.

Memo

4 Playing Back and Deleting Images
You can delete images and sound files that you do not want to keep.

**When images or sound files are inadvertently deleted**
Deleted images and sound files can be recovered with the Optio WS80 (p.155). Deleted images and sound files can be recovered even if the camera has been turned off after deletion as long as the SD Memory Card has not been removed. However, deleted images and sound files cannot be recovered after operations to write data such as taking pictures, recording movies, protecting images, saving DPOF settings, resizing images, cropping images, or formatting has been performed.

**Deleting a Single Image**
You can delete a single image or sound file.

- **Caution**
  Protected images and sound files cannot be deleted (p.156).

1. In **mode**, use the four-way controller (◀ ▶) to choose the image/sound file you want to delete.
2. **Press the** button.
   A confirmation screen appears.
3 Use the four-way controller (▲▼) to select [Delete].

4 Press the OK button.
The image or sound file is deleted.

To Delete the Sound from an Image

If sound (voice memo) has been added to an image (p.188), you can delete the sound without deleting the image.

1 In ▷ mode, use the four-way controller (◄►) to choose the image with sound. ▪ appears on the images with sound.

2 Press the button.
A confirmation screen appears.

3 Use the four-way controller (▲▼) to select [Delete Sound].

4 Press the OK button.
The sound data is deleted.

• Select [Delete] in Step 3 above to delete both the image and sound data.
• You cannot delete only the sound in a movie.
Deleting Selected Images and Sound Files

You can delete several images/sound files selected from the four-/nine-image display at once.

Protected images and sound files cannot be deleted (p.156).

1 In < mode, press the zoom button towards the left (Zoom) once or twice.
   Four-image display or nine-image display appears.

2 Press the button.
   □ appears on the images and sound files.
Use the four-way controller (▲▼◄►) to choose the images and sound files that you want to delete and press the OK button. 
✓ appears on the selected images and sound files.
If you select an image and press the zoom button towards the right (Zoom), the selected image appears in single-image display as long as the button is pressed, enabling you to check whether you really want to delete it or not. (The display returns to four-/nine-image display when you release the button.) However, protected images cannot be displayed in single-image display.

4 Press the button.
A confirmation dialog appears.

5 Use the four-way controller (▲▼) to select [Select & Delete].

6 Press the OK button.
The selected images and sound files are deleted.
Deleting All Images and Sound Files

You can delete all the images and sound files at once.

Protected images and sound files cannot be deleted (p.156).

1. Press the MENU button in mode.
The [ Setting] menu appears.
When you press the MENU button in mode, press the four-way controller ( ) once.

2. Use the four-way controller ( ▲▼) to select [Delete All].

3. Press the four-way controller ( ).
The [Delete All] screen appears.

4. Use the four-way controller ( ▲▼) to select [Delete All].
5 Press the OK button.
All the images and sound files are deleted.

Recovering Deleted Images

You can recover images or sound files that were taken with this camera and then deleted.

If any of the following operations have been performed after deleting an image, the deleted image and sound file cannot be recovered.
- Shooting
- Protect or DPOF setting/Resizing/Cropping
- Formatting
- Removing the SD Memory Card

1 After deleting a file, press the four-way controller (▼). The Playback Mode Palette appears.

2 Use the four-way controller (▲▼◄►) to select ◄ (Image Recovery).
When ◄ is displayed, there are no images that can be recovered.

3 Press the OK button.
The number of recoverable images appears.
If you selected ◄ and pressed the OK button, the message [No image to be processed] appears. In this case, press the OK button to return to the Playback Mode Palette.
4 Use the four-way controller (▲▼) to select [Recover].

5 Press the OK button.
The files are recovered.

- Recovered images and sound files have the same file name as before they were deleted.
- Up to a maximum of 999 deleted image files can be recovered.

Protecting Images and Sound Files from Deletion (Protect)

You can protect stored images and sound files from being accidentally deleted.

1 In 
 mode, use the four-way controller (◄►) to choose the image you want to protect.

2 Press the four-way controller (▼).
The Playback Mode Palette appears.

3 Use the four-way controller (▲▼◄►) to select ◁ (Protect).

4 Press the OK button.
5 Use the four-way controller (▲▼) to select [Single Image/Sound].

6 Press the OK button.
   The message [Protect this image/sound] appears.
   To protect another image or sound file, use the four-way controller (◀▶) to select another image or sound file.

7 Use the four-way controller (▲▼) to select [Protect].

8 Press the OK button.
   The selected image or sound file is protected and the screen shown in Step 5 reappears.
   To protect other images or sound files, repeat Steps 5 to 8.
   Select [Cancel] to exit the Protect settings.

   • To cancel the protection of the image, select [Unprotect] in Step 7.
   • ▼ appears on the protected images and sound files during playback.
   • The maximum number of images and sound files you can protect in succession with [Single Image/Sound] is 99.
To Protect All Images and Sound Files

1 Select [All Images/Sounds] in Step 5 on p.157.

2 Press the OK button.

3 Use the four-way controller (▲ ▼) to select [Protect].

4 Press the OK button.
   All the images and sound files are protected and the screen shown in Step 1 reappears.

5 Use the four-way controller (▲ ▼) to select [Cancel] and press the OK button.
   The Playback Mode Palette reappears.

**Caution**
Protected images and sound files will be deleted if the SD Memory Card is formatted (p.192).

**Memo**
To cancel the protection of all your images and sound files, select [Unprotect] in Step 3.
By using the supplied AV cable (I-AVC7), you can capture and play back images on equipment with a video IN jack, such as a TV.

1. **Turn the AV device and camera off.**

2. **Open the battery/card/terminal cover of the camera and connect the AV cable to the PC/AV terminal of the camera.**
   
   Connect the terminal of the AV cable with the arrow mark ⬅️ facing the front side of the camera.

3. **Connect the other ends of the AV cable to the video input terminal and audio input terminal of the AV device.**
   
   When using stereo sound equipment, insert the sound terminal into the L (white) terminal.

4. **Turn the AV device on.**
   
   When the device that the camera is connected to and the device that plays back images are different, turn both devices on.
   
   When viewing images on AV equipment with multiple video input terminals (such as a TV), refer to the operation manual of the device and select the video input terminal to which the camera is connected.
5 Turn the camera on.

- It is recommended to use the optional AC adapter kit K-AC88 if you intend to use the camera for a long time (p.40).
- Depending on the country or region, images and sound files may fail to be played back if the video output format is set differently from the one in use there. If this happens, change the video output format setting (p.201).
- The camera display turns off and the volume cannot be adjusted with the zoom button while the camera is connected to AV equipment.

When connecting to and playing back images on AV equipment, image data is output at normal screen resolution. To view movies recorded at 1280 (1280×720, 30 fps) and 1280 (1280×720, 15 fps) in HDTV, transfer the data to a computer and play it back on the computer (p.211).
5 Editing and Printing Images

Editing Images ........................................ 162
Setting the Printing Service (DPOF) ...... 179

About printing
The following options are available for printing images taken with this camera.

1 Use a printing service.
2 Use your printer with an SD Memory Card slot to print directly from the SD Memory Card.
3 Use your computer’s software to print images.
Editing and Printing Images

Changing the Image Size (Resize)

By changing the recorded pixels of a selected image, you can make the file size smaller than the original. You can use this function to continue taking pictures when the SD Memory Card or the built-in memory is full, by making the images smaller and overwriting the original images to make more space available.

- Images taken with (1920×1080), panoramic images and movies cannot be resized.
- You cannot select a larger resolution than that of the original image.

1. In mode, use the four-way controller ( ) to choose the image you want to resize.
2. Press the four-way controller ( ).
   The Playback Mode Palette appears.
3. Use the four-way controller ( ) to select (Resize).
4. Press the OK button.
   The screen for choosing the number of recorded pixels appears.
5. Use the four-way controller ( ) to select the number of recorded pixels.
163

**Editing and Printing Images**

6 **Press the OK button.**
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

7 **Use the four-way controller (▲▼) to select [Overwrite] or [Save as].**

8 **Press the OK button.**
The resized image is saved.

**Cropping Images**
You can delete the unwanted part of a picture and save the cropped image as a new image.

- **Images taken with 2.1MP (1920×1080), panoramic images and movies cannot be cropped.**

1 **In **mode, use the four-way controller (◄►) to choose the image you want to crop.**

2 **Press the four-way controller (▼).**
The Playback Mode Palette appears.

3 **Use the four-way controller (▲▼◄►) to select **(Cropping).**
4 **Press the OK button.**
The cropping screen appears.
The largest size of cropped image is shown with a green frame on the screen. The cropped image cannot be larger than this cropping frame size.

5 **Choose the cropping area.**
The following operations move the green frame and set the area for cropping on the screen.

<table>
<thead>
<tr>
<th>Button</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom button</td>
<td>Changes the size of the cropped section.</td>
</tr>
<tr>
<td>Four-way controller</td>
<td>Moves the cropping position up, down, left and right.</td>
</tr>
</tbody>
</table>
| Green button         | Rotates the cropping frame.  
                      | • The button is displayed only when the cropping frame size can be rotated. |

6 **Press the OK button.**
The cropped image is saved with a new file name.
The number of recorded pixels is selected automatically according to the size of the cropped section.

---

**Processing Images So That Faces Look Smaller**

Images are processed to reduce the size of people’s faces detected with the Face Recognition function (p.76) when taking pictures so that they look smaller.

1 **In ** mode, use the four-way controller ( ◢ ▪ ) to choose the image you want to edit.

2 **Press the four-way controller ( ▼ ).**
The Playback Mode Palette appears.

3 **Use the four-way controller ( ▲ ▼ ◢ ▪ ) to select (Small Face Filter).**
4  **Press the OK button.**
Face recognition frames for faces that can be corrected are displayed. Proceed to Step 6 when there is only one recognition frame.

5  **Use the four-way controller (▲ ▼ ◄ ►) to select a face to be processed.**
A green frame indicates the face that is to be processed.

6  **Press the OK button.**

7  **Use the four-way controller (◄ ►) to change the reduction ratio.**
- ▲+  Approx. 5 %
- ▼+  Approx. 7 %
- ◄+  Approx. 10 %

8  **Press the OK button.**
A confirmation dialog for overwriting the image appears. If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

9  **Use the four-way controller (▲ ▼) to select [Overwrite] or [Save as].**

10 **Press the OK button.**
The camera returns to ◄ mode and the processed image is displayed.
You may not be able to process images in the following situations:
- When the size of face taken in relation to an image is too large or too small
- When faces are located in the edges of an image
In such cases, the face recognition frame in Step 4 will not appear.

## Using the Digital Filters

This function lets you change the color tones and perform special processing on a selected image.

<table>
<thead>
<tr>
<th>B&amp;W</th>
<th>Processes the image into one that has the look of a black and white photograph.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sepia</td>
<td>Processes the image into one that has the look of a sepia photograph.</td>
</tr>
<tr>
<td>Toy Camera</td>
<td>Processes the image that looks as though it was shot with a toy camera.</td>
</tr>
<tr>
<td>Retro</td>
<td>Processes the image into one that has the look of an old photo.</td>
</tr>
<tr>
<td>Color</td>
<td>Processes the image using the selected color filter. You can choose from six filters: red, pink, purple, blue, green, and yellow.</td>
</tr>
<tr>
<td>Color extraction</td>
<td>Extracts only a specific color and processes the rest of the image into black and white. You can choose from three filters: red, green, and blue.</td>
</tr>
<tr>
<td>Color enhancer</td>
<td>There are four filters: Sky Blue/Fresh Green/Delicate Pink/Autumn Leaves.</td>

<td>Adjusts the brightness of the image.</td>
</tr>
</tbody>
</table>

Panoramic images, movies or images taken with another camera cannot be edited using Digital Filter function.

1. **In mode, use the four-way controller ( ◀▶ ) to choose the image you want to edit.**

2. **Press the four-way controller ( ▼ ).**
   
The Playback Mode Palette appears.
Use the four-way controller (▲▼◄►) to select \(\text{DIGITAL FILTER}\) (Digital Filter).

Press the OK button.
The filter selection screen appears.

1. B&W
2. Sepia
3. Toy Camera
4. Retro
5. Color
6. Color extraction
7. Color enhancer
8. Soft
9. Brightness

Subsequent steps vary depending on your selection.

To Select a B&W, Sepia or Soft Filter

Use the four-way controller (▲▼) to choose a filter.
The preview image of the results of the filter effect appears.

Press the OK button.
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

Use the four-way controller (▲▼) to select [Overwrite] or [Save as].
8 **Press the OK button.**
The image processed with the filter is saved.

---

**To Select a Retro, Color, Color Extraction or Color Enhancer Filter**

5 **Use the four-way controller (▲▼) to choose a filter.**
The preview image of the results of the filter effect appears.

6 **Use the four-way controller (◄►) to choose the color.**
The color filter changes in the following sequence each time the four-way controller (►) is pressed.

<table>
<thead>
<tr>
<th>Filter</th>
<th>Color Changes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Retro</td>
<td>Original image → Amber → Blue</td>

<tr>
<td>Color extraction</td>
<td>Red → Green → Blue</td>
</tr>
<tr>
<td>Color enhancer</td>
<td>Sky Blue → Fresh Green → Delicate Pink → Autumn Leaves</td>
</tr>
</tbody>
</table>

7 **Press the OK button.**
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

8 **Use the four-way controller (▲▼) to select [Overwrite] or [Save as].**

9 **Press the OK button.**
The image processed with the filter is saved.
5 **Use the four-way controller (▲▼) to choose a filter.**
The preview image of the results of the filter effect appears.

6 **Use the four-way controller (◄►) to adjust the effect.**

<table>
<thead>
<tr>
<th></th>
<th>Four-way controller (◄)</th>

</thead>
<tbody>
<tr>
<td>Toy Camera</td>
<td>Weak</td>
<td>Medium</td>
<td>Strong</td>
</tr>
<tr>
<td>Brightness</td>
<td>Dark</td>
<td>Standard</td>
<td>Bright</td>
</tr>
</tbody>
</table>

7 **Press the OK button.**
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

8 **Use the four-way controller (▲▼) to select [Overwrite] or [Save as].**

9 **Press the OK button.**
The image processed with the filter is saved.
Red-eye Compensation

You can correct images where the flash has caused the subject to appear with red eyes.

- The red-eye compensation function cannot be used on panoramic images, movies or on images where red eyes cannot be detected on the camera. An error message appears in Step 4.
- The red-eye compensation function can only be used with still pictures taken with this camera.

1. In mode, use the four-way controller (◀▶) to choose the image you want to correct.

2. Press the four-way controller (▼).
   The Playback Mode Palette appears.

3. Use the four-way controller (▲▼◄►) to select (Red-eye Compensation).

4. Press the OK button.
   A confirmation dialog for overwriting the image appears.
   If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

5. Use the four-way controller (▲▼) to select [Overwrite] or [Save as].

6. Press the OK button.
   The edited image is saved.
Adding a Frame (Frame Composite)

This function lets you add a decorative frame to still pictures. There are 90 frames already stored in the camera.

1. In ** mode, use the four-way controller (◀▶) to choose the image to which you want to add a frame.

2. Press the four-way controller (▼). The Playback Mode Palette appears.

3. Use the four-way controller (▲▼◀▶) to select □ (Frame Composite).

4. Press the OK button. The 9-frame display of the frame selection screen appears.

5. Use the four-way controller (▲▼◀▶) to choose a frame.

---

**Caution**

The Frame Composite function cannot be used on images taken with 2.1M (1920×1080), panoramic images, movies or images of size 3M (2048×1536) or smaller. An error message appears in Step 4.
Press the zoom button towards the right (✓).
The selected frame appears in single-image display.
You can choose another frame using either of the following operations.

<table>
<thead>
<tr>
<th>Four-way controller (◀ ▶)</th>
<th>Press to choose a different frame.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom button towards the left (❖)</td>
<td>Press to return to the 9-frame display of the frame selection screen, and then perform Step 5 to choose a different frame.</td>
</tr>
</tbody>
</table>

Press the OK button.
The frame position and size adjustment screen appears.
You can adjust the image using either of the following operations.

<table>
<thead>
<tr>
<th>Four-way controller (▲ ▼ ◀ ▶)</th>
<th>Press to adjust the position of the image</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom button</td>
<td>Press to make the image larger or smaller.</td>
</tr>
</tbody>
</table>

Press the OK button.
A confirmation dialog for overwriting the image appears.
If the selected image is protected, the processed image is saved as a new image and the following confirmation dialog does not appear.

Use the four-way controller (▲ ▼) to select [Overwrite] or [Save as].

Press the OK button.
The edited image is saved with the recorded pixels of 3M (2048×1536).
Optional Frames
The optional frames are stored in the built-in memory in the Optio WS80. These optional frames are deleted if the files on the built-in memory are deleted with a computer or the built-in memory is formatted. To reload the optional frames into the built-in memory, copy the files from the CD-ROM (S-SW87) supplied with the camera.

To Copy Frames

1. **Remove the SD Memory Card from the camera.**
   If you leave the SD Memory Card in the camera, the frames will be copied onto the card, not into the camera’s built-in memory.

2. **Connect the camera to the computer using the provided USB cable (I-USB7).**
   Refer to “Connecting to a Computer” (p.211) for instructions on connecting the camera to a computer.

3. **When the device detection window opens, click [Cancel].**

4. **Insert the CD-ROM (S-SW87) into the CD-ROM drive.**

5. **When the installer window opens, click [EXIT].**

6. **If there is not already a “FRAME” folder in the root directory of the camera (removable disk), create the folder.**

7. **Copy the desired files from the FRAME folder in the root directory of the CD-ROM to the FRAME folder on the camera (removable disk).**
   For information on working with files on your computer, refer to the instruction manual supplied with the computer.

8. **Disconnect the USB cable from the computer and camera.**
   Refer to “Connecting to a Computer” (p.211) for instructions on disconnecting the cable.

---

**Caution:**
Frames can be stored both in the built-in memory and on the SD Memory Cards, but using large numbers of frames may slow down processing times.
To Use a New Frame

The frames downloaded from the PENTAX website or other source can be used for adding a frame to pictures.

- Extract the downloaded frame and copy it to the FRAME folder in the built-in memory or the SD Memory Card.
- The FRAME folder is created when the SD Memory Card is formatted with this camera.
- For more information on downloading, refer to the PENTAX website.

Editing Movies

You can select a frame from the recorded movie to save as a still picture or divide a movie into two.

1. In mode, use the four-way controller (◀ ▶) to choose the movie you want to edit.

2. Press the four-way controller (▼).

The Playback Mode Palette appears.

3. Use the four-way controller (▲ ▼ ◀ ▶) to select (Movie Edit).

4. Press the OK button.

The movie edit selection screen appears. Subsequent steps vary depending on your selection.
To Save a Frame from a Movie as a Still Picture

5 Select [Save as Still Image] on the movie edit selection screen.

6 Press the OK button.
The screen appears for selecting a frame to be saved as a still picture.

7 Use the four-way controller (▲▼◄►) to choose the frame you want to save.
   - ▲ Plays or pauses the movie
   - ▼ Stops the movie and returns to the first frame
   - ◄ Reverses the movie frame by frame
   - ► Advances the movie frame by frame

8 Press the OK button.
The selected frame is saved as a still picture.

To Divide a Movie

5 Select [Divide Movies] on the movie edit selection screen.

6 Press the OK button.
The screen for choosing the dividing position appears.

7 Use the four-way controller (▲▼◄►) to determine the dividing position.
   - ▲ Plays or pauses the movie
   - ▼ Stops the movie and returns to the first frame
   - ◄ Reverses the movie frame by frame
   - ► Advances the movie frame by frame

8 Press the OK button.
A confirmation dialog appears.
Use the four-way controller (▲▼) to select [Divide].

Press the OK button.
The movie is divided at the specified position, the two portions are saved as new files, and the original one is deleted.

The protected movies cannot be divided.

Copying Images and Sound Files
You can copy images and sound files from the built-in memory to the SD Memory Card and vice versa. This function can be selected only when an SD Memory Card has been inserted in the camera.

Make sure that the camera is turned off before inserting or removing the SD Memory Card.

Press the four-way controller (▼) in  mode.
The Playback Mode Palette appears.

Use the four-way controller (▲▼ ◄►) to select  (Image/Sound Copy).
3  **Press the OK button.**
   The copying method selection screen appears.
   Subsequent steps vary depending on your selection.

To Copy Files from the Built-in Memory to the SD Memory Card

All the images and sound files in the built-in memory are copied to the SD Memory Card at once. Before copying the images, make sure that there is enough space on the SD Memory Card.

4  **Use the four-way controller (▲▼) to select [■ SD].**

5  **Press the OK button.**
   All the images and sound files are copied to the SD Memory Card.

To Copy Files from the SD Memory Card to the Built-in Memory

Selected images and sound files from the SD Memory Card are copied to the built-in memory one at a time.

4  **Use the four-way controller (▲▼) to select [SD ▶ ●].**

5  **Press the OK button.**

6  **Use the four-way controller (◄ ►) to select the image/sound file you want to copy.**
Press the OK button.
The selected image/sound file is copied to the built-in memory. To copy other images or sound files, repeat Steps 4 to 7. Select [Cancel] to exit the settings.

- If sound (voice memo) has been added to an image, the image is copied with the sound.
- When a file is copied from the SD Memory Card to the built-in memory, it is assigned a new file name.
DPOF (Digital Print Order Format) is the format for storing print order data on still pictures captured with a digital camera. Once the print order data has been stored, the pictures can be printed according to the DPOF settings using a DPOF-compatible printer or photo processing lab. You cannot store print order data for movies or sound-only files.

Caution: If the picture already has the date and/or time imprinted on it (p.123), do not set [Date] (On) in DPOF settings. If you select (On), the imprinted date and/or time may overlap.

### Printing a Single Image

Set the following items for each image.

<table>
<thead>
<tr>
<th>Copies</th>
<th>Choose the number of copies up to 99.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Date</td>
<td>Specify whether you want the date inserted on the print or not.</td>
</tr>
</tbody>
</table>

1. **In mode, press the four-way controller (▼).**
   The Playback Mode Palette appears.

2. **Use the four-way controller (▲ ▼ ◀ ►) to select DPOF (DPOF).**

3. **Press the OK button.**
   The DPOF setting method selection screen appears.
4 Use the four-way controller (▲▼) to select [Single Image].

5 Press the OK button.
The message [Applies DPOF settings to this image] appears.

6 Use the four-way controller (◀▶) to select an image.
If DPOF settings have already been made for an image, the previous number of copies and date setting (✓ or □) will be displayed.

7 Use the four-way controller (▲▼) to choose the number of copies.

8 Press the Green button to switch ✓ or □ for [Date] setting.
✓ The date will be imprinted.
□ The date will not be imprinted.
To continue setting DPOF print order data, repeat Steps 6 to 8.

9 Press the OK button.
The setting is saved and the screen shown in Step 4 reappears.

Caution
Depending on the printer or printing equipment at the photo processing lab, the date may not be imprinted on the pictures even if ✓ (On) is selected for [Date] in the DPOF settings.

Memo
To cancel DPOF settings, set the number of copies to [00] in Step 7 and press the OK button.
Printing All Images

When you choose the number of copies and whether or not to insert the date, the settings are applied to all the images stored in the camera.

1. **Select [All Images] in Step 4 on p.180.**

2. **Press the OK button.**
   The message [Applies DPOF settings to all images] appears.

3. **Choose the number of copies and switch ✓ or □ for [Date] setting.**
   Refer to Steps 7 and 8 in “Printing a Single Image” (p.180) for details of how to make the settings.

4. **Press the OK button.**
   The settings for all the images are saved and the DPOF setting method selection screen reappears.

   • The number of copies specified in the [All Images] setting applies to all the images. Before printing, check that the number is correct.
   • Settings for single images are canceled when settings are made with [All Images].
6 Recording and Playing Back Sound

Recording Sound (Voice Recording) .......................................................... 184
Adding a Voice Memo to Images .............. 188
Recording and Playing Back Sound

Recording Sound (Voice Recording)

You can record sound with the camera. The microphone is located on the front of the camera. When recording sound, aim the camera at the sound source to obtain the best sound quality.

Setting the Voice Recording Function

To use the Voice Recording function, assign it to the Green button first.

1. Press the MENU button in  mode.
   The [Rec. Mode] menu appears.

2. Use the four-way controller (▲▼) to select [Green Button].

3. Press the four-way controller (►).
   A pull-down menu appears.

4. Use the four-way controller (▲▼) to select [Voice Recording] and press the OK button.
5 Press the **MENU** button.
The Voice Recording function is assigned to the Green button.

### Recording Sound

1. **Press the Green button in **\(\text{ }\)** mode.**
The camera enters the Voice Recording mode. The remaining recordable time and the recording time of the current file appear on the display.
   1. Recording time
   2. Remaining recordable time

2. **Press the shutter release button fully.**
Recording starts. The self-timer lamp blinks during recording.
You can record sounds continuously for up to 24 hours.
When the Green button is pressed during recording, an index is added to the current sound file.

3. **Press the shutter release button fully.**
Recording stops.
Recording and Playing Back Sound

You can play back the sound files you made in Voice Recording.

1. Press the \( \text{Q} \) button.
2. Use the four-way controller (\( \uparrow\downarrow\uparrow\downarrow \)) to choose the sound file to play back.
3. Press the four-way controller (\( \uparrow \))

Playback starts.
- 1. Total file recording time
- 2. Playback time

---

memo

- If you press and hold down the shutter release button for more than one second in Step 2, recording continues until you take your finger off the button. This is useful for recording short sound.
- The sound is saved in WAVE monaural files.
Available operations during playback

<table>
<thead>
<tr>
<th>Operation Description</th>

</tbody>
</table>

4 Press the four-way controller (▼).
Playback stops.
Adding a Voice Memo to Images

You can add a voice memo to your still pictures.

**Recording a Voice Memo**

1. **In ** mode, use the four-way controller ( ▼ ▼ ) to choose the still picture to which you want to add a voice memo.

2. **Press the four-way controller (▼).**
   The Playback Mode Palette appears.

3. **Use the four-way controller ( ▼ ▼ ▼ ) to select ▼ (Voice Memo).**

4. **Press the OK button.**
   Recording starts. You can record a voice memo continuously for up to 24 hours.

5. **Press the OK button.**
   Recording stops.

- A voice memo cannot be added to the image that already has a voice memo. Delete the old voice memo (p.151) and record a new one.
- A voice memo cannot be added to protected images (p.156).
Playing Back a Voice Memo

1. **In \( \rightarrow \)** mode, use the four-way controller (\( \downarrow \uparrow \)) to choose the still picture with the voice memo that you want to play back.
   \( \square \) appears on images with voice memos in single-image display.

2. **Press the four-way controller (\( \uparrow \)).**
   Playback starts.

   **Available operations during playback**

<table>
<thead>
<tr>
<th>Operation</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom button towards the right (( \uparrow ))</td>
<td>Increases the volume.</td>
</tr>
<tr>
<td>Zoom button towards the left (( \downarrow ))</td>
<td>Reduces the volume.</td>
</tr>
</tbody>
</table>

3. **Press the four-way controller (\( \downarrow \)).**
   Playback stops.

   To Delete the Sound from an Image  \( \Rightarrow \) p.151
7 Settings

Camera Settings ........................................... 192
Using the Clock Function ............................... 208
Formatting an SD Memory Card

Formatting deletes all the data on the SD Memory Card. Be sure to use this camera to format (initialize) an SD Memory Card that is unused or has been used on other cameras or digital devices.

- Do not remove the SD Memory Card during formatting as this may damage the card and render it unusable.
- Formatting deletes protected images and any data recorded on the card with a computer or any camera.
- SD Memory Cards formatted on a computer or device other than this camera cannot be used. Be sure to format the card with the camera.
- The built-in memory cannot be formatted except when an error occurs.

1. **Press the MENU button in **

   The [Setting] menu appears. When you press the MENU button in ** mode, press the four-way controller ( ) once.

2. **Use the four-way controller ( ▲ ▼) to select [Format].**

3. **Press the four-way controller ( ).**

   The [Format] screen appears.

4. **Use the four-way controller ( ▲ ▼) to select [Format].**

5. **Press the OK button.**

   Formatting starts. When formatting is completed, the camera returns to ** mode or ** mode.
Changing the Sound Settings

You can adjust the volume of operation sounds and change the type of sound.

1. **Press the MENU button in ► mode.**
   The [Setting] menu appears.
   When you press the MENU button in ◄ mode, press the four-way controller (►) once.

2. **Use the four-way controller (▲▼) to select [Sound].**

3. **Press the four-way controller (►).**
   The [Sound] screen appears.

<table>
<thead>
<tr>
<th>Sound</th>

<tr>
<td>Self-timer Sound 1</td>
</tr>
</tbody>
</table>

4. **Use the four-way controller (▲▼) to select [Operation Volume].**

5. **Use the four-way controller (◄►) to adjust the volume.**
   Set the volume to 0 to mute the start-up sound, shutter sound, operation sound, and self-timer sound.

6. **Change [Playback Volume] in the same way as in Steps 4 and 5.**

**To Change the Sound Type**

4. **Use the four-way controller (▲▼) to select [Start-up Sound].**

5. **Press the four-way controller (►).**
   A pull-down menu appears.
6 Use the four-way controller (▲ ▼) to select the sound type.
Choose from [1], [2], [3] or [Off].

7 Press the OK button.

8 Set [Shutter Sound], [Operation Sound] and [Self-timer Sound] in the same way as in Steps 4 to 7.

9 Press the MENU button twice.
The camera returns to ▲ mode or ▼ mode.

Changing the Date and Time

You can change the initial date and time settings (p.52). You can also set the format in which the date appears on the camera.

1 Press the MENU button in ▼ mode.
The [ inflammable] menu appears.
When you press the MENU button in ▲ mode, press the four-way controller ( ► ) once.

2 Use the four-way controller (▲ ▼) to select [Date Adjustment].

3 Press the four-way controller ( ► ).
The [Date Adjustment] screen appears.

4 Press the four-way controller ( ► ).
The frame moves to [mm/dd/yy].
Depending on the initial setting or previous setting, [dd/mm/yy] or [yy/mm/dd] may be displayed.
5 Use the four-way controller (▲ ▼) to choose the date and time display style.
Choose from [mm/dd/yy], [dd/mm/yy] or [yy/mm/dd].

6 Press the four-way controller (►). The frame moves to [24h].

7 Use the four-way controller (▲ ▼) to select [24h] (24-hour display) or [12h] (12-hour display).

8 Press the four-way controller (►). The frame returns to [Date Format].

9 Press the four-way controller (▼). The frame moves to [Date].

10 Press the four-way controller (►). The frame moves to one of the following items depending on the date format set in Step 5.
   - Month for [mm/dd/yy]
   - Day for [dd/mm/yy]
   - Year for [yy/mm/dd]

The following operations and screens use [mm/dd/yy] as an example. The operations are the same even if another date format has been selected.
11 Use the four-way controller (▲▼) to change the month.

12 Press the four-way controller (▶). The frame moves to the day field. Use the four-way controller (▲▼) to change the day. After changing the day, change the year in the same manner.

13 Change the time in the same way as in Steps 8 to 12. If you selected [12h] in Step 7, the setting switches between am and pm corresponding to the time.

14 Press the four-way controller (▼) to select [Settings complete].

15 Press the OK button. The date and time settings are saved.

When you press the OK button in Step 15, the camera clock is reset to 00 seconds. To set the exact time, press the OK button when the time signal (on the TV, radio, etc.) reaches 00 seconds.
Setting the World Time

The date and time selected in “Setting the Date and Time” (p.52) and “Changing the Date and Time” (p.194) serve as the Hometown date and time. By using the world time function, you can display the time in a city other than the Hometown (Destination). This is useful when taking pictures in a different time zone.

To Set the Destination

1. **Press the MENU button in Q mode.**
   - The [Setting] menu appears.
   - When you press the MENU button in A mode, press the four-way controller (▲) once.

2. **Use the four-way controller (▲ ▼) to select [World Time].**

3. **Press the four-way controller (►).**
   - The [World Time] screen appears.

4. **Use the four-way controller (▲ ▼) to select [Destination].**

5. **Press the four-way controller (►).**
   - The [Destination] screen appears. The city that is currently selected blinks on the map.

6. **Use the four-way controller (◄ ▶) to change the Destination city.**
   - The current time, location and time difference of the selected city appear.
7. Use the four-way controller (▲▼) to select [DST].

8. Use the four-way controller (◄►) to select ✓ or □.
Select ✓ if the Destination city uses daylight saving time.

9. Press the OK button.
The settings are saved and the [World Time] screen reappears.

10. Press the MENU button twice.
The camera returns to capture status with the current setting.

 memo Select [✓ Hometown] in Step 4 to set the city and DST setting for the Hometown city.

---

To Display the Time of the Destination (Select Time)

1. Press the MENU button in ◄ mode.
The [気軽に Setting] menu appears. 
When you press the MENU button in ◄ mode, press the four-way controller (►) once.

2. Use the four-way controller (▲▼) to select [World Time].

3. Press the four-way controller (►).
The [World Time] screen appears.

4. Use the four-way controller (▲▼) to select [Select Time].

<table>
<thead>
<tr>
<th>World Time</th>

</tr>
<tr>
<td>◄Destination</td>
<td>DST</td>
</tr>
<tr>
<td>New York</td>
<td>14:25</td>
</tr>
<tr>
<td>◄Hometown</td>
<td>□</td>
</tr>
</tbody>
</table>

5. Press the four-way controller (►).
A pull-down menu appears.
Use the four-way controller (▲▼) to select ➡️ or 🏡.

- ➡️ Displays the time of the Destination city
- 🏡 Displays the time of the Hometown city

Press the OK button.
The setting is saved.

Press the MENU button twice.
The camera returns to 📷 mode or 🎬 mode.
When ➡️ (Destination) is selected in Step 6, the ➡️ icon appears on the display to indicate that the destination date and time are displayed in 📷 mode.

Changing the Display Language

You can change the language in which the menus, error messages, etc. are displayed.
The camera supports the following 20 languages: English, French, German, Spanish, Portuguese, Italian, Dutch, Japanese, Danish, Swedish, Finnish, Polish, Czech, Hungarian, Turkish, Greek, Russian, Thai, Korean and Chinese (traditional and simplified).

1 Press the MENU button in 🎬 mode.
The [Setting] menu appears.
When you press the MENU button in 📷 mode, press the four-way controller (►) once.

2 Use the four-way controller (▲▼) to select [Language/言語].

3 Press the four-way controller (►).
The [Language/言語] screen appears.
4 Use the four-way controller (△ ▼ ◀▶) to select the language.

5 Press the OK button.
The menus and messages are displayed in the selected language.

Changing the Naming Rule of the Folder

You can change the naming rule of the folder for storing images. When the naming rule is set to the date, pictures are saved in separate folders by the date they were taken.

<table>
<thead>
<tr>
<th>Standard</th>
<th>xxxPENTX (where xxx is the 3-digit folder number)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Date</td>
<td>xxx-mmdd (3-digit folder number_month day)</td>
</tr>
<tr>
<td></td>
<td>* xxx-ddmm (3-digit folder number_day month) when the [Date Format] is set to [dd/mm/yy]</td>
</tr>
</tbody>
</table>

Taken with the folder name setting [Standard]. (e.g. September 25)
Taken with the folder name setting [Date]. (e.g. September 25)
Next time, taken with the folder name setting [Date] again. (e.g. October 1)

- Up to 999 folders can be created.
- Up to 9999 images or sounds can be saved in a folder.
1 Press the **MENU** button in ➤ mode.
The [🔧 Setting] menu appears.
When you press the **MENU** button in ➤ mode, press the four-way controller (➡) once.

2 Use the four-way controller (🔼 ▼) to select [Folder Name].

3 Press the four-way controller (➡).
A pull-down menu appears.

4 Use the four-way controller (🔼 ▼) to select [Standard] or [Date].

5 Press the **OK** button.
The setting is saved.

### Changing the Video Output Format

When you connect the camera to AV equipment, choose the appropriate video output format (NTSC or PAL) for taking and playing back images.

1 Press the **MENU** button in ➤ mode.
The [🔧 Setting] menu appears.
When you press the **MENU** button in ➤ mode, press the four-way controller (➡) once.

2 Use the four-way controller (🔼 ▼) to select [Video Out].

3 Press the four-way controller (➡).
A pull-down menu appears.

4 Use the four-way controller (🔼 ▼) to select a video output format.
Choose the video output format to match the input format of the AV equipment.
5 Press the OK button.
The setting is saved.

Depending on the country or region, images and sound files may fail to be played back if the video output format is set differently from the one in use there. If this happens, change the video output format setting.

Connecting the Camera to AV Equipment p.159
Video output format of each city p.245

Adjusting the Brightness of the Display

You can adjust the brightness of the display.

1 Press the MENU button in ◀ mode.
The [Setting] menu appears.
When you press the MENU button in ◀ mode, press the four-way controller (▶) once.

2 Use the four-way controller (▲▼) to select [Brightness Level].

3 Use the four-way controller (◄►) to adjust the brightness.

- Dark
- Normal
- Bright

4 Press the MENU button.
The camera returns to ◀ mode or ◀ mode.
The display appears with the set brightness.
Using the Power Saving Function

You can save battery power by setting the display to dim automatically when no operation is performed for a fixed time. After the power saving function has been activated, the display returns to the ordinary brightness if any button is pressed.

1. **Press the MENU button in 

   The [ ] Setting] menu appears.
   When you press the MENU button in 

2. **Use the four-way controller ( ▲ ▼ ) to select [Power Saving].

3. **Press the four-way controller ( ▶ ).

   A pull-down menu appears.

4. **Use the four-way controller ( ▲ ▼ ) to select the time until the camera enters power saving mode.

   Choose from [2min.], [1min.], [30sec.], [15sec.], [5sec.] or [Off].

5. **Press the OK button.

   The setting is saved.

- Power Saving does not function in the following situations:
  - While taking pictures in (Continuous Shooting) mode
  - In the playback mode
  - While recording a movie
  - While the camera is connected to a computer
  - When using the AC adapter
  - While a menu is being displayed
- When no operation is performed after the camera is turned on, Power Saving is activated only after 15 seconds elapse even if [5sec.] is set.
Setting Auto Power Off

You can set the camera to turn off automatically when no operation is performed for a fixed time.

1. **Press the MENU button in \( \rightarrow \) mode.**
   The [\( \text{Setting} \)] menu appears.
   When you press the MENU button in \( \text{A} \) mode, press the four-way controller (\( \uparrow \)) once.

2. **Use the four-way controller (\( \uparrow \downarrow \)) to select [Auto Power Off].**

3. **Press the four-way controller (\( \uparrow \)).**
   A pull-down menu appears.

4. **Use the four-way controller (\( \uparrow \downarrow \)) to select the time until the camera turns off automatically.**
   Choose from [5min.], [3min.] or [Off].

5. **Press the OK button.**
   The setting is saved.

- **memo**
  Auto Power Off does not function in the following situations:
  - While recording sound in Voice Recording mode
  - While taking pictures in \( \text{J} \) (Continuous Shooting) mode
  - While recording a movie
  - During a slideshow or movie/sound playback
  - While the camera is connected to a computer
Changing the Start-up Screen

You can choose the start-up screen displayed when the camera is turned on.
You can choose any of the following images as the start-up screen:
- The Guide Display Start-up Screen showing a guide to the shooting modes and buttons
- One of the 3 Optio logos
- One of your own images (compatible images only)

1. **In mode, press the four-way controller (▼).**
   The Playback Mode Palette appears.

2. **Use the four-way controller (▲▼◄►) to select (Start-up Screen).**

3. **Press the OK button.**
The image selection screen appears.

4. **Use the four-way controller (◄►) to choose the image for the start-up screen.**
   Only images suitable for the start-up screen are displayed. You can also choose one of the 3 Optio logos or the Guide Display Start-up Screen already stored in the camera.

5. **Press the OK button.**
The start-up screen is set.

memo
- Once the start-up screen has been set, it will not be deleted even if the original image is deleted or the SD Memory Card is formatted.
- Select [Off] to hide the start-up screen.
- The start-up screen is not displayed when the camera starts up in the playback mode.
Correcting Defective Pixels in the CCD Sensor (Pixel Mapping)

Pixel Mapping is a function for mapping out and correcting defective pixels in the CCD sensor. Run the Pixel Mapping function if image dots always seem to be defective in the same place.

1 Press the MENU button in [ ] mode, and press the four-way controller (▶).
The [Setting] menu appears.
[Pixel Mapping] cannot be selected when the [Setting] menu is displayed from [ ] mode or Voice Recording mode.

2 Use the four-way controller (▲▼) to select [Pixel Mapping].

3 Press the four-way controller (▶).

4 Use the four-way controller (▲▼) to select [Pixel Mapping].

5 Press the OK button.
Defective pixels are mapped and corrected.

Caution
When the battery level is low, [Not enough battery power remaining to activate Pixel Mapping] is displayed on the monitor. Use the AC adapter kit K-AC88 (optional) or load a charged battery.
Reseting to Default Settings (Reset)

You can reset the camera settings to their defaults. Refer to “Default Settings” (p.240) for the reset settings.

1. **Press the MENU button in ➤ mode.**
   The [✎ Setting] menu appears.
   When you press the MENU button in ➤ mode, press the four-way controller (➤) once.

2. **Use the four-way controller (▲▼) to select [Reset].**

3. **Press the four-way controller (➤).**
   The [Reset] screen appears.

4. **Use the four-way controller (▲▼) to select [Reset].**

5. **Press the OK button.**
   The settings return to the defaults.

**memo**

The following settings are not affected by resetting:
- Date Adjustment
- World Time
- Language/言語
- Video Out
Using the Clock Function

Displaying the Time
You can view the time (Clock mode) on the display.

1. **Make sure the power is turned off.**

2. **Press and hold the OK button.**
   The camera turns on and the Clock mode screen appears.
   The camera turns off automatically after approximately 10 seconds. If you press the power switch while the Clock mode screen is displayed, the camera will turn off immediately.

Setting the Alarm
You can set the alarm to ring at a specified time. You can choose whether the alarm will ring only once at the set time or at the same time every day.

1. **Press the MENU button in \( \text{Q} \) mode.**
   The [\( \text{Setting} \) menu appears.
   When you press the MENU button in \( \text{C} \) mode, press the four-way controller (\( \uparrow \)) once.

2. **Use the four-way controller (\( \uparrow \downarrow \)) to select [Alarm].**

3. **Press the four-way controller (\( \uparrow \)).**
   The [Alarm] screen appears.

4. **Press the four-way controller (\( \uparrow \)).**
   A pull-down menu appears.
5 Use the four-way controller (▲ ▼) to select [Off], [Once] or [Everyday].
   • Once The alarm rings only once, at the set time.
   • Everyday The alarm rings every day, at the set time.
   To cancel the set alarm, select [Off].

6 Press the OK button.

7 Use the four-way controller (▲ ▼) to select [Time].

8 Press the four-way controller (▶).

9 Use the four-way controller (▲ ▼) to change the hour.

10 Change the minutes in the same way as in Steps 8 to 9.

11 Press the four-way controller (▶).

12 Press the four-way controller (▼) to select [Settings complete].

13 Press the OK button.
   After the message [Alarm is set] appears, the camera turns off.
   When the set time is reached, the camera turns on with the Clock mode screen displayed and the alarm will ring. The alarm will stop ringing when a button is pressed or after one minute elapses. The camera will turn off 10 seconds after the alarm is stopped.

Caution
   • The alarm will not ring if the camera is on when the set time is reached.
   • The alarm will not ring during interval shooting.
To Cancel an Alarm

You can cancel an alarm that is set.

1 Select [Off] in Step 5 on p.209.

   ![Alarm screen]

   - Alarm: Off
   - Time: Once Everyday

2 Press the OK button.

3 Press the four-way controller (▼) to select [Settings complete].

4 Press the OK button.

   [Alarm] is set to □ (Off) and the [Setting] menu reappears.

5 Press the MENU button.

   The previous screen reappears.
8 Connecting to a Computer

Setting Up Your Computer ......................... 212
Connecting to a Windows PC .................. 220
Connecting to a Macintosh .................... 229
By installing the software included on the provided CD-ROM on your computer and connecting the camera to your computer with the USB cable, you can transfer images and movies captured with your camera to the computer and then display and manage them. This section explains how to install the provided software and the other necessary preparations for enjoying the captured pictures and movies on your computer.

**Provided Software**

The following software is included in the provided CD-ROM (S-SW87).

**Windows**

- Image viewing/managing/editing software “ACDSee for PENTAX 3.0” (Nine languages: English, French, German, Spanish, Italian, Russian, Chinese [traditional and simplified], Korean, and Japanese)

**Macintosh**

- Image viewing/managing software “ACDSee 2 for Mac” (Six languages: English, French, German, Spanish, Italian, and Japanese)

It is recommended to use the optional AC adapter kit K-AC88 when the camera is connected to a computer (p.40). If the battery runs out of power while images are being transmitted to a computer, the data may be lost or damaged.
System Requirements

The following system requirements must be met for you to fully enjoy the images and movies captured with the camera on your computer.

Windows

| OS | Windows 2000, Windows XP or Windows Vista  
|---|---
|   | • The OS must be preinstalled and updated to the latest version.
| CPU | Pentium III or higher (Pentium 4 or higher recommended)
| Memory | 256 MB minimum (1 GB or more recommended)
| Hard Disk Space | 100 MB minimum (1 GB or more recommended)
| Others | CD-ROM drive  
|   | USB port as standard equipment  
|   | Internet Explorer 5.0 or later  
|   | DirectX 9.0 or later and Windows Media Player 9.0 or later (for playing movies)

* Operation is not guaranteed on all computers meeting the system requirements.
* The system requirements describe the minimum environment for playing and editing movies.

Windows 95, Windows 98, Windows 98SE, Windows Me and Windows NT are not supported.

The versions of Internet Explorer, Windows Media Player and DirectX required for using “ACDSee for PENTAX 3.0” are not included in the provided CD-ROM. Visit the following sites to download the necessary items and install/update them on your computer.

- **Internet Explorer**  
- **Windows Media Player**  
- **DirectX**  
**Connecting to a Computer**

* Operation is not guaranteed on all computers meeting the system requirements.
* The system requirements describe the minimum environment for playing and editing movies.

### Macintosh

<table>

* The system requirements describe the minimum environment for playing and editing movies.

### Installing the Software

#### Windows

Install the image viewing/managing/editing software (ACDSee for PENTAX 3.0).

- Make sure your Windows PC meets the system requirements before installing the software.
- When multiple accounts have been set up in Windows 2000, Windows XP or Windows Vista, log on with an account that has administrative rights before installing the software.

1. **Turn your Windows PC on.**
2. **Insert the CD-ROM (S-SW87) into the CD-ROM drive.**

The language selection screen appears.
Choose a language from the displayed screen.
The “ACDSee for PENTAX 3.0” installation screen appears.

Click [Install].
The setup screen appears.
Follow the on-screen guidance to input registration information and install the software.
5 Click [Finish].
“ACDSee for PENTAX 3.0” installation is complete.

6 Click [Exit] on the installation screen.
The window closes.

**Macintosh**

Install the image viewing/managing software (ACDSee 2 for Mac).

1 Turn your Macintosh on.

2 Insert the CD-ROM (S-SW87) into the CD-ROM drive.

3 Double-click the CD-ROM (S-SW87) icon.

4 Double-click the [ACDSee Install] icon.
The language selection screen appears.
If the [Master Installer] icon appears, double-click it to display the language selection screen.

5 Choose a language from the displayed screen.
The “ACDSee 2 for Mac” installer screen appears.
6  Click [Install].
The setup screen appears.
Follow the on-screen guidance to input registration information and install the software.

7  When the screen shown on the right appears, click [Yes].

8  Click [Close].
“ACDSee 2 for Mac” installation is complete.

9  Click [Exit] on the installation screen.
The window closes.
**Product Registration on the Internet**

In order to better serve you, we request that you complete the product registration.

If your computer is connected to the Internet, please click [Product Registration] on the setup screen after the language selection screen is displayed. The world map screen shown on the right for Internet Product Registration is displayed. Click the displayed country or region and then follow the instructions to register your product. Only customers in countries and regions displayed on the software installation screen can register their products on the Internet Product Registration.

**Setting the USB Connection Mode**

Set the device to which the camera is connected with the USB cable.

![Image](image.jpg)

Make sure to set the USB connection mode before connecting your camera to the computer. You cannot perform the following setting if the camera is already connected to your computer with the USB cable.

1. **Turn your camera on.**
2. **Press the MENU button in **
   The [Setting] menu appears. When you press the MENU button in **
   mode, press the four-way controller ( ) once.
3. **Use the four-way controller ( ▲ ▼) to select [USB Connection].**
4. **Press the four-way controller ( ▶).**
   A pull-down menu appears.
Use the four-way controller (▲▼) to select [MSC].

Press the OK button. The setting is saved.

Press the MENU button. The camera returns to ◀ mode or ▶ mode.

Proceed to the following pages depending on your computer.
- Connecting to a Windows PC p.220
- Connecting to a Macintosh p.229

MSC and PTP

MSC (Mass Storage Class)
A general-purpose driver program that handles devices connected to the computer via USB as a memory device. Also indicates a standard for controlling USB devices with this driver.
By simply connecting a device that supports USB Mass Storage Class, you can copy, read, and write files from a computer without installing a dedicated driver.

PTP (Picture Transfer Protocol)
A protocol that allows transfer of digital images and control of digital cameras via USB, standardized as ISO 15740.
You can transfer image data between devices that support PTP without installing a device driver.

Unless otherwise specified, select MSC when connecting the Optio WS80 to your computer.
Connecting to a Windows PC

Connecting the Camera and Your Windows PC

Connect your camera to the Windows PC using the provided USB cable (I-USB7).

1. Turn your Windows PC on.
2. Turn your camera off.
3. Connect your camera to the Windows PC using the USB cable.
   Connect the terminal of the USB cable with the arrow mark facing the front side of the camera.

4. Turn your camera on.
   The “Device Detector” screen appears.
   If the “Device Detector” screen does not appear, follow the steps in “When the “Device Detector” screen does not appear” (p.222).

Memo

The self-timer lamp blinks while the camera is connected to a Windows PC.
Transferring Images
Transfer the images captured with the camera to your Windows PC.

If there is no SD Memory Card in the camera, the images stored in the built-in memory will be transferred to your Windows PC.

5 Confirm that [Acquire images from the device with ACDSee] is checked and click [OK].

6 Click [Next].

7 Select an image to copy and click [Next].

8 Specify [File names] and [Destination folder], and click [Next].
The images are copied to your Windows PC.
9 Click [Finish].
The “ACDSee for PENTAX 3.0” starts.

When the “Device Detector” screen does not appear

5 Double-click the [ACDSee for PENTAX 3.0] icon on the desktop.

6 Click [My Computer].

7 Double-click [Removable Disk].

If the SD Memory Card has a volume label, the volume label name appears instead of [Removable Disk]. A new unformatted SD Memory Card may show the manufacturer’s name or model number.
8 Double-click the [DCIM] folder.
Images are stored in folders named by the shooting date (“XXX_0808” for August 8. “XXX” is a three-digit number.). If [Standard] is selected for [Folder Name] in the [Setting] menu, a folder named “XXXPENTX” (XXX is a three-digit folder number) is displayed and images are stored here.

9 Select the folders you want to copy to the Windows PC.

10 Select [Copy To Folder...] from the [Edit] menu.
The “Copy Files” screen appears.

11 Specify the destination folder and click [OK].
The images are copied to your Windows PC.
Disconnecting the Camera from Your Windows PC

1. Double-click the [Safely Remove Hardware] icon in the task bar.
The “Safely Remove Hardware” screen appears.

2. Select [USB Mass Storage Device] and click [Stop].
The “Stop a Hardware device” screen appears.

3. Select [USB Mass Storage Device] and click [OK].
A message appears indicating that the hardware can be safely removed.

4. Click [Close].

5. Disconnect the USB cable from your Windows PC and the camera.
Connecting to a Computer

"ACDSee for PENTAX 3.0" lets you view, edit, manage, search for, share, and print images.

1. Double-click the [ACDSee for PENTAX 3.0] icon on the desktop.
   ACDSee starts and the main browser window appears.

ACDSee Browser Interface

- **A Menu bar**
  Provides access to the various menu commands.

- **B Toolbar**
  Provides quick access to frequently used tasks and functions.

* The screen shown is an example with the default settings.

**memo**
- If the camera (removable disk) is being used by an application such as "ACDSee for PENTAX 3.0", the camera cannot be disconnected until the application is closed.
- The camera will automatically switch to the playback mode when the USB cable is disconnected from your Windows PC or the camera.
C Folders pane
Displays the configuration of folders in your computer. When you browse a folder, the contents of the folder appear in the File List pane.

D Preview pane
Displays a preview of the image or media file currently selected in the File List pane. You can change the size of the preview image or play back the media file.

E File List pane
Displays the contents of the selected folder or the results of the most recent search (the file or folder that matches the search item). It is the only pane that always appears in the browser and it cannot be hidden or closed.

F Category pane
Displays a list of categories and priorities. By dragging and dropping files from the File List pane to here, you can set category and priority for files.

G Image Basket pane
Displays files selected in the File List pane. By choosing images and files and putting them in the Image Basket pane, you can use the editing and creating functions on images from different folders and categories.

H Status bar
Displays information and properties for the selected file.
Viewing Images

1 Select and click the folder containing the image you want to view in the Folders pane of the ACDSee browser.
Images are displayed in the File List pane.

2 Select and double-click the image you want to view in the File List pane.
The selected image is displayed with the viewer.
With the viewer, you can enlarge/reduce the display size of the image or edit the image. You can also play back movies or sound files.

ACDSee Quick View
The image is displayed on the “ACDSee Quick View” screen if you double-click the image file directly from the browser without starting ACDSee. (You cannot play back or display the file with ACDSee Quick View even if you double-click a movie or sound file.)
You can also enlarge/reduce the display size of the image on the “ACDSee Quick View” screen.
Click [Full Viewer] on the “ACDSee Quick View” screen to switch the display to the viewer.
Click [Photo Manager] to switch the display to the ACDSee browser.
Details on How to Use “ACDSee for PENTAX 3.0”

You can find more information on how to use “ACDSee for PENTAX 3.0” by using the help pages.

1. **Click the [?] icon at the top right of the screen.**
   The help screen appears.

2. **Double-click the desired topic.**
   The explanation is displayed.
Connecting to a Macintosh

Connecting the Camera and Your Macintosh

Connect your camera to the Macintosh using the provided USB cable (I-USB7).

1. **Turn your Macintosh on.**

2. **Turn your camera off.**

3. **Connect your camera to the Macintosh using the USB cable.**
   
   Connect the terminal of the USB cable with the arrow mark facing the front side of the camera.

4. **Turn your camera on.**

   The camera is recognized as [NO_NAME] on the desktop.

   - If the SD Memory Card has a volume label, the volume label name appears instead of [NO_NAME]. A new unformatted SD Memory Card may show the manufacturer’s name or model number.
   - The self-timer lamp blinks while the camera is connected to a Macintosh.
**Transferring Images**

Transfer the images captured with the camera to your Macintosh.

If there is no SD Memory Card in the camera, the images stored in the built-in memory will be transferred to your Macintosh.

5. **Specify a save location, make sure that [Launch ACDSee] is checked, and click [Download].**

After images are copied to your Macintosh, the “ACDSee 2 for Mac” starts.

When [Delete images from device] is checked, images are deleted from the camera after transfer is complete.

**Disconnecting the Camera from Your Macintosh**

1. **Drag [NO_NAME] on the desktop to the trash.**

   If the SD Memory Card has a volume label, drag the icon of that name to the trash.

2. **Disconnect the USB cable from your Macintosh and the camera.**

   • If the camera (removable disk) is being used by an application such as “ACDSee 2 for Mac”, the camera cannot be disconnected until the application is closed.
   • The camera will automatically switch to the playback mode when the USB cable is disconnected from your Macintosh or the camera.
Starting “ACDSee 2 for Mac”

“ACDSee 2 for Mac” lets you display and manage images.

1. Double-click the [ACDSee] folder inside the [Applications] folder.

2. Double-click the [ACDSee 2 for Mac] icon.
ACDSee starts and the main browser window appears.

ACDSee Browser Interface

A Menu bar
Provides access to the various menu commands.

B Toolbar
Provides quick access to frequently used tasks and functions.

C Folders pane
Displays the configuration of folders in your Macintosh. When you browse a folder, the contents of the folder appear in the File List pane.

D Preview pane
Displays a preview of the image or media file currently selected in the File List pane. You can change the size of the preview image or play back the media file.
E Favorites pane
You can add frequently used items (folders, etc.).

F File List pane
Displays the contents of the selected folder or the results of the most recent search (the file or folder that matches the search item). It is the only pane that always appears in the browser and it cannot be hidden or closed.

G Status bar
Displays information and properties for the selected file.

Viewing Images

1 Select and click the folder containing the image you want to view in the Folders pane of the ACDSee browser.
Images are displayed in the File List pane.

2 Select and double-click the image you want to view in the File List pane.
The selected image is displayed.
You can enlarge/reduce the display size of the image.

Details on How to Use “ACDSee 2 for Mac”

You can find more information on how to use “ACDSee 2 for Mac” by using the help pages.

1 Select [ACDSee 2 for Mac] from [Help] on the menu bar.
The help screen appears.

2 Click the desired topic.
The explanation is displayed.

<tr>
<td></td>
<td>The shooting mode is set to [f], [g] or [h]</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The flash does not discharge in these modes.</td>
<td></td>
</tr>
</tbody>
</table>

**Memo** Very occasionally, static electricity may cause camera malfunction. In this case, remove the battery and install it again. If the camera is then working properly, normal condition is restored and you can continue using the camera.
The table below lists the factory default settings. The meaning of the indications for menu items with a default setting is explained below.

**Last Memory Setting**

Yes : The current setting (last memory) is saved when the camera is turned off.

No : The setting returns to the default setting when the camera is turned off.

* : The setting depends on the [Memory] setting (p.133).

— : N/A

**Reset Setting**

Yes : The setting returns to the default setting with the Reset function (p.207).

No : The setting is saved even after reset.

— : N/A

Optional Accessories

A number of dedicated accessories are available for this camera. Products marked with an asterisk (*) are the same as those supplied with the camera.

- **Power supply**
  - Rechargeable lithium-ion battery D-LI88 (*)
  - Battery charger kit K-BC88 (*)
    (Battery charger D-BC88, AC plug cord)
  - AC adapter kit K-AC88
    (AC adapter D-AC64, DC coupler D-DC88, AC plug cord)

  The battery charger and AC plug cord are only sold as a set.

- **Cable**
  - USB cable I-USB7 (*)
  - AV cable I-AVC7 (*)

- **Strap**
  - O-ST51 (*)
  - O-ST8    Silver chain strap
  - O-ST24   Genuine leather strap
  - O-ST81   Waterproof strap

- **Camera case**
  - O-CC72
  - O-CC79
  - O-CC81

- The above figures are based on our standard shooting conditions and may vary depending on the subject, shooting conditions and type of the SD Memory Card used.
- Recording can continue until the built-in memory or the SD Memory Card is full, or the size of the recorded movie reaches 2 GB (when using an SDHC card). If recording stops at 2 GB, start recording again to continue to record the rest of the movie in blocks of 2 GB.

White Balance: Auto, Daylight, Shade, Tungsten Light, Fluorescent Light, Manual

Lens:
- Focal Length: 6.2 mm - 31 mm (approx. 35 mm - 175 mm in 35 mm equivalent focal length)
- Aperture: F3.8 (W) - F4.7 (T)
- Lens Composition: 10 elements in 8 groups (4 aspherical elements)
- Zoom Type: Electrically driven

Optical Zoom: 5x

Intelligent Zoom: Approx. 5.9x at 7M (3072×2304), Approx. 28.5x at 640 (640×480) (when combined with optical zoom)

</table>
### Built-in Flash Modes
- Auto, Flash Off, Flash On, Auto + Red-eye, Flash On + Red-eye, Soft Flash

### Flash Range
- Wide-angle: approx. 0.4 m - 3.4 m (approx. 1.31 ft - 11.15 ft) (Sensitivity: in Auto condition)
- Telephoto: approx. 0.4 m - 2.8 m (approx. 1.31 ft - 9.19 ft) (Sensitivity: in Auto condition)

### Drive Modes
- Single-frame, Self-timer (approx. 10 sec., approx. 2 sec.), Continuous, Burst Shooting, Interval Shoot

### Self-timer
- Electronic control type, control time: Approx. 10 sec., 2 sec.

### Time Function
- World Time: 75 cities (28 time zones)

#### Clock Mode
- Press and hold the **OK/DISPLAY** button when the camera is turned off to display the time (approximately 10 seconds).

#### Alarm
- At the specified time, the Clock mode screen is displayed and the alarm rings.

### Power Source
- Rechargeable lithium-ion battery D-LI88, AC adapter kit (optional)

### Battery Life
- Number of Recordable Images: approx. 200 pictures
- *Recording capacity shows approximate number of shots recorded during CIPA-compliant testing (with display on, flash used for 50% of the shots, and 23 degrees centigrade). Actual performance may vary according to operating conditions.

#### Playback Time
- approx. 240 min. *According to the result of in-house testing. Actual time may differ depending on usage conditions.

### Movie Recording Time
- approx. 70 min.

### Sound Recording Time
- approx. 270 min.

### Interfaces
- USB 2.0 (high-speed compatible) /PC/AV terminal

### Video Output
- NTSC/PAL (monaural)

### Waterproof and Dustproof Function
- Comply with JIS waterproof grade 8 and JIS dustproof grade 6 (IP68)
- Continuous underwater picture-taking possible for 2 hours at depth of 1.5 m.

### Dimensions
- Approx. 91.5 (W) × 59.5 (H) × 22 (D) mm (excluding operating or protruding parts)

### Weight
- Approx. 105 g (excluding battery and SD Memory Card)
- Approx. 125 g (including battery and SD Memory Card)

### Accessories
- Rechargeable lithium-ion battery, battery charger, AC plug cord, USB cable, AV cable, software (CD-ROM), strap, Operating Manual, Quick Guide
WARRANTY POLICY

All PENTAX cameras purchased through authorized bona fide photographic distribution channels are guaranteed against defects of material or workmanship for a period of twelve months from date of purchase. Service will be rendered, and defective parts will be replaced without cost to you within that period, provided the equipment does not show evidence of impact, sand or liquid damage, mishandling, tampering, battery or chemical corrosion, operation contrary to operating instructions, or modification by an unauthorized repair shop. The manufacturer or its authorized representatives shall not be liable for any repair or alterations except those made with its written consent and shall not be liable for damages from delay or loss of use or from other indirect or consequential damages of any kind, whether caused by defective material or workmanship or otherwise; and it is expressly agreed that the liability of the manufacturer or its representatives under all guarantees or warranties, whether expressed or implied, is strictly limited to the replacement of parts as hereinbefore provided. No refunds will be made on repairs by non-authorized PENTAX service facilities.

Procedure During 12-month Warranty Period
Any PENTAX which proves defective during the 12-month warranty period should be returned to the dealer from whom you purchased the equipment or to the manufacturer. If there is no representative of the manufacturer in your country, send the equipment to the manufacturer, with postage prepaid. In this case, it will take a considerable length of time before the equipment can be returned to you owing to the complicated customs procedures required. If the equipment is covered by warranty, repairs will be made and parts replaced free of charge, and the equipment will be returned to you upon completion of servicing. If the equipment is not covered by warranty, regular charges of the manufacturer or of its representatives will apply. Shipping charges are to be borne by the owner. If your PENTAX was purchased outside of the country where you wish to have it serviced during the warranty period, regular handling and servicing fees may be charged by the manufacturer's representatives in that country. Notwithstanding this, your PENTAX returned to the manufacturer will be serviced free of charge according to this procedure and warranty policy. In any case, however, shipping charges and customs clearance fees to be borne by the sender. To prove the date of your purchase when required, please keep the receipt or bills covering the purchase of your equipment for at least a year. Before sending your equipment for servicing, please make sure that you are sending it to the manufacturer's authorized representatives or their approved repair shops, unless you are sending it directly to the manufacturer. Always obtain a quotation for the service charge, and only after you accept the quoted service charge, instruct the service station to proceed with the servicing.
• This warranty policy does not affect the customer’s statutory rights.
• The local warranty policies available from PENTAX distributors in some countries can supersede this warranty policy. Therefore, we recommend that you review the warranty card supplied with your product at the time of purchase, or contact the PENTAX distributor in your country for more information and to receive a copy of the warranty policy.

The CE Mark is a Directive conformity mark of the European Union.
For customers in USA

STATEMENT OF FCC COMPLIANCE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not approved by the party responsible for compliance could void the user’s authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
  Increase the separation between the equipment and receiver.
  Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
* Consult the dealer or an experienced radio/TV technician for help.

For customers in Canada

This Class B digital apparatus complies with Canadian ICES-003.

Pour les utilisateurs au Canada

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

FOR CALIFORNIA, U.S.A. ONLY

Perchlorate Material-special handling may apply. The lithium battery used in this camera contains perchlorate material, which may require special handling. See www.dtsc.ca.gov/hazardouswaste/perchlorate
Declaration of Conformity
According to 47CFR, Parts 2 and 15 for
Class B Personal Computers and Peripherals

We: PENTAX Imaging Company
A Division of PENTAX of America, Inc.

Located at: 600 12th Street, Suite 300
Golden, Colorado 80401 U.S.A.
Phone: 303-799-8000 FAX: 303-790-1131

Declare under sole responsibility that the product identified herein complies with 47CFR Parts 2 and 15 of the FCC rules as a Class B digital device. Each product marketed is identical to the representative unit tested and found to be compliant with the standards. Records maintained continue to reflect the equipment being produced can be expected to be within the variation accepted, due to quantity production and testing on the statistical basis as required by 47CFR §2.909. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. The above named party is responsible for ensuring that the equipment complies with the standards of 47CFR §15.101 to §15.109.

Information for Users on Collection and Disposal of Old Equipment and Used Batteries

1. In the European Union

These symbols on the products, packaging and/or accompanying documents mean that used electrical and electronic equipments and batteries should not be mixed with general household waste.

Used electrical/electronic equipments and batteries must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of these products.

Following the implementation by member states, private households within the EU states may return their used electrical/electronic equipments and batteries to designated collection facilities free of charge*.

In some countries your local retailer may also take back your old product free of charge if you purchase a similar new one.

*Please contact your local authority for further details.

By disposing of this product correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

2. In other countries outside the EU

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

For Switzerland: Used electrical/electronic equipment can be returned free of charge to the dealer, even when you don’t purchase a new product. Further collection facilities are listed on the home page of www.swico.ch or www.sens.ch.

Note for the battery symbol (bottom two symbol examples): This symbol might be used in combination with a designation for the chemical element or compound in use. In this case you have to comply with the requirement set by the Directive for the chemicals involved.
